Bachelor of Science
Computer Science
Hunter College
New York, NY
1995

Skills

Network Engineer with over 20 years
of experience with routing, switching
and Data Center environment

Cisco/Meraki –
Switches/Routers/Wireless

Security/Firewalls –
ASA/Palo Alto-Panorama/VPN

SD-WAN – VeloCloud/Orchestrator

AWS – knowledge on various AWS
Services including EC2, VPC (NAT,
Peering, VPN), Direct Connect,
Route 53, Cloud Watch

Visio/O365

Experience

February 2018 - June 2025

Network Engineer • Hansen Technologies • Bethlehem, PA

- Support day to day Hansen's global WAN infrastructure
- Charged with building, configuring, installing, managing, and monitoring of VeloCloud SD-WAN technology throughout all global regions
- Configure and support Amazon AWS functions pertaining to VPCs, VPNs, Security Groups, Direct Connect and routing
- Participate in global roll out of Palo Alto firewalls and Panorama centralized monitoring
- Manage and support Cisco/Meraki switches and wireless network
- Collaborate with internal customers to provide the best support and improvements to their environment
- Roll out Palo Altos' Global Protect solution to support work-from-home employees
- Team up and conspire with other engineers on best practices around switching, routing, DNS, and IP addressing
- Build out technical documentation for our processes and infrastructure

September 2015 - January 2018

Sr. Network Engineer • Vital Network Services • East Greenville, PA

- Acted as a primary point of contact with the customer for all technical issues, including addressing design and proposed integration concerns and pricing
- Analyzed and defined client's business strategy and determine system architecture requirements to achieve business goals
- Served as operational technical subject matter expert for future technology initiatives
- Troubleshoot moderate to complex network fault, performance and configuration issues in relation to the customer's WAN/LAN and wireless network
- Assisted network architecture and design team in rolling out network changes in the environment
- Continually provided input on enhancing client's current technology

Professional Strengths

Comprehensive knowledge of CISCO/MERAKI networking technologies and protocols

Extensive knowledge of Network System Engineering methods

Skilled in designing, planning and implementing LAN/WAN solutions including SD-WAN

Proficient in technical and non-technical communication, both in oral and written

Good leadership skills and ability to guide and provide technical direction and supervision for a given project

Excellent problem solving, analytical and logical thinking skills

June 2008 – September 2015

Sr. Network Engineer • Olympus Corporation of the Americas • Center Valley, PA

- Worked with project management team to ensure projects were properly defined, scoped, implemented and completed
- Provided technical support and developed solution proposals base on the technical and business requirements
- Was responsible for design, implementation, and troubleshooting of Cisco switches, routers and firewall across the whole enterprise in Americas
- Designed and implemented New Branch facility locations
- Planned, configured, installed and continuously monitored Cisco wireless controllers and access points at various branches and distribution centers
- Created and maintained Visio documentation for layer 2 and 3 design and network assessments
- Collaborated with external vendors to select new technology for datacenter/remote sites
- Evaluated new technologies and platforms to determine their applicability to solving the business challenges and needs
- Documented the design, operation and troubleshooting of technology platforms and procedures

October 1999 – June 2008

Network Engineer • Prudential Financial • Newark NJ

- Worked on elimination and replacement of ATM equipment with Cat 6500 POS-OC3. This was done with a minimal downtime through efficient project management, good local support motivation/direction and vendor management
- Prepared setups and operations for new sites, defined goals and objectives of future projects
- Maintained responsibility for a successful integration of MPLS resulting in \$700,000 annualized savings
- Supervised and provided direction to project teams, including cable vendors, electricians and local network support staff on project related tasks
- Maintained strong commitment and accuracy, detail, and timeliness of completions of every project
- Standardized network configuration by reconfiguring network equipment and bringing it up to Prudential's standards
- Requested data circuits – T1, T3, OC-3 and OC-12 and coordinated installation of circuits
