Experience

Senior Software Engineer, Greenshades – Vernon, CT Mar. 2025 – July 2025

- Developed payroll platform features using .NET, Angular, and SQL, supporting business growth initiatives
- Collaborated with cross-functional teams via sprint planning, addressing operational challenges

Software Engineer, Checkwriters – Vernon, CT Sep. 2022 – Mar. 2025

- Engineered Angular/ASP.NET HR/Payroll platform, accelerating customer acquisition and market reach
- Architected ASP.NET Core microservices with RESTful APIs and event-driven architecture
- Developed reusable Angular/PrimeNG UI components, streamlining interface development
- Migrated systems to Azure using Terraform, enhancing monitoring and reducing operational costs
- Implemented DevOps automation with Github Actions and Azure DevOps, streamlining CI/CD and testing
- Designed database schemas and procedures, implementing performance tuning and automated backups

Software Engineer, Avineon – Vernon, CT Dec. 2021 – Sep. 2022

- Rebuilt contract system (Angular/ASP.NET), reducing processing from hours to minutes
- Optimized data sync service (C#/MSSQL), cutting processing from 15 min to 15 sec
- Established SDLC via automated testing, documentation, and Agile/.NET mentoring
- Obtained and held a secret-level federal security clearance

Software Engineer, Southern Auto Auction – East Windsor, CT Mar. 2021 – Dec. 2021

- Engineered Angular/Ionic mobile auction platform, replacing hardware and reducing device costs by 50%
- Developed C#/ASP.NET backend, managing auctions with bidding, payments, and inventory
- Implemented automated CI/CD pipelines with testing, enabling daily mobile and web platform releases

Software Engineer, BNL Industries – Vernon, CT Apr. 2019 – Feb. 2021

- Engineered C#/.NET document/time tracking systems, automating workflows and streamlining operations
- Led ERP transition via C# integrations, Python/SQL migrations, and stakeholder collaboration
- Managed Active Directory user accounts, groups, and security policies across the organization
- Administered VMware vSphere environment, configuring and maintaining virtual machines
- Provided Tier 4 IT Support while ensuring NIST 800-171, CMMC, and ITAR compliance

Education

Central Connecticut State University – BS in Computer Science

2019
