PLANO, TX 75025

Professional Summary

Results-driven Cloud Architect & DevOps Engineer with 14+ years of experience designing, implementing, and optimizing scalable, secure, and cost-efficient cloud solutions. Deep expertise in **Microsoft Azure, Amazon Web Services (AWS), GCP, Kubernetes, Terraform, and DevOps best practices**. Proven ability to drive engineering efficiency, reduce operational costs, and align technical strategies with business objectives. **Successfully boosted engineering productivity by 35% and achieved over \$3M in annual cost savings through automation, infrastructure optimization, and cloud-native solutions**. Adept at leading cross-functional teams, streamlining CI/CD pipelines, and ensuring high availability and security in cloud environments.

Core Skills

Cloud Platforms	Microsoft Azure, Amazon Web Services(AWS), Google Cloud
Microsoft Azure Services	Azure Virtual Networks, Virtual Machines, Active Directory, DataLake, Databricks, Service Bus, Blob Storage, Azure Resource Manager (ARM), Azure Web Apps, Azure Kubernetes Service (AKS), Azure Container Service (ACS), Express Route, VPN, Load Balancing, Application Gateways, Auto-Scaling, Service Fabric, Traffic Manager, Azure SQL and Azure DevOps
Amazon Web Services(AWS)	EC2, VPC, EBS, AMI, SNS, RDS, EBS, IAM, S3, CloudWatch, Cloud Trail, CloudFormation, Autoscaling, CloudFront, R53
Google Cloud Platform (GCP)	Compute Engine, VPC, Cloud Storage, Cloud Functions, Cloud Run, Cloud Spanner, Cloud SQL, BigQuery, Cloud Pub/Sub, Cloud IAM, Stackdriver (Cloud

	Monitoring & Logging), Google Kubernetes Engine (GKE), Cloud Build, Anthos, Cloud Load Balancing, Firebase
Configuration Management Tools	Terraform, ARM templates, Ansible, Chef, Puppet.
CI /CD Tools	Jenkins, Azure DevOps Pipelines, AWS Code Pipeline, GitLab CI/CD, GitHub Actions, Bamboo, Travis CI, Circle CI, Spinnaker.
Build Tools	Maven, ANT, Gradle.
Containerization Tools	Docker, Docker Swarm, Kubernetes, Mesos, OpenShift, AWS ECS.
Version Control Tools	GIT, GitHub, GitLab, Bitbucket, SVN.
Logging & Monitoring Tools	CloudWatch, Azure Monitor, Prometheus, Grafana, New Relic, Nagios, Splunk, ELK Stack, Datadog, Dynatrace, Kibana.
Vulnerability Scanner Tools	SonarQube, Veracode, Trivy.
Scripting & Programming Languages	Shell Scripting, PowerShell, YAML, XML, Ruby, Java, Golang, Python, Groovy, .Net, Node.js.
Databases	My SQL, MS SQL, PostgreSQL, MongoDB, DynamoDB, and Aurora Global DB.
Application/Web Servers	Web logic, Web sphere, Apache Tomcat, Nginx, Apache Kafka.
Operating Systems	UNIX, Linux, Windows, Solaris, CentOS, UBUNTU and RHEL.
Virtualization Platforms	VMware Workstation, Vagrant, VMware vSphere ESXi 5.x/4.X, ESX /3.x, Hyper-V.
Bug Tracking Tools	JIRA, ServiceNow, Bugzilla, Remedy, HP Quality Center, Mingle.
Repositories	JFrog Artifactory, Nexus.
Key Vault's	AWS Key Management Service, Azure Key Vault, HarshCorp Key Vault.
Deployment Strategies	Canary, Blue/Green.
Web Technologies	HTML5, CSS, JavaScript, jQuery, Bootstrap, XSD, XSL, XPATH, WordPress.

