

Kyossh Kanna k

Email; kyossh2024@gmail.com | Phone : + 1 (913) 526 0394

Over 10+ years of wide-range of experience working as Senior Frontend Developer in modern technologies such as React JS, Micro-Component code architecture, Redux, Jest, Enzyme, React Testing Library, HTML5, CSS3, JavaScript, Chart JS, Material Design, axios, fetch, Bitbucket, Git, NPM, YARN, Postman, critical Accessibility compliances such as 508 and WCAG (AA/AAA etc) delivered and implemented thru Scrum and Safe Agile Framework.

➤ KEY ACHIEVEMENTS

- Highly experienced in modernizing Legacy applications with various types of clients (worked in my experiences) by using current edge technologies such as React, Redux on AWS Platform.
- Extensive experience in developing web pages using HTML5, CSS3, JavaScript with ES5 and ES6, Typescript, jQuery, Angular js, React 15/16/17/18, Redux, Node.js
- Experience in anatomy of Angular application and built application using angular 1.5/2.0 hybrid using Typescript.
- Strong Hold on Object-Oriented Programming (OOP'S) Concepts.
- Experience in Applications using AJAX, Object Oriented JavaScript, JSON, JSONP, and XML.
- Experience in developing applications using Amazon Web Services like EC2, S3, SNS, CloudWatch, Lambda function, code commit, Dynamo DB
- Experience and building an isomorphic application using React 12/13/14/15/16/17 and Redux with GraphQL on server side
- Experience in React JS for creating interactive UI using One-way data flow, Virtual DOM, JSX, React Native concepts
- Experience in Cross-Platform Mobile Development using React Native + Type Script based mobile app also designed the UI views with Flexbox and React Native dimension API
- Modernized the JavaScript legacy application using fusion components and internal framework for Health Insights and Healthier Living Program for Aetna Health using current edge technologies such as React, MaterialUI design, JSX, Webpack.
- Knowledge on creating an API to connect various Drupal 7/8 sites to magneto and .net backend.
- Increase the backend performance with Apache Solr, Memcache and varnish for various Drupal 7/8.
- Create content types, views, blocks and different Drupal functionality.
- Designed Web and Mobile user centered design experiences
- Experience in using React.js 16/17 components, Forms, Events, Keys, Router, plus Redux, Animations and Flux concept
- Experience in implementing the Node.JS server side code to interact with MongoDB to store and retrieve data by using the Mongoose drivers.
- Used Vue.js to fetch data from server using axios, prepare and transform data to display in the forms
- Experienced in version control tools GIT and SVN Apache Tortoise Subversion
- Awarded for Excellence and Teamwork for delivering Health Actions (HA) and Digital Coaching Programs (DCP) for Aetna Health App.
- Modernized the legacy system and implemented Shared Component Architecture to eliminate vanilla JavaScript dependencies and increased the performance of the multiple systems across the reporting applications for Aetna Health's Data Analytics and Data modernization program (DADM)
- Experience on implementing critical Web Accessibility compliances such as 508 and WCAG AAA certification
- Certified Safe® DevOps Practitioner (implemented the practice in team and aligned with program level)

OTHER KEY ACCOMPLISHMENTS

- Built rich user experience web applications with complex workflows, user navigations, and animations using latest web technologies
- Implemented complex pages using own internal design framework and contributed to the enhancements of the framework
- Developed Micro-Component Library of the app using our own framework and cross-functional util libraries that achieved faster development cycles.
- Implemented Security using OAuth 2.0's Authentication and Authorization Framework, OktaSSO, for the Health Improvement Program Module on Aetna.com for Member Health Login
- Implemented Authorization framework for the API endpoint with integration with the Authorization Server and Resource Server.
- Implemented JSON web tokens (JWT) mechanism for authentication and authorization security configurations using React and Axios API Integration.

(Technologies/Tools/DBs/Methodologies):

UI Technologies	React, Redux, Router, Javascript, Material UI, Bootstrap, HTML/HTML5, CSS/CSS3, Webpack, Babel, JSX.
Code Versioning, CI/CD	Git, GitLab, BitBucket, Github, Jenkins, Husky Integration
Accessibility Compliance	508, ADA, WCAG Compliance
Design Language	Material Design, MaterialUI, Vuetify, React Bootstrap, MaterialUI Iconography, themes, Styled Components.
UI Libraries	react, react-dom, react-redux, redux-thunk, axios, fetch, chalk, react-dev-utils, react-thunk, redux-saga, react-router, jest, enzyme, styled-components
Operational Excellence	CI/CD Process, Jenkins, Best Test Coverage, GitHub Code Management, SourceTree, Bitbucket
Database	Oracle, MySQL, MongoDB
Development Tools	Eclipse, NPM, Babel, Husky, Webpack, SQL Developer, VS Code, React Plugins, Chrome UI Plugins, React Dev Tools, Splunk Logs
Methodologies and Agile Tools	Agile, SAFe Agile, Scrum, Atlassian Suite (JIRA and Confluence), Rally

