

Keyur Mandani

Phone: (951)-333-7454

Email: kmandani05@gmail.com

Summary

- Practical familiarity installing, configuring, and troubleshooting **Routers (4400, 7200 Series)**, and **Cisco Switches(3K/5K/7K/9K)** and **Wireless AP's (3700, 5500)**.
- Expert-level knowledge of TCP/IP, OSI model, and troubleshooting, implementing static and dynamic routing protocols such as **OSPF, and BGP**.
- I have helped building and deploying **Cisco DNA Center** appliance into the HQ and plants to help manage cisco network devices in a centralized environment.
- Implemented redundancy with HSRP, VRRP, GLBP, **Ether channel technology** (LACP, PAGP), etc.
- Experience in managing storage switches that includes configuring **VSAN , FCOE, VPCs** for storage switches such as N3k and N9k.
- Familiar with **Wireless Access Points, WLAN controller**, F5 Load Balancer, Palo Alto firewall and WAN Technologies such as MPLS, Frame-Relay, T1, ATM, PPP, HDLC.
- Implementing, securing, and managing remote access using VPN technologies like **IPSec, SSL**, and **GRE**.
- Implementing security policies using ACLs, Palo Alto Firewall, and AAA (TACACS, RADIUS) servers.
- Good understanding of **F5** products and technology (**LTM, SSL offloading**).
- Hands-on experience in implementation and deploying **BIG-IP F5 LTM/GTM** for load balancing and network traffic management for business applications.
- Worked on **F5 LTM series like 6400, 6800, 8800** for the corporate applications, and their availability.
- Hands-on experience in deployment of GRE tunneling, **SSL, and Site-Site IPSEC VPN, DMVPN**.
- Good knowledge of **Cisco Nexus** data center infrastructure with **5K, 7K, 9K series switches**.
- Good knowledge of Cabling Standards and fiber optics Multimode fiber, single-mode fiber, UTP, Cat 6, 5e, etc.
- Experience in Network Management Tools and sniffers like **Wireshark, NIKSUN, NetScout, and Cisco works** to support 24 x 7 Network Operation Center.
- Cabling, Patching, Racking, Stacking the Network Devices in the Data Center.
- Hands-on experience with cloud platform migration with AWS, Azure, GCP.
- Experience in diverse IT disciplines, including networking, technical support, operating systems, virtualization, and system administration.
- Committed, result-oriented, self-learning, and motivated individual with a zeal to learn new technologies.
- Strong written and verbal communication skills, self-motivated, self-managed, result-oriented, practical, always looking to learn and contribute.

Certification

- Cisco Certified Network Associate Routing & Switching (**CCNA R&S**)

- Cisco Certified Network Professional – Route (**CCNP- Route**)
- Palo Alto Network – Accredited Configuration Engineer (**PA- ACE 7.0**)
- AWS - Solution Architect - Ongoing

Technical Skills

- Cisco Routers: 2800, 3600, 3700, 3800, 3900, 4400, ASR-1000-x
- Cisco Switches: 2900, 3500, 3700, 6500, NX-OS (5/7/9K)
- Cisco Wireless: 3700/5500 WAP
- Routing: EIGRP, OSPF
- Switching: HSRP, DHCP, Static, VLAN, STP (Spanning Tree Protocol), VTP, EtherChannel, Trunks, VPC
- Other Protocols: HSRP, GLBP, VRRP, SNMP, SMTP, DNS, QoS/CoS, IP SLA
- Security: Cisco ASA (5505, 3100 cloud), FortiGate and PA-450/3K/5K
- Networking: TCP/IP, UDP, ICMP, DHCP, DNS, SNMP, ARP
- Load Balancer: F5 – BIG-IP LTM, GTM
- Servers: Windows Server 2012 R2 (Active Directory, DHCP, DNS) , Vmware
- Monitoring Tools: Solar Winds, Extrahop, Netbrain and Stealth watch
- Cloud Platforms: AWS (EC2, S3, R53, VPC, ELB, SFG, TG)

Experience

Network Firewall Engineer - Lead

Tata Consulting Services - Plano, TX

On Assignment at Toyota Motors North America

January 2023 - Present

- Leading a firewall team of 7 members to provide support for infrastructure.
- Plan and manage Palo Alto firewall hardware and software uplift projects at multiple remote locations that include manufacturing and sales sites across North America , Canada, and Mexico.
- Actively participating in design, architectural and consultation activities to support application deployment and break-fixes.
- Implement advanced Palo Alto Firewall features like URL filtering, User-ID, App-ID, Content-ID on both inbound and outbound traffic.
- Configured, Troubleshoot and Maintained Firewalls policies on Cisco NGFW 5500 series and Palo alto including Security, NAT policy definitions; application filtering; Regional based rules; URL filtering, Data filtering, file blocking, User based policies.

