Experience

Virtuwell by HealthPartners
Senior Software Engineer

Bloomington, MN
March 2015 – Present

- Effective Principal Developer and Architect of a 5-application suite since September 2019

Projects

- 2024-25 Full Infrastructure Migration
 - Architected application deployment strategy from a more basic Docker deployment to an Open Shift environment that utilizes Helm and ArgoCd
 - Migrated Git repositories from internal BitBucket instance to GitHub Enterprise
 - Developed all new GitHub Actions to handle CI/CD pipeline
- 2023 Hybrid Preventive Care (HPC)
 - Architected a more robust integration with Epic Labs and Scheduling Modules to allow for scheduling of in-person lab visits
 - Assisted in development of a robust Drools-backed interview for HPC
- 2019 Virtuwell ⇔ Epic Labs Integration
 - Designed and implemented a bi-directional integration with Epic Labs Module via HL7 interfaces for mail-order lab kits
 - Developed a robust test harness application that also served to multiplex incoming messages to the correct environment
- 2016 Application Re-platform
 - Architected a full application platform migration from bare metal to a private cloud
 - Developed application deployment and environment management strategy for core business

Infinite Campus
Senior Software Engineer

Blaine, MN
September 2010 – March 2015

Projects

- 2013-15 Learning Management System (now Campus Learning Suite)
 - Technical lead, led teams of up to four developers in building and releasing new functionality
 - Partnered with a Performance Engineer solve application performance issues resulting in a gain of 45% in inter-application message processing
- 2010-13 R&D – Gamifying Learning
 - Experimented with multiple methods to “gamify” learning via rapid prototyping
 - Worked primarily to develop server-side applications supporting the various prototypes with Java/Groovy/Grails