Certifications

- AWS Certified Solutions Architect - Professional
- Microsoft Certified: Azure Solutions Architect Expert
- Google Cloud Certified: Professional Cloud Architect
- Certified Kubernetes Administrator (CKA)

- Project Management Professional (PMP)
- Certified Information Systems Security Professional (CISSP)

Work Experience

Cloud Architect | Senior Cloud/DevOps Engineer

Mar 2021 - Present

XT Global

Technologies: Azure (AKS, App Gateway, Monitor, DevOps, Key Vault, ARM), AWS (EKS, Control Tower, CodePipeline, Glue, Athena), Terraform, Kubernetes, Docker, Jenkins, GitHub Actions, ArgoCD, Python, PowerShell

- Led a hybrid cloud transformation project, migrating 80% of infrastructure to **Azure and AWS**, enabling platform agility and \$1.2M annual cost savings.
- Architected **highly available Azure environments**, leveraging **Azure Virtual Network, Load Balancer, and Azure App Gateway** to support critical business applications.
- Integrated **Azure Monitor and Azure Log Analytics** for centralized monitoring, reducing MTTR by 40% and improving observability.
- Automated resource provisioning across Azure subscriptions using **Terraform and ARM templates**, cutting environment setup time by 65%.
- Designed and deployed **multi-region disaster recovery on Azure**, achieving 1-hour RTO and improving business continuity by 40%.
- Led the adoption of **Azure Kubernetes Service (AKS)** to modernize application delivery; improved scalability, reduced deployment issues by 40%.
- Managed Azure DevOps Pipelines and GitHub Actions to build secure, automated CI/CD pipelines; cut release cycles by 70%.
- Reduced Azure cloud spend by 20% YoY through **cost optimization**, reserved instances, and Azure Cost Management strategies.
- Implemented **Azure Security Center, Azure Key Vault, and role-based access (RBAC)** for policy enforcement and compliance.
- Delivered cross-functional training on **Azure infrastructure, security, and DevOps** best practices to upskill engineering teams.
- Architected and deployed secure, multi-region **AWS environments using Control Tower, Organizations, and SCPs** to enforce governance at scale.
- Led **AWS EKS (Elastic Kubernetes Service)** adoption across production workloads with **GitOps** integration (**ArgoCD**), reducing deployment rollback time by 80%.

- Designed data pipelines using **AWS Glue, Kinesis, and Athena** to enable near real-time reporting and advanced analytics.
- Automated infrastructure provisioning and security compliance (CIS benchmarks) using **AWS Config, CloudFormation, and Terraform**.
- Managed cross-account CI/CD using **CodePipeline, CodeBuild**, and cross-role access via IAM policies, enabling decentralized teams to ship independently.

Senior Cloud/DevOps Engineer

Oct 2016 - Mar 2021

Cobuild Lab

Technologies: Azure (App Services, Functions, Logic Apps, Monitor, DevOps, ARM), AWS (Lambda, ECS Fargate, Step Functions, GuardDuty, Secrets Manager), Terraform, Jenkins, Kubernetes, Ansible, Python, Prometheus

- Architected **multi-region Azure deployments** with VNet peering, VPN, and **ExpressRoute**, improving latency and availability.
- Built secure and scalable **CI/CD workflows in Azure DevOps**, reducing deployment time by 60% and improving delivery consistency.
- Migrated legacy apps to Azure App Services and Azure SQL, reducing infrastructure management effort by 50%.
- Deployed **Azure Functions and Logic Apps** to build serverless workflows that cut processing time and operational costs.
- Implemented centralized logging with Azure Monitor, enhancing system visibility and proactive alerting.
- Reduced Azure operational costs by 30% through rightsizing and automation; achieved \$2M+ annual savings.
- Designed IaC templates with **Terraform and ARM** to automate Azure infrastructure provisioning across multiple environments.
- Maintained compliance with **HIPAA and ISO 27001** by enforcing Azure Policy, tagging, and governance standards.
- Built resilient serverless applications using **AWS Lambda, API Gateway, Step Functions, and DynamoDB** to handle 100K+ daily API calls.
- Migrated monolithic applications to **AWS ECS Fargate** with ALB integration, cutting infrastructure costs by 40% and improving scaling latency.
- Implemented cost visibility dashboards using **AWS Cost Explorer** and tagging strategies, identifying \$120K in annual savings opportunities.

