SUMMARY

Results-driven Systems Engineer with 17+ years of experience in virtualization, infrastructure modernization utilizing HCI solution, and cloud integration. Proven ability to lead enterprise-scale IT transformations, optimize operational costs, and ensure regulatory compliance through innovative, secure, and scalable solutions.

ACCOMPLISHMENTS

- **Data Center Consolidation:** Led a team of six engineers in a large-scale data center consolidation following Umpqua Bank's acquisition of Columbia Bank. Decommissioned Columbia's data centers and migrated 200+ virtual machines and over 100 TB of application and shared data into Umpqua's environment. Scaled the Nutanix HCI infrastructure to support 100+ critical business applications, ensuring high performance, system availability, and full regulatory compliance. This initiative reduced operational expenses by 30% while maintaining uninterrupted service and security.
- **Merger Edge Site Reconfiguration – Columbia to Umpqua Integration:** Led reconfiguration of 130+ Columbia Bank branches post-merger to align with Umpqua's remote site standards. Migrated each site to a new network architecture, re-IPed infrastructure, and re-imaged servers and endpoints to meet security baselines. Created procedural checklists to standardize after-hours cutovers, enabling consistent, low-impact transitions. Enhanced standardization, operational efficiency, and regulatory compliance across the branch network.
- **Umpqua Bank Data Center Refresh Project:** Re-architected Umpqua Bank's primary and secondary data centers by deploying eight new Nutanix HCI clusters on Supermicro bare-metal nodes, replacing legacy compute and storage infrastructure. Followed Nutanix best practices using Foundation, Prism Element, and Prism Central for deployment and centralized management. Virtualized workloads using VMware vSphere 8, vCenter 8, and ESXi 7/8, with VLAN-segmented clusters designed by workload tier to optimize performance and security. Led hypervisor and firmware patching and implemented Nutanix and VMware lifecycle management tools to maintain FDIC and SOX compliance. Achieved a 50% reduction in rack space and a 25% decrease in operational costs.
- **Business Continuity & Disaster Recovery:** Designed and optimized Umpqua Bank's disaster recovery strategy to meet application-specific RTO/RPO requirements, ensuring business continuity for 70+ Tier 0 and Tier 1 applications. Configured and managed VMware Site Recovery Manager (SRM) with automated recovery plans, leveraging VMware Replication and Nutanix storage for seamless failover. Led and participated in the annual DR validation process, achieving 100% compliance with FDIC annual disaster recovery testing requirements.
- **Automation & Efficiency:** Automated Umpqua Bank's VM deployment and peer review workflows using custom PowerShell scripts, significantly improving operational efficiency. Reduced server build times by 70% and increased deployment accuracy by 90% by streamlining configuration validation and peer review processes. Enabled consistent, repeatable builds aligned with internal standards and compliance requirements.

CORE SKILLS & TECHNOLOGIES

Infrastructure & Virtualization

- **VMware:** vSphere 7/8, vCenter, ESXi, SRM, vSAN, VMware Replication, Aria Operations (vRealize), Log Insight
- **Nutanix:** Prism Central and Elements, AHV, Foundation, Move, Xray; Calm, HCI deployment and management on Supermicro hardware
- **Cloud Platforms:** Microsoft Azure (Entra ID, Key Vault, Storage, ARC, VNETs, NSGs, ExpressRoute, VM management)
- **Server Hardware:** Cisco UCS, HP Blade Servers, Dell PowerEdge, Supermicro, NetApp, Pure Storage, Dell EqualLogic

Backup, DR & Monitoring

- **Backup & Recovery:** Rubrik, Commvault
- **Disaster Recovery:** VMware SRM, Nutanix-native backup, site replication, Zerto
- **Monitoring & Performance:** Aria Operations (vROps), SolarWinds, Log Insight

Networking & Security

- **Core Networking:** IPv4, VLAN segmentation, trunked ports, port hardening, Ethernet, fiber optics
- **Advanced Networking:** Load balancing, hub-and-spoke topology, L3/L4 firewall configuration
- **Security & Compliance:** VMware NSX firewall, incident & vulnerability management, SOX/FDIC compliance

Windows & Systems Management

- **Windows Server:** 2016–2022, Failover Clustering
- **Microsoft Services:** Active Directory, DNS, DHCP, Sites & Services, GPOs
- **System Management:** SCCM, CrowdStrike, Rapid7, ServiceNow, Azure DevOps (ADO)

