

Harsath Arif Bava Mohaideen

(850) 559-2580

harsath.arif@gmail.com

PROFESSIONAL SUMMARY

- Adept and seasoned agile leader with over **18 years** of experience in software development, including **around 5 years as agile coach, 8 years as scrum master/ agile project manager, 8 years of project management, 14 years on J2EE platform, 11 years on architecture and design, and 9 years on SOA platform**
- **Certified scrum master (CSM)** and **SAFe 4 Program Consultant (SPC)** with excellent communication, collaborative and coaching skills.
- **Efficient change agent** who helps individuals, teams, management for effective **agile and lean adoption, scaling and transformation**
- Passionate agile leader who values agile principles, practices, and core values who provides **directive and non-directive coaching** to teams and enterprise in their agile journey.
- Skilled influencer who fosters **relentless improvement** of processes to build high performing agile teams
- Objective mentor for Scrum Masters, Product Owners and team members
- **Effective servant leader** with good **decision making skills, resource and risk management skills**, experienced in all phases of SDLC and PMLC
- **Experienced facilitator** with polished presentation, negotiating and influencing skills to bring stakeholders to consensus over a common goal
- Agile mentor with **interpersonal skills** to coach and groom team towards a focused vision
- Skilled hands on as a **technical architect** with strong **analytical, problem solving skills** and **business acumen** to transform business concepts to working software

ACCOMPLISHMENTS

- Transforming CITI mortgage to adopt, mature and scale in agile
- Provided embedded coaching to more than 40 distributed teams in agile frameworks such as Scrum, Kanban and Scrumban.
- Trained and coached Product Owners and teams in release planning, backlog management, prioritization and estimation
- Trained and coached 24 scrum masters to build high performing team
- Coached teams in pair programming, TDD, ATDD to improve agility and provided guidance and support for their CI / CD initiatives
- Facilitated many boot camps and workshops for teams to learn and kick start agile
- Prepared many training materials, presentations, templates, assessments, transformation feedbacks.
- Presented many lunch and learn sessions, webinars to large audience
- Coached and supported executive leaders in 4 lines of business in their agile transformation initiatives
- Recommended changes to workspace, release processes, and support services to improve agility of the teams

TECHNICAL SKILLS

SOFTWARE DEVELOPMENT FRAMEWORKS	:	SCRUM, Kanban, Scrumban, XP, RUP, Waterfall,
PROJECT MANAGEMENT TOOLS	:	Rally, JIRA Agile, Confluence, RTC, MS-Project 2010, MS Office Suite, SharePoint
TECHNOLOGY	:	SFDC, CAST IRON, Cassandra, SOA, Java, C, C++, J2SE, J2EE STRUTS, SPRING, Hibernate, Web Services, SOAP, XML, Apache CXF, WSDL, WS-Policy, XML Schema, WS-*, Restful web services, SOAP, Atom Pub, JMS, UDDI, RMI / IIOP, BPEL4WS, Apache Camel, Adobe Flex, Blaze DS, JSON, JavaScript, AJAX, JQuery, ExtJS, .NET, PRISM
SOFTWARE TOOLS	:	IBM Rational Software Architect, MS-Visio, Adobe Flex Builder, Adobe

Harsath Arif Bava Mohaideen

(850) 559-2580

harsath.arif@gmail.com

	Dreamweaver and Adobe Fireworks, Tomcat, Oracle 10g SOA suite, IBM Web sphere, Oracle ESB, FUSE ESB, IBM WSAD 6.0, IBM Visual Age, Eclipse, Spring Tool Suite, JEP, and ANT, Oracle 10g, Informix, MySQL, Derby, Erwin, Oracle Designer, Rational Clear case, Data Stage, Optimize IT, Load Runner
SCM	: VCS, GIT, Maven, Jenkins

EDUCATION ▪ CREDENTIALS

SAFe 4 Program Consultant (SPC)	2017
SAFe Agilist (SA)	2015
Certified Scrum Master (SCM)	2012
ITIL V3 Certification	2011
Master of Computer Applications, BHARATHIDASAN UNIVERSITY, INDIA	1999