PROFESSIONAL EXPERIENCE:

Client: - AT&T, Plano, TX
Role: Sr. React Developer

August 2023 – Present

Responsibilities:

- Developed web pages using HTML, DHTML, XHTML, DOM, CSS, JSON, JavaScript, jQuery, and AJAX.
- Developed and maintained Florida Blue web application using React.js, enhancing user experience and improving performance.
- Designed CSS templates for use on all pages on the website working with CSS Background, positioning, text, border, margin, padding, and table.
- Involved in creating a Reusable component using React JS.
- Designed and developed advanced state management solutions using Redux, ensuring efficient handling of complex state scenarios.
- Migrated to **React 18**, leveraging concurrent features like useTransition to improve rendering efficiency for data-heavy components.
- Enhanced application performance using **Next.js** for server-side rendering (SSR) and static site generation (SSG).
- Established a **custom hook library** to simplify state management and API calls across components, boosting reusability.
- Integrated **React Query** for caching and managing server state, ensuring faster and efficient data fetching.
- Developed and maintained a shared component library, collaborating with design teams to standardize components and design patterns across projects.
- Implemented code splitting and lazy loading techniques using React.lazy and React Suspense, optimizing application load times and resource management.
- Created custom hooks and higher-order components to encapsulate reusable logic, promoting code reuse and separation of concerns.
- Integrated GraphQL APIs using Apollo Client, optimizing queries and mutations for efficient data fetching and handling.

- Used Git for version control, ensuring proper branching, merging, and pull request practices, and collaborated with team members through code reviews and pair programming.
- Developed Progressive Web Applications with offline capabilities, push notifications, and improved performance using service workers and caching strategies.
- Implemented localization and internationalization (i18n) to support multiple languages and regions using React Intl, enhancing the application's global reach.
- Explored and implemented micro-frontend architecture, ensuring modularity and scalability of the application.
- Stayed updated with the latest trends and best practices in React.js, participating in training sessions and conferences to continuously improve skills.
- Developed and maintained reusable React components to build scalable and high-performance web applications for Florida Blue.
- Implemented state management solutions using Redux, ensuring efficient state handling across complex applications.
- Collaborated with DevOps teams to set up and maintain CI/CD pipelines, ensuring smooth deployment processes.
- Collaborated with project stakeholders, gather requirements, and develop the UI application. create reusable, effective, and scalable VueJs Code. - Implement front-end components with Vue
- Used Redux-Store to store the React Application's state and worked with middleware for the Redux-Store.
- Used React Native for building Single Page mobile applications (SPA) for IOS and Android platforms.
- Experienced on WCAG 2.0 level A & AA success criteria and widespread knowledge on US ADA for digital assets to fix HTML, CSS and JavaScript issues.
- Utilized React.js for building custom components and widgets, such as product carousels, interactive filters, and checkout processes, enhancing the usability and functionality of eCommerce platforms.
- Design UI views with Flexbox and React Native dimension API.
- Experienced with various AWS Cloud platforms and their features, including EC2, S3, EBS, Cloud Watch, Elastic, SNS, Cloud Formation, and Route53.
- Developed user interface by using ReactJS and Flux for SPA development.
- Worked on ReactJS to develop single-page apps by extending virtual DOM.
- Worked with React Router for developing Single Page Applications SPAs.
- Good Experience in React JS for creating interactive UI's using One-way data flow, Virtual DOM,
- Enhanced colour contrast and provided alternative text for images to comply with WCAG 2.0 requirements.
- Used Cypress, which can help build tests and run in a real browser.
- Experience in working with GraphQL queries and using Apollo GraphQL Library.
- Worked with React Router for developing Single Page Applications SPAs.
- Development of front-end application using React, Dependency injection, Rx, and Http modules with Node JS server for future evolutions.
- Built Confidential tool using React, RXJS, and NGRX platform. Developed components as an independent module for reusability across the application
- Worked on React Native to develop single page application.
- Developed various screens for the front end using React JS and used various predefined components from NPM (Node Package Manager) and Redux library.
- Worked with back-end API developers to design the web API required in Node JS and work on the existing APIs whenever required as per the front-end requirements.
- Used POSTMAN for writing and testing JIRA REST API.
- Worked on ReactJS Virtual Dom and React views, rendering using components that contain additional components called custom HTML tags.
- Considerable experience with IDEs like Eclipse , NetBeans , WebStorm , Sublime , Notepad++ , Microsoft VisualStudio .
- Utilized React Native for cross-platform development, integrating Firebase for authentication and backend support to enhance user engagement and data management.
- Integrated Firebase Authentication and Realtime Database APIs for secure user authentication and real-time fitness data management in the Fit Life Tracker mobile app.
- Integrated Google Maps and HealthKit/Google Fit APIs for location-based features and health data integration, enhancing the Fit Life Tracker mobile app's functionality.

