

ADEKUNLE OGUNSINA

Azure Solutions Architect/Cloud Engineer

Fort Worth, TX

7137540909

adeogunsina@yahoo.com

SUMMARY OF QUALIFICATIONS

Versatile Enterprise and IT engineer with over 12 years of IT experience. Skilled in Cloud Computing Information management, application development, & virtualization. Knowledgeable in Windows Server Administration, Automation, Analytics, IT Service Management, and Customer Support built across Healthcare, Telecommunication & Financial Industry. Experience in leading teams on complex projects from conception to completion, expert knowledge of cloud computing technologies and services, including Azure, SaaS, IaaS, PaaS, and microservices. Skilled in working with stakeholder groups and translating their business requirements into effective solutions. In-depth understanding of security and compliance, DevOps best practices, Application delivery, Data protection, Automation, and Configuration Management in Azure platforms.

TECHNICAL SKILLS

- | | | |
|------------------------------|----------------------------------|------------------------------------|
| • Azure Cloud Infrastructure | • Windows/Linux/VMs | • GitHub/Bitbucket |
| • IaaS/PaaS/SaaS | • Confluence/Jira | • Azure Backup and Recovery |
| • Python/Javascript | • Azure Template Language | • Strategic Planning/Documentation |
| • Azure Platform Services | • Terraform/ARM Templates | • Jenkins/Azure Devops |
| • Lean/Agile/Waterfall | • MS Office 365 Cloud Specialist | • Cloud Migration |
| • CICD/SDLC | • Azure AD and Group Policy | • Docker/Kubernetes |

PROFESSIONAL EXPERIENCES

SR. AZURE SOLUTIONS ARCHITECT

Clinton Health Access Initiative (Rochester, New York)

Nov 2021 Till Date

- Evaluate and optimize cloud infrastructure for performance, cost-efficiency, and high availability while maintaining Azure security and governance best practices.

- Led the integration of an Epic-based EHR system with Azure to enable real-time analytics and secure data sharing.
- Lead and execute the end-to-end migration process, including data center consolidation, re-platforming, rehosting, and application modernization to cloud-native solutions,
- Experience in developing and integrating Azure platform into various types of external systems, recommending approaches and technology for standardization.
- Serve as subject matter expert responsible for performing all aspects of SCCM planning, setup, deployment, and maintenance.
- Manage confidential user account information following established security policies and procedures.
- Build reusable assets and solutions for future business problems and create resolutions.
- Create detailed technical documentation, architectural diagrams, migration, and operational guides in Confluence.
- Design scalable, secure, and cost-effective Azure architectures that align with industry best practices covering IaaS, PaaS, and SaaS solutions.
- Build and implement architecture roadmaps for scalability, resilience, and availability.
- Participate in network engineering solutions including DNS, Active Directory, firewalls, and load balancers.
- Manage Azure health data services to centralize and analyze patient data securely, ensuring compliance with HIPAA and HITRUST.

AZURE INFRASTRUCTURE ARCHITECT

ACXIOM LLC (CONWAY, ARKANSAS)

NOV 2018 – OCT 2021

- Designed and deployed secure, scalable, and resilient Azure cloud infrastructure following Microsoft Cloud Adoption Framework and Azure Well-Architected Framework best practices.
- Architected advanced network topologies including Azure Virtual Networks (VNet), VPN Gateway, Application Gateway, Azure Firewall, and hybrid connectivity via ExpressRoute.
- Developed standardized cloud environments using **Terraform**, **Azure Bicep**, and **ARM templates** for full infrastructure automation (IaC).
- Led cloud migration initiatives using Azure Migrate, Azure Site Recovery, and Database Migration Services, reducing downtime and increasing operational efficiency.
- Designed and implemented Azure Landing Zones with integrated governance (Management Groups, Azure Policy, Blueprints) to support secure, scalable, and compliant cloud adoption.
- Automated deployment and configuration of Azure resources using **Azure DevOps Pipelines**, integrating Infrastructure as Code (IaC), validation, and release orchestration.
- Architected high availability and disaster recovery strategies utilizing Availability Zones, Load Balancers, Azure Backup, and Azure Site Recovery.
- Integrated monitoring and alerting frameworks using Azure Monitor, Log Analytics, Application Insights, and Event Grid for end-to-end observability.
- Implemented Azure Key Vault, Managed Identities, and RBAC (Role-Based Access Control) to enhance cloud security and manage secrets securely across environments.