PROFESSIONAL EXPERIENCE

CITI GROUP IRVING, TX

06/2016 - TILL DATE

Agile Coach

- Provided embedded coaching to 17 distributed teams and coaching support to 8 teams
- Coached multiple journeys in “Mortgage” line of business towards agile adoption, maturity and transformation
- Understand goals, impediments and roadmap of agile transformation from agile transformation leaders (business and technology) and provide strategic and tactical recommendations.
- Observed agile metrics and provided recommendations to leaders and team for improvement.
- Performed agile suitability, readiness and maturity assessments of teams and coached teams to next level of maturity
- Encouraged scrum masters, product owners to perform self assessments and mentored them to improve their skills
- Continuously inspected for waste and nourished **lean continuous improvement**.
- Organized and facilitated **road map planning, release planning**
- Coached product owners in effective backlog management
- Coached scrum teams in **refining and estimating backlog, retrospectives, reviews and planning**
- Coached **scrum masters, product owners, scrum teams** in applying Agile software development techniques to build high performance Agile teams
- Helped “Platform and Engineering” teams, release management leaders in establishing and promoting **Continuous Integration / Continuous Delivery**
- Helped to establish, measure, monitor and improve on **agile metrics** and improvising tools for agile metrics
- Facilitated 4 boot camps and team-building activities for around 50 members in each boot camp
- Conducted trainings or workshops for 330 participants
- Presented 3 “Webinar” sessions of total 510 participants
- Authored and contributed agile training materials, templates

Harsath Arif Bava Mohaideen

(850) 559-2580

harsath.arif@gmail.com

CAPITAL GROUP
SAN ANTONIO, TX

05/2015 - 06/2016

Senior Scrum Master/ Agile Coach

- Facilitated boot camps, conducted workshops and team-building activities
- Trained around 90 individuals in agile principles and practices
- Provided embedded coaching to 6 teams to deliver quality working software for one Agile Release Train (ART)
- Provide guidance in adoption of **SAFe** principles and practice to teams and leadership
- Provided guidance to business and technology leaders for agile adoption and transformation
- Performed Value Stream mapping, helped teams toward reducing waste and improve cycle time and lead time.
- Formed and promoted **autonomous, self-organizing, empowered** individuals and teams.
- Continuously inspected for waste and nourished **lean continuous improvement**.
- Organized and facilitated **road map planning, release planning**
- Trained and coached teams in **TDD, ATDD and Pair programming**
- Facilitated and coached on **sprint planning daily stand-ups, backlog grooming, reviews, retrospectives, and demos**
- Coached the Product Owners in Agile, especially with regards to preparing **User Stories** and prioritizing the **Product Backlog**
- **Coached and mentored** younger professionals in applying Agile software development techniques to build high performance Agile teams
- Authored and coached on managing various scrum artifacts and metrics including; **sprint backlog, burn down, team roster, velocity and various reports using JIRA agile**
- Compiled **post-release performance reviews** and recommended changes to improve sprint / release performance
- Tracked and communicated **team velocity and sprint/release progress**
- Identified, removed or mitigated organizational **impediments**
- Nurtured intra-team cooperation and inter-team collaboration

AT&T

03/2014 -05/2015

PLANO, TX
PROJECT 29

03/2014 - 05/2015

PROJECT 29 is a program that facilitates selling services to Service Providers. This program is implemented upon set of APIs involving many different systems. SFDC acts as the front end for the Service Providers. CAST IRON is the middleware to communicate with different systems through APIs. The project was implemented over four major releases.

Senior Scrum Master

- Coached four teams for effective adoption of agile practices
- Successfully guided the teams for two major projects implemented and deployed over four releases within planned release target dates
- Organized and facilitated **SOS for EBM** program , **SOS retrospective** and other scrum ceremonies for the program
- Organized and facilitated **road map planning, release and sprint planning, daily stand-ups, backlog grooming, reviews, retrospectives, and demos**
- Coached the Product Owners in Agile, especially with regards to preparing **User Stories** and prioritizing the **Product Backlog**
- **Coached and mentored** younger professionals in applying Agile software development techniques to build high performance Agile teams
- Authored and managed all aspects of scrum documentation including; **sprint backlog, burn down, team roster, velocity and various reports** using Rally
- Compiled **post-sprint performance reviews** and recommended changes to improve sprint performance
- Tracked and communicated **team velocity and sprint/release progress**
- Identified and removed **impediments**
- Nurtured intra-team cooperation and inter-team collaboration

Harsath Arif Bava Mohaideen

(850) 559-2580

harsath.arif@gmail.com

- Effectively groomed the three teams to effectively adopt scrum, increase team cohesiveness and velocity for each release

