Email: tygaurav5@gmail.com

Experience Overview

12+ years of strong experience working as a senior Database administrator/Architect in a mission-critical production environment. Highly skilled in production-support, designing, analysis, modeling, development, administration, implementation, performance, troubleshooting, and migration to the Cloud for Oracle, MongoDB, MS-SQL, AWS Redshift, and PostgreSQL databases. Involved in designing the architecture, logical, and physical model of enterprise-level databases. Solid experience in Oracle GoldenGate, Exadata, RAC, Grid, ASM, Data Guard, AWS RDS, MongoDB, and No-SQL Database technologies. Highly motivated, independent, and result-driven.

Experience Summary

- Over a decade of broad experiences in Oracle Databases (12c,19c,21c) as a Sr. Oracle DBA.
- Very strong experience with Oracle GoldenGate (12c,19c,21c) for Uni/Bi-Directional (active-active) and microservices replication.
- Expertise in Oracle, MongoDB, Goldengate, Cassandra, MySQL, PostgreSQL, MariaDB, SQL Server, Azure Cosmos, and RDS databases.
- Experience in managing Percona/Aurora PostgreSQL and MongoDB databases.
- Strong experience in database migrations on AWS EC2/RDS cloud and Azure cloud.
- Experience working with AWS, Azure, and GCP cloud providers.
- Experience in upgrading databases to the latest versions (In-place/out-of-place upgrade).
- Hands-on experience in RAC (Real Application Clusters), Data Guard/Standby, ASM, Data Guard Broker, and Grid Control.
- Competent in planning and implementing Oracle database backup and recovery strategies, such as user-managed backup, RMAN backup with/without catalog, cold and hot backup, full/incremental backup.
- Design and manage Big Data solutions, including AWS EMR, EMR Studio, and Azure Databricks.
- Experience working with modern cloud data platforms like AWS, Azure, GCP, Snowflake, Databricks, etc.
- Experience sourcing and modeling data from third-party APIs.
- Have a technical understanding of Oracle Fusion Cloud ERP & Procurement Cloud platform.
- Experience with cloud-based deployments, SaaS models.
- Prior experience integrating systems and managing work using the Agile software development lifecycle.
- Strong experience in Oracle Server installations/upgrades, space management, RAC, Oracle Data Guard, and backup/recovery, Replication, Capacity Planning, Disaster Recovery, Database Performance Tuning, Security Administration, Index and Cluster Partitioning, Patching, Data-Pump, Import/Export, RMAN, SQL-Loader, Fine-Grained Auditing (FGA), Database Auditing.
- Understanding the process of creating an end-to-end application that involves front/back-end interfaces and integration.
- Supported SAP application with Oracle Database on Oracle Cloud.
- Collaborate with cross-functional teams to ensure seamless SAP system integration.
- Experience working on Redis ElastiCache in-memory Database.
- Experience working with SAP ERP applications and supported database tuning, maintaining security, conducting backups, and optimizing SAP environments.
- Experience with Neo4J GraphDB.
- Experience with Oracle Autonomous Database.
- Performed several Database migration from Oracle/mongo DB to RDS, Azure Cosmos.

- Experience working in Amazon relational Database services Aurora MySQL and Aurora PostgreSQL.
- Create and manage conceptual, logical, and physical data models and metadata.
- Strong Data Modeling skills to include data quality, source systems analysis business rules validation, source to target.
- Experience working with Cloudera Data Platform (CDP).
- Strong working experience in Protected Health Information (PHI), Personally Identifiable Information (PII) HIPAA Privacy regulations and security Rules.
- Develops testing approaches, plans, scripts, and documentation of results. Creates and maintains the data catalog for the enterprise data warehouse.
- Working on AWS EC2/ RDS Aurora Postgres Databases and managing advance features.
- Proficient and experienced in data modeling (Conceptual, Logical, Physical, 3nF, Dimensional) at both project and enterprise levels.
- Performed data management and data analytics using Cloudera hybrid data platform.
- Proven experience with Microsoft SQL Server, T-SQL, Stored Procedures & Triggers, SSIS, SSRS, PowerShell, Power BI, Python, R.
- Experience in Oracle data security and encryption technologies such as TDE and Advanced security.
- Experience with AWS services like Lambda, S3, EC2, VPC, Redshift, IAM, EBS, CloudFront, Snowball, CloudWatch, DynamoDB, Glacier, SES, SNS.
- Overseeing and providing support for Oracle Cloud Integration (OCI) implementation and integration of multiple business applications.
- Develops physical data models and/or works with a data modeler to develop physical data models.
- Experience working with Exadata X3/X5/X6/X8 series servers.
- Strong experience in database patching, migration, and version upgrades.
- Experience working with Oracle Engineered Systems and Oracle's ZFS Storage Appliance (ZFS).
- Expertise in supporting MongoDB stand-alone, replica set, and Shard databases.
- Expertise in working with the AWS Database Migration Service (DMS) and AWS Schema Conversion Tool (SCT).
- Experience working in Oracle REST Data Services (ORDS) and bridges HTTPS and Oracle Database.
- Experience in installing, deploying, and managing Snowflake databases on a day-to-day basis.
- Capable of developing management and monitoring scripts using Korn/Bash Shell, Python, and Perl, and developing automatic monitor frame work using Autosys/Cron jobs.
- Managed databases of various sizes, from 1GB to 300TB+.
- Managed other DBAs while leading the offshore team and served as a Database Administrator/Lead DBA. Worked as a team member in a 24x7 production environment and provided on-call and day-to-day support.

