## ServiceNow Developer and Administrator

(267) 498 7194 | [bilalahmedchaudhry5@gmail.com](mailto:bilalahmedchaudhry5@gmail.com) | Lansdale, PA

---

Experienced ServiceNow Developer and Administrator with over 13 years of IT experience and 9 years specializing in IT Service Management (ITSM) and Customer Service Management (CSM) solutions. Proven track record in designing, implementing, and optimizing ServiceNow solutions that drive operational efficiency, improve service delivery, and enhance customer satisfaction. Expertise in managing key ITIL processes such as Incident, Problem, Change, and Knowledge Management, and in developing seamless CSM workflows to enhance customer experiences. Strong collaborator with cross-functional teams to design innovative solutions, leveraging ServiceNow's capabilities to streamline business processes.

## Professional Summary

- Dynamic ServiceNow Administrator and Developer with extensive experience in platform administration and configuration.
- Expertise in custom application development utilizing ServiceNow Studio to meet organizational needs.
- Proficient in IT Service Management (ITSM) best practices, driving efficient incident, problem, and change management processes.
- Skilled in implementing IT Operations Management (ITOM) and IT Business Management (ITBM) solutions to enhance operational efficiency.
- Strong background in workflow automation and process design, optimizing service delivery and user experience.
- Experienced in managing Service Catalog, ensuring effective service request handling and fulfillment.
- Adept in integrating third-party applications using REST and SOAP, enhancing system interoperability.
- Competent in performance analytics and reporting, providing actionable insights for continuous improvement.
- Specialized in Human Resource Service Delivery (HRSD) customization and development, improving HR processes.
- Familiar with DevOps practices, facilitating continuous integration and deployment for efficient software delivery.

- Strong troubleshooting and problem-solving skills, with proficiency in JavaScript and GlideScript for scripting tasks.
- Knowledgeable in ServiceNow security model and access controls, ensuring data protection and compliance.
- Experienced in Configuration Management Database (CMDB) management, maintaining accurate asset relationships.
- Skilled in custom widget development for Service Portal, enhancing user engagement and functionality.
- Proficient in technical documentation and process mapping, ensuring clear communication of workflows and standards.
- Solid understanding of Hardware Asset Management (HAM) and Software Asset Management (SAM) processes.
- Experienced in Agile methodologies and Scrum practices, promoting collaborative and efficient project management.
- Demonstrated proficiency in leveraging multiple ServiceNow releases, including Dublin, Eureka, Fuji, Geneva, Helsinki, Istanbul, Jakarta, London, Madrid, New York, Orlando, Paris, Quebec, Rome, San Diego, Tokyo, and Xanadu.

## Core Competencies

- ITSM (Incident, Problem, Change Management)
- Customer Service Management (CSM).
- ServiceNow Administration and Development
- Service Catalog & Request Management
- Knowledge Management and Self-Service Portals
- Workflow Automation and Process Design
- CMDB and Asset Management.
- ITIL Best Practices and IT Operations Management (ITOM).
- HRSD Customization and Employee Experience
- Integrations (REST/SOAP APIs)
- Performance Analytics and Reporting
- Agile Development and Scrum

## Work Experience

**SENIOR SERVICENOW DEVELOPER (Contract)**

**Nov 2020 - Present**

**Accenture, Charlotte, North Carolina, USA (Remote)**

- Implemented ITSM processes, including incident, problem, and change management, resulting in improved service delivery and a significant reduction in resolution times.
- Managed Software Asset Management (SAM) to optimize software licensing, ensuring compliance and achieving significant reduction in annual software costs.
- Oversaw Hardware Asset Management (HAM) practices, enhancing lifecycle management and maximizing asset utilization from procurement to disposal.

- Deployed the DISCOVERY module to automate the identification and mapping of IT assets, improving the accuracy of the Configuration Management Database (CMDB).
- Optimized ITSM processes by implementing Incident, Problem, and Change Management modules, driving a significant reduction in resolution times and improving service delivery.
- Spearheaded the implementation of CSM workflows, improving customer interaction and self-service functionalities, leading to higher satisfaction and reduced service desk workloads.
- Designed Service Catalog items and automated fulfillment workflows, improving service request handling and overall user experience.
- Enhanced Knowledge Management by creating a self-service knowledge base, empowering users to resolve common issues independently, thus reducing ticket volumes and service desk dependency.
- Integrated third-party applications using REST and SOAP APIs to improve data flow and enhance ITSM, ITAM, and CSM processes.
- Created knowledge management processes to develop a self-service knowledge base, empowering users to resolve common issues and reduce ticket volumes.
- Trained staff on ITSM and ITAM tools, promoting best practices and maximizing the efficiency of service delivery across the organization.
- Integrated third-party applications with ServiceNow to enhance data flow and automation within ITSM and ITAM processes.
- Designed and executed service mapping within the CMDB to visualize dependencies between assets and applications, facilitating effective change management.
- Provided subject matter expertise in ITAM, ensuring effective tracking and reporting of IT assets throughout their lifecycle.
- Implemented automated reporting for SAM and HAM, delivering insights that support strategic decision-making regarding asset management.
- Lead initiatives for continuous improvement within ITSM, ITAM, and ITOM, leveraging user feedback and performance data to refine processes and enhance service quality.

