

SUMMARY

8+ Years' experience Selenium Testing Engineer highly skilled in **leading Test Planning & Execution** and managing **Defect Reporting**. Adept at deploying expertise in Test **Automation** via **Selenium methodologies and API**. Proficient in **Automating Web Application Testing** via **Selenium WebDriver** and delivering business value to the **clients**.

KEY

Quality Assurance

Cross-Platform Application Development

Selenium Components & Automation

Manual & Automation Testing

Selenium IDE & Web-Driver

Selenium Test Cases

Page Object Model

Functional & Compatibility Testing

Systems Integration

Regression Testing

Team Incubation

PROFESSIONAL SKILLS

- ❖ Planned & **strategized test schedules** in accordance with **project scope** and delivery **deadlines**.
- ❖ Identified, analyzed & reported **application defects** and rendered assistance with **resolution** via **JIRA**.
- ❖ Interacted with customers & internal stakeholders to ensure complete & thorough understanding of all requirements.
- ❖ Defined, implemented, and maintained **test plans**, test specifications, and **test suites**.
- ❖ Implemented and executed test strategies to **improve the overall quality** and **boost test code coverage**.
- ❖ Directed **Performance** and **Load Testing** and administered System performance & **health monitoring**.
- ❖ Appointed in-charge of testing web services in **SOAP/REST** with JSON/XML data to **enhance customer-facing apps/API's (Postman & Rest Assured)**.
- ❖ Developed & executed test cases to boost automated test coverage for existing functionality.
- ❖ Deployed both **functional** and automation testing to successfully **integrate backend** with **Restful APIs**.
- ❖ Enhanced and maintained the test automation framework that is built using widely used, open-source frameworks such as **Selenium, Cucumber, and Gherkin**.
- ❖ **Apache POI** for handling data from excel, **JDBC** for handling data from the Database.
- ❖ Knowledge about Native and Hybrid mobile app testing using **Appium**.
- ❖ Integrate new libraries and frameworks as the mobile test automation landscape matures.
- ❖ Work with the software development and manual test team to build, maintain, and monitor the existing suite of automated tests.
- ❖ Understand the **financial, retail and ecommerce domain** and customers we support to ensure that the test suite catches **defects** before they reach the customer.
- ❖ Independently developed Test Plans, Test Cases and **Test Specification documents**.
- ❖ Assesses and **evaluated** the **coverage** of all aspects of requirements in the test design.
- ❖ Defined functional test cases based on technical design/functional design for **verifying accuracy** of developed features.
- ❖ Documented testing results & performed **root cause analysis** to initiate corrective action for meeting quality objectives.
- ❖ Led **manual, compatibility, performance, and security** testing for web applications.
- ❖ Deployed expertise in test planning, test design, test strategy & execution in addition to **Agile/Scrum** methodologies
- ❖ Conducted Test Planning, strategized system testing & methodologies and developed **system integration test cases**.
- ❖ Formulated **scalable automated test frameworks** and test suits across technologies for the entire product portfolio.
- ❖ Rendered assistance to conduct **design/code inspections** & perform manual testing encompassing all functionalities.
- ❖ **Stakeholder Management & Webpage Development**
- ❖ Collaborating with developers and QA leads to **enhanced testing performance, automation, and tools**.
- ❖ Automated and resolved defects for developing an **end-to-end testing solution**.
- ❖ Devised processes for **high-quality releases** with clearly defined test phase **entrance** and **exit criteria**.
- ❖ Scripted detailed **test scenarios** via advanced test automation frameworks like **Cucumber/BDD frameworks**, etc.
- ❖ Developed validation masterplan.

- ❖ Create the testing **data management plan** for the automated test scripts.
- ❖ Publish results of **automated test execution** for release planning purposes.
- ❖ **Serve as an escalation point** for experienced level staff in automated test scripts.

