

Craig Blafer

Senior Software Engineer & Architect

OBJECTIVE

A craftsman solving challenges with supportable solutions. Backed by a Master of Science and 25+ years of experience managing teams, architecture, applications, for statements, and databases. I understand how to build profitable, sustainable applications. I am looking to deliver solutions in a HYBRID environment. Sales Channel, Retail, Fintech, Medtech, Insurance, Mortgage, and Engineering.

EXPERIENCE

Sr. Software Engineer (Contract)

April 2025 – Current

Covius Corporation

Remote

- Spearheaded a full-stack AI heavy product rewrite for loss mitigation in the mortgage industry, enhancing workflow automation and document processing. Utilized Blazor, Telerik UI components, Azure services, Entity Framework, and SQL Server to deliver scalable and maintainable solutions. Development leveraged Copilot for efficient code generation.
- Architected and implemented secure authentication and single sign-on (SSO) for the application by integrating with Azure AD and Azure B2C, ensuring robust security and a seamless user experience for both employees and external partners.
- **Tech Stack: C#, Blazor Server, SQL, EF**

Sr. Software Engineer / Manager

Sept 2023 – Jan 2025

Rheem Manufacturing

Atlanta, GA

- Led the complete modernization of **MyRheem.com**, a mission-critical platform serving AC and water heater distributors and contractors. Oversaw a portfolio of **1,500+ applications** and **2,000+ REST APIs** supporting sales channels, promotions, warranties, and analytics.
- Directed a **12-member engineering team** through a full product rewrite, driving initiatives in **microservices architecture**, **GraphQL migration**, **API management (API-M)**, and **UX redesign** using .NET Core and Blazor.
- Managed a **support team of 18** maintaining legacy systems using **Agile Kanban**, ensuring continuity and stability during transition.
- Defined and implemented technical requirements, system architecture, and development workflows. Championed automation of manual processes, resulting in improved operational efficiency and reduced support overhead.
- Job includes architecture, team management, Scrum mastering, coordination with business, product evangelizing, decomposing stories into tasks, and documentation: work tracking, Release notes, standards, install guide, release processing.

- Acted as **Scrum Master and Product Evangelist**, facilitating cross-functional collaboration between engineering, business stakeholders, and product teams.
- Authored and maintained comprehensive documentation including release notes, standards, installation guides, and deployment procedures.
- Successfully presented and defended architectural decisions in **EY ARB2** review board.
- **Tech Stack:** C#, SQL Server, .NET Core (v8), Blazor Wasm, Swagger, Postman, HTML, jQuery, GraphQL, Microservices, API-M, Playwright, Entity Framework, ADO.NET, Azure DevOps, Agile, JSON
- **Design Patterns:** Builder, Factory, Adapter, Iterator, State, Strategy, Façade, Decorator

Sr. Software Engineer

July 2022 - Sep 2023

Institute of Nuclear Power Operators

Atlanta, GA

- Led team of 5 in enhancing software to regulate nuclear plant access and personnel. Converted SOAP to REST API. Modernized plant auditing system that is used to gather and organize auditing visits. Added employee loan & split loan to HR system. Created development wiki and numerous KT guides. Mentored 2 new hires.
- **Tech Stack:** C#, SQL, Angular, WPF, VB.Net, Swagger, Postman, ElasticSearch, Json, JQuery, Ajax, EntityFramework, Git, TFS, BeyondTrust, Agile, .Net Core, Rest, Soap, Azure DevOps to enable CI/CD, & Telerik/Kendo UI.
- **Design Patterns:** Factory, Observer, Strategy, & Chain of Responsibility.

