- Forward focused professional with expertise in managing the entire project planning and implementation from scope management to activity sequencing, effort and cost estimation, risk analysis to quality management using Agile and Scrum methodologies.
- Hands on experience in managing Development Lifecycle right from coding to testing (preparation of test cases along with implementation) to maintenance of proposed applications.
- using continuous delivery model.
- Excellence in developing & delivering team and organization training materials & workshops; building knowledge and skills to facilitate the Agile transformation.

Skills

- ADO (Azure DevOps) Board, ServiceNow tool, PowerBI Tool, SharePoint, wiki, Remedy tool
- Microsoft Office (Advance word, Excel, PowerPoint, and outlook
- SAFe Scaled Agile Framework
- Product Management
- People Management Skills
- Agile Software Development
- Jira/Confluence
- PPRT #, NEXUS, PCM, Deployment Events (Remedy Tool) Release Pro, Build Gate Passed/Failures
- ALM Tool, for Defect Tracking QTest Tool (Testing approval with QA team, Test case Analysis/preps
- Business Analysis
- Risk Management
- Process Improvements
- Stakeholder Management
- Reporting & Documentation
- Liaison & Coordination
- Microsoft SQL Server/ java/cabol, replication, migration/upgrades/MuleSoft

Testing Tools: Langs, Capybara, Rspec, Selenium IDE, Selenium Web driver 2.0, Soup UI, Java Script, Cobol, Java, Ruby, QTest, ALM for defects tracking.

Software Methodologies: Agile, Scrum, Kanban, Crystal, (XP)Extreme programming, Scaled Agile (SAFe)

Clodelle Bainsi

DevOps Tools: Azure DevOps Board (ADO), Jira/Confluence Jenkins, GitHub/Gitlab, Eclipse, Sonar Cube, Fortify, Code hub, Artifactory, Sauce Labs, Perfecto, Visual Studies, and Selenium Web driver. Version 1. TFS. Bitbucket, Release branch, Endpoints, RML specifications, payloads, RS2, Cybersauce, CYBS, PAX, POSP, IOM, Amex, Synergy, Kafka, CEH CNE, Merchant Dom

Certification

-
- Certified SAFe 5 Scrum Master
- Professional Scrum Master (PSM)
- Oracle 11g certification (OCA)
- SQL fundamentals 11g certification

Professional Experience

Sr Agile Scrum Master | Bank of America || Dallas, TX

Dec 2022- Present

Working with BOFA Payments and Merchant Services Engineering Scrum Teams: Serving as an Agile Delivery Lead/RTE with 5 or more Cross functional Paym Engineering teams within the Identity Access Management Domain, Onboarding application Software, API Implementation with Software Terminal VAS, teams building and adding Endpoints/Payloads, RS2 systems with Enterprise Technology API teams, Operations/Infrastructure teams and Data analytic teams working on Merchants Credit Cards/Capture teams. Working with Infrastructure teams with AWS microservices migrating to cloud, Production support teams and SRE/Devops team.

Project Tracking tool: Microsoft Azure Devops tool(ADO Board) Jira/Confluence/Wiki/ Bitbucket, Repositories, DevSecOp, Horizon Jira 2/3/Confluence, Remedy tool, ALM tool for defect tracking. ServiceNow tool for change management and Delivery tracking, SharePoint location for documentation.

Responsibilities:

- Administering end to end project management activities inclusive of planning, effort, design, scope, estimation, resource coordination and delivery as per specified time frames.
- Maintaining key program performance data for evaluations to support key decision-making program performance analysis.
- Sprint planning, daily scrums, retrospectives, stakeholder meetings and software demonstrations.
- Communication between scrum team and product owner on a regular basis.
- PI Planning Event, System Demos and Solution Demos.
- Working closely with Project Owner in backlog management and continuous delivery of features.
- Removing obstacles for the team by escalating an issue to leadership resulting in early delivery of customer issue solution and providing customer positive feedback.
- Tracking and managing product backlog, burn down metrics, velocity, and task breakdown.
- Establishing and communicating the annual calendars for Iterations and Program Increments (PI).
- Assisting PI Planning readiness by fostering the preparation of Vision and Backlogs and Pre- & Post-PI Planning meetings.
- Establishing and supporting communities of practices to promote organizational understanding of agile roles and help individuals develop into them.
- Supporting the Scrum Master activities including running daily stand ups, sprint planning, grooming, Planning Poker, and retrospective and reporting iteration progress.
- Implementing Agile best practices to facilitate, enable & coach multiple teams in a hybrid environment.
- Facilitating Scrum ceremonies like backlog grooming, release & sprint planning, impediment removal to ensure smooth project execution and delivery.

