

CHAS GARCIA

Senior Mobile Engineer | React Native / Kotlin / Swift

chasgarciatype@gmail.com • chas-garcia.netlify.app • Atlanta, GA

Summary

Senior Mobile Engineer with over **10 years** of experience leading the design and development of cross-platform **mobile apps**, delivering secure, scalable, and compliant solutions for major health systems and startups.

- **Full-Stack Mobile Expertise:** Delivered production-ready mobile apps, balancing native performance with scalable backend architecture.
- **Healthcare-Focused Execution:** Built **HIPAA-compliant mobile platforms** integrated with **EHRs** (e.g., Epic, FHIR), lab systems, BLE medical devices, and real-time patient monitoring dashboards.
- **Startup-Driven Development:** Took mobile products from concept to app store launch in fast-paced startups, owning architecture, development, CI/CD, and third-party integrations.
- **Effective Communication & Collaboration:** Acted as a technical bridge between engineering, product, and design teams, ensuring aligned execution in both enterprise and startup environments.
- **Core Skills:** React Native, Swift, Kotlin, Java, TypeScript, Firebase, AWS Serverless, Jest, Detox, Appium

Experience

Function Health

Lead Mobile Engineer

06/2023 - 04/2025

Function Health is a health and wellness company focused on providing advanced **blood testing** and **personalized health insights**.

Skills: React, React Native, TypeScript, AWS, Redux, MobX, React Query, AsyncStorage, SQLite, Jest, Detox, Fastlane, GitHub Actions

- **Mobile App Development:** Led the development of **iOS & Android apps**, ensuring high performance, security, and scalability.
- **Compliance:** Ensured HIPAA/GDPR compliance for **secure handling of sensitive health data**.
- **Performance Optimization:** Improved app **load times by 40%** through code optimization and caching strategies.
- **API Integration:** Integrated with **third-party APIs** (lab results, EHR systems, payment gateways) and **internal health analytics platforms**.
- **Unit Testing:** Implemented and maintained **unit and end-to-end tests** using **Jest, Detox, and Appium**, achieving **80%+ code coverage** and significantly reducing regression bugs and release cycle time.
- **App Deployment:** Managed and deployed mobile applications to the **App Store** and **Google Play Store** using **CI/CD pipelines**, ensuring streamlined releases and compliance with platform guidelines.

Novant Health

Senior Mobile Engineer

10/2021 - 05/2023

A nonprofit healthcare system, operating hospitals, clinics, and telehealth services with a focus on **patient-centered care** and **community wellness**.

Technologies: React Native, Swift, SwiftUI, Kotlin, Jetpack Compose, Combine, Coroutines, Epic MyChart API, FHIR, OAuth2.0, Firebase

- **Healthcare App Development:** Led the development and maintenance of **iOS and Android apps**, ensuring high performance, security, and HIPAA compliance.
- **Telehealth Features:** **Successfully launched telehealth features**, increasing virtual visits by **40%** (critical during COVID-19).
- **Analytics Monitoring:** Monitored analytics using **Firebase** and **New Relic** to identify and resolve UX pain points, improving overall user experience.
- **API Integration:** Integrated **third-party APIs** (e.g., Epic MyChart, payment gateways, push notifications).
- **Accessibility & Compatibility:** Ensured compliance with WCAG standards and maintained cross-device compatibility to provide an inclusive and seamless user experience.
- **CI/CD Implementation:** Implemented **CI/CD pipelines** using **Fastlane** and **GitHub Actions** for automated testing and seamless deployment, streamlining the development process.

Experience

Kangaroo Healthcare

Full Stack Mobile Developer

02/2019 - 09/2021

Kangaroo Healthcare is a **digital health company** specializing in **remote patient monitoring** and **chronic care management**, offering **AI-powered, FDA-cleared devices** and **software** to help healthcare providers track vital signs **remotely**.

Technologies: React Native, React, Redux, React Native Paper, Lottie, React Native BLE PLX, Node.js, RESTful APIs, PostgreSQL

- **Mobile App Development:** Enhanced user engagement **by 30%** through leading the development of Kangaroo Health's cross-platform mobile app.
- **BLE Integration:** Designed Bluetooth Low Energy (BLE) integration with Kangaroo's FDA-cleared medical devices, including glucose monitors and BP cuffs, to enable seamless data transfer.
- **Dashboard Development:** Built real-time dashboards for tracking **vital signs** (blood pressure, SpO2, glucose) using **chart libraries** like **Victory**, **Chart.js**, and **D3.js** to visualize patient data.
- **API Development:** Developed **RESTful APIs** using **Node.js** to securely sync vital signs data from medical devices to Electronic Health Records (**EHRs**), ensuring seamless integration and real-time data transfer for healthcare providers.
- **AI Integration:** Integrated Python-based ML models for **AI-driven alerting systems** to flag abnormal vital signs, enabling clinicians to quickly identify and respond to critical health conditions.
- **Automated CI/CD Pipelines:** Implemented and maintained zero-downtime deployments using **GitHub Actions** and **Bitrise**.