TECHNICAL SKILLS

- ⇒ **Operating Systems:** MS-DOS | Windows | macOS | Linux | UNIX | iOS | Android |
- ⇒ **Methodology:** Waterfall | Agile (Scrum) | V-Model (Software Development) |
- ⇒ **API Tools:** Postman | Swagger | Rest Assured | SoapUI | RESTful API |
- ⇒ **Databases:** Microsoft Access | Oracle | Microsoft SQL Server | MongoDB | PostgreSQL | AWS | Airflow | WinSCP |
- ⇒ **Testing Tool and Framework:** Selenium Web Driver | Eclipse | Test-NG | J-Unit | Maven | J-Meter | GIO | Active MQ | Appium | Jenkins (CI/CD) | GitHub | Bitbucket | Cucumber | Firebug | Confluence | Apache POI | Log4J | Data Driven | RAFT |
- ⇒ **Defect Tracking Tools:** HP Quality Center | ALM | JIRA | Zephyr | TFS | Confluence | qTest |
- ⇒ **Programming...Languages:** Java | Gherkins | JavaScript | SQL | HTML | C# |

EDUCATION

BSc in Computer Science & Engineering.
CGPA 3.62 out of 4.00
Bangladesh University.

WORK STATUS – (EAD)

PROFESSIONAL EXPERIANCE

||Bank of America||Plano, Tx||Software Development Engineer in Test||Dec 2024 – Present |

Bank of America, R3(Research, Resolution, Reconciliation) application is a financial domain- Creating Exception, Adjustment and settlement like DDA, GL, SVPCO, FEED. Creating different types of Item Request like ATM, BKA, BCRC etc. Bag scanning in IWT tray. Different types of file processing like cgsCustomerNotificationsJob, DCN_00_ImportExceptionsJob, sms_00_ImportExceptionsJob, DEPCORR_ImportExceptionsJob, oeclCreateExceptionJob, etc. File ingestion in WinSCP server. Prepared MOC trucking document.

Responsibilities:

- ⇒ Worked on **Agile** and **Scrum** Methodology involved in giving points to user stories, Back log grooming and participated in **Sprint Planning**, **Daily Scrum**, **Sprint Demo** and **Retrospective meeting**.
- ⇒ Participated in peer reviews of **software requirements**, designs, and test procedures.
- ⇒ Analyze Business Requirement Documents to get a better understanding of the system technical perspective.
- ⇒ Experience in writing **test plans**, **test cases/scenarios**, **test strategy** and **analyzing test results**.
- ⇒ Improved Framework by implementing the Page Object Model (**POM**) and organizing Web Elements by creating separate classes for each page of application and reusable common methods for code reusability.
- ⇒ **Performed System Integration (SIT)**, **UAT**, **Functional**, **Cross Brower**, **Parallel** and **Retesting**.

- ⇒ Work closely with Test Lead during the Software Testing Life Cycle (STLC) by ensuring full test coverage of the assigned test cases.
- ⇒ Responsible for writing and maintaining **Selenium WebDriver** scripts for regression and functional testing.
- ⇒ Deployed both **functional** and **automation** testing to successfully **integrate backend with Restful APIs**.
- ⇒ Validated Webservices **manually & Automation** using Postman & Rest Assured.
- ⇒ Worked with chrome extension Postman **REST** client, an **HTTP** client for testing Webservices.
- ⇒ Preparation of test cases based on requirements using **qTest** and involved in internal and external test case reviews.
- ⇒ **Reported & tracked the bugs**, performed E-mail notifications to the developers using the Quality Center.
- ⇒ Tracked the defects using **qTest** and generated defect summary reports.
- ⇒ Experience in using **Selenium Web Drive, Eclipse, Java, TestNG and RAFT frameworks in creating test scripts, Annotation, Parameterization, Data providers, Test suites and HTML reports**.
- ⇒ Developed **Feature files using Gherkin with Scenario, Scenario Outline, Background**, and action keywords **Given/When/Then; Step Definitions using Java and Selenium code with TestNG Assertion**
- ⇒ Extensively used Selenium **locators** like **XPath, CSS selectors**, and **WebDriver** to test the web application.
- ⇒ Extensive experience in designing and implementation of **continuous integration (CI)**, continuous deployment (**CD**) through **Jenkins**.
- ⇒ Successfully implemented **Java OOP** concept with **Collections, Exception** handling in **Cucumber Framework**
- ⇒ Extensively worked on **JMeter to create Thread Groups** and test web applications for various loads on key business scenarios.
- ⇒ Involved in **GUI testing, functional testing, Regression testing, Load testing, End to End testing, Cross Browser testing, Parallel testing, User Acceptance Testing and Database testing**.
- ⇒ Strong experience in data validation and manipulation in **Oracle** databases using **SQL queries**.
- ⇒ Provided back-end testing for data validation using complex **SQL** Queries joining multiple tables
Developed **complex SQL scripts** for **Oracle** database using **Toad**.
- ⇒ Experienced of working with **SQL** queries in **DML** (Data Manipulation Language) and **DDL** (Data Definition Language) and performing Database testing using **JDBC** libraries in different **RDBMS** like **Oracle** and **MySQL**.
- ⇒ Wrote and optimized test cases to maximize the success of manual software testing with consistent, thorough approaches.
- ⇒ **Debugged** code and **located root causes** of problems by reviewing configuration files and **logs**.
- ⇒ Proposed improvements to development and testing processes to **positively impact usability, function**, and performance.
- ⇒ Responsible for testing the application against different environments in **QA, SIT and UAT**.
- ⇒ Tested applications in different types of platforms, browsers and versions, such as **Chrome, Edge**, and **Firefox**
- ⇒ Performed **Regression, Integration** testing and **End to End** testing.