Clodelle Bainsi

- Encouraging the collaboration between teams and System and Solution Architects/Engineering.
- Coordinating with Product & Solution Management, Product Owners, and other stakeholders to help ensure strategy and execution alignment.
- Providing visibility into the Agile team's delivery plans and Release plans at the project level and to stakeholders
- Utilizing Jira to track and effectively communicate team velocity, burn down charts, and sprint/release progress to the team.
- Submitting weekly/ monthly status reports to project stakeholders

Accomplishments:

- Brought in Agile best practices such as time boxing, continuous integration, code/design reviews, transparency, accountability, rally tracking, product visioning, technical debt reduction, self management, empowerment, and role training, which resulted in the realization of velocity improvement of more than 80%.
- Spearheaded the agile transformation journey for several projects (Waterfall Teams to Scrum Teams and Empowered Teams to self organize and grow cross functionally).
- Institutionalized the implementation of Kanban into Maintenance Teams and led them through continuous improvement mind set, which resulted in significant improvement in cycle time.
- Front-led change and continuous improvements, which resulted in increasing the productivity of Scrum Teams by 16% and the quality of deliverables by 22%.

Sr Scrum Master

| Silicon Valley Bank || Phoenix/Arizona | Dec 2021- Dec-2022

Working with onboarding applications project under a program called Identity Access Governance, maintaining over 6000 applications to protect our customer's information from data breaches through Access Control solutions called Oracle Identity Management Centralized system. This project was about us getting all the assets, whether applications whether software into our centralized systems so we can authenticate an authorized access even from the vendors who owned these applications which was an extra step to our infrastructure and our services at the time.

I also work with Cloud Infrastructure teams, migrating to Cloud and Azure, Information security (cyber security teams)

Responsibilities:

- Supporting Product Owner ensuring the product backlog is properly refined prioritizing to maximize value and using and elaborating on users' stories to be ready for upcoming 1to 2 sprints.
- Facilitating Daily scrum, release and sprint planning sessions, Sprint review and sprint retrospective.
- Ensuring all participants understand the purpose of a ceremony and keep to the time box.
- Fostering and encouraging conversations and collaboration both inside and outside of team allowing them to self-organize.
- Identifying and removing impediments, prevent distractions that interfere with the ability of the team to deliver sprint goal.

- Mentoring and assessing the team to maturity.
- Facilitating effective communication and working relationships between Scrum team Product Owner, stakeholders, and third-party vendors.
- Ensuring the team understands the need for clear and concise Product Backlog items and achieve this through techniques like splitting user stories.
- Enforcing the values and principles of Agile by focusing on continuous learning and feedback loop.
- Removing impediments and protecting team members from interruptions and distractions to maximize productivity.
- Monitoring task board and burn down charts to track the progress of work and communicate with the team, achieve this through techniques such as user story slicing and acceptance criteria.

Humana IT Medicaid/Medicare| Healthcare/Insurance

Jan 2020- Dec 2021

Sr Scrum Master

Managing ADO Board (Azure DevOps tool) with the Scrum teams.

Working with Watson AI HCPR project to bring AI Voice Capability into HCPR provider Self Service. AI powered Conversational Assist Solution that leverages the Advanced NLP capabilities of IBM Watson and Provides an easy-to-use natural language interface for providers. Enables SMES to train and tune the Solution to enhance the performance. Reduction in call Volume. The primary purpose was to target around the Watson AI looking up authorization status and creating new authorizations. Other major features like utilizing tools to reduce call volume so associates can focus on sales-generating questions and inquiries which will create a stronger provider experience.