FEDERAL AVIATION ADMINISTRATION OKLAHOMA CITY, OK

09/2008 - 03/2014

INSTRUMENT FLIGHT PROCEDURE (IFP)

04/2011 - 03/2014

Instrument Approach Flight Procedure (IFP) is a group of web applications currently used by FAA-Aviation and is being developed by ATO-IT Technical Services Group which will enable Flight Specialists to develop and maintain instrument flight procedures for all airports / airways. It complies with AIXM standards and coordinates with other systems that manage navigational aids such as FIX, NAVAID. This group of applications enables the flight specialist to finally publish the approach procedures that facilitate the pilots and other stake holders.

Project Manager / Scrum Master

- Managed three teams to deliver quality working software
- Planning, scheduling, monitoring, controlling and successfully closed the project
- Organized and facilitated **project planning, daily stand-up meetings, sprint and release planning, backlog refinement, reviews, retrospectives**, , demos and other scrum related meetings
- Coached the Product Owners in Agile, especially with regards to preparing **User Stories** and prioritizing the **Product Backlog**
- **Coached and mentored** younger professionals in applying Agile software development techniques to build ultra-high performance Agile teams
- Authored and managed all aspects of scrum documentation including; **sprint backlog, burn down, team roster, velocity** using **JIRA and confluence**
- Assisted team in build and release management using **Jenkins**
- Compiled **post-sprint performance reviews** and recommended changes to improve sprint performance
- Tracked and communicated **team velocity** and **sprint/release progress**
- Identified and removed **impediments**
- Identified, managed and controlled risks proactively
- Planned, communicated and **executed two major releases** of the project
- Coaching and mentoring team members in **Test Driven Development**
- Performed regression testing at various stages and in all environments of deployed application

WORKFORCE MANAGEMENT TOOLSET

09/2008 - 03/2011

Workforce Management Toolset is a comprehensive, integrated suite of web applications being developed by ATO-IT Technical Services Group which will enable ATO Managers across business lines to make strategic business and/or tactical operational decisions based on timely, accurate, and consistent information. Foundation Services is a suite of products that offers common functionality across all WMT applications, and these products are integral to the WMT modules' functionality. It is based on the SOA methodology. It includes Organization Definition Management (ODM), People Information (PI), Positions, and Sector Currency (SC) web services. Time Tracker project under WMT focuses on providing ATO with a central source for accurate, timely and reliable data, enabling the operational service units to make better real-time and strategic decisions that align with ATO objectives as they relate to timesheets, activities and labor distribution requirements

Architect / Scrum Master

- Organized and facilitated **project planning, daily stand-up meetings, sprint and release planning, backlog refinement, reviews, retrospectives, demos** and other scrum related meetings
- Coached the Product Owners in Agile, especially with regards to preparing **User Stories** and prioritizing the **Product Backlog**
- Authored and managed all aspects of scrum documentation including; **sprint backlog, burn down, team roster, velocity**, etc.
- Compiled **post-sprint performance reviews** and recommended changes to improve sprint performance
- Tracked and communicated **team velocity** and **sprint/release progress**

Harsath Arif Bava Mohaideen

(850) 559-2580

harsath.arif@gmail.com

- Identified and removed **impediments**
- Participated in design and architecture of the system
- Reviewed Software Architecture Document and other related documents that describe the system's architecture
- Estimated project development effort
- Reviewed and provided feedback to Functional Analysts and designers on different artifacts that they produced

SOUTH FLORIDA WATER MANAGEMENT DISTRICT

09/2007 - 08/2008

FLORIDA

FLOW Re-Engineering

FLOW is a FORTRAN application used to compute discharge of water through various structures installed in the state. The existing application is to be re-engineered to be integrated with enterprise system. The design shall be made scalable to adopt for new structures and computation techniques. The system must be designed to integrate with existing enterprise applications and be scalable to adapt to future enterprise applications.

