DMITRIY NAZAROV

(703)3030407

SDET / QA Automation Engineer

Irving, TX

<https://linkedin.com/in/dmitriy-nazaroff-b485a3272>

ABOUT ME

Software **Quality Assurance Automation Engineer** with **7+years** of experience in performance, functional, integration, security testing. Skilled in **Selenium** and **Cucumber** BDD framework for UI and automation for API testing, has experience in database testing. Proficient in creating and executing automated test scripts, identifying defects. Able to design and implement automated testing frameworks to improve efficiency and reduce manual testing efforts.

PROFESSIONAL SUMMARY

Full Experience in generating **Test Plans**, writing proper **Test Scenario**, and executing **Test Cases**, tracking, and logging **Defects** in **Jira**, analyzing **Tasks** and **Test Summary Reports**. Has experience in each phase of **Software Testing Life Cycle (STLC)** and **Software Development Life Cycle (SDLC)**.

Advanced knowledge of **Java** and its frameworks and concepts like **OOP**, **Collections**, **Stream API**, **DateTimeAPI**. Hands on experience writing **SQL Queries** along with data integrity and data validation testing, as well as performing **Database Testing** using ETL process. Proficient in testing **REST API** using tools like **POSTMAN** and **JMeter**, **Gatling** as manual tools and **RestAssured Framework** for automation.

Designed and maintained several automation frameworks like **Hybrid Framework**, **Test-Driven Development Framework**, **Data-Driven Framework**, **Behavior Driven Development Framework**, **Page Object Model Framework** using **Selenium WebDriver** and **Cucumber (Gherkin Language)**.

Has an expertise of working with cloud platforms as **Amazon Web Services (AWS)** and **Google Cloud Platform (GCP)**, for running test frameworks in a more efficient way to test loading and performance.

EDUCATION

09/2006 - 05/2010	Bachelors of International Relations / Karaganda University
04/2015 - 08/2015	Computer Educational Center , San Francisco, CA <i>Advanced Quality Assurance Engineering</i>
09/2015 - 03/2016	Computer Educational Center , San Francisco, CA <i>Test Automation with Selenium WebDriver using Java</i>

SKILLS

UI testing frameworks	Selenium WebDriver, Selenium Grid, Serenity, AppliTools
API testing frameworks	RestAssured, Postman, JMeter, Swagger, REST API
DataBase tools	MySQL, MS SQL, PostgreSQL, MongoDB, ETL
Common Frameworks	JUnit, TestNG, Cucumber, Apache POI, JDBC, Lombok
Special tools and frameworks	Jira, Agile, Scrum, Kanban, BDD, POM,
Mobile testing frameworks	Appium, Espresso, Selendroid, AVD emulator
Build framework and tools	Maven, Git, GitHub, Jenkins, Gatling, Docker, Kubernetes
Languages	Java, Python, HTML, JavaScript, Gherkin, Groovy
Cloud	Amazon Web Services (AWS), Google Cloud Platform (GCP), Azure

EXPERIENCE

Title: QA engineer	Client: Chase / Wilmington, DE	Period: 02/20 - Present
Achievements and Tasks:		
- Designed and implemented automated tests for web and mobile banking applications using Selenium WebDriver, Appium. - Developed and maintained the automation test framework, improving the overall efficiency and reliability of the testing process. - Create and edit Confluence Wiki pages for sharing knowledge and useful information - Conducted performance testing using tools like JMeter to identify bottlenecks and optimize application performance. - Designed a new framework for the project that uses AI tools for testing such as AppliTools. - Involved in moving the test environment from the inner server to EC2 AWS		
Environment:	Java, Selenium, Cucumber, API, JMeter, Postman, Appium, AWS	

Title: SDET	Client: CarMax / Richmond, VA	Period: 01/2018 - 12/2019
Achievements and Tasks:		
- Worked on automation of tests for web and mobile applications, using Selenium - Built Test Automation Java BDD Framework from scratch using Maven, Cucumber, JUnit - Responsible for implementing Page Object Model (POM). - Worked on Cross-Browser compatibility and fixed the bugs for several browsers. - Worked on increasing efficiency and reducing costs for software. - Used Jenkins as CI Tool and used JUnit plugin with Jenkins to generate high quality reports.		
Environment:	Java, Selenium, Cucumber, Jenkins, BDD, Maven, JUnit, POM	

Title: Quality Analyst	Client: Duke Energy / Charlotte, NC	Period: 03/2016 - 12/2017
Achievements and Tasks:		

- Designed and developed manual Test Cases and scenarios for testing procedures.
- Recorded, reported, and documented bugs/defects in JIRA.
- Extensively queried through SQL to check the database records in MySQL database.
- Assisted in creating Test Automation Projects using Selenium and Cucumber BDD

Environment:

Manual Testing, Jira, MySQL, Selenium WebDriver, Cucumber
