QA Automation Engineer/SDET

Detail-oriented and proactive QA Automation Engineer with hands-on experience throughout the software development lifecycle. Known for utilizing advanced automation frameworks, cloud setups, and CI/CD practices to ensure the highest standards of product quality and efficiency. Extensive background in end-to-end automation testing, data privacy compliance, and performance validation.

Technical Skills

- **Testing Approaches:** Proficient in Agile and SCRUM methodologies, full SDLC and STLC, with experience in BDD and TDD frameworks.
- **Automation Tools:** Skilled in Cypress, Playwright, Selenium WebDriver, Appium for UI and mobile test automation.
- **Build & CI/CD Tools:** Familiar with Jenkins, GitHub Actions, and Maven for automated test integration and deployment.
- **Frameworks:** Experience with BDD (using Cucumber), Hybrid, TestNG, and Page Object Model.
- **Programming Languages:** Comfortable coding in Java, JavaScript, Python.
- **API & Performance Testing:** Utilizes Postman, RestAssured, JMeter, SOAP UI, and Locust for backend and load testing.
- **Cloud & Containers:** AWS, Docker, and Kubernetes for environment setup and consistency.
- **Version Control & Collaboration:** Git, GitHub, Bitbucket, SVN, JIRA, Rally, Confluence.

Professional Experience

CDC (Centers for Disease Control and Prevention) | Contingent via Accenture

Test Automation Engineer Aug 2023 – Present

- Created and optimized automation strategies for CDC's data-driven health applications, prioritizing user safety and data privacy through comprehensive testing workflows with **JavaScript** and **Cypress**.
- Built API test cases with **Postman** and **RestAssured**, streamlining backend validation and reducing system downtime.
- Tested **Power app** applications using the **Microsoft power platform**, conducted end to end testing of Microsoft power apps to ensure functionality and performance.
- Developed and executed end-to-end tests using **Playwright with Webkit** to validate iOS-specific workflows ensuring cross-browser compatibility.
- Implemented automated test suites within **GitHub Actions** and **Jenkins**, achieving significant reductions in test cycles and improved efficiency in deployments.
- Leveraged **AWS** and **Docker** for consistent environment setups, conducting parallel testing across multiple browsers.
- Performed load and performance testing using **JMeter** to identify and resolve potential bottlenecks early.

Environment: Cypress, Playwright, JavaScript, Postman, GitHub Actions, JMeter, AWS, Docker, JIRA, Microsoft Power Apps

Meta Inc. | Contingent via Solvd Inc.

QA Automation Engineer Aug 2022 – July 2023

- Contributed to Meta's **Privacy Implementation Review (PIR)** team, developing automated frameworks to ensure high standards of privacy and security across web applications.
- Coordinated UAT and cross-functional collaboration for feature validation with a strong focus on privacy compliance.
- Conducted regular code reviews for Java and Python to identify areas for optimization, enhancing the test framework's reliability.
- Performed in-depth **Python** code reviews line by line to ensure correct implementation of designated privacy features and adherence to security protocols.
- Tested **Machine Learning Models** to validate purpose limitation, ensuring user data was processed strictly for intended use cases in compliance with privacy guidelines.
- Integrated test automation into CI/CD pipelines with **Buck**, ensuring complete testing coverage with nightly build cycles.

Environment: Java, Python, Jest, SQL, Buck, Docker, Hive, Machine Learning (ML)

Citi Bank, Irving, TX

Senior QA Automation Engineer Jun 2019 – Aug 2022

- Crafted a scalable BDD automation framework using **Cucumber** and **Selenium WebDriver**, improving test efficiency for financial applications.
- Used Maven for building the WebDriver project integrated with Continuous Integration tools Jenkins for running tests on a nightly basis automatically.
- Used Java as client library for Selenium and WebDriver to design and develop Automation test Framework using TestNG.
- Developed robust test cases for REST API validation using **Postman** and **RestAssured**, enhancing backend service reliability.
- Developed and Executed mobile automation scripts using **Appium** across simulators and emulators, performing extensive testing for **iOS and Android** applications.
- Automated comprehensive web and UI tests using **AWS** to ensure consistent results across varied environments, with **Jenkins** integration for seamless CI/CD operations.
- Conducted thorough data validation via SQL, identifying and reducing data-related issues by 25%.
- Spearheaded acceptance testing with **Cucumber**, which led to a more streamlined release process for high-stakes banking features.

Environment: Selenium WebDriver, Cucumber, Appium, Maven, TestNG, Jenkins, Postman, RestAssured, AWS, SQL, Agile

South Texas Health Systems, Edinburg, TX

QA Automation Engineer Jan 2016 – May 2019

- Developed and maintained automated tests for healthcare applications with **JUnit** and **Selenium WebDriver**, focusing on ensuring quality and accuracy in crucial workflows.
- Conducted mobile automation testing using **Appium**, enabling cross-platform validation across iOS and Android.
- Set up CI/CD automation in **Jenkins** and conducted parallel testing across browsers with **Selenium Grid**.
- Designed comprehensive API tests with **SOAP UI** and **Postman** to cover integration points across RESTful and SOAP services.
- Worked in an Agile team environment, contributing to sprint planning and enhancing test coverage across multiple phases.

Environment: Selenium WebDriver, JUnit, Appium, SOAP UI, Postman, JIRA, Agile

Education

Bachelor of Science in Information Technology

University of Texas at Tyler, Tyler, TX

Active Security Clearance:

Public Trust Clearance