Sr. Software Engineer

July 2014 - July 2022

Jack Henry & Associates

Atlanta, GA

- Engineered a high-throughput analytics system that processed **1+ TB of daily risk messages**, identifying anomalous events to enhance **bank security and fraud detection**.
- Boosted system performance by **50%** and significantly reduced bug reports through targeted optimization and refactoring.
- Led an **8-person development team** to build a robust reporting platform, delivering **100+ dashboards** that surfaced actionable security insights across financial institutions.
- Designed and optimized high-performance database systems using both MS SQL Server (T-SQL) and Oracle (PL/SQL) to handle the 1+ TB daily data load for analytics and reporting, ensuring data integrity and efficiency.
- Actively contributed to the **JHA Agile Advisory Board**, mentoring **8 junior developers** and launching a company-wide **Lunch & Learn program** to foster continuous learning.
- **Tech Stack:** C#, SQL Server, ASP.NET MVC, .NET Core 6, JavaScript, Ajax, SSRS, Redgate, RabbitMQ, MSMQ, ElasticSearch, Serilog, Python, R, Azure DevOps, Jira, Telerik/Kendo UI
- **Methodologies:** Agile, Scrum, Kanban, Lean, TDD, BDD, OOD
- **Security & Compliance:** Whitesource (Mend), Veracode, SonarQube
- **Testing Tools:** Moq, Fakes, Selenium, Azure Pipelines
- **Design Patterns:** Factory, Observer, Strategy, Adapter, Chain of Responsibility (CoR)

Sr. Software Engineer

Daugherty Business Associates

July 2013 – July 2014

Atlanta, GA

**Sr . AzureDeveloper
2013**

Access Insurance

June 2011 – July

Atlanta, GA

Software Contractor

McKesson/Aaron Rents/Scientific Games

Oct 2007 – June 2011

Atlanta, GA

Sr. Software Architect

NCR

Oct 1997 – Oct 2007

Atlanta, GA

- Clinched Yum! Brands sale by creating Table Service & Delivery modules for Fast-food POS. Specialty in Inventory, Scheduling, and Payroll management.
- **Tech Stack:** C#, C++, Sql, VB.net, Winforms, Asp.Net, & ScrumMaster.
- Led development of **Table Service and Delivery modules** for fast-food POS systems, directly contributing to the successful **sale to Yum! Brands**.
- Specialized in **Inventory, Scheduling, and Payroll management**, streamlining operations across multiple restaurant locations.
- Developed and maintained custom web parts and solutions for internal SharePoint 2013 portals using the Client-Side Object Model (CSOM/JSOM) and JavaScript to enhance user interaction and automate business processes for project teams.
- Delivered scalable solutions that improved order accuracy, reduced wait times, and enhanced employee scheduling efficiency.
- Collaborated cross-functionally with product and QA teams to ensure seamless deployment and client satisfaction.
- **Tech Stack:** C#, C++, VB.NET, SQL Server, WinForms, ASP.NET
- **Methodologies:** Agile, Scrum (Certified ScrumMaster)

EDUCATION**Masters in Math/Computer Science**

Atlanta, GA

Georgia State University

Thesis: Human factors/ User interfaces

Bachelors in Math/Comp Sci/English

Atlanta, GA

Emory University**PATENT****Store Management Dashboard (2005)**

Allowed QSR managers to view restaurant status at a glance and drill down as needed.

Industries

Financial (Fintech)	Nuclear Industry (Science)	Medical (Medtech)	Insurance	Http/Https
Supply Chain	Healthcare	Retail	SaaS	Restaurant
Education	Energy	CRM	Mortgage	

Roles

Developer	Team Lead	Project Management	Design	Full Stack
Architecture	Business Analysis	Documentation	Project Lead	Architect
UI/UX	Team Lead	Web Services	Deployment	Security
Prompt Engineering	Management	Lead	Code Review	AI Prompt Generator

Languages

C#	C++	JQuery	Java	MVC
Jscript	JavaScript	Python	Typescript	Fortran
WPF	NPM	YAML	XML	LINQ

Databases

SQL Service	Entity Framework (EF)	Elastic Search	Redgate	T-Sql
ORM	Postgress (PostgreSQL)	NoSQL		

Testing

TDD	Automated Testing	Selenium	Playwright	Moq	Fakes
Fakes	nUnit	msTest			

UI/UX

Telerik	HTML	Css	Angular	Ajax	Bootstrap
Rest	.Net Zero	Telerik for Blazor			

Skills

Agile	Kanban	Razor	Restful API	AI Prompting	Copilot
.Net Core v4.8	API-M	SSIS	Spa	.Net	
\CoreWinforms	ADO	WCF	OOD	BDD	DDD
Web Services	Azure Dev Ops	CMMi	Git	Jira	S3
Msmq	RabbitMq	Subversion	Confluence	SVN	CI/CD
