SUMMARY:

Seeking the role of a **Senior Application Developer** in the development of multi-tier enterprise applications with .NET or Java front end/middle tier, which utilize MS SQL Server, Oracle, DB2, or MySQL back end, where familiarity with banking, insurance, manufacturing, government, retail, agriculture, and healthcare environments is a plus. Specializing in OOP, TDD, data migration, performance tuning, Java, Delphi, C++, and VB6 migration to C#, modernizing legacy applications, and technical writing.

WORK HISTORY:

Principal Developer (Contract, Remote), Zenith Elevate, Brampton, ON **May 2023 – present**

Designed and developed MAGNACHat, a secure, serverless P2P messenger with AES-256 CNG encryption of text, voice, video, screen and file exchange; MAGNABase, a database tuning and analysis tool that supports all DB engines from the Top 10, in .NET 6 C# WPF; and MAGNAText, a tool for sending SMS/MMS from desktop and command line via VOIP.MS.

Senior .NET Developer (Contract, Remote), Bell BBM for WorkplaceNL, St. John, NB **Feb 2023 – May 2023**

Helped launch WroklplaceNL's new BI platform by developing OTBI and BI Publisher reports in Oracle Fusion R13 and Oracle 22c PL/SQL. Interviewed R2R business users in HR and Finance, to define technical requirements and support full project life cycle.

Principal Developer (Contract, Remote), Zenith Elevate, Brampton, ON **Apr 2022 – Feb 2023**

Designed, and developed MAGNAPing infrastructure monitoring software suite, in C#.NET 4.8 and Standard 3, with plugins for MS SQL, DB2, Informix, Oracle, MySQL, PostgreSQL, Teradata Vantage, Sybase ASA/ASE, SQLite, Kafka, RabbitMQ, IBM MQ, Amazon MQ, MSMQ, XMPP, SMTP, transactional email APIs (Sendgrid, Postmark, Sendinblue, Mailjet, Mandrill), and SMS/MMS. Wrote C# units, SQL stored procedures, XSD and JSON schemes, and Java 8 extended stored procedures. Configured master Docker images for .NET Framework and Core versions. Wrote and published the administrator manual in LaTeX/PDF. Developed MAGNABoard remote UNIX administration application with C#.NET and SSH.

Senior Software Developer (Contract, Remote), TD Bank, Toronto, ON **Nov 2021 – Apr 2022**

Translated technical requirements to application code of Basel Reporting ETL stored procedures, views, and functions under MS SQL 2019 and ASP.NET 4.8 VB web front end. Used git/Bitbucket and Jira.

Senior Software Engineer (Contract, Remote), Verifone Inc, Mississauga, ON **July 2021 – Nov 2021**

Ported from unmanaged C to C#.NET 4.8 and further customized modules of payment processing software suite RTS that processes credit/debit card transactions and converts data between TLOG and proprietary formats. Used git, Jira, and Jenkins CI.

Senior Software Developer (Contract, Remote), Sobeys Inc, Stellarton, NS **Nov 2020 – July 2021**

Uplifted and migrated components of retail grocery store administration suite from Delphi 7, RAD Studio XE4, and VB6 to C#.NET 4.5 and 5.0 with Winforms, WPF, Entity Framework, and Castle Windsor. Followed Agile/Scrum under

Jira/Confluence/TFS/git. Collaborated with support analysts and architects, to provide technical implementation proposals and estimates. Migrated Crystal 10 reports to SSRS. Coached team members in performance tuning on C# and SQL tiers.

Principal Software Developer (Contract, Remote), Zenith Elevate

Jan 2020 – Oct 2021

Proposed, designed, and developed the infrastructure monitoring system MAGNAPing in C#.NET 4.8 and ported it to .NET Core. Used MS SQL Server, DB2, Oracle, MySQL, PostgreSQL, Informix, Sybase ASA/ASE, Teradata Vantage, SQLite, Interbase/Firebird, MSMQ, Websphere MQ, Kafka, RabbitMQ, Sendgrid, Postmark, Mailchimp, Mailgun, Sendinblue, SMTP, Jabber XMPP to develop monitoring and alerting plugins. Wrote technical documentation in LaTeX. Installed and configured Wordpress with WooCommerce.

Senior Software Developer (Contract, hybrid), iPipeline Canada Inc, Burlington, ON

May 2015 – Dec 2019

Achievements:

- Migrated 8+ million life insurance policies into iPipeline's emerging **OmniLife** in C# and SQL 2016
- Identified and implemented performance improvements in all tiers of **WealthServ** in C++, VB6, SQL 2012-2016
- Developed detailed diagnostics and optimizations of the PCI compliance suite of applications in C# with PGP
- Architected and developed direct-to-consumer life insurance policy sales integration portal in C#, SQL 2016

Responsible for the full project life cycle from requirement gathering and quoting, through analysis and development, project roll-out, and into support, for all Bluesun's SAAS life insurance policy administration platforms: WealthServ, OmniLife, BlueSky and the integration with external systems. Developed code in C# and VB under .NET 4.5-4.7.2 and Core 2.0 frameworks as well Java 1.5-8 and SQL Server 2012-2016 stored procedures, for Winforms, WPF, and web applications, web services, and API in on-premise and Azure environments. Developed PDF fulfilment with MigraDocs and email fulfilment with Sendgrid and Postmark APIs; SSIS ETL modules from Fasat, NWB, and Vantage; BI with Crystal Reports and SSRS including migration. Used TDD, git, Bitbucket, Jenkins, Octopus, Zendesk/Jira. Gathered requirements from corporate customers in major life, property, and casualty insurance carriers/MGAs.

