

AKIRA LEEKS

SOFTWARE ENGINEER

akira.leeks@gmail.com | 407-209-7550 | linkedin.com/in/akiral | Sandy Springs, GA

Passionate engineer with five years of full-stack development experience. Focused on implementing well-researched patterns and strategies that improve products, services, and databases, concentrating on collaborative work in effective high-velocity teams.

AREAS OF EXPERTISE

Java - JavaScript - C# - HTML5 - REST - Selenium - Kubernetes - SQL
Visual Studio .Net - Node.JS - Angular - Figma - MySQL - PostgreSQL

WORK EXPERIENCE

T-MOBILE | Atlanta, GA

Sep 2020 - Present

Associate Software Engineer

- Developed and maintained microapps that help agents process payments and refunds transactions using Angular and Java
- Delivered self-contained, reusable, and testable modules and components to help reduce duplicated code across applications
- Created browser-based regression automation suites and tests using Selenium web driver
- Formulated and sustained technical documentation specifications, requirements, and test cases
- Built comprehensive and precise automated end to end flow test cases for continuous testing of applications
- Partnered with technical teams and utilizes system expertise to deliver technical solutions

MACY'S | Johns Creek, GA

Oct 2018 - Jun 2020

Software Engineer

- Designed and developed internal business systems/applications, systems interfaces, databases, reporting, or business functionality
- Developed and implemented features for the Macy's Thanksgiving Day Parade web application using C#.Net, JavaScript, MySQL, and Bootstrap as well as creating and maintaining API endpoints that facilitated integrations and provided the requested details in a fast and secure environment
- Managed MySQL and PostgreSQL databases handling thousands of rows and creating queries, triggers, and stored procedures to optimize performance on multiple devices and environments
- Performed code reviews for all code written by the other developers, review code for team and industry standards compliance, and provide feedback to developers

EDUCATION

BACHELOR'S DEGREE, COMPUTER SCIENCE

Jan 2014 - May 2018

University of Georgia | Athens, GA