- Managed **AWS Secrets Manager, Parameter Store, and custom KMS policies** for securing multi-environment credentials and secrets.
- Conducted security assessments using **AWS Inspector, GuardDuty, and Security Hub**, remediating over 95% of critical findings.

Cloud/DevOps Engineer

Sep 2010 - Oct 2016

Hocs Consulting

Technologies: Azure (IaaS/PaaS, Functions, Event Grid, Traffic Manager, Blueprints), AWS (EC2, RDS, S3, ALB, CloudWatch, CodeDeploy), GCP (PoC/Migration), Terraform, Ansible, Jenkins, Python, PowerShell

- Migrated on-premise services to **Azure IaaS and PaaS**, improving scalability and cutting infrastructure costs by 40%.
- Developed **ARM templates** and Terraform scripts for consistent, repeatable Azure deployments across dev and production.
- Implemented **Azure Application Gateway and Traffic Manager** to optimize traffic distribution and enhance app performance.
- Built centralized log aggregation using Azure Monitor and Log Analytics, reducing troubleshooting time by 70%.
- Automated provisioning using Ansible and PowerShell scripts across **Azure and AWS**, reducing manual errors.
- Established secure interconnectivity between on-premises data centers and Azure via **VPN Gateway and ExpressRoute**.
- Delivered serverless solutions using **Azure Functions and Event Grid**, processing millions of events with minimal cost overhead.
- Supported governance and security with **Azure Blueprints, Key Vault integration, and Azure RBAC** implementation.
- Developed CI/CD pipelines using Jenkins integrated with **AWS CodeDeploy and S3** for artifact storage and rollback versioning.
- Deployed **EC2-based microservices** with Auto Scaling and ALB, automating deployment with Ansible and user-data scripts.
- Created monitoring stack using **CloudWatch Logs, Alarms**, and custom dashboards to track system health and application performance.
- Built custom backup and restore workflows for **RDS and S3-based data lakes**, ensuring disaster recovery compliance.

- Delivered **AWS training sessions** and onboarding documentation for junior engineers and client teams.

Projects

Microservices-based E-commerce Platform

- Led development of a cloud-native e-commerce platform using 20+ containerized microservices on Kubernetes with Istio service mesh
- Implemented event-driven architecture using Kafka, processing 10,000 transactions per second
- Achieved 99.99% uptime, 50% faster feature delivery, and supported a 300% increase in concurrent users
- Reduced infrastructure costs by 40% through efficient resource allocation and auto-scaling

Real-time Data Analytics Pipeline

- Architected a serverless data analytics platform ingesting 10,000 events/second from 50+ sources
- Utilized Splunk AWS Lambda, Kinesis, and Athena to process and analyze 100TB+ of data monthly
- Led a team of 8 in implementing real-time dashboards using Amazon QuickSight, reducing reporting latency from hours to seconds
- Achieved 60% cost reduction and 80% improvement in data freshness compared to previous batch-processing system

CI/CD Pipeline Optimization

- Redesigned CI/CD pipeline using Jenkins, Docker, and Kubernetes, reducing average deployment time from 45 minutes to 10 minutes
- Implemented parallel testing and caching strategies, cutting build times by 65%
- Integrated security scanning tools, identifying and addressing 98% of vulnerabilities before production deployment
- Increased deployment frequency from bi-weekly to daily, enabling faster time-to-market for new features

Education

University of Texas at Dallas
Bachelor's Computer Science
GPA: 3.7

Aug 2006 - Aug 2010

University of Texas at Austin
Master's Computer Science
GPA: 3.6

Oct 2010- Aug 2012
