Summary

- Seasoned IT/Telecom professional with 20+ years of experience delivering scalable and robust software and cloud solutions for Tier-1 clients including Verizon, AT&T, T-Mobile, and Vodafone.
- Proven expertise in designing, developing, and deploying complex applications using C#, REST APIs, React/Angular, and AWS cloud services.
- Strong background in microservices architecture, DevOps practices (CI/CD), event-driven systems, and system performance optimization.
- Demonstrated ability to lead agile development teams and collaborate with cross-functional stakeholders to deliver high-performing production systems.
- Certified Azure Solutions Architect Expert with hands-on experience in EKS, Kubernetes, Azure Operator Nexus and cloud-native service orchestration.
- Strong background in orchestration of enterprise network services in AWS, leveraging native AWS services like EC2, VPC, Lambda, and CloudFormation.
- Expertise across Requirement Analysis, Solution Architecture, Design, Development, Deployment, Integration, and E2E Testing for Telecom Solutions.
- Extensive Experience in delivering Managed Service projects for Telecom Operators, covering Network/Service Assurance and Fulfillment.
- Hands-on experience in the OSS Implementation (Service Provisioning, Service/Network Inventory, Discovery/Reconciliation, FM/PM, Northbound / Southbound and B2B Integration).
- Diverse experience in Telecom Technologies GSM, PSTN, CDMA, GPRS, SDH Transport, MPLS, 3G, LTE/4G, 5G Core/RAN, O-RAN, SMO, etc.

Technical Skills

COTS products:

- Amdocs (ARM, OND, OSO, OUA and Helix Service Assurance), Assure1 Federos (Now Oracle Communications Unified Assurance), Clarity OSS, IBM Netcool/Impact, HPE TeMIP/Expert, Ericsson (Order Care, Cloud Manager, Catalog Manager, Expert Analytics, Granite Inventory, Network Engineer, HPE Service Orchestrator, ClickSoftware WFM, Ericsson Resolution (BMC Remedy), and SAP-BI.

Operating Systems and Protocol:

- RedHat/Suse/Centos/Ubuntu Linux, Solaris, Windows, TCP/IP, DNS, TLS, LDAP, SOAP, SNMP

Programming and DB Skills:

- C, C++, Core Java, JavaScript, Python, Perl, AngularJS, ReactJS, REST API, Postman, MySQL and Oracle.

Cloud technologies

- RH OpenStack, Mirantis OpenStack, Kubernetes (K8s), docker, and Helm.
- Public Cloud MS Azure (AON, DevOps, ARM, AKS, IAM, Azure Arc, VNet, Log Analytics, etc.).
- AWS (VPC, EC2, S3, CFT, AMI, Lambda, EKS, IAM, DirectConnect, CloudWatch, DynamoDB, CLI, etc.).

Work Experience

Cloud Orchestration (Contractor at Verizon) - Technosphere Inc. New York, NY (09/2023 to present)

- Designed and automated cloud-native provisioning workflows using Ericsson Orchestrator and AWS services (EC2, Lambda, VPC, CloudFormation), reducing manual provisioning errors.
- Drive continuous improvement initiatives by analyzing orchestration order fallout, identifying bottlenecks, and implementing corrective actions.
- Migrate enterprise services from Verizon private cloud to AWS Public Cloud optimizing performance and reliability
- Diagnosed and remediated architectural bottlenecks in orchestration flow using root-cause analysis and system metrics.
- Developed REST APIs and reusable components to support dynamic service configuration and deployment.

Solution Sales Architect Lead - Amdocs Inc. Plano, TX (03/2023 - 03/2024)

- Architected end-to-end solutions for service orchestration and catalog management deployed in Azure, exposing APIs using TMF622, TMF620, and TMF641.
- Led proof-of-concepts and productization efforts of Amdocs components integrated with Azure SaaS infrastructure.

Sr. Technical Program Manager - Microsoft Corporation Irving, TX (07/2022 - 03/2023)

- Spearheaded the implementation of platform-level services in Azure hybrid cloud, enabling lifecycle orchestration of K8s clusters from Azure using RESTful Delete APIs and Redfish protocol.
- Led the microservices designing in go language for control plane operations and integrated them with Azure-native services.