- Configured Firewall-security context modes, interfaces, objects and access list, NAT, AAA for network access and advanced network protection on Cisco Firewalls.
- Enable file forwarding to Wildfire cloud through Content-ID implementation to identify new threats.
- Manage multiple Palo Alto firewalls centrally through the Palo Alto Panorama M-500 centralized Management appliance.
- Implement the Global Protect VPN, IPSec VPNs and SSL VPNs through IKE and PKI on Palo Alto firewalls for site-to-site VPN Connectivity.
- Deployed Active/Standby modes of High Availability (HA) with Session and Configuration synchronization on multiple Palo Alto firewall pairs.
- D2D activities include reporting progress to the higher management and staging firewall policies for off-hours deployments and validations.
- Managing Palo Alto firewall devices of various series, PA-450/3K/5Ks.
- Manage IPS/IDS services and rule base for WAN traffic inspection.
- Support collaboration calls with vendors and other application teams to support high priority incidents.
- Configuring various advanced features (Profiles, monitors, iRules, Redundancy, SSL Termination, Persistence, SNATs, HA on F5 BIG-IP appliances SSL termination and initiation, Persistence, Digital Certificates, executed various migration/upgrade projects across F5 and hands on with F5 BIG-IP LTM/GTM
- Experience working in Data Centers managing cabling infrastructure (copper and fiber) and power provision.
- Experience on Cisco Nexus 2248 FEX and Nexus 5500 series switches to provide flexible solutions and access port connectivity across DC architecture.
- Coordinated with the Network administration team to implement and test Disaster Recovery plans for the Data Center.
- Hands-on experience in the connection of LAN MDF to IDF using Nexus 5000 series switches and Catalyst 3850 series switches.
- Extensively used SevOne (Collects network data) to collect data from F5, by polling through SNMP and log collection through Syslog, create reports and forward to Operations team.

Network Infrastructure Engineer
American Chemical Society - Perm.
Washington, DC

March 2021 - January 2023

- Managed and configured Nexus 5K & 9K switches including hardware and software upgrades.
- Manage F5 viprion LTM/GTM/APM for the internal and external traffic by configuring iRules, Policies and VIPs and internet policies.
- Performed code upgrade on F5 viprions to the latest code as well as help application in designing and deploying the application from network standpoint.
- Manage Infoblox IPAM and DNS for the network including creating host records, A records and zone delegations for the cloud platforms.
- Deployed Cisco DNA Center from scratch to manage the HQ and Plants.

- Managing and supporting SAN storage team, configuring VSAN , FCOE, VPCs for storage switches such as N3k and N9k.
- Perform Switch upgrades as well as monitor over network issues on wireless and LAN.
- Helping with On-boarding and off-boarding to the new contractors to allow access to the networks over VPN.
- Helping with Cloud Migrations for AWS that includes configuring and deploying VPC, Transit Gateways and EC2 instances and allowing access to the company on-site datacenter.
- Manage and maintain HQ network with 5500 series WAP and Catalyst 6500 series switches.

Network Engineer

SyncSort INC - Pearl River , NY (Contract)

March 2020 - December 2020

- Deploy & configure FortiGate firewall on Vmware virtual environment.
- Configured VMware instances to prepare for the deployment of various platforms such as Windows and Linux.
- Design and Configure Dell Switches as per the requirement.
- Troubleshoot user tickets relating to network connectivity.
- Configure and Manage CMDB for the infrastructure from Scratch.
- Work with vendors and resolve issues related to hardware and bugs to keep the network devices up to date.
- Prepare a maintenance schedule to perform device and code upgrades.
- Coordinate with the site for maintenance for minimum downtime for the services.