Responsibilities:

- Tracking all Requirement request needed at the Design stage for the API team and updating user stories/task completed on the Azure Board for tracking purposes.
- Working directly with team lead/PO to create user stories and moved user stories from the RMS board to the work board) Enterprise Technology/services work board/sprint board for the teams to start working on their stories.
- Facilitating and organizing daily stand-up meetings, reviews, estimation, retrospectives, sprint and release planning, demos, burndown tracking and other Scrum-related meetings.
- Contributing to all phases of SAFe/OSAM from Deliver initiation, PI Planning event, Sprinting, Ongoing PI planning & PI closure.
- Program level Scrum of Scrums.
- Identifying of the program risks and bifurcating using the ROAM approach.
- Ensuring user stories are sized according to sizing guidelines, maintained a guideline for estimations and published among the team as part of coaching.
- Ascertaining each feature should be completed within one Program Increment (PI), if the sizing indicates it will take longer than one PI, then ensured the feature requires to be decomposed further.
- Performing feature review sessions as requested where features are prioritized/ranked for each capability the features and reviewed in between to gauge the commitment for the PI.
- Conducting PMC (program management council) and managed the Program Backlog & Program Roadmap.
- Working collaboratively with Business and IT partner teams to support development and software delivery.

Clodelle Bainsi

- Assisting the Product Owner and Technical Product Manager in user story creation/prioritization and product Backlog grooming via emergent requirements.
- Asking difficult questions, removing impediments, and making issues and problems visible.
- Making sure the development team is working efficiently towards Sprint goals.
- Coaching the development team and stakeholders on how to use Agile/Scrum practices at a pace that is sustainable and comfortable for the team and organization.
- Making sure the development teams are practicing the core agile principles of collaboration, prioritization, team accountability, and visibility.

- Recommending improvements and assists in changes to best practice.
- Identifying and managing issues and jeopardizing with a clear grasp of the challenges/options until resolved.
- Possesses excellent interpersonal skills and ability to work with diverse teams with diverse personalities, during high pressure scenarios, within extremely tight deadlines.
- Being aware of agile technology practices (e.g., Test Driven Development, Continuous Integration).
- Having the ability to analyze project issues and challenges and proactively define alternatives.

Scrum Master | Post-Acute Medical LL.C (Insurance/Revenue Cycle Management) | Jan 2018-Jan 2020

Prior authorization (PAS) was an application wherein Health care Managers obtain approval from health insurance plan before admitting residents. PA is a Process for minimizing costs, wherein benefits are only paid if the medical care has been pre-approved by the insurance company.

Responsibilities:

- Mentoring, coaching & transforming 8 teams towards Agility and making efforts to let the Team deliver with high quality and high productivity.
- Training SMs to Facilitate Kanban boards and scrum ceremonies (grooming, sprint planning, retrospectives& daily scrum).
- Working directly with Project Manager, PO on the product roadmap, budget estimations/planning and requirement gathering.
- Creation of the Definition of Ready (DoR) and ensuring DoR is followed throughout the program, conducting the revision session to DOR as per needed.
- Program-level Scrums of Scrum.
- Identification of the program risks and bifurcated them to ROAM approach.
- Ensuring the stories are sized according to sizing guidance, maintaining a guideline for estimations, and publishing among the team as part of coaching.
- Generating reports on Sprint Health Assessment Dashboard Sprinting, Sprint Burndown / Sprint Burnup, Sprint Cumulative Flow, Sprint Capacity by Team Member & Dependency Status Dashboard.
- Identifying and managing issues and jeopardizing with a clear grasp of the challenges/options until resolved.
- Possesses excellent interpersonal skills and ability to work with diverse teams with diverse personalities, during high pressure scenarios, within extremely tight deadlines.

Sr Scrum Master | Pride N Living Health Care Services Inc (DHS-Minnesota)| Minneapolis, MN | Jan 2015-Jan 2018

Clodelle Bainsi

Web Application Software Development Project. An advanced solution that will provide a framework for timely, efficient, and insightful reporting and analysis across the board and evolving spectrum of the Medicaid and Health and Human Services (HHS) market. Designed, developed, and implemented to meet and exceed the analytic needs of this market, surpassing the capabilities of the competition in this space.