Solutions Architect III - Ericsson Inc. Plano, TX (02/2016 - 07/2022)

- Lead Verizon Zoom project to enable Verizon Orchestrate and manage Virtual Network Functions (VNFs) for their Enterprise N/W Services (SDWAN, Security, Routing, Internet Breakout, etc.) in their Private Cloud (VCP) and uCPE (Whitebox) using Ericsson Orchestrator and Federos Assure1.
 - Design the Enterprise Network Services LCM use cases flows (Instantiate, Update, Terminate)
 - Solution Design for Service Orchestration and Service Assurance Components and interface with Verizon Northbound and Southbound Systems
 - Custom Adaptation in Federos Assure for Service/VNF onboarding, Alarm monitoring, Alarm Correlation and Close Loop Action.
 - PI Planning with customer, defining user stories, Backlog grooming and Sprint planning.
 - Coordinate with VNF vendors for new Enterprise Services.
 - Lead Development team to drive e2e Sprint Delivery
 - DevOps implementation for CI/CD, UAT defects analysis and drive to closure
 - Feature Demo to Customer & Solution Handover to Support organization.
 - PoC to orchestrate and manage VNFs in AWS public cloud.
- Lead the new enhancements in ATT Cloud Formation tool used for ATT AIC/NC Sites Infrastructure planning/design
 - Analysis/Design of new Features and creation of Epics/User Stories
 - Backlog grooming, Sprint Planning, and lead development team to drive sprint delivery
 - UAT defects analysis and drive to closure, Feature Demo to Customer.
 - Migration of ATT Cloud Formation tool from ATT OnPrem to MS Azure
- Lead the T-Mobile Network Provisioning Catalog solution migration from VM infrastructure to K8s based Ericsson Cloud Container Distribution (ECCD) platform.
 - ECCD cluster deployment on BareMetal Machines (Lab & Production).

- Liaison with Ericsson PDU and 3PP Vendor (EDB) on microservices delivery with Feature Parity intact.
- Lead the development team for Ericsson Catalog Manager custom adaptation microservices delivery

Sr. Solution Architect - Ericsson India Gurgaon, India (11/2007 - 01/2016)

- Technical Support to Ericsson CU for OSS Presale for new MS contracts and bring existing MS Contracts Operations under Ericsson Managed Service Portfolio to support OSS Functions across the globe.
- Demonstrate the MS Delivery Platform (**IBM Netcool**, ClickSoftware WFM, Granite, Ericsson Resolution, Eniq PM, etc.) capabilities to Ericsson NOC for existing MS Contracts and New Potential MS Customers.
- Lead MSDP toolsets Implementation for MS contracts (RCOM, Vodafone UK/NL, MBNL).
 - Customer Workshop for understanding Network in Scope, NBI Specifications for fault, performance and inventory collection, B2B Interface between customer trouble ticketing and MSDP trouble ticketing system
 - Solution Analysis and Design and lead the dev team to drive the e2e delivery
- Lead the deployment of a middleware from 3PP vendor Synchronoss with B2B integration between customer Trouble Ticketing System and Ericsson WFM via this middleware for MBNL.
- Lead the migration of MSDP FM system from HP TeMIP to **IBM Netcool**.
 - **Netcool Integration** with MSDP **Trouble Ticketing system** for **manual/auto trouble ticket** creation.
 - Workshop with ANOCs to understand existing FM functionality/features and showcase Netcool functionality.
 - Requirement Specifications, Solution Design, Responsibility Matrix, RISC analysis, AT Specs/Plan
 - Dual feed of the **alarms** from **EMS/NMS/NE** to **HP TeMIP** and **IBM Netcool** for uninterrupted operations.
- New network (**NE/EMS/NMS**) **integration** with MSDP FM System (**IBM Netcool**)

OSS Architect/Developer - Reliance Communications Navi Mumbai, India (11/2002 - 11/2007)

- Clarity OSS implementation to integrate Reliance Wireline/Wireless/Transport Network
 - Inventory data modeling (Chassis, Equipment, Card, Port, Logical Port, Circuit Design)
 - MDD Development for **Alarms**, **Performance counters** collection, Inventory Discovery and Reconciliation
 - **Alarm Correlation** for **Fiber cut management**, **Service Impact** and **RCA**, Auto Trouble Ticket Creation.
 - Service Order Provisioning Flow design and MDD Development for Service Provisioning and Activation

Software Engineer - GlobalSoft Pvt Ltd. (10/2001 - 11/2002)

- SNMP Manager and Agent development for DWDM devices for Lightmaze AG

Software Engineer - Infinite Softcomm Solutions Pvt Ltd. (10/2000 - 10/2001)

- SNMP protocol Stack development and Web Development.

Software Programmer - Compare Infobase Pvt Ltd. (03/1999 - 10/2000)

- Web Development (Websites, Search Engine)

Training & Courses

- | | | |
|-----------------------------------|----------------------------|----------------------------------|
| • RH OpenStack Admin I (Ericsson) | • IBM Tivoli Netcool (IBM) | • Network Engineer (Telecordia) |
| • TOGAF (By Ericsson) | • TeMIP Expert (HPE) | • Mirantis Open Stack (Mirantis) |
| • TMF 814 Standards (IONA) | • Corba 2.0 (IONA) | |

Certification

- Mirantis MCA200, Microsoft Certified Azure Solutions Architect Expert (AZ-303/304)

Education

- Master of Computer Applications (MCA) from IGNOU, Delhi, India