Network Engineer

Toyota Motor North America - Plano, Dallas (Contract)

March 2017 – March 2020

- Involved in the implementation and configuration of Enterprise network infrastructure.
- Working as a Network engineer supporting Cisco Routers, Switches, Bluecoat Proxy servers, and BIG-IP Load Balancers.
- Cisco routers, switches setup including WAN routers, coordinating with leased line vendors.
- Having experience on WLAN, dealing with Cisco Prime, Controllers, and Access Points.
- Implementation, configuration, and support for **F5 Big-IP LTM-6400** load balancers, **ASA Firewall**, and **Palo Alto Firewall**.
- Worked on **Palo alto** and **Panorama** in creating updating rules, VPN Tunnels, and troubleshooting the incidents.
- Worked on **Palo Alto** PA- 5000 and PA-3000 series and **panorama**. Worked on creating new policies and OS updates.
- Experience with Virtual route Forwarding, multicast routing, and policy-based routing.
- Involved in configuring and implementing composite Network models consists of Cisco 7600, 7200, 3800 series routers and Cisco 2950, 3500, 5000, 6500 Series switches.
- Optimized performance of the WAN network consisting of Cisco 3550/4500/6500 switches by configuring VLANs.
- Worked with Cisco technical representatives by opening TAC cases with vendors on user P1, P2 issues.
- Working with ISP service providers like Verizon and AT&T for any critical circuit issues.

- Experience in implementing and troubleshooting Nexus-OS devices Nexus 5k (**5010,5596, 5548**), Nexus 7k (**7010,7018**) switches, Nexus 2k (**2232TM, 2232TM-E**) switches.
- Good knowledge of concepts like port-channel, Virtual Port Channel (VPC), and Virtual Extensible LAN (VXLAN).
- Perform IOS Software upgrades on **switches 6500, 3750, 3560, and 4500s**.
- Perform IOS Software upgrades on **routers 2600, 2900, 3000, 4400, 1000-x's**.
- Implementation, Monitoring, and troubleshooting the protocols EIGRP, OSPF, and Static Routes.
- Hands-on experience working with IP **Multicast**, IGMP, IGMP version 2 and 3, CGMP, IGMP Snooping, PIM-Sparse, and Dense Mode
- Design and implement campus switch network with Cisco Layer 3 switches (3750, 4500,6500 & Nexus 7000, 5000, 2000 series) in multi VLANs environment and inter-VLAN routing, HSRP, 802.1q trunk, ether channel
- Implement Security Policies, VPN connection as per requirement for Internal and External Connection.
- Implementing IPsec Tunnel, URL Filtering, Antivirus, Anti-Spyware policies, and Providing Vulnerability Protection.
- Implemented Zscaler cloud Firewall for all the remote offices in Toyota North America.
- Part of the Zscaler migration project from bluecoat. This also includes policy migrations, user authentication, and creating pac files without affecting the production environment.
- IPsec and GRE Tunnel Build up from the sites to Zscaler.
- Part of a pilot team for testing the Zapp and worked on Zscaler rollout on user's machines across Toyota North America.
- Configure, Deploy, and Maintain Cisco and Juniper Router / Switches for HQ and Datacenters.
- Worked on F5 BIG-IP LTM 8900, configured profiles, provided, and ensured high availability.
- Configuring various advanced features (Profiles, monitors, iRules, Redundancy, SSL Termination, Persistence, SNATs, HA on F5 BIG-IP appliances SSL termination and initiation, Persistence, Digital.
- Experience in configuring and troubleshooting BIG-IP F5 load balancer LTM creating virtual servers, nodes, pools, and iRules in the LTM module.
- Installation, Configuration, and Administration of Windows Servers 2012 R2, FTP, DNS, DHCP, TFTP, Linux OS under various LAN and WAN environments.
- Hands-on experience with Amazon Cloud services such as EC2, S3, VPC, Load-Balancing.
- Provided support for troubleshooting and resolving Customer and user-reported issues.
- Generating RCA (Root Cause Analysis) for critical issues of layer1/layer2/layer3 problems.
- Working on capturing the packets for the record of all Ethernet/IP activity for all ports of the switch or router with NIKSUN packet sniffer.
- Performing network monitoring, providing analysis using various other tools like Wireshark, NetScout, SolarWinds etc.

