Professional Summary

A seasoned Front End Development Director and technical leader with 20 years of experience building performant and accessible web interfaces. I excel at mentoring teams and defining technical visions, with a proven history of shipping enterprise-scale solutions using Vue, React, and modern web fundamentals. I am a frequent international conference speaker, sharing my expertise on topics like WCAG accessibility and web performance.

Skills & Technologies

- **Front End Core:** HTML, CSS, JavaScript
- **JavaScript Frameworks & Libraries:** Vue, React, Svelte, Node.js, Chart.js
- **Development Workflow:** Git, Vite, Gulp, Grunt, npm, Yarn, Storybook, Sass/SCSS, Composer
- **Backend & Templating:** PHP, Twig, Swig, .NET, Razor, Pug
- **Content Management Systems (CMS):** Craft, WordPress, Drupal, Kirby, Ghost, Directus, Cockpit, 11ty, Jekyll, Concrete CMS
- **Design & Visual Tools:** Figma, Adobe Photoshop, Adobe Illustrator, Adobe XD, Affinity Photo, Affinity Designer, reveal.js, Lottie
- **Analytics & Performance:** Matomo, Lighthouse, Google Analytics
- **Cloud & Deployment Services:** Firebase, Heroku, cPanel, GitHub Actions, GitHub Pages, DNS
- **Productivity Tools:** Google Workspace (Docs, Sheets, Slides), Microsoft Office (Word, Excel)
- **Professional Skills:** Mentoring, Public Speaking, Slide Deck Presentation Creation, Interdepartmental Collaboration, Problem-Solving, Proposal Creation, WCAG Accessibility

Professional Experience

Front End Development Director (Promoted from Front End Lead) | Savas Labs | Feb 2022 – June 2025

- Shipped over a dozen projects directly while enabling the team to ship an additional 20, using robust CMS websites and bespoke applications built with Vue/Vite and React.
- Mentored and directed the front-end team, teaching new coding methodologies and fostering collaborative problem-solving to boost their growth and output.
- Boosted code quality and team learning by conducting comprehensive pull request reviews that identified opportunities for future enhancements.
- Served as a key client liaison, expertly synthesizing prospective client needs into detailed work orders and solution pitches.
- Orchestrated seamless collaboration with design and project management teams, ensuring technical feasibility and adherence to critical standards.
- Authored and implemented Standard Operating Procedures (SOPs), including custom GitHub Actions, to enhance team efficiency and code consistency.
- Built and documented a comprehensive component library with Storybook.

Development Lead | Token of Trust | June 2021 – February 2022

- Developed a comprehensive, new client dashboard and component library from scratch using Vue and Swig.
- Designed and implemented diverse views for critical business functions, including reporting and user management, prioritizing based on stakeholder needs.
- Created user interfaces for internal identity verification specialists, streamlining human verification workflows.
- Built intuitive end-user interfaces for identity verification, accounting for varied workflows.
- Refactored and enhanced a proprietary WordPress plugin, improving both the end-user experience and the administrative interface.
- Managed project scope and task distribution for a lean three-person development team while actively mentoring a junior front-end developer.

Lead Developer | Red Circle | March 2014 – June 2021

- Supervised and executed front-end development for over 18 public-facing client websites, utilizing CMS platforms including Concrete CMS, WordPress, Craft, and Kirby.
- Collaborated closely with design teams to translate visual concepts into web-ready formats and optimize for digital presentation.
- Engineered accessible and performant web solutions, prioritizing WCAG guidelines and optimizing for low-bandwidth connections.
- Developed bespoke native applications using Cordova to meet specific client requirements.
- Directed the complete front-end overhaul of a core .NET-backed software platform, translating provided design assets into new Razor-rendered views.
- Integrated Google Maps API to visualize customer acquisition spend versus profitability.
- Implemented a Vue-based, touch-screen enabled monitoring software platform for large-scale entertainment operations.

Contracting Developer | Robert Half Technology | August 2013 – March 2014

- Deployed as a trusted problem-solver and consultant to diverse organizations, delivering specialized web and application solutions.
- Developed and documented a comprehensive Sass-driven component system for a General Mills recipe collection site, proactively resolving critical design flaws.
- Created a visually digestible component library from varied source materials for a health insurance client.
- Engineered a custom internal iPad application for US Bank using Cordova (HTML, CSS, vanilla JS) for HR, facilitating structured candidate interviews.
- Transformed designer concepts into scalable UI components and prototypes for a large-scale health insurance intranet.

Speaking Engagements

Frequent international speaker at over 50 conferences, delivering talks, workshops, and keynotes on:

- Practical accessibility (WCAG AA compliance) via incremental improvements.
- Advanced CSS layout with Grid & Flexbox for responsive challenges.
- Modern CSS capabilities and best practices.
- Progressive Web Apps (PWAs): Implementing offline, push notifications, and local install.
- Website performance optimization: Key wins including image optimization to reduce bounce rates.

Locations & International Reach

- Presented across multiple continents in cities including: Portland, Brooklyn, Kansas City, San Diego, Wisconsin Dells, Calgary, Minneapolis/St. Paul, Atlanta, Cincinnati, St. Louis, Louisville, Stockholm, Copenhagen, Antwerp, Oslo, Melbourne, London, Málaga, Łódź, Porto, Vilnius, Bucharest, Sydney, Amsterdam, and Kyiv.

PubConf Performances

- Regularly performed in, won, and occasionally hosted PubConf, a tech comedy live show (often an after-party for attached conferences), demonstrating quick-witted, tech-themed humor and engaging presentation skills across various cities.