#### **SERVICENOW DEVELOPER/ADMIN (Contract)**

**Jun2019 – Oct 2020**

#### **American Airlines, Dallas, Texas, USA (Remote)**

- Designed and implemented Project Portfolio Management (PPM) solutions within ITBM, improving project visibility and resource allocation across the organization.
- Developed custom workflows for Demand Management, enabling effective tracking and prioritization of incoming project requests based on business needs.
- Configured Financial Management processes within ITBM, facilitating accurate budgeting and forecasting to enhance financial oversight of projects.
- Streamlined Resource Management by creating tools for tracking resource utilization, ensuring optimal allocation of personnel to projects based on skill sets.
- Collaborated with stakeholders to gather requirements for custom applications within ITBM, aligning project objectives with organizational goals.

- Implemented HR Service Delivery (HRSD) processes to enhance employee experience, enabling efficient handling of HR inquiries and service requests.
- Developed automated onboarding workflows in HRSD, improving the efficiency of employee onboarding and reducing time to productivity. Created and maintained a
- comprehensive knowledge base within HRSD, allowing employees to access relevant information and reducing HR support ticket volumes.
- Managed and optimized the Configuration Management Database (CMDB), ensuring accurate representation of IT assets and their relationships to support ITSM processes.
- Conducted regular audits of the CMDB to maintain data integrity and compliance, identifying discrepancies and implementing corrective actions.
- Developed service maps within the CMDB to visualize dependencies between applications and infrastructure, enhancing incident and change management processes.
- Integrated HRSD with other ServiceNow modules to ensure seamless data flow and improve the overall user experience across HR services.
- Provided training and support to HR teams on using HRSD functionalities, fostering greater adoption and effective utilization of the platform.
- Led the implementation of change management processes that leverage CMDB data to assess the impact of changes on IT services and assets.
- Created reports and dashboards to provide insights into project performance, resource utilization, and HR service metrics, driving informed decision-making.

#### **SERVICENOW DEVELOPER (Contract)**

**Jan 2017 – Jun 2019**

#### **Bank of America, Wilmington, Delaware, USA (Remote)**

- Administered and customized the ServiceNow platform to meet business requirements, enhancing functionality across ITSM, ITOM, and ITBM modules.
- Developed and maintained workflows, business rules, and UI policies to streamline processes and improve user experience for incident and request management.
- Collaborated with cross-functional teams to gather requirements and implement solutions, ensuring alignment with organizational goals and regulatory compliance.
- Implemented Customer Service Management (CSM) features, enhancing service request processes and improving support ticket management, with seamless integration into the ServiceNow platform.
- Ensured accurate CMDB management to support ITSM processes, improving data integrity and supporting effective change management.
- Created and managed custom applications and modules within ServiceNow, leveraging JavaScript and Glide scripting for enhanced functionality.
- Implemented integration with third-party systems using REST and SOAP APIs to facilitate data exchange and improve operational efficiency.
- Conducted system testing and quality assurance to ensure the reliability and performance of ServiceNow implementations, documenting findings and resolutions.

- Provided ongoing support and training to end-users and stakeholders, ensuring effective adoption of ServiceNow features and best practices.
- Developed and maintained reports and dashboards to provide insights into service performance metrics and facilitate informed decision-making.
- Participated in change management processes, ensuring that changes to the ServiceNow environment followed established protocols and minimized disruption.
- Documented administrative processes, configurations, and troubleshooting procedures to support knowledge sharing and improve operational efficiency.
- Monitored system performance and usage metrics, proactively identifying areas for improvement and implementing optimization strategies.
- Managed application security settings and user access controls, ensuring compliance with internal policies and regulatory requirements.
- Collaborated with IT leadership to align ServiceNow capabilities with business strategies, driving continuous improvement initiatives across departments.
- Developed and executed training programs for new features and updates, enhancing user proficiency and satisfaction with the ServiceNow platform.
- Participated in regular audits and assessments of the ServiceNow environment to ensure compliance with industry standards and best practices.

