SENIOR MAINFRAME DEVELOPER

Highly skilled IT professional with 25+ years of experience designing, developing, and supporting mission-critical enterprise applications. Deep expertise in mainframe technologies and tools, complemented by hands-on experience in UNIX and Windows environments. Strong knowledge of relational databases with advanced proficiency in creating complex SQL queries. Proven track record in contributing to modernization initiatives, executing data migrations, and enhancing legacy systems to improve accuracy, automate manual processes, and increase operational efficiency. Adept in all phases of the SDLC, with a history of partnering with business and IT stakeholders to deliver reliable, high-impact solutions in both Agile and Waterfall environments.

TECHNICAL SKILLS

Operation Systems: z/OS, UNIX, Windows

Languages: COBOL, Easytrieve, VB.Net

Databases: DB2, Oracle, SQL Server, IMS

Tools/Utilities: VSAM, CICS, JCL, TSO/ISPF, FTP, NDM, SORT, ChangeMan, ISPW, Control-M, Zeke, File-Aid, File Manager, Xpediter, IBM Debug, Abend-Aid, Fault Analyzer, IBM Utilities, QMF, SPUFI, IBM Data Studio, SQL, SQL PL, PL/SQL, Transact-SQL (T-SQL), Toad, PL/SQL Developer, SQL Server Management Studio, SSIS, Visual Studio, Jira, ServiceNow, Visio, MS Office

PROFESSIONAL EXPERIENCE

NORFOLK SOUTHERN CORPORATION, Atlanta, GA

2019 – 2025

Mainframe Application Developer (Contractor)

- Collaborated with Scrum Master, Product Owners, and cross-functional stakeholders to support and enhance large-scale revenue accounting applications, ensuring accurate financial processing for rail freight operations.
- Performed in-depth system analysis, translated business requirements into technical specifications, and developed complex COBOL/DB2 programs, enabling new system functionality and supporting key business processes.
- Delivered small system enhancements, COBOL program fixes, DB2/SQL queries for data analysis, end-user issue resolution, and documentation of critical system processes, resulting in improved system usability and efficiency.
- Provided 24x7 on-call production support, troubleshooting system issues, determining root cause, and implementing resolution to ensure high system availability with minimal downtime.

GEORGIA DEPARTMENT OF REVENUE, Atlanta, GA

2016 – 2019

Senior Systems Analyst (Contractor)

- Conducted detailed system analysis and developed COBOL/DB2 programs to enhance the legacy Motor Vehicle Registration and Titling System, ensuring full compliance with newly enacted legislative mandates.
- Partnered with Business, IT, Legal, and QA stakeholders to replace the legacy Motor Vehicle Registration and Titling System with a modern commercial off-the-shelf (COTS) system.
- Analyzed and cleansed legacy DB2 data using complex DB2/SQL queries and COBOL/DB2 programs, ensuring only accurate and relevant data was migrated to the Oracle-based COTS system.

- Configured the COTS system, developed VB.Net programs, participated in system testing, and provided post-implementation support to ensure a seamless transition.

MACY'S SYSTEMS AND TECHNOLOGY, Johns Creek, GA

2015 – 2016

Senior Developer

- Contributed to a critical modernization initiative by collaborating with Business and IT stakeholders to replace an aging legacy system with a modern web-based Product Management System.
- Created technical specifications and developed complex DB2 and Oracle stored procedures to deliver new system functionality aligned with business requirements.
- Developed comprehensive test plans and executed test cases to validate results against requirements, ensuring all defects were identified and corrected prior to deployment.

ANTHEM, INC., Atlanta, GA

2000 – 2015

Developer Advisor

- Served as Subject Matter Expert (SME) for critical systems supporting Finance, Commissions, and Provider areas, contributing to major enhancements that significantly improved business operations.
- Led the end-to-end delivery of the mainframe Agent Commission System Enhancement Project, which restructured commission payment methodology and reduced annual broker expenses by \$15M.
- Integrated Membership and Sales Compensation systems to automate new member data intake and eliminate manual commission contract entry, improving accuracy and operational efficiency.
- Built cross-platform processes using COBOL, UNIX shell scripts, PL/SQL, and Oracle to transfer data from VSAM files to Oracle tables, enabling users to generate reports without IT assistance.
- Performed DB2 and Oracle database tasks, including creating and modifying tables, archiving and purging data, and tuning SQL statements, resulting in improved system performance and enhanced functionality.
- Provided technical leadership and mentoring to team members, ensuring high quality work and on-time project completion.

EDUCATION

Bachelor of Business Administration (BBA)

Computer Information Systems, Baruch College, CUNY, New York, NY