Allina Health

Mobile Software Engineer

05/2017 - 01/2019

Allina Health is a nonprofit healthcare system, operating 12+ hospitals and 90+ clinics, focused on **integrated care**, **innovation**, and **community health** through digital tools like its patient-facing mobile app.

Technologies: Swift, Kotlin, Jetpack Compose, HL7 Standards, Zoom SDK, WebRTC, Firebase Cloud Messaging, Fastlane, GitHub Actions, Sentry, Google Analytics

- **Mobile App Development:** Developed and maintained the **iOS (Swift)** and **Android (Kotlin)** apps.
- **Epic FHIR API Integration:** Integrated **Epic FHIR APIs** to enable seamless access to Electronic Health Records (**EHR**) data, ensuring **secure and efficient data exchange** between healthcare systems.
- **Telehealth Feature Development:** Built and integrated telehealth features using **WebRTC** and **Zoom SDK**, enabling secure **video consultations** and **real-time communication** within the application.
- **Bluetooth/Wearable Integration Optimization:** Optimized integration with **Bluetooth** and **wearable devices**, including Apple Health and Fitbit, to ensure accurate data synchronization and seamless user experience across health tracking platforms.
- **HIPAA Compliance Assurance:** Ensured **HIPAA compliance** by implementing **robust encryption protocols** and maintaining detailed **audit logs** to protect patient data and meet regulatory standards.
- **App Crash Reduction:** Reduced app crashes **by 30%** through the implementation of error monitoring tools like **Sentry** and **Firebase**, enabling proactive issue detection and faster resolution.

CVS Health

Frontend Developer

02/2016 - 04/2017

CVS Health is a leading American **healthcare** company operating 9,000+ retail pharmacies, 1,100+ MinuteClinics, and a top-tier PBM (Caremark), offering integrated health services via digital tools like its flagship CVS Pharmacy app.

- Built and maintained key features in the **CVS Pharmacy app** (iOS/Swift, Android/Kotlin).
- Connected app to **CVS enterprise APIs** for real-time Rx status, inventory checks, and Caremark (PBM) insurance data.
- Optimized **barcode scanning** for mobile coupons using ML Kit/CameraX.
- Ensured **HIPAA/PII compliance** for health data (encryption, role-based access).
- Reduced app launch time by **40%** by optimizing asset loading and modularizing code.

Experience

Parking Mobility

Junior Mobile Developer

04/2014 - 01/2016

Parking Mobility is an app designed to help people with disabilities by making sure accessible parking spaces are available when they need them.

- Enhanced app user engagement **by 25%** by developing **iOS** and **Android** features for **disability parking enforcement**.
- Increased **user compliance by 30%** through developing a **real-time reporting feature** for improperly parked vehicles.
- Implemented **camera integration** for photo-based parking violation submissions.
- Collaborated with designers to enhance accessibility (**WCAG compliance**) for users with disabilities.
- Integrated the app with **Firebase** for **real-time data storage** and **synchronization**.

Skills

Languages & Scripts: JavaScript · ES6/ES6+ · HTML5 · CSS3 · TypeScript · SQL · Bootstrap

Mobile Development: React Native · React.js · Swift · Objective-C · Java · Kotlin · Flutter · Ionic · Xamarin · Xcode

UI Libraries: React Native Paper · NativeBase · UI Kitten · React Native Elements · Magnus UI · React Native Maps · Lottie

Backend Development: Node.js · RESTful APIs · GraphQL · tRPC · Firebase · AWS Serverless · Docker · Kubernetes

Test-Driven Development: Jest · Detox · React-Testing · Mock Server Worker · Supertest · CircleCI · GitHub Actions

Database Technologies: Firebase Firestore · MySQL · PostgreSQL · MongoDB · SQLite · Redis · Elasticsearch · DynamoDB

Debugging & Monitoring:

SonarQube · Sentry · Datadog · Redux Dev Tools · PDB · Git · SEO · Object Oriented Programming · Gulp · Functional Programming · Webpack · Asynchronous Programming

Soft Skills:

Communication · Problem-Solving · Teamwork · Time Management · Attention to Detail · Continuous Learning · Critical Thinking · Adaptability · Creativity

Education

Holy Names University

Oakland, CA

Bachelor of Computer Science

2010 - 2013
