

SENIOR SOFTWARE ENGINEER

C# | SQL Server | Webapi | Javascript | JQuery | Knockout | .NET

Highly accomplished Full Stack Software Engineer with a Bachelor's degree in Computer Science and 22+ years of experience in designing, developing, and implementing robust and efficient web applications in fast-paced agile methodology environments seeking senior level software engineer position. Proven ability to lead teams, mentor coworkers, deliver complex projects on time, and drive significant improvements in application performance and user experience. Proven track record in optimizing Azure services, streamlining APIs, and driving project success through collaborative leadership. Adept at transforming complex challenges into efficient, customer-focused outcomes while fostering team growth and exceeding performance expectations. Excellent written and verbal communication skills.

CORE TECHNICAL SKILLS

- C# - Expert
- SQL/MS SQL - Expert
- JavaScript - Expert
- jQuery - Expert
- HTML - Expert
- Knockout - Expert
- Linq - Expert
- ASP.NET - Proficient
- WebApi - Proficient
- MVC - Proficient
- Azure - Proficient
- Typescript - Competent
- Angular - Competent
- Node.js - Competent
- Playwright - Competent
- React - Competent
- MongoDB - Competent

SELECT CAREER HIGHLIGHTS

- **Led High-Performing Teams:** Surpassed peers with top code contributions, mentored junior developers, and streamlined processes, accelerating delivery and enhancing team performance.
- **Built Scalable Azure Solutions:** Designed Azure services and APIs for real-time time tracking and scheduling, improving system efficiency and user experience.
- **Drove Feature Innovation:** Developed key features like Auto Complete and Mobile API, optimized reporting systems, and implemented unit tests, boosting reliability and customer satisfaction.

PROFESSIONAL EXPERIENCE

ISOLVED – Remote

05/2012 – 02/2025

PRINCIPAL SOFTWARE ENGINEER | 10/2022 – 02/2025

- Identified premier candidates for development positions by executing interviews and comprehensive skill assessments.
- Dismantled complex level 5 customer support issues each week, transforming 4 cases into successful resolutions and happy clients.
- Facilitated collaborative code reviews, fostering team knowledge sharing and improving overall development speed. Cultivated junior developers' skills through targeted mentorship, fostering growth and innovation in the team.
- Surpassed all developers including other principal engineers by delivering code contributions, driving the team's project success.
- Designed and maintained Azure service queues, buses, and functions to streamline the importing of time clock punches, committing of timecards, tracking of occurrences and corrective actions, as well as biometric consent processing in real-time.
- Engineered advanced and efficient APIs, streamlining employee punching, scheduling, and time-off requests

TEAM LEAD | 02/2018 – 10/2022

- Facilitated daily standups, fostering collaboration and communication among team members for project alignment. Guided junior developers through complex coding challenges, fostering a collaborative learning environment.
- Assessed effort levels weekly, refining project planning and enhancing team resource allocation.
- Achieved the highest output among developers, consistently surpassing project expectations and deadlines.

SENIOR SOFTWARE DEVELOPER | 05/2012 – 02/2018

- Transformed customer visions into reality by orchestrating efficient quotes and precise timeline assessments for innovations.

- Spearheaded the development of many new features, such as - Auto Complete, Complex Overtime, Complex Premium Pay, Department Budgeting, TimeOff Requests Calendar, Assignment Scheduling, Schedule Enhancements, Mobile Web Clock, Mobile API.
- Transformed the reporting system, greatly reducing processing time, resulting in heightened customer satisfaction.
- Designed and implemented comprehensive unit tests, boosting code reliability and greatly reducing bugs.

NETSTEPS – Lehi, UT

05/2011 – 05/2012

TEAM LEAD

- Orchestrated the deployment of dynamic client websites, ensuring seamless functionality and user experience.
- Conducted daily scrum sessions to streamline communication and align project goals among team members.
- Presented innovative features to client representatives, fostering dynamic discussions that drove project alignment.
- Analyzed incoming development requests, crafting precise quotes that accelerated project initiation decisions.
- Coordinated assignment of bugs and new features to team members, ensuring timely project advancement.
- Facilitated engaging code reviews, stimulating continuous growth and enhancing collaboration among team members.
- Engineered very welcomed enhancements including an automated bundling engine, product variants feature, and a new payment gateway.

QQUEST SOFTWARE SYSTEMS – Sandy, UT

01/2003 – 05/2011

SENIOR SOFTWARE DEVELOPER

- Converted client visions into actionable quotes by meticulously assessing all custom development requests.
- Developed the end-to-end development of projects, blending database design, business rules, and UI elements.
- Implemented object-oriented principles to structure code effectively, enhancing modularity and readability.
- Harnessed SQL Profiler and dynamic tracing tools to uncover performance bottlenecks, driving optimization.
- Serialized objects to XML and transformed data using XSLT, creating user-friendly reports and exports.
- Revamped multiple malfunctioning modules, enhancing functionality and improving overall user satisfaction.

EDUCATION

Bachelor of Computer Science (1997 - 2002) – UTAH VALLEY UNIVERSITY

- GPA: 3.791 / 4.0 | PHI THETA KAPPA

CERTIFICATIONS

Scrum Master Certified (2025) – SIX SIGMA GLOBAL INSTITUTE**MS SQL SERVER Top 10% (2025) – TESTDOME****MongoDB for SQL Experts (2025) – MONGODB**