#### **SERVICENOW ADMIN/DEVELOPER (Contract)**

**Jul 2013 – Dec 2016**

#### **Anthem Blue Cross and Blue Shield, Indianapolis, Indiana, USA (Remote)**

- Analyzed application requirements and provided best feasible solutions based on timelines and resources.
- Designed, developed and tested CMDB (Configuration Management) in ServiceNow based on specific client needs.
- Worked on Business Rules, Client Scripts and UI Actions for multiple ITIL modules.
- Developed responsive web applications using JavaScript and CSS, contributing to enhanced customer-facing web services.
- Collaborated with the CSM team to integrate web-based service requests into the ServiceNow platform, enhancing user experience for external clients.
- Worked on the dashboard, introduced knowledge articles and Customer Service Management (CSM).
- Implemented Government, Risk and Compliance (GRC) module.
- Implemented chatbot as part of GRC and created custom table to store the responses to have more accurate data and better auto response capability.
- Developed continuous integration process with the incidents to update them anytime there is a loss reported.
- Configured recovery time objects (RTO) and recovery point objects (RPO) based on the business service priority.
- Responsible for ensuring that Knowledge Articles are maintained, stable, and available to all clients without interruption during their working hours during the process of upgrades.

- Providing subject matter expertise, act as technical product advocate, design, develop and implement ITIL processes, ITSM, ITAM, SACM, Knowledge, Demand and Release Management modules within ServiceNow platform.
- Created and tested UI Actions/ UI Policies in customizing forms and buttons.
- Experienced with XML, HTML, AJAX, Jelly, CSS, jQuery, Bootstrap and AngularJS frameworks.
- Gather requirements from development leads, GS&S, ITS, info security team.
- Worked on Service Catalog, Configuration Management, Reporting, LDAP, Inbound/Outbound emails and Discovery.
- Used ACL's for controlling the security mechanism in Service Now.

#### **Frontend Developer/Scrum Master (Contract)**

**Dec 2011 – Jun 2013**

#### **American Airlines, Dallas, Texas, USA (Hybrid)**

- Developed and maintained responsive web applications using JavaScript, HTML, and CSS, ensuring cross-browser compatibility and optimal performance.
- Implemented interactive user interfaces with JavaScript frameworks such as React and Angular, enhancing user engagement and experience.
- Collaborated with UX/UI designers to translate design wireframes and prototypes into functional code, adhering to best practices in web development.
- Created reusable components and libraries in JavaScript to streamline development processes and improve code maintainability.
- Integrated REST APIs to facilitate seamless data communication between the frontend and backend, optimizing application functionality.
- Conducted thorough testing and debugging of web applications using tools like Jest and Mocha, ensuring high-quality deliverables.
- Utilized version control systems, particularly Git, for efficient code management and collaboration within the development team.
- Participated in Agile development methodologies, contributing to daily stand-ups, sprint planning, and retrospectives to enhance team performance.
- Implemented performance optimization techniques in JavaScript to improve page load times and overall application responsiveness.
- Developed and maintained technical documentation for codebases, APIs, and project workflows to support knowledge sharing within the team.
- Engaged in code reviews to provide and receive feedback, promoting best practices and continuous improvement in coding standards.
- Assisted in the migration of legacy systems to modern JavaScript frameworks, improving functionality and user experience.

#### **QA Automation Engineer (Contract)**

**Jul 2010 – Nov 2011**

#### **The Hartford, Hartford, Connecticut, USA**

- Designed, developed, and maintained automated test scripts using tools such as Selenium, JUnit, or TestNG to enhance test coverage and efficiency.

- Collaborated with cross-functional teams to define test strategies, requirements, and acceptance criteria for new features and enhancements.
- Executed automated test cases and performed regression testing, ensuring software quality and functionality across various releases.
- Developed and maintained test data and environments, ensuring consistency and reliability in testing processes.
- Analyzed test results and documented defects in tracking systems, providing clear and detailed reports to facilitate resolution.
- Implemented Continuous Integration/Continuous Deployment (CI/CD) practices to streamline the testing process and improve deployment efficiency.
- Participated in code reviews and provided feedback to development teams on testability and potential quality issues.
- Conducted performance and load testing using tools such as JMeter or LoadRunner to evaluate system behavior under stress.
- Created and maintained comprehensive test documentation, including test plans, test cases, and test scripts, to ensure traceability and compliance.
- Collaborated in Agile ceremonies, such as daily stand-ups and sprint retrospectives, to align testing efforts with project goals and timelines.

## **Education and Certifications**

**Bachelors of Commerce (BCom)**

**Certified System Administrator**

**Certified Application Developer**

**Certified Scrum Master**

**University of Punjab, Lahore, Pakistan**

**ServiceNow**

**ServiceNow**

**Scrum Alliance**