||7-Eleven, Inc|| Irving, TX || Software Development Engineer in Test || Feb 2024 –Nov 2024

7-Eleven, Inc. is the premier name in the convenience-retailing industry. Based in Irving, Texas, 7-Eleven operates, franchises and/or licenses more than 13,000 stores in the U.S. and Canada. As an SDET for the Merchant Portal Group at 7-Eleven. I am involved in **Functional, Automation, API** and **Backend** testing of the existing system, enhancing the overall customer experience and integrating seamlessly with merchant platforms.

Project: Marketplace/Merchant Portal.

Application: Web based **ecommerce** application -designed to manage Orders, Payouts, Payouts by Order, Transaction and Remittance file– working on multiple features like Left navigation, Stores status, Single store view, mix panel, Account creation, reset password, Mailbox set up, forgot password, Searching, Sorting, Pagination, Filtering, Date picker, Biz dev flow, Setting, Login, Get Started, Availability, Banking, download report etc. Collaborated with cross-functional teams to integrate new restaurant/aggregator features into the existing **7-Eleven** platform, ensuring a seamless user experience.

Responsibilities:

- ⇒ Actively participated in **Agile** Scrum development including **Sprint Planning, Daily Scrum, Refinement, Demo and Retrospective meeting**
- ⇒ Participated in peer reviews of **software requirements**, designs, and test procedures.
- ⇒ Documented **test plans** and test cases corresponding to business rules and requirements.
- ⇒ Experience in writing **test plans, test cases/scenarios, test strategy and analyzing test results.**
- ⇒ Good understanding of the Software Development Life Cycle and role of QA.
- ⇒ **Performed System, UAT, Functional, Cross Browser (Chrome, Safari, Firefox, Edge etc.), Parallel and Retesting.**
- ⇒ Work closely with Test Lead during the Software Testing Life Cycle (**STLC**) by ensuring full test coverage of the assigned test cases.
- ⇒ Appointed in-charge of testing web services in **SOAP/REST** with **JSON/XML** data to **enhance customer-facing apps/APIs (Postman & Rest Assured).**
- ⇒ Deployed both **functional** and automation testing to successfully **integrate backend with Restful APIs.**
- ⇒ Experience in API testing tools like **Postman & Rest Assured.**
- ⇒ Used **Postman API** to get convenient, visual display of query results.
- ⇒ Validated Webservices manually & Automation using **Postman & Rest Assured.**
- ⇒ Worked with chrome extension Postman **REST** client, an **HTTP** client for testing Webservices.
- ⇒ Maintained and **executed test cases** and test scripts using **Zephyr plugin.**
- ⇒ **Reported & tracked the bugs**, performed E-mail notifications to the developers using the Quality Center.
- ⇒ Experience in using **Selenium Web Driver, IntelliJ, Java and TestNG in creating test scripts, Annotation, Parameterization, Data providers, Test suites and HTML reports.**
- ⇒ Developed **BDD** tests using **Cucumber** by writing behavior and step definitions & developed required **Selenium support code in JAVA for Cucumber, GitHub, Jenkins.**
- ⇒ Extensive experience in designing and implementation of continuous integration (CI), continuous deployment (CD) through **Jenkins.**
- ⇒ Provided support in the performance testing using **JMeter** task includes developing test plan, test script and reports.
- ⇒ Extensively worked on **JMeter** to create Thread Groups and test web applications for various loads on key business scenarios.
- ⇒ Involved in **GUI testing, functional testing, Regression testing, Load testing, End to End testing, Cross Browser testing, User Acceptance Testing and Database testing.**
- ⇒ Strong experience in data validation and manipulation in **SQL** Server databases using **SQL queries.**
- ⇒ Provided back-end testing for data validation using complex SQL Queries joining multiple tables
Developed **complex SQL scripts** for **PostgreSQL** database using SQL Developer
- ⇒ Responsible for all backup, recovery and upgrading of all the **PostgreSQL** databases.
- ⇒ Studied and stayed current on features and functionality of **PostgreSQL.**
- ⇒ Implement data access, data retrieve, table maintenance of **PostgreSQL.**
- ⇒ Experience in handling and configuration of **NoSQL** databases like **MongoDB.**
- ⇒ Experience in **MongoDB** installation, back-up and recovery in dynamic environment.
- ⇒ Experience with creating script for data modeling and data import and export.
- ⇒ Worked on **MongoDB** database concepts such as locking, transactions, indexes, and updating.
- ⇒ Maintained a regression test suited for **AWS S3** storage service, ensuring backward compatibility and system reliability.
- ⇒ Maintained a Sanity test suite for **AWS incognito** storage service, ensuring backward compatibility and system reliability
- ⇒ Developed automated test scripts using Selenium and Java for validating web applications hosted on **AWS Elastic** Beanstalk.
- ⇒ Implemented API testing strategies for **AWS API** Gateway, verifying request and response mapping, security, and authentication mechanisms.
- ⇒ Wrote and optimized test cases to maximize the success of manual software testing with consistent, thorough approaches.
- ⇒ **Debugged** code and **located root causes** of problems by reviewing configuration files and **logs.**
- ⇒ Proposed improvements to development and testing processes to **positively impact usability, function, and performance.**
- ⇒ **Collaborated** with developers and project managers to assess **program capabilities**, features, and testing demands.
- ⇒ Performed E2E, regression and integration testing.