Professional experience

United Health Group

(Sr. Database Administrator consultant)

Location: Dallas, Texas

June 2022- Till

- Work as the primary SME DBA in the commercial applications DBA team to support production applications, and serve as a key member of the Front-Line Support team.
- Support Oracle Databases on 4-Node RAC Cluster with Oracle 19.2, ASM, and Oracle Cluster ware and Managed Exadata X-5 and X-6 servers.
- Performed day-to-day activities: Such as daily error checks and database health, monitoring of physical resources (disk space, memory, CPU). Performance Checks, GoldenGate replication checks, OS checks.
- Creating/Managing CDB / PDB and have done migrations from 11g to 12c.
- Supporting PostgreSQL 9.x for day-to-day operations as a Database administrator.
- Worked on applying quarterly CPU patch published by Oracle for every quarter for RAC and non-RAC Databases.
- Supporting up to 2-node physical/logical Data guard.
- Implemented Oracle GoldenGate 12/21c Bi-Directional (active-active) replication.

- Operational Snowflake support, Physical Database Design and Indexing, Apply Software Upgrades, Backup and Recovery.
- Migrated Oracle on-prem Databases to AWS RDS/EC2 and Oracle cloud.
- Implemented Oracle transparent data encryption (TDE).
- Day to day Application support and address Performance tuning via AWR, ADDM, ASH, Explain plan.
- Install, configure, harden, patch, upgrade, migrate, maintain, and administer production and development MSSQL 2019 and 2022 instances.
- Managing MongoDB installation, CRUD operations, backup, restore, recovery, security best practices, replication and sharding.
- Supporting migrating from traditional on-prem OLTP/OLAP databases to cloud native DBaaS and/or NoSQL databases like Cassandra, Neo4J, Mongo DB, Cosmos DB.
- Performed cross-database migration from Oracle to PostgreSQL and MongoDB.
- Provide Production DBA support, as needed, on a 24/7 basis.
- Administer and maintain Redshift databases on AWS cloud.
- Implement ETL solutions using Microsoft SSIS on Azure Data Factory.
- Configuring and maintaining RMAN backups utilizing Database Cloud Service Console and EM/GRID Control.
- Work closely with Cloudera's teams at all levels to help ensure TPO's needs are met.
- Managing Oracle Advanced Security and Data Encryption with the use of TDE.
- Managed MongoDB, MariaDB on-premise databases for Atlas and Percona Multi-Cluster.
- Managing EDB, Percona, and community PostgreSQL databases.
- Managing Oracle Goldengate 19c/21c bi-directional (active-active) replication across multiple regions.
- Managing databases on multiple cloud platforms, such as AWS, GCP, and Azure.

Delta Airlines

(Sr. Database Administrator/Architect)

Location: Eagan - Minnesota

Sep 2019- June-2022

- Worked as the primary application DBA and support the development and production applications, and serve as the key member in the Front Line Support On-Call team covering mission critical applications.
- Worked as the primary application DBA and support the development and production applications, and serve as the key member in the Front-Line Support On-Call team covering mission critical applications.
- Conduct Performance Tuning OGG in extremely high data volume environments. Participate in analysis and designing of Oracle Exadata Server for infrastructure and related projects.
- Established database backup/recovery strategy for different databases. Utilized RMAN for backup and recovery strategy. Completed export and import of different databases using Oracle TTS, Datapump utilities and SQL Loader. Applied different recovery procedures for complete and incomplete recoveries depending on the type of failure.
- Setup/Maintenance of Test/Development/UAT Servers setup (PostgreSQL 9.x 10.x).
- Disaster recovery planning or Emergency Recoveries and Ensuring Recoverability of Databases. (PostgreSQL 9.x 10.x).
- Data mine the Enterprise Database Warehouse (EDW) and also maintaining SQL query output in Access Database or SQL Server applications.
- Review and install updates and patches for the Banner ERP and related 3rd party products.
- Implements and maintains Data Modeling Governance processes to include change management and configuration management for supported data models.
- Performed SQL tuning including reviewing SQL code, using Explain Plan, Oracle hints, adding SQL profiles, adding or pinning SQL plan baselines (SPM), rebuilding tables with different parameters or partitioning large tables & indexes to minimize contention waits. Also provided tuning recommendations to Application jobs, time/CPU consuming queries.
- Provides documentation to support the Kimball Dimensional Data Modeling Framework.
- Implement SSRS, SSAS, SSIS, and data warehousing.
- Migrated MongoDB, Postgres SQL Database to EC2 instance.
- Managed multiple shards and replica-sets for MongoDB Database.