Responsibilities:

- Facilitating and organizing Scrum ceremonies, daily stand-up meetings, reviews, estimation, retrospectives, sprint and release planning, demos, burndown tracking and other Scrum-related meetings.
- Working collaboratively with Business and IT partner teams to support development and software delivery.
- Involved in each phase of life cycle (SDLC) including requirement gathering, technical design, development, system integration phase, quality assurance phase, and development and production support activities using Agile Methodologies.
- Experience working effectively in a Dynamic, Fast paced development environment coordinating between multiple teams.
- Conducting the Agile Workshops at the Organizational level.
- Excellent team facilitation and Conflict resolution skills including arbitration and negotiations.
- Ability to estimate the resource load, prioritize and proactively manage the IT customer expectations.
- Prepared the PI Planning agenda and actively participated from offshore to the PI planning events.
- Generated reports of OSAM PI Health Assessment Dashboard Sprinting, OSAM PI Health Assessment Dashboard PI Planning, Sprint Burndown / Sprint Burnup, Sprint Cumulative Flow, Sprint Capacity by Team Member & Dependency Status Dashboard.

Scrum Master /Project Coordinator | Jelani Consulting LLC/Barclays Bank | Jan 2013-Jan 2015

Working on a Software Technology Patching project. Because it is a 3rd party vendor product, we normally do our patching every quarterly for security bug fixes to help maintain our company assets and to protect our customers information from any data breaches. Our backend developers were there to ensure they were well maintained. The team then determines the name of the project, for example a Microsoft 365 Patch.

Responsibilities:

- Facilitating and organizing Scrum ceremonies, daily stand-up meetings, reviews, estimation, retrospectives, sprint and release planning, demos, burndown tracking and other Scrum-related meetings.
- Working collaboratively with Business and IT partner teams to support development and software delivery.
- Assisting the Product Owner and Technical Product Manager in user story creation/prioritization and product Backlog grooming via emergent requirements.
- Asking difficult questions, coaching, removing impediments, and making issues and problems visible. Escalate, as necessary.
- Making sure the development team is working efficiently towards the Sprint goal.
- Ensured user stories are sized according to sizing guidelines, maintained a guideline for estimations and published among the team as part of coaching.

Clodelle Bainsi

- Ascertained each feature should be completed within one Program Increment (PI), if the sizing indicates it will take longer than one PI, then ensured the feature requires to be decomposed further.
- Performed feature review sessions as requested where features are prioritized/ranked for each capability the features and reviewed in between to gauge the commitment for the PI.
- Conducted PMC (program management council) and managed the Program Backlog & Program Roadmap.
- Facilitating and organizing Scrum ceremonies, daily stand-up meetings, reviews, estimation, retrospectives, sprint and release planning, demos, burndown tracking and other Scrum-related meetings.
- Working collaboratively with Business and IT partner teams to support development and software delivery.
- Assisting the Product Owner and Technical Product Manager in user story creation/prioritization and product Backlog grooming via emergent requirements.
- Asking difficult questions, coaching, removing impediments, and making issues and problems visible. Escalate, as necessary.
- Making sure the development team is working efficiently towards the Sprint goal.

Scrum Master & Automation Architect | The Priory Group of Health Services || Roehampton, UK Jan 2011-Dec 2013

Personal Health Message Centre (PHMC) is a web-based application providing a user interface (UI) to enable secure messaging communication between Optum consumer representatives and consumers.

Responsibilities:

- Contributed to automation plan & strategies for complete automation test coverage.
- Managed Automation Team and tracked the progress of automation status on every sprint level.
- Provided appropriate estimation on the user stories during the scrum grooming sessions.
- Developed appropriate test suits for both manual and automation testing activities.
- Generated ROI metrics from the automation implementations.
- Created automation scripts using R-Spec and Capybara frameworks.
- Created database objects such as tables, views, synonyms, sequences, and triggers.
- Cloned/migrated databases using RMAN and traditional data pump export/import utilities Oracle 11gR2.
- Restore and recovery of databases in case of database crash, disk/media failure.
- Applying patches and works closely with Oracle to make the application environment up to date.
- Backup & Recovery Maintenance.
- Monitoring and tuning the databases (Performance tuning).

Education

- MBA Degree in Strategic Marketing, University of Gloucestershire United Kingdom (England) 2012
- Post Graduate Diploma in Marketing Communications London School of Commerce UK 2011
- Bachelor's degree in business law, Buea Cameroon 2008
