

Elvie Djomo

Dallas, TX | (347) 486-4241 | Elviedjomo@gmail.com

Professional Summary

DevOps Engineer with 7 years of experience, specializing in streamlining development workflows, optimizing cloud infrastructure, and automating deployment pipelines. Proven expertise in a variety of DevOps tools and methodologies, ensuring seamless software delivery and high system availability. Committed to enhancing team collaboration and efficiency while delivering scalable and secure solutions and collaborative skills.

Skills Highlights

- Experience in configuring and managing core Amazon Web Services - Identity and Access Management (IAM), Elastic Cloud Compute (EC2), Simple Storage Service (S3), Elastic Load Balancing (ELB), Virtual Private Cloud (VPC), RDS, Route53, CloudWatch, Trusted Advisor, Autoscaling.
- Experience with revision control systems - Git, GitHub.
- Experience with server configuration - Amazon Linux, Windows Server 2016 or higher, SUSE
- Experience with Infrastructure as a Code tools – CloudFormation, Ansible, Terraform
- Experience with containerization technology – Docker, Kubernetes (EKS, ECS), Helm
- Experience with DevOps tools to include Docker, Ansible, Jenkins, GitHub, Git, GitLab CI, ArgoCD, GitHub Actions, AWS CodeBuild, AWS CodeDeploy and AWS CodePipeline
- Monitoring & Logging: CloudWatch, Prometheus, Grafana, ELK Stack
- Security & Scanning: Trivy, SonarQube, AWS Trusted Advisor
- Experience customizing, managing and scaling monitoring, metrics collection and graphing systems.

Professional Experience

CloudSpace Consulting – Manassas, VA
Cloud/DevOps Engineer | Dec 2020 – Present

- Designed and deployed fault-tolerant, cost-efficient infrastructure on AWS to support scalable and reliable cloud-based applications.
- Built and maintained infrastructure using **Terraform** and **Ansible**, ensuring consistency and repeatability across development, testing, and production environments.
- Implemented application and infrastructure monitoring using **AWS CloudWatch** and **SNS**, enabling faster detection and response to system issues.
- Automated deployment processes, system updates, and maintenance tasks with configuration management tools, improving efficiency and reducing manual workload.
- Developed reusable **Ansible Playbooks** and **CloudFormation templates** for standardized provisioning and configuration of AWS environments.
- Collaborated with development and operations teams to streamline **CI/CD pipelines**, improving deployment workflows and supporting agile delivery cycles.
- Performed routine infrastructure reviews using **AWS Trusted Advisor** to improve security, performance, and cost management.
- Provided operational support for distributed applications, working closely with cross-functional teams to maintain service reliability.
- Created and maintained documentation including system architecture diagrams, operating procedures, and runbooks to support operational excellence.
- Proactively identified opportunities for automation and continuous improvement in deployment and infrastructure management processes.

Pro-core Plus, Silver spring, MD

DevOps Engineer | Nov 2019 – Dec 2020

- Managed AWS and Azure cloud platforms, including EC2 instances, S3, RDS, and Azure VMs. Utilized EC2 Auto Scaling for maintaining high availability.
- Automated build and deployment workflows using Jenkins, Maven, Docker, and Ansible.
- Created Jenkins declarative pipelines for building and deploying applications.
- Developed automation scripts in Python for various tasks, such as log rotation and application deployment automation.
- Installed and configured version control tools like Git and SVN on Linux systems. Managed Git repositories and configured Git hooks.
- Administered Windows servers, including installation and maintenance, as well as troubleshooting Windows-specific issues.

- Integrated AWS services like Elastic Beanstalk, Elastic Load Balancer, and CloudFormation for application deployment and scaling.
- Managed databases in AWS, including RDS and EBS. Utilized RDS for managed database services and EBS for block storage.
- Designed cloud architectures for high availability, security, and scalability.

Smarteck Partners LLC – Manassas, VA

Cloud Engineer | June 2018 – Oct 2019

- Migrated legacy on-premise applications to AWS using **CloudEndure** and **EC2**, helping modernize infrastructure and reduce reliance on physical hardware.
- Created and maintained **Ansible Playbooks** and **CloudFormation templates** to provision and manage cloud environments efficiently.
- Developed **runbooks** and **standard operating procedures (SOPs)** to support consistent and effective incident response.
- Configured key AWS services including **IAM roles, VPCs, subnets, NAT Gateways, and Route 53** to meet organizational security and networking standards.
- Participated in a rotating on-call schedule to support system uptime and reliability, handling critical incidents in alignment with service expectations.

Community Care Center – La Mesa, CA

Nurse Assistant | Dec 2011 – May 2018

- Delivered patient care and maintained accurate medical records
- Educated patients and families on health and recovery procedures

Education

Douala University – Douala, Cameroon
Associate Degree in Economics | June 2010

Bachelor Degree in Economics | June 2011

Certifications

- AWS Certified SysOps Administrator – Associate
- AWS Certified Cloud Practitioner

LANGUAGE

- French (Fluent)
- English (Fluent)
