

Project Management

Strategic project management leader with proven expertise driving enterprise technology initiatives, digital transformation, and cross-functional team performance within large-scale government and financial institutions.

Demonstrated success in delivering mission-critical IT programs, managing end-to-end lifecycle of infrastructure modernization, cloud migration, and PMO operations. Adept at leading remote and onsite teams across complex environments, ensuring alignment with organizational objectives, timelines, and regulatory standards. Known for integrating innovative tools such as AI and MDM to optimize workflows and increase transparency. Excel at cultivating stakeholder partnerships, navigating matrixed organizations, and deploying scalable systems to enhance service delivery and risk mitigation. Dedicated to advancing operational efficiency through structured change management and continuous improvement strategies.

Areas of Expertise

- | | | |
|--------------------------------|-----------------------------------|---------------------------------------|
| ♦ Project Lifecycle Management | ♦ Team Building & Leadership | ♦ Infrastructure Modernization |
| ♦ Enterprise System Migration | ♦ Agile & Waterfall Methodologies | ♦ Artificial Intelligence Integration |
| ♦ Cloud Implementation | ♦ Remote Team Coordination | ♦ Process Improvement |
| ♦ PMO Operations | ♦ Change Management | ♦ Data Center Relocation |
| ♦ Stakeholder Engagement | ♦ Risk Mitigation Strategies | ♦ Regulatory Compliance |

Professional Experience

Arizona Department of Economic Security – DTS, Phoenix/Remote Senior Technical Project Manager

2017 – Present

Direct enterprise-wide technical initiatives within the Project Management Office (PMO), leading cross-functional teams through modernization of legacy infrastructure and migration to scalable, FedRAMP cloud-based platforms. Manage stakeholder communications, oversee scope alignment, and ensure compliance with strategic IT governance standards. Facilitate coordination between technical departments, business units, and external partners to drive alignment and project success. Design and implement structured change management strategies to support digital transformation efforts across the organization.

- Delivered 1.4M+ pages annually to support remote work transition by managing enterprise-wide implementation of Cloud EFax with 99.7% uptime.
- Enabled uninterrupted PMO operations during pandemic by establishing first-ever virtual project management office.
- Advanced project visibility and efficiency by integrating Artificial Intelligence into PMO workflows.
- Strengthened system availability and storage capabilities by leading NetApp Data Center Storage Refresh project to completion.
- Expanded secure public access across critical locations by managing statewide AZDES Kiosk deployments and configuring protected VRF networks.
- Minimized operational disruptions and improved data integrity by directing Data Center Relocation initiatives and ACA implementation across multi-phase rollouts.

Wells Fargo, Remote Senior Technical Project Manager

2015 – 2017

Led technology-driven initiatives for the Security and Mobile Unit Install Team, providing end-to-end project execution support across distributed environments. Managed resource planning, remote coordination, and technical deliverables across geographically dispersed teams. Served as key liaison between development, operations, and business units, ensuring project requirements were met through collaborative execution.

- Managed multiple high-impact projects across U.S.-based and international teams by coordinating schedules, resources, and delivery expectations.
- Enhanced solution delivery by providing strategic leadership to project teams during implementation and release phases.
- Increased collaboration and team efficiency by delivering matrix leadership across cross-functional departments.
- Improved deployment readiness and system performance by leading technical design for environment build-outs.
- Streamlined project execution by remotely managing diverse teams and resolving interdependencies in real time.

Oversaw complex system upgrades and organizational change initiatives, leading technical staff in transitioning from legacy systems to standardized enterprise solutions. Implemented process-driven methodologies to elevate performance, reduce incident rates, and ensure structured change control. Provided technical leadership and mentorship to team members while aligning efforts with executive priorities and state regulatory mandates. Led the PMO in SaaS deployments.

- Piloted full-scale Mobile Device Management (MDM) test program across DES to enhance security and device oversight.
- Improved process discipline and reduced project risk by implementing new operational guidelines and promoting procedural consistency across DTS.
- Supported statewide technology transformation by managing Phase I and Phase II of Data Center Relocation and ACA platform integration.

Additional Experience

Technical Project Manager / Systems Designer, TIWAMA Communications, Inc., Gilbert

Technical Project Manager, American Express, Phoenix

Technical Support Manager, Union Bank of Switzerland / Perot Systems, Chicago

Senior Network Engineer, Oak Park Hospital, Chicago

Education

Bachelor of Science in Computer Science with minor in Psychology, University of Wisconsin - Whitewater

Licenses & Certifications

Certified Scrum Master (CSM)

Scrum Fundamentals Certified (SFC)

Certification, AI Foundations for Everyone - IBM/Coursera

- Introduction to Artificial Intelligence (AI) Certification
- Generative AI: Introduction and Applications Certification
- Generative AI: Prompt Engineering Basics Certification
- Building AI Powered Chatbots Without Programming Certification

Certification, Implementation Manager - Gateway Community College, Phoenix

- Clinical / Practitioner Consultant Certification
- Workflow Redesign Certification

ITIL Foundations, v3

CompTIA Security+

Epic ADT, Office Visit and Basic Module Design courses

Microsoft Certified Professional (MCP)

Microsoft Certified Engineer (MCE)

Class K-67 Residential & Commercial Low Voltage Communication Systems Contractors License

Affiliations

Registrar of Contractors

Custom Electronic Design and Installation Association

North American Board of Certified Energy Practitioners

Technical Proficiencies

Project Management: Agile Methodologies, Scrum, Kanban, Waterfall, Risk Management, Change Management

Software: MS Office 365, MS Project, SharePoint, SQL, Citrix, Epic ADT, vSphere, Faronics, ServiceNow (PPM)(ITSM), MS Project, Jira, Monday

Cloud & Virtualization: AWS, Azure, Google Cloud, VMware, Hyper-V Hardware: NetApps FAS, Cisco Switches & Routers, F5, FedRAMP Compliance

Operating Systems: Windows 11/10, Mac OS, Google Suite Tools: Azure, Google Meet, Zoom

Analysis Tools: Tableau, Google Analytics