- Optimized cloud spend by designing scalable architectures with Autoscaling Groups, Reservations, and Azure Cost Management.
- Deployed containerized applications with Azure Kubernetes Service (AKS) and managed microservices deployments alongside Infrastructure.
- Enhanced DevOps processes by integrating security scanning (SonarQube, Snyk) and artifact management into CI/CD pipelines using Azure DevOps.
- Provided architectural leadership and mentorship to cross-functional teams on cloud-native design patterns, serverless technologies, IaC best practices, and DevOps culture.

AZURE CLOUD/SOLUTION ARCHITECT

Fujitsu America (Boston, Massachusetts)

Feb 2017 - Oct 2018

- Used power shell scripts to automate Azure cloud system creation for end-to-end infrastructure, VMs, storage, Azure firewall rules, and routes.
- Assisted customers in simplifying the architecture by automation using JSON templates and power shell.
- Implemented new Azure services like Backup Vaults, Recovery Service Vaults, Operation Management Suites, Cost Estimation and Efforts.
- Experienced in developing dashboards, parameterized, linked, and sub-reports by region, week, month, quarter and year.
- Set up cloud monitoring using Log Analytics, Azure Monitor, Event Grid, and Application Insights.
- Developed architectural standards that promote DevOps practices with Infrastructure as Code (IaC) and Continuous Integration/Continuous Deployment (CI/CD).
- Created, validated, and reviewed solutions and effort estimates for migration to Azure Cloud environment.
- Conducted proof of concept for the latest Azure cloud-based services.
- Installed and configured the IIS web server on Microsoft Windows 2012/2012R2 /2016 server accordingly.

AZURE CLOUD ENGINEER

Fujitsu America (Boston, Massachusetts)

Jan 2013 – Feb

2017

- Designed new Azure landing zone architecture focused on network, compute and other Azure Cloud adoption frameworks.
- Managed deployment of over 60 Kubernetes clusters across Azure and AWS, with 70% uptime rate for 12 months.
- Used CI/CD pipeline for resource deployments with tools like Bitbucket and Jenkins.
- Deployed resources using IaC with Terraform and ARM template.

- Implemented RBAC for Azure resources using the Azure roles and design of some custom roles.
- Deployed express route connection to set up connectivity between the on-premise environment and Azure, creating redundancy.
- Configured and set up Azure Virtual WAN to connect various Azure regions and office branches using a hub and spoke design.
- Managed customer keys with key rotation policies for required encryption and user-defined routes for routing packets within and outside Azure.
- Created and managed private endpoints and links to prevent public access to Azure PaaS services.
- facilitated the integration of Palo Alto Prisma with Azure for security assessment and scanning of Azure resources.
- Implemented key enhancements such as optimizing volumes and EC2 instances.
- Created multiple VPC instances that increased overall speed by 30%.
- Deployed different SQL services, such as Azure SQL, SQL MI, and SQL servers.
- Managed Azure Key Vault with secrets, certificates, and key access policies to restrict user permissions to create and delete secrets, and certificates.

SYSTEMS ADMINISTRATOR

Elpeka Concepts Lagos, Nigeria

March 2008 – Nov 2012

- Advised customers and users regarding required maintenance practices of diverse software systems for OEM warranty requirements and industry best practices.
- Researched, documented, and escalated support cases to higher levels of support when unable to resolve issues using available resources.
- Updated software versions with patches and new installations to close security loopholes and protect users.
- Drafted technical documents, including white papers, user manuals, implementation documentation, and support-based entries.
- Explained technology-related details in easy-to-understand terms to individuals from all walks of life and in various job positions.
- Set up customers through the installation process of software or hardware and the initial program start-up procedures.

COURSES / CERTIFICATIONS

Microsoft Certified: Azure Fundamentals AZ-900

Microsoft Certified: Azure Solutions Architect AZ-305

EDUCATION

BSc. Political Sciences

2006

University of Ado Ekiti | Ekiti, Nigeria |

Diploma Computer Science

2008

APTECH | Lagos, Nigeria
