WORK EXPERIENCE

Mermaid Trap, LLC

Analyst, Generalist

Sarasota, FL

July '23 – Present

- Manage P&L and FP&A for a \$3.1M revenue restaurant business previously owned by my family
- Led operational restructuring focused on pricing strategy and technology modernization, driving +173% EBITDA growth
- Structured the sale of the operating business through a private credit transaction that included acquisition and working capital financing; retained real estate ownership and secured a long-term lease with the new owners
- Developed internal tools (iOS/Web) using Django, Postgres, and AWS to automate invoice parsing and inventory tracking

Washington University Investment Management Company

Investment Data & Systems Analyst

St. Louis, MO

March '22 – July '23

- Partnered directly with the CTO to manage and optimize data infrastructure and analytics systems supporting the university's endowment investment program (\$13B AUM)
- Developed analytics dashboards and internal tools using Python, SQL (Snowflake), Tableau, GitLab, and AWS to support investment research, portfolio management, and the data engineering lifecycle
- Performed detailed performance measurement and attribution analyses across the endowment's portfolio of direct investments and external fund managers, spanning global equities, absolute return, private equity, venture capital, and real assets
- Prepared GIPS-compliant quarterly investment reviews highlighting performance metrics, exposures, and liquidity profiles
- Engaged investment team to define user requirements, gather precise specifications, and deliver customized analytics solutions to meet diverse investment management needs

Energizer Holdings, Inc.

Senior Pricing Analyst, Trade & Price Strategy

St. Louis, MO

August '21 – March '22

- Partnered with Commercial, Finance, Trade Marketing, and Category teams to drive strategic pricing improvements and assortment optimization across North American household battery and auto categories
- Modeled B2B price elasticity using regression analysis with Python (statsmodels) to quantify customer sensitivity and inform pricing strategy amid inflationary headwinds

Lockheed Martin, Missiles & Fire Control

Multi-functional Finance Analyst, Production Operations

Ocala, FL

September '19 – January '21

- Managed a \$38M overhead budget across 15+ tactical missile and fire control programs, optimizing labor and indirect costs through detailed FP&A modeling and variance analysis
- Partnered with senior engineering leadership to develop departmental budgets and authorize \$14M+ in capital expenditures across Production, Facilities, Technical, Environmental, and Quality Assurance operations
- Evaluated asset depreciation and scrap potential to improve lifecycle management and inform investment planning

ITC Defense Corporation

Lead Research Analyst, Manager

Gainesville, FL

February '15 – July '19

- Provided program and administrative support for the delivery of an Armory and Fuel Management System (AFMS) to the Kuwait Ministry of Defense, including training, installation, and ongoing maintenance under FMS Case KU-B-UML
- Promoted twice to lead a 10-person team conducting research and proposal development for global defense programs
