
Product-minded frontend engineer with over five years of experience, driven by a passion for building great products, customer obsession, and mastering innovative technologies.

Skills

Frontend - React.js, Angular, JavaScript, TypeScript, React Three Fiber, Three.js, HTML, CSS, GLTF, Svelte, JQuery.

Backend - Python, AWS, Node.js, Jinja, Express.js, Django, Flask, C++, C#.

Databases - SQL, NoSQL, Graph, PostgreSQL, MySQL, MongoDB, AWS RDS, AWS DynamoDB, AWS S3 Buckets, Neo4J.

Tools - Git, Figma, Excelsior, Invision, Jira, Trello, Salesforce, Blender, GitHub, BitBucket, GitLab, Docker, PowerOn, Bash.

EXPERIENCE

DocMe360, Remote – Front End Engineer | March 2025 - Present

- Supporting the public launch of Ask VA 2.0, a government platform serving over 18 million users.
- Built the proof-of-concept for an AI-driven tool that summarizes patient clinical records into concise, two-paragraph summaries to enhance user comprehension and case triage.
- Contributed to front-end development tasks, improving performance, accessibility, and user experience in alignment with federal standards.
- Collaborated with cross-functional teams to deliver secure, scalable, and human-centered digital solutions.

Lvt8 Technologies, Remote – Founder, Software Engineer, Freelancer | February 2019 - October 2024

- Developed and marketed multiple prototypes across various industries, including an event space configuration platform; an eCommerce platform; a restaurant ordering platform; a high-end jewelry eCommerce portal
- Utilized advanced 3D rendering technologies (React Three Fiber, Three.js) and 3D modeling tools (Blender) to create interactive user experiences.
- Managed full-stack development, deploying applications on AWS and handling data storage with MongoDB.
- Built REST API endpoints for a social network app encouraging college students to collaborate academically.
- Built a web app for a retail store to help manage a growing waitlist for exclusive products.
- Developed ERD models, designed wireframes, and deployed apps via Heroku.

Q2 eBanking, Austin, TX – Software Engineer, Frontend Project Lead | March 2021 - May 2024

- Led four projects from planning through development to client implementation and maintenance resulting in \$7 million in recurring annual revenue.
- Enhanced security, streamlining UX, and adding multilingual support of applications.
- Improved form accessibility, customizability, and performance from prior versions.
- Solved issues of large data calls by implementing various internal tools and APIs to the architecture.
- Accelerated the debugging process by creating a tool to combine client-side logs and server-side logs.
- Improving knowledge-share of engineers by hosting monthly, company-wide meetings on client-side applications.
- Created formalized release process and announcement protocols.

Kapsch TrafficCom, Austin, TX – Software Engineer, Front End | June 2020 - December 2020

- Updated and added functionality to an in-house tool that builds servers for new projects.
- Completed ticketed assignments for projects built in Angular while verifying diagnoses, solving bugs, adding features, and communicating to teammates on progress, obstacles, and expected deadlines.

EDUCATION

University of Colorado - Boulder – Masters in Computer Science | Starting Fall 2025