- Working with the Vendors on various issues at Data Centers by replacing hardware and various parts.
- **Viptela SD-WAN Deployment.** Worked with the vendor team to design and implement industry-leading **SD-WAN** infrastructure to provide secure, carrier independent WAN connectivity across the enterprise.
- Integrated with the existing BGP environment to redistribute routes seamlessly from **Viptela** into traditional MPLS WAN.
- Provides Level-2/3 support and troubleshooting to remediate detected/reported incidents. Escalate issues as required.
- Implement and maintain backup and disaster recovery capabilities for all identified critical mission systems.
- Maintain and manage LAN/WAN security through proper hardware and software tools
- Work with infrastructure teams, application teams, and service providers to ensure solid designs and solutions to maintain secure and highly available systems.
- Take ownership of issues and provide timely responses to all incidents and outages.

Network Analyst

Inkovation Inc, - Santa Fe Springs, CA

(January 2016 – Dec, 2016)

- Involved in the implementation and configuration of Enterprise network infrastructure.
- Responsible for configuring a network containing Cisco 3800, and Cisco 2950, 3500, 6500 series switches.
- Configured network using routing protocols Multi-Area OSPF, EIGRP.
- Key contribution in troubleshooting LAN/WAN structures including EIGRP, multi-area OSPF and BGP.
- Designed VLAN with port security and subnetting schemes.
- Configured STP and VTP on layer 2 devices including HSRP and VRRP.
- Palo Alto Firewall installation, configuration, and internal traffic management.
- Implement Security Policies, VPN connection as per requirement for Internal and External Connection.
- Implementing IPsec Tunnel, URL Filtering, Antivirus, Anti-Spyware policies, and Providing Vulnerability Protection.
- Installation, Configuration, and Administration of Windows Servers 2012 R2, Active Directory, FTP, DNS, DHCP, TFTP, Linux OS under various LAN and WAN environments.
- Implement Security Policies, VPN connection as per requirement for Internal and External Connection.
- Worked on F5 BIG-IP LTM configured profiles, provided, and ensured high availability.
- Configuring various advanced features (Profiles, monitors, Redundancy, SSL Termination, Persistence, SNATs) on F5 BIG-IP appliances SSL termination and initiation, Persistence.
- Experience in configuring and troubleshooting BIG-IP F5 load balancer LTM creating virtual servers,

nodes, pool, and iRules in the LTM module.

- Designed and Implemented Virtual Server Farm for Website load balancing with F5 BIG-IP LTM in DMZ architecture.
- Managing Windows 2012 R2 servers with DHCP and Active Directory.
- Hands-on experience with Amazon Cloud services such as EC2, S3, VPC, Load-Balancing.

Network Administrator

E-Tech Lab Solutions - INDIA

(January 2013 - August 2014)

- Troubleshoot traffic passing managed firewalls via logs and packet captures.
- Configured and resolved various OSPF issues in an OSPF multi-area environment.
- Managed fast Layer 3 switched/routed LAN/WAN infrastructure as a part of the Network team. The LAN consisted of Cisco campus model of Cisco 3550 at the access layer, Cisco 6513 at distribution/core layer.
- Involved in the configuration & troubleshooting of routing protocols: OSPF, LDP, EIGRP, RIP. Configured IP access filter policies.
- Configure VRRP & GLBP and VLAN Trunking 802.1Q & ISL, STP, Port Security on Catalyst 6500 switches.
- Configuring HSRP between the Cisco router pairs for Gateway redundancy for the client desktops.
- Negotiate VPN tunnels using IPSec encryption standards and configured and implemented site-to-site VPN, Remote VPN.
- Ensure Network, system, and data availability and integrity through preventive maintenance and upgrade.
- Involved in L2/L3 Switching Technology Administration including creating and managing VLANs, Port security, Trunking, STP, Inter-VLAN routing, LAN security.

Education

- California State University, Los Angeles - USA
Master's in Computer Information System (2016)
- Gujarat Technological University - India
Bachelor's in Computer Science & Engineering - 2014