||Citibank || Pasadena, CA || QA Automation Engineer || Nov 2020 – Jan 2024 ||

Citi Online Banking provides client account information like account summaries, account details, monthly statements, balance transfers, accrued interest, check ordering, loan application, apply for credit cards, and financial services.

Responsibilities:

- ⇒ Actively participated in **Agile** Scrum development including **Sprint Planning**, **Daily Scrum**, and **Retrospective meeting**
- ⇒ Experience in writing **test plans**, **test cases/scenarios**, **test strategy** and **analyzing test results**.
- ⇒ Good understanding of the Software Development Life Cycle and role of QA.
- ⇒ **Performed System, UAT, Functional, Cross Browser and Retesting.**
- ⇒ Work closely with Test Lead during the Software Testing Life Cycle (STLC) by ensuring full test coverage of the assigned test cases.
- ⇒ Appointed in-charge of testing web services in **SOAP/REST** with JSON/XML data to **enhance customer-facing apps/APIs (Postman & Rest Assured).**
- ⇒ Deployed both **functional** and automation testing to successfully **integrate backend** with **Restful APIs**.
- ⇒ Experience in API testing tools like Postman & Rest Assured.
- ⇒ Validated Webservices manually & Automation using Postman & Rest Assured.
- ⇒ Worked with chrome extension Postman REST client, an HTTP client for testing Webservices.
- ⇒ Maintained and **executed test cases** and test scripts using **Quality Center/ALM**.
- ⇒ Preparation of test cases based on requirements using HP Quality Center and involved in internal and external test case reviews.
- ⇒ **Reported & tracked the bugs**, performed E-mail notifications to the developers using the Quality Center.
- ⇒ Tracked the defects using **HP Quality Center** and generated defect summary reports.
- ⇒ Experience in using **Selenium Web Drive, Eclipse, Java and TestNG frameworks** in **creating test scripts, Annotation, Parameterization, Data providers, Test suites and HTML reports.**
- ⇒ Developed **BDD** tests using **Cucumber** by writing behavior and step definitions & developed required **Selenium support code in JAVA** for **Cucumber, GitHub, Jenkins.**
- ⇒ Extensive experience in designing and implementation of continuous integration (CI), continuous deployment (CD) through **Jenkins.**
- ⇒ Provided support in the performance testing using JMeter task includes developing test plan, test script and reports.
- ⇒ Extensively worked on JMeter to create Thread Groups and test web applications for various loads on key business scenarios.
- ⇒ Involved in **GUI testing, functional testing, Regression testing, Load testing, End to End testing, Cross Browser testing, User Acceptance Testing and Database testing.**
- ⇒ Provided back-end testing for data validation using complex SQL Queries joining multiple tables
Developed **complex SQL scripts** for Oracle database using SQL Developer