Software Architect

- Gathered requirements by conducting interviews, brainstorming sessions, and document analysis with various stakeholders.
- Lead a team of 8 developers and 2 testers for successful completion of the project within schedule
- Prepared software architecture document, data model, and diagrams for class, process, sequence, state, and deployment.
- Prepared High Level Design document and Detailed Design Document.
- Prepared the architecture for the application to integrate with heterogeneous applications.
- Designed, developed and tested Flow Engine, Flow Services, Flow Parser and Flow Evaluator.
- Designed user interface, data reader/writer interface, mailer and other services.
- Prepared test plans and test cases for performing unit testing and integration testing.
- Environment: Java 1.4.2, XML, Struts 1.2.x, Servlet, HTML/JSP, JMS, CSS, VO, DAO, RUP, UML, Oracle 10g, MQ Series, Web Services, Red Hat Linux, C++, FORTRAN
- Tools Used: MS-Visio, Borland Together, Oracle Designer, PVCS and MS-Project.

FLORIDA ASSOCIATION OF COURT CLERKS

07/2006 - 08/2007

FLORIDA

MyFloridaCounty

MyFloridaCounty is a fully integrated web application providing online services for the public: child support payments, ordering official records, and traffic citation payments, as well as providing administration for these services. The applications communicate with many other applications in diverse platforms from other organizations like FDLE, DMV, county clerk offices, and banks. These applications process various online and offline payments made by e-checks and credit/debit cards.

Senior Systems Analyst

- Analyzed & designed MyFloridaCounty system, applying UML and all applicable artifacts of RUP, using Rational Requisite Pro and Rational XDE with WSAD.
- Identified, designed and developed service interfaces to integrate heterogeneous applications.
- Identified and proposed solutions for potential areas for improvement in terms of performance, scalability, extensibility, and robustness of applications.
- Suggested technical changes to improve the heterogeneous applications.
- Involved in coding, review and testing of front-end programs built with Struts, SPRING, JSP, CSS and back-end programs built with JDBC, VO, DAO, SDO, JMS and web services.
- Environment: Java 1.4.2, XML, Struts 1.2.x, Spring, Hibernate, Servlet, HTML/JSP, JMS, CSS, VO, DAO, RUP, UML, Web sphere 6.0, Oracle 10g, Informix, MQ Series, Web Services, Red Hat Linux
- Tools Used: WSAD 6.0, PVCS

AGENCY OF WORKFORCE INNOVATION INDIA/FLORIDA

10/2002 - 06/2006

ONE STOP MANAGEMENT INFORMATION SYSTEM

One Stop Management Information System (OSMIS) is a web-based application for the State of Florida, led by its agency for Workforce Innovation (AWI). It aims at developing automated information systems for providing workforce related programs and services for the people of Florida. This project combined and replaced the functionality of a number of IBM Mainframe based systems and client-server systems. Development architecture is J2EE with Oracle 10i database, Oracle 10g Application server and Apache Web Server.

Technical Lead / Applications Architect

- Gathered functional requirements by conducting interviews, JAD sessions, and workshops with various stakeholders.
- Analyzed functional requirements and prepared use-case models and documented them to use-case specification, SRS, use-case realization specification, glossary and other artifacts.
- Gathered non-functional requirements like reliability, security, scalability, and performance, and documented supplementary specification and other related artifacts.
- Prepared software architecture document.
- Performed detailed system study of OSST, JCORPS, JSST and other disparate systems for integrating them to OSMIS.
- Generated class diagrams, sequence diagrams, state diagrams, deployment diagrams for the finance management module using Rational Rose.
- Involved in the coding and testing of the framework components using J2EE patterns such as Front Controller, Service Locator, Value List Handler, and Business Delegate.
- Prepared test plans, test cases, and test scripts, and performed unit testing, integration testing, and regression testing for finance management module.
- Evaluated and analyzed the performance of the application by writing and executing test plans and test scripts using Optimize-IT and Load Runner.
- **Managed a team of 12 developers and testers to deliver quality code under a tight schedule.**
- Evaluated quality of source code based on Chidamber-Kemerer OO metrics (WMC, DIT, NOC, CBO, LCOM, CC) using JMetrics.
- Mentored developers and testers.
- As a Project Lead, was responsible for managing the project through the complete lifecycle.
- Environment: Java, EJB 1.2, JSP, Servlet, JDBC, JNDI, UML, Rational Rose 2000, CVS, Oracle 10g App Server, Oracle 10g Database server, Struts, Spring, Hibernate
- Tools Used: Eclipse, Rational Rose, Rational Test Suite, Clear Case, Optimize IT, Load Runner

HCL TECHNOLOGIES

01/2002 - 10/2002

INDIA

WIA TRACKER

WIA Tracker is a web-based customer off-the-shelf product which helps to automate WIA, a government-funded welfare program. This product is based on MVC architecture. It contains a strong, scalable, and easily customizable business layer. It has been devised to be portable to any application server.

