

David Castro Fernandez

Network Consulting Engineer

Summary

Network Consulting Engineer with over 10 years of experience, but also versed in the design and deployment of simple to complex enterprise solutions involving other brands such as Cisco, VMWare, Microsoft, Citrix, SASE technologies, etc.

Versed on Datacenter Technologies, Switching, Routing, Firewalls, load balancers, Security:

- Network Engineering Consulting,
- Design & Deployment, Architecting
- Technical leader (Security, Data center, Routing & Switching, load balancers)
- Training, Mentoring.
- Network Support Engineer
- Technical Support Engineer.
- Design, implementation, maintenance, optimization and troubleshooting of networks (mostly based on Cisco Systems), such as banks, hospitals and government sector.
- Result-oriented, responsible, pro-active, excellent time management skills.
- Very organized person, self-student, problem analyzing skills and ability to adapt to high volumes of work when demanded by customers and projects.

Current Certifications:

Cisco CCNP Data Center
Cisco CCNP Routing & Switching
Cisco CCNP Security
Cisco CCNA Data Center
Amazon AWS Solutions architect
Palo Alto PCNSE
Checkpoint CCSA R.80
Citrix CC-SDWAN
Cisco Sourcefire Certified Professional
ITILv3 Foundations

Experience

Network Engineering Architect

TTEC –April 2022 to Present

Principal Network Engineer

TTEC – May 2019 to April 2022

TTEC is a public cloud provider of Data Center services such as computing, Data center networking, unified communications, applications, virtualization and known as (IaaS, SaaS, WCCE provider). My current role is technical leader “Principal Network engineer” within the CPT (Cloud Provisioning Team), where my role has the following tasks:

- Meet with the new customer/potential new customer and work towards those needs/ get to know the customer environment and design a proper way for them to integrate to us.
- Design/Implement/Integrate new deployments for new customers within the cloud environment, (in all the regions data centers)
- Deployments/Implement/Design on ACI (EPGs, BDs, VRFs, L3OUTs/L2OUTs, VMM, physical domain, AEPs, transit tenants, contracts)
- Design/Implement SDWAN VPNs using Viptela(vmanage), for communication between Data centers and integrating customer branches. (OMP, VPN interfaces, IPSec, OSPF, BGP). Add new vedges to the sdwan fabric.
- Deploy/Implement/Support legacy network devices Nexus family (N7K, N5K, N2K), and UCS with Fabric interconnect environments.
- Lead network, data center and security projects related to provision new environment for a customer or existing customers.
- Deploy/ Implement/Support Netscalers (DMZ or internal) LTM, GSLB, content switching, reverse proxy and so on.
- Deployment of virtual network/Firewalls/Broker devices (ASAvs, CSRvs, vedges, Zscaler ZPAs)
- Design/Integrate/Implement Zscaler ZPAs, and the necessary configurations on the portal.
- Deploy/Implement vmware vcenter/ESXi server with the infrastructure team, DVS deployment for centralize network within vcenter.
- Configure layer 2 disjoint interfaces (vNIC templates) port channels on UCSM, LAN connectivity template, server profiles.
- Turnup MPLS circuits on WAN routers with multi-tenant environments (BGP VPNv4 VRF aware) or install customer manage gear including SD-WAN v-edge devices.
- Deploy FTDs, Palo Alto's and checkpoint solutions for whichever type of design required.

- Create high level and low level documentation on the network from diagrams, solution documents, HLD and LLD.
- Meet with Enterprise architecture on new network designs/ New integrations/Features, work on deploying this on the LAB and move to production based on results.

Senior Network Consultant Engineer

SPC Internacional July 2017 – May 2019

SPC Internacional is a Cisco, Citrix and VMware partner that provides Data Center, network and virtualization solutions. Currently I work as a Senior Network Consultant engineer and as this position, I am currently responsible for the following:

- Lead projects: new network design or an existing network design migration.
- Deploy network projects related to network routing & switching such as: deploying new/replacing/migrating campus switches (access, aggregation, core) same with data center new FEX, new aggregation switches, or Core switches, catalyst to Nexus migration or Nexus migration to move ACI.
- Maintenance of network devices, upgrades, and replace of an entire device (RMA).
- Implement network security (ASAs, FTD, Palo Alto appliances)

Security and Network technical leader

Hewlett Packard August 2015 – Jun 2017

Started working the network Team, where I was in charged of implement several network changes and involve within projects, some of the tasks and appliances I worked with:

- Implement, maintain and troubleshoot network and Security appliances
- Work on Cisco nexus Switches N7K, N9K, N5ks Nexus (VDC, vPC, SVIs, and so on).
- Work on Cisco Switches 4500X, 3750/3850/3650/2960 Series, HP Comware switches.
- Work on F5 LTM, DNS,
- Work on Check Point appliances, ASAs NGFW.
- Work on Escalations of team members
- Provide training and KT's to team members.
- Update network diagrams or in charge or creating them.
- Document projects or changes.

Network Engineer

Cisco – Sykes Mar 2013 – Jul 2015

I worked at the Cisco Technical Assistance Center, within the VPN and security department, providing support with the latest features and new appliances. I used to have a backlog with cases with different severity, I was an active user in the techzone.cisco.com support site where there are users cooperating on high technical issues on Tech zone (Cisco Interim website). Some of the features and appliances I provided support to:

- Provide support with the ASAs NGFW, IDS or IPS modules or appliances
- Provide solution on issues related to: NAT, Multiple context, ACLs, routing, internal issues(bugs), ZBF, MPF.
- IPSec IKEv1 and IKEv2(Site to Site, DMVPN, GRE, AnyConnect, WebVPN, VPN Client IPSec, PPTP on router, L2TP on ASA or routers ISR or ASR)
- AAA LDAP, Radius, TACACS+, SDI, Token, certificate authentication, SSL Certificates
- Created Case reviews for other CSEs (Engineers) Etc..

Technical Support Engineer

Teleperformance - Set 2012 – Feb 2013

Provide technical support to Windows Server, windows XP, windows 7, windows 8 operating systems to end users and Corporate users from the world, provide technical support for issues related with virtualization, Network issues (NICs such teaming), compatibility, virus, performance, information recovery, accompany customers with maintenance tasks, repair usual issues with the Microsoft OS, review and analyze captures of traffic TCP or UDP to see if everything is working properly, provide guides for creating Map drives, basic scripting.

Accomplishments included below:

- Enhanced technical support skills
- Educate the customers on the problems with the computers or Servers. Access by a remote access tool to the customer's computer and start some listed steps to find out the problems and then repair the issue and let the PC completely secure.
- Enhanced multitasking skills.
- Programming skills (Scripting)
- Use automated tools and manual tool as well.

Network Support Engineer

Universidad de San José - Jan 2011 – Aug 2018

Network engineer in charged of supporting services such as switching, routing

Accomplishments include and the usual day to day tasks:

- Set up different Cisco devices (Router (ISR2800/2900, Linksys for Small offices), Firewall (ASAs), and switches such 3750, 3500, and 2960.
- Recreated lab environments
- Configured VLANs for L2 and SVIs as the default gateways and Routing (OSPF) and BGP against the Service provider.
- Provide troubleshooting to any issues in the platform.
- Resolved End user issues (Computers, programs).
- Created action plans and explain users how to use certain tools.