- ⇒ Experienced of working with SQL queries in DML (Data Manipulation Language) and DDL (Data Definition Language) and performing Database testing using JDBC libraries in different RDBMS like **Oracle** and MySQL.
- ⇒ **Debugged** code and **located root causes** of problems by reviewing configuration files and **logs**.
- ⇒ Proposed improvements to development and testing processes to **positively impact usability, function, and performance**.
- ⇒ **Collaborated** with developers and project managers to assess **program capabilities**, features, and testing demands.
- ⇒ Performed E2E, regression and integration testing.

|| Scholastic || New York City, NY || QA Engineer || April 2018 – Oct 2020 ||

CMS – Content management system that offers managing publishing assets in a central repository for users to access, export, search, and import the contents.

Responsibilities:

- ❖ Analyzed the Functional Requirements and Design Specification documents.
- ❖ Worked closely with software developers, business analysts and other project management personnel involved in Software Development Life Cycle (**SDLC**).
- ❖ Attended design review conference meetings with off-site team.
- ❖ Communicated with developers and QA Team members to resolve issues.
- ❖ Manually performed Positive, Negative, Integration, Boundary, Sanity, Functional, Cross Browser, Regression, UAT and End-To-End Testing for billing applications.
- ❖ Used HP Quality Center to ensure efficient documentation of QA activities.
- ❖ Performed Back-End testing by verifying the data in the Microsoft SQL Server Database.
- ❖ Managed the Requirement Traceability Matrix (RTM).
- ❖ Experience in using **Selenium Web driver, Eclipse, C# and TestNG frameworks in creating test scripts, Annotation, Parameterization, Data providers, Test suites and HTML reports**.
- ❖ Developed **BDD** tests using **Cucumber** by writing behavior and step definitions & developed required **Selenium support code in JAVA for Cucumber, GitHub, Jenkins**.
- ❖ Participated actively in team meetings with Functional/Development Team for fixing bugs.
- ❖ Identified, tracked, resolved all defects and ensured resolution prior to the implementation of the software.
- ❖ Supported and worked with team to prioritize work requests and reported issues/results on a daily/weekly basis.
- ❖ Coordinated with management, development team, operations and clients for any outstanding issues and ensured the implementation of software in the correct environment.
- ❖ Wrote and optimized test cases to maximize the success of manual software testing with consistent, thorough approaches.
- ❖ Debugged code and located root causes of problems by reviewing configuration files and logs.
- ❖ Collaborated with developers and project managers to assess program capabilities, features and testing demand.
- ❖ Produced and maintained consistent technical documentation.
- ❖ Managing assets, monitoring operational and capital expenditures with the objective of preserving and increasing value.

|| Barnes and Noble || New York City, NY || Feb 2017 – Mar 2018 ||QA Analyst ||

Barnes & Noble, Inc., a Fortune 1000 company, is the bookseller with the largest number of retail outlets in the United States and a retailer of content, digital media, and educational products.

Project: Online Sales Acceleration (OSA)

Application: Web based application -designed to manage Sales/Billing – worked on multiple versions of sales, billing applications that aim to ensure customer satisfaction and effectiveness of sales, and billing functionality.

Responsibilities:

- ❖ Design Test Plan for manual testing for different releases that covers GUI/UI Testing, Functional Testing, Integration Testing, Regression Testing, Interface Testing, End-to-End Testing and User Acceptance Testing
- ❖ Attend the daily stand up to provide status.
- ❖ Analyze Product Requirement and write test cases based on the user stories.
- ❖ Update Test Cases according to the changes of BRD in Confluence
- ❖ Provide test estimation effort for each sprint.
- ❖ Log Defects using Jira and retest the Defects and close them in Jira.
