

Charles B. Mitchell II

Email: c.brandonmitchell@yahoo.com

Location: Nashville, TN 37086

PROFESSIONAL SUMMARY

Qualified Mid-Level Business Intelligence Developer with over 4 years of experience in data development, ETL data mapping, and data analysis. Proficient in Microsoft business intelligence technologies, including SSMS, SSIS, SSRS, and Power BI. I aim to leverage my experience and talents to become a valuable asset to your team while further developing my skillsets.

SKILLS

- Database Management Systems: Microsoft SQL Server (2005+), PostgreSQL
- BI Tools: Power BI, SSMS, SSIS, SSRS
- Programming: T-SQL, Python
- Data Management: Data cleansing, Data warehousing, ETL
- Software & Tools: Microsoft Excel, Git, Visual Studio, VS Code
- Communication: Great communication and interpersonal skills
- Languages: Fluent in Spanish
- Other: Leadership experience, High intellectual curiosity, Experience in account management and customer service

EXPERIENCE

Data Migration Specialist

Corpay | Nashville, TN

11/2023 - Present

- Migrated on-premises SQL databases to Azure SQL Database and Azure Data Lake.
- Designed and implemented data migration processes between SQL database systems.
- Developed ETL (Extract, Transform, Load) workflows to support data integration and transformation.
- Collaborated with cross-functional teams to analyze data requirements and establish migration strategies.
- Executed comprehensive migration plans, ensuring data integrity and validation.
- Troubleshoot and resolved issues related to data quality and performance during migration.

Data Engineer Consultant

UDigg LLC | Richmond, VA

2022 - 2023

- Led a data reconciliation project involving HR data for a home manufacturer.
- Provided service and support for clients' data migration.
- Developed and supported databases, including coding, cleaning, and maintaining stored procedures.
- Used Postgres/SSIS for ETL processes, tuning, and debugging.
- Conducted QA testing, data cleaning, and transformation.
- Collaborated daily with software engineers, business analysts, DBAs, and other contractors to complete sprint tasks.
- Worked with various platforms and applications, including MSSQL, Excel, Git, PostgreSQL, PowerShell, Visual Studio, and VS Code.

Data Analyst II (SQL/Integration)

Mars Petcare | Thompson's Station, TN

2019 - 2022

- Transitioned into a Data Analyst role within the segment after joining the company in 2016.
- Collected and organized raw data files.
- Analyzed business requirements and designed various database objects as part of a team.
- Created numerous simple to complex queries involving multi-joins, CTE techniques, and stored procedures.
- Employed best practices in creating complete schemas, including tables, relationships, stored procedures, views, clustered and non-clustered indexes, and triggers.
- Tuned and debugged integration solutions using SSIS.
- Created ETL solutions for reading product protein composition and digestion data from .CSV/XML files into SQL Server databases.
- Validated incoming data and performed job completion notifications.
- Analyzed existing SQL queries for performance improvements.

Database Developer Program

Lifting the Veil IT Academy | Nashville, TN

01/2018 - 03/2019

- Completed a 1-year intensive hands-on program in database development.
- Gained experience with CTEs, derived tables, window functions, and aggregate functions in T-SQL.
- Created shared datasets and data sources for SSRS reports.

- Tuned and optimized queries by altering database design and analyzing query options.
- Assisted junior students in best practices for SSIS, T-SQL, and SSRS.
- Prioritized and completed tickets efficiently based on business needs.
- Supported existing data structures and maintained SSRS BI reporting.

EDUCATION

Tennessee State University

BS in Animal Sciences

Graduated: 12/2009

Relevant Coursework: Fundamentals of Data Modeling (Microsoft SSMS, SSIS, SSRS)