Senior Developer/Analyst (Contract), Woodbridge Group, Mississauga, ON

Sep 2013 – June 2015

Achievements:

- Proposed, designed, and delivered the HR interactive organizational charts web site (Kaizen 2014 winner)
- Introduced the team to ITIL release and configuration management and peer code reviews
- Identified opportunities for and developed significant performance improvements across the platform

Responsible for the full project life cycle from requirement gathering and quoting, through analysis and development, to the project roll-out, and into support, for the mission-critical HR and automotive foam production control applications.

Developed VB and C# .NET 4.5 code with Winforms, MS SQL 2008, iSeries, and Oracle 11g queries and stored procedures, SSRS reports, and SSIS ETL packages for the HR and PLM applications. Designed and implemented the Organizational Charts project for displaying the business unit organizational structures interactively online and for printing in PDF format, with QR Codes, using ASP.NET, JavaScript, JQuery, and LaTeX, Word-HTML conversion with OpenXML. Won Kaizen 2014 1st and 2nd places. Gathered requirements from internal customers in HR, purchasing, and sales.

Senior Web Programmer (Contract, Remote), American Express, Markham, ON

Apr 2008 – Aug 2013

Achievements:

- Implemented Banco De Mexico SPEI real-time payment web services
- Developed Compliments and Complaints system's WebSphere MQ integration interface for IWealthView
- Reduced incidents/maintenance cost by 90%, by implementing application and infrastructure changes

- Improved business users' satisfaction through proactive performance and capacity analysis

Supported Amex Canada Bank suite of applications: **IWealthView** by Open Solutions/Fincentric, **GIFTS EDD** AML compliance suite by FIS Global, and Report2Web by Redwood Software. As an application owner, supervised on-site and offshore IT support teams (DBAs, Wintel/Linux sysadmins) to ensure the smooth implementation, migration, and operation of the applications in their respective environments. Set up and administered VMWare ESX, SQL 2005-2008 HA cluster, and Windows 2003 Servers. Investigated issues with C++ WinForms bank teller application and SOAP web services, Java 1.7-8 EE ATM/VR interface to Websphere MQ, and SSRS reports. Developed code fixes to address immediate issues in Visual Studio 2008, BIDS, Eclipse, and NetBeans. Developed batch jobs in BMC Control M, MS SQL Server Agent with SSIS, and RedHat Linux shell scripts. Multi-tasked between the projects and incidents in ITIL SDLC framework (IBM InfoWeb, ManageNow, ServiceNow).

Developer/Analyst (Permanent F/T), eBridge Software, Burlington, ON

Nov 2006 – Apr 2008

Achievements:

- Introduced the improved diagnostics and error handling in SQL
- Introduced code peer review process

Developed EDI integration between the **accounting packages** and **data transmission networks** in Visual Studio 2005 C++, C#, XML, Delphi 7, MS SQL 2005/2000, and Crystal Reports 8/9. Wrote Delphi and C#.NET Winforms and ETL program code of the **accounting package integrations** using APIs to Axapta, MS Dynamics AX, Great Plains, SAP Business One, Accpac, COM+, .NET web services, ODBC, and proprietary APIs. Developed EDI transformations in Biztalk using XSLT for XCBL and proprietary XML schemas. Used Final Builder, VMWare, Virtual PC, VSS, and remote debugging to accomplish development goals. Investigated issues with accounting package integration using SQL trace and other methods. Worked with internal and external clients to gather requirements and resolve issues.

Developer/Analyst (Permanent F/T), Royal Bank Insurance, Mississauga, ON

July 2002 – Nov 2006

Achievements:

- Implemented Investment Credit Facility project phase 1, which was the top RBC project of 2002.
- Implemented Exempt Tax project phase 2, which was ranked among top 7 RBC projects of 2003.
- Implemented Transunion credit reporting ETL extract for Investment Credit Facility.

Developed and supported **Bedrock** suite of life insurance policy administration applications with Delphi 6/7, MS SQL 7/2000, COM middle tier, Crystal Reports, and DTS packages. Used Visual C++, C# .NET, MS SQL 7/2000, Crystal Reports 7/8/9, Delphi 8/7/6/5, Wise Install, and VSS/MKS source control to achieve production support and project development goals. Multitasked between support tickets, analysis/fixes, and wrote new code for the development projects. Performed code audit for junior and intermediate developers on the team. Carried pager for after-hours on-call support. Wrote new life insurance policy administration code in Delphi, C#, Winforms, and T-SQL stored procedures, triggers, and functions. Wrote technical specifications in Word/Visio from business specifications, documented support issues, and communicated recovery actions with business analysts and partners. Researched tools and technologies for the team (Power Designer 9, Erwin, Crystal 9, StarTeam).

PROFESSIONAL TRAINING/CERTIFICATIONS:

Certificate, Development of reports in Oracle Fusion OTBI and BI Publisher, PluralSite.com	2023
Certificate: OWASP Top 10, PluralSite.com	2017, 2018
Certificate: Secure web development, PluralSite.com	2017, 2018
Certificate: SDLC 2.0 in ITIL environment - American Express	2012

Certificate: IT Service Management - American Express	2012
Certificate: Open Network Confidentiality Principles - American Express	2009-2013
Certificate: Information Security and Privacy - American Express	2009-2013
Certificate: Anti-Money Laundering & Terrorism Financing - RBC, American Express	2004-2013
Certificate: FLMI 280, Life Office Management Association	Aug 2004
Certificate: Delphi 5 Programmer, BrainBench.com	Oct. 2000
Certificate: Delphi 4 Programmer, BrainBench.com	July 1999
Certificate: MS SQL Server Programmer, BrainBench.com	July 1999
Certificate: MS Access Programmer, BrainBench.com	June 1999
Certificate: HTML Programmer, BrainBench.com	June 1999
Certificate: Programming for MS Windows using Borland C++, Borland Inc.	Apr 1993