- Support of Oracle GoldenGate 19c Uni/Bi-Directional (active-active) replication for Oracle databases, perform Data-sync, fixing GG abends, errors on active replication.
- 24X7 level L3 DBA support for the production systems.

Citi Group
(Sr. Oracle DBA/ Architect)

Location: Irving, Texas
Jan 2018- Sep 2019

- 24X7 level L3 DBA support for the production systems.
- Responsible for tuning database performance for business-critical applications.
- Designed, developed, implemented, and supported MongoDB database solutions that are highly available and scalable.
- Supported backup/recovery, security, monitoring, performance tuning, and managed MongoDB/Cassandra clusters.
- Supported PostgreSQL, RDS and Cosmos DB for day-to-day operations as a database administrator.
- Review Oracle stored procedures, functions, and packages using advanced PL/SQL features and dynamic SQL.
- Deploying and administering SSIS packages, troubleshooting execution issues including analyzing package, and making appropriate changes.
- Implemented Oracle GoldenGate Bi-Directional (active-active) replication for Oracle databases.
- Design and configuration of the GoldenGate extracts/ replicats / Oracle initial load / transformation/mapping.
- Data refresh using the Data Pump utility and SQL loader from production to UAT, SIT, and DEV.
- Perform RMAN online backups (full or incremental) of Oracle RAC databases, setting up and monitoring standby databases.
- Optimize postgresql.conf for performance improvement. (PostgreSQL 9.x 10.x).
- Performed maintenance tasks to fix Oracle index/object fragmentation for highly used objects and scheduled daily updates of stats on critical objects as part of the maintenance plan.
- Performed administrative tasks include managing database files, backing up/restoring, security management, database mirroring, data integration, and synchronization.
- Supported AWS, ORaaS (Oracle as a service), and migrated Oracle Database to the cloud.
- Worked on Software as a Service (SaaS), Platform as a Service (PaaS), and Infrastructure as a Service(IaaS).

Fox Networks Group
(Sr. Oracle DBA consultant)

Location: Los Angeles, CA
Dec 2015- Jan 2018

- Administration, design, implementation, and support of highly available and scalable distributed MongoDB database solutions.
- Support Oracle Databases on 4-Node RAC Cluster with Oracle 12, ASM, and Oracle Cluster ware.
- Design installation and configuration of all Database products including Oracle RDBMS, Oracle Enterprise Manager (12c, 13c), Exadata, ZDLRA, Golden Gate.
- Implemented GoldenGate extracts/ replicats / Oracle initial load / transformation/mapping.
- Data Refresh using Data Pump Utility, SQL Loader from Prod to UAT, SIT, and DEV.
- Worked on applying patches for enhancement and fixing bugs using Adpatch, Opatch.
- Administration and upgrade experience of Oracle EBS 12.
- Administration and Management replication via Oracle GoldenGate and Qlik replicate.
- Provide Level 3 on-call support for the 24/7 Oracle/MongoDB database environment.
- End-to-end performance diagnostics and tuning for large-scale production databases using OLTP/OLAP.
- Develop and construct Cassandra databases and assist with daily tasks.
- Created/Managed CDB/PDB and migrated Oracle as a service (ORaaS) from 12c to 19c.
- Performed day-to-day activities: such as daily error checks, database health monitoring, and monitoring of physical resources (disk space, memory, CPU), Performance Checks, GoldenGate replication checks, OS checks.
- Logical and physical design of Oracle databases as an architect.
- Managing RAC multi-node instances on RAC clusters.