PROFESSIONAL EXPERIENCE

Morphew Consulting

Cloud Infrastructure Engineer Consultant

July 2024 – Present

- Built secure, redundant, and HIPAA-compliant Azure infrastructure to support healthcare case studies for patient outcome tracking and risk analysis. Designed the solution to be scalable, cost-effective, and aligned with lifecycle management and data protection best practices.
- Deployed new Azure tenant with Production and Restoration subscriptions; implemented Entra ID with custom attributes, groups, and MFA enforcement for secure identity governance.
- Integrated custom domain (morphewconsulting.com) with Azure DNS for internal name resolution.
- Architected segmented VNets with dedicated subnets for application, web, database, and Kubernetes clusters; enforced traffic control using NSG rules and Azure Firewall.
- Built AKS cluster hosting containerized PostgreSQL, application, and web components; implemented Application Gateway and Load Balancer for resilient traffic management.
- Configured Azure Blob Storage for persistent volume claims and backup data; secured access using Azure Key Vault for secrets and certificate lifecycle.
- Developed backup and recovery strategies meeting SLA-defined RTO/RPO targets; utilized Azure Defender for patch management, threat protection, and HIPAA compliance.
- Automated Kubernetes deployment via CI/CD pipeline using Python, with auto-renewing certificate-

based communication.

- Created audit trails and architectural documentation to support HIPAA tracking and long-term scalability.

Umpqua Bank

Systems Engineer III

Dec 2007 – Sept 2024

- **Infrastructure & Security Management:** Directed security hardening efforts across data centers and remote sites physical server hardware and storage using solution-specific hardening guides to meet NIS and DIS security standards. Maintained a secure VMware and Nutanix environment using Life Cycle Manager. Achieved a 99% monthly remediation rate for Windows and Linux vulnerabilities through SCCM, Ansible, and ServiceNow tracking. Implemented AES-256 encryption for data at rest across storage solutions and edge site servers.
- **Virtualization & Documentation:** Developed comprehensive documentation for virtualization and infrastructure operations, standardizing deployment, maintenance, and patch management processes.
- **VMware Monitoring and Operations:** Implemented and configured VMware Aria Operations for monitoring and analytics, improving system visibility and proactive remediation. Created Nutanix Blueprints to automate VM resource constraints.
- **Data Protection & Compliance:** Spearheaded FDIC and SOX audit compliance efforts, ensuring timely remediation and adherence to regulatory requirements.
- **Vendor & Cross-Team Collaboration:** Partnered with VMware, Nutanix, and Rubrik to maintain a secure and optimized infrastructure, addressing issues, exploring emerging technologies, and enhancing business capabilities.
- **Hyper-Converged Infrastructure (HCI) Implementation and Maintenance:** Spearheaded the implementation and upgrade of Nutanix HCI on bare-metal Supermicro servers, fully integrated with a private cloud environment leveraging VMware vSphere 7/8, vCenter 8, and ESXi 7 hosts. Oversaw ongoing firmware, software, and hypervisor patching across all nodes to ensure optimal performance, security compliance, and minimal downtime.
- **VM & Storage Administration:** Designed, deployed, and maintained Windows Server 2012–2022 VM templates across multiple sites. Managed and optimized over 2,500 VMs across data centers and 300 edge sites, increasing system availability to 99.999% and improving storage efficiency by 25% via proper workload placement and storage tiering.
- **Backup & Disaster Recovery:** Managed Rubrik environments protecting 1,200+ VMs with mirrored clusters and Azure archival. Led version upgrades, resolved issues with vendor support, and maintained DR solutions using Zerto and VMware SRM, ensuring 100% SLA compliance through continuous backup and recovery testing.
- **Security & Vulnerability Remediation:** Collaborated with security teams to proactively address findings from penetration testing, utilizing VMware Skyline, VMware Life Cycle Manager, and Nutanix Life Cycle Manager.
- **Technical Leadership & Support:** Provided Level 3 escalation support for VMware and Nutanix environments, mentoring junior engineers and fostering professional growth.
- **Testing & Performance Optimization:** Conducted system testing and troubleshooting to maintain uptime, optimize infrastructure performance, and align SLAs with risk assessments.

EDUCATION & CERTIFICATIONS

Bachelor's degree in computer science

Western Oregon State College Monmouth, OR

- **VMware Certified Professional – Data Center Virtualization [VCP-DCV 2024]**, VMware – Aug 2024
- **Microsoft Certified: Azure Fundamentals**, Microsoft – Apr 2024
- **Nutanix Certified Professional - NCP** -Oct 2019
