Leadership & Execution | Strategy Development | Oracle ERP & Fusion| SAP| Salesforce | Digital Transformation Leader

As a forward-thinking Digital Technology Leader with over 15 Years of leadership experience and a proven track record in Portfolio Management, Technology, ERP implementation, upgrade and Operations, I am dedicated to driving digital transformations and fostering business growth. I excel in delivering exceptional IT, ERP, and Salesforce solutions through strong collaborations with cross-functional teams. My results-oriented leadership focuses on strategy, execution, process design, and re-engineering, enabling organizations to achieve operational excellence and customer-centricity. I am adept at building and retaining top talent, cultivating high-performing teams globally, and leveraging negotiation skills for strategic partnerships.

With extensive experience in digital transformation, mergers, acquisitions & divestitures, Oracle ERP, Salesforce along with Marketing cloud and LMS, I have led successful global rollouts, provided comprehensive support, and ensured seamless operations. My proficiency in application development and data warehouse management facilitates data-driven decision-making, delivering tangible business value. My core competencies include strategic planning, vendor management, negotiations, cost control, and budgeting, consistently achieving financial targets and enhancing profitability.

I am dedicated to driving digital transformations and empowering organizations to thrive in today's ever-changing business landscape, leveraging my expertise in portfolio management, technology implementation, and strategic leadership.

- AOP and Budget planning and execution for annual spend of ~\$40 M and cost tracking and executed comprehensive cost-outs for DT commercial.
- Subject Matter Expert for DT - Commercial PMO, acted as advisor for DT commercial, DT Legal and DT Finance department from project initiation till closure and audited all projects from PMO compliance perspective.
- Realized cost savings by strategically mapping the company's roadmap and consolidating various ERP support teams.
- Implemented and enforced industry-leading practices for application rationalization using TIME methodology. Reduced Application footprint by 25% for DT commercial.

Nighthawk Radiology Services, USA

October 2007 – June 2010

Oracle Applications Lead

Worked as Oracle applications functional and technical lead, working on enhancements and successfully accomplishing implementations, production setups, support, and testing. Performed project and risk management.

Environments

Oracle Applications 11i (11.5.10) AR, AP, GL, CM, OM, Inventory, Purchasing, BOM, Advanced Pricing and Scheduling, I-Expenses and I-Procurement, Oracle Alerts, Oracle Forms 6i, Reports 6i, PL/SQL, SQL*Plus, SQL*Loader, Linux, Windows 2000, and Windows XP

- Project managed by conducting daily stand-up calls with the offshore team, using waterfall and application implementation methodologies and best practices. Served as SME for I-Expenses and advanced pricing for Oracle ERP modules.
- Analyzed, designed, and developed combo billing capabilities for Oracle to handle dynamic creation of ordered items, based upon input from legacy system.
- Supported month-end processes and financial closing.
- Developed programs to restrict access using custom libraries, developing alerts, custom invoice emailing process, custom purchase orders, and a custom check design for payments.

- Monitored and troubleshoot concurrent manager jobs and managed system profile setups, along with other SYSADMIN responsibilities, including defining responsibilities, menus, functions, users, request groups, flex fields, value sets, lookup sets, concurrent programs, request sets, and profiles.
- Developed reports using Oracle and XML reports, forms development and customization, interface creation (RICE) components.
- Developed MD.050 functional design documents, MD.070 technical design documents, MD.120 installation and migration instructions documents, and BR-100 setup documents using AIM methodology for development and implementation.
- Created data extract and upload programs using open interfaces and APIs.
- Provided functional and technical support for P2P and O2C cycles.
- Integrated security disciplines from a SOX perspective and communication with Oracle to Built and manage TARS.

Regal Beloit Corporation, USA

October 2006 – October 2007

Oracle Developer (Oracle ERP)

Develop and enhance Oracle application modules for supply chain and order management, manufacturing, and financials.

- Served as senior developer, interacting with the director of application management and coordinating with the offshore team.
- Project managed by conducting daily stand-up calls using waterfall and application implementation methodologies and best practices.
- Communicated regularly with manufacturers and financial personnel to implement Oracle ERP applications and enhance existing modules.
- Created MD-50 functional design, MD-70 technical design, BR100 setup document, CV-10 conversion requirement and strategy, and CV-40 conversion data mapping document.
- Estimated technical effort for upgrade from 11.03 to 11.5.10 and then provided support. Customized and developed reports, forms, interfaces, and extensions.

Sogeti, USA

May 2005 – October 2006