Kaiser Permanente
(Sr. Oracle DBA consultant)

Location: Pleasanton, CA
Jan 2014- Dec 2015

- Provide Production DBA support, as needed, on a 24/7 basis.
- Support Oracle Databases on 4-Node RAC Cluster with Oracle 11.2, ASM, and Oracle Cluster ware and Managed Exadata X-5 and X-6 servers.
- On-boarding pharmacy stores from multiple source servers into a Production system using Oracle GoldenGate on Exadata X3 servers.
- Database migration from IMB legacy Informix to Oracle and MS-SQL server.
- Protect PII, PHI and PCI Data and worked on HIPAA regulations to protect US healthcare data.
- Provide Level 3 on-call support for the 24/7 Oracle/MongoDB database environment
- End-to-end performance diagnostics and tuning for large-scale production databases using OLTP/OLAP.
- Develop and construct Cassandra databases and assist with daily tasks.
- Created/Managed CDB/PDB and migrated Oracle as a service (ORaaS) from 12c to 19c.
- Performed day-to-day activities: such as daily error checks, database health monitoring, and monitoring of physical resources (disk space, memory, CPU), Performance Checks, GoldenGate replication checks, OS checks.
- Logical and physical design of Oracle databases as an architect.
- Implemented GoldenGate extracts/ replicats / Oracle initial load / transformation/mapping.
- Perform RMAN Online backup (Full/ Incremental) of Oracle RAC Databases, setting up and monitor standby databases.

Fastenal Co.
(Database Administrator)

Location: Winona, MN
July 2013- Jan 2014

- Provide Production DBA support, as needed, on a 24/7 basis.
- Installed, configured, and supporting Oracle GoldenGate 11.1 and 11.2 for Oracle to Oracle data replication.
- Implemented Oracle GoldenGate replication using a downstream mining database.
- Implemented Oracle GoldenGate 11.1 Bi-Directional (active-active) replication for Oracle databases.
- Implemented Oracle GG 11.2 Bi-Directional replication for Oracle Databases.
- Implemented GoldenGate extracts/ replicats / Oracle initial load / transformation/mapping.
- Configure integrated extracts for compress tables.
- Support experience of supply chain management system via Oracle Demantra management system.
- Documenting standard operating procedures.

Credit Suisse
(Oracle DBA Production Support consultant)

Location: RTP, Raleigh, NC
Feb 2013- July 2013

Fannie Mae
(Sr. Oracle APP DBA Consultant)

Location: Reston, Virginia
Feb 2012- Feb 2013

Exelon Corporation
(Lead Oracle DBA consultant)

Location: Chicago, Illinois
June 2010- Jan 2012

Pepsi Corporation
(Sr. Oracle Database Engineer)

Location: Chicago, Illinois
Sep 2008- June 2010

Technical Skills

Extensive Database Experience:

Oracle (12c,19c,21c), MS-SQL server (2019,2021,2022), MongoDB (4.x,5.0,6.0,7.0), MY-SQL (8.x), Apache/DataStax Cassandra (5.x,6.x), PostgreSQL Community/EDB (14,15,16), Amazon RDS, Amazon Aurora MySQL/PostgreSQL, Redis, Azure Cosmos DB, IBM Informix, Neo4J, Azure Cosmos, Hadoop, Teradata, RedShift, HBase, NoSQL, MemSQL, Apex, Snowflake, CockroachDB.

Open-Source Databases:	Percona Server (MySQL, MariaDB, PostgreSQL, MongoDB).
Data Replication:	Oracle Goldengate (12c,19c,21c), Qlik replicate, Oracle Data Guard.
Programming Language:	SQL and PL/SQL, HTML, .NET, XML, Java, JavaScript, SDK, Perl, Python, Korn/Bash Shell.
Operating Systems:	HP-UX, Sun Solaris, AIX, Linux (Redhat/Centos), BSD, Windows, VMware (vSphere, Center, ESXi).
Database Tools:	TOAD, DBartisan, Datawarehouse, SQL-Developer, SQL-Trace, AWR, ADDM, ASM, RMAN, OEM 13c, Databricks, ERwin, Studio 3T, pgAdmin, CloudWatch, SSRS, SSIS, Oracle Data Integrator. MySQL-Workbench.
DevOps:	AWS, OpenStack,IGA, Docker, Kubernetes, Puppet, Chef, CICD, Ansible, Git, TxnHub, Servicer Now, Jira software.
Cloud Computing:	AWS, Azure, GCP, Cloudera.

Education

- MS in Information Technology Management from Western Governors University, Texas U.S.A.
- Masters in Computer Applications from CCS University, India

Certifications

- OCP: Oracle12c certified professional.
- AWS Certified Solutions Architect professional.
- Azure Certified Administrator associate.
- GCP (Google Cloud certified professional Cloud Architect)
- Oracle Cloud Infra Certified Architect.
- Certified in Apache Cassandra 3.x Administrator Associate.
- Certified Associate in Project Management (PMI-CAPM).
- SnowPro Core Certified (Snowflake).

Immigration Status

US Legal permanent resident (Green Card).