Senior Systems Analyst

- Analyzed the requirements and designed use-case specification documents and other artifacts in the inception phase of the project
- Designed use-case diagrams and class diagrams with relationships, sequence diagrams, and state diagrams for the 'Categorization' module, using Rational Rose 98 in the elaboration and construction phase of the project
- Prepared detailed program specification of classes
- Developed business components (session and entity beans)
- Reviewed code, unit test code and performed integration testing of the application
- Environment: Java, Servlets, JSP, JDBC, JNDI, UML, Windows 2000/NT, OC4J, Tomcat, JBOSS, Oracle
- Tools Used: Rational Rose 2000, JDeveloper

AG TECHNOLOGIES, LTD.

10/2001 - 1/2002

INDIA

QUERY BUILDER

Query Builder was a product that facilitated building of enterprise applications by supporting various persistence platforms. Acted as an interface to different database products. Persistence mechanism and connectivity were designed to be generic.

Systems Analyst / Senior Programmer

- Analyzed business requirements and designed UML OO models for different layers of the application
- Designed Class Diagrams, Sequence Diagrams, Activity Diagrams and State Diagrams
- Prepared detailed program specification of classes
- Prepared Software Architecture Document
- Developed the core framework using GOF patterns
- Environment: Java, UML, JDBC, JAXP, SAX, DOM, XML, LDAP, JNDI, Oracle, SQL Server, MS-SQL
- Tools Used: Rational Rose, ERWin

APEEGO, LTD.

1/2001 - 9/2001

INDIA

APPAREL GRAVEYARD

A B2B portal for apparel industry. Provides an e-market place intended to connect all segments of apparel manufacturing and distribution chain. General section consists of Site Search, Job Market and Service Center. E-commerce section consists of Corporate Registration, Channel Partner Registration, Product Listing and Categorization modules.

Senior Analyst Programmer

- Analyzed the requirements and designed use-case specification documents and other artifacts in the inception phase of the project
- Designed use-case diagrams, class diagrams with relationships, sequence diagrams, state diagrams for the 'Categorization' module using Rational Rose 98 in the elaboration and construction phase of the project
- Prepared detailed program specification of classes
- Developed business components (session and entity beans)
- Reviewed code, unit test code and performed integration testing of the application
- Environment: Java, Servlets, JSP, JDBC, UML, EJB, Web Logic, and Oracle

ASSET INTERNATIONAL

10/2000 - 1/2001

INDIA

MOBILE ENQUIRY SYSTEM

ASSET International is a leading IT education provider in the Asian market. Mobile Enquiry System is a WAP-based application that provides information about the courses conducted by ASSET in mobile phones and other WAP-based devices.

Analyst Programmer

- Analyzed, designed and tested entire application.
- Coded course viewer and customer support modules.
- Integrated the application and performed integration testing of the application.
- Configured and deployed the application in Nokia WAP server, web and application servers
- Environment: Java, JSP, Servlet, JDBC, WML, WMLS, Oracle, Web Logic, Nokia WAP Server

Harsath Arif Bava Mohaideen

(850) 559-2580

OPEN TECH SOLUTIONS

3/2000 - 9/2001

INDIA

MULTI-LEVEL MARKETING SYSTEM

Open Tech Solutions is an IT company focusing on online shopping in Asian market. Multi-Level Marketing System is an online web marketing application for retail chain stores.

Programmer

- Coded, wrote unit testing and system testing code and tested Customer Registration and Retailer Registration modules of the application.
- Integrated other modules and performed system integration testing on the application.
- Environment: Java, Servlet, JSP, JDBC, Apache, Tomcat

SV GROUP

05/1999 - 2/2000

INDIA

YARN SUPPLIER SUPPORT SYSTEM

SV Group is a textile-manufacturing firm that exports garments. It gets the raw materials from many local suppliers. SV Group used this system to manage the supplies of raw materials for their yarn division. The system is a client server application installed in desktops of the yarn divisional offices, to manage and maintain suppliers to their division.

Junior Programmer

- Developed 'Supplier Manager' module using which users can add, modify and delete suppliers to the system. Developed reports for the module. Reviewed programs coded in other modules.
- Environment: Visual Basic 5.0, SQL Server, and Crystal Reports