Environment: HTML5, CSS3, Node JS, Eclipse, Typescript, React JS, VueJS, Next JS, ES6, JavaScript, Bootstrap, GIT, JIRA, Mongo DB, Rx JS, Web pack, GitHubAPIv3, React Local Storage API, SQL, BackboneJS, Jenkins, REST web service, JSON ,Karma, Jasmine, Jira.

Responsibilities:

- Experienced in designing web pages using HTML 5, CSS3, JavaScript, Bootstrap, SASS, LESS, React.js, Redux, Flex, and Mongo DB.
- Responsible to Style, look and feel of the web page with SASS that extends CSS with dynamic behavior such as variable, mixing, operations and functions.
- Researching JavaScript based frameworks like React Native and Ionic/Cordova for frontend.
- Worked on React JS Virtual Dom and React views, rendering using components which contains additional components called custom HTML tags.
- Worked on CGI protocol, including how data is passed between the server and the script using environment variables and standard input/output.
- Implemented various screens for the front end using React.js and used various predefined components from NPM (Node Package Manager) and redux library.
- Worked in using React JS components, Forms, Events, Keys, Router, Animations, and Flux concept.
- Involved in using **React JS** components and **React Native** for building Single Page mobile applications (SPA) for **IOS** and **Android** platforms.
- Worked on Apollo Federation to break down our monolithic GraphQL schema into smaller, manageable services.
- Implemented data processing pipelines using **Python scripts** and libraries like **pandas** and **NumPy**, resulting in improved efficiency and data accuracy.
- Designed and implemented micro frontend architecture using frameworks like React and Vue.js, enabling independent development and deployment of frontend modules.
- Proficient in developing web applications using **Vue.js**, a progressive **JavaScript framework**.
- Used **Figma** for web-based design and prototyping tool that is primarily used for the design and collaboration of user interfaces.
- Used GraphQL for Data Loading for extensively to prevent N+1 query issues and optimize performance.
- Developed cross-platform mobile applications using **Flutter** framework for both iOS and Android platforms.
- Used Performance tuning for user interfaces for the usage of optimized image formats like. web and compress images to reduce file sizes.
- Used **AWS** as cloud service for the storage of data.
- Implemented an express **GraphQL library** to mount **GraphQL API server** on the user configured HTTP endpoint.
- Developed responsive and interactive web applications using **Next.js** framework, ensuring cross-browser compatibility and optimal performance.
- Proficient in scripting languages commonly used for CGI, such as Perl, Python, PHP, or Bash.
- Used **Adobe Stock** for designers and developers to find high-quality stock photos, illustrations, videos, and templates for use in their projects.
- Experienced with configuring web servers like Apache or Nginx to handle CGI scripts.
- Used **Adobe Spark** to create graphics, web pages, and video stories quickly and easily.
- Implemented recursive algorithm to parse large **GraphQL** introspection queries into dotfile format to visualize the one-to-many relations between schemas in SVG format.
- Configured Web pack to execute linters, magnifiers, pre/post-processors, tests, transpires, etc. based on build target.
- Implemented React container and presentational components (as Stateless and Functional components when applicable).
- Implemented **GraphQL subscriptions** for real-time updates, especially in areas like market feeds, transaction status, and user account activity.
- Experienced in writing and debugging CGI scripts in these languages.
- Implemented responsive UI designs using **Flutter** widgets and managed state using Provider or Bloc pattern.
- Implemented **server-side rendering (SSR)** and **static site generation (SSG)** techniques in **Next.js**, improving SEO and reducing initial load times for users.
- Utilized **Next.js API** routes to create backend functionality, such as handling form submissions and fetching data from external **APIs**.
- Collaborated with cross-functional teams to integrate Python-based solutions into existing software systems, ensuring seamless functionality.
- Experience in RESTful web services to integrate between Server side to Client Side
- Worked with JASMINE unit test framework to write unit tests for JavaScript code.

Environment & Tools: HTML5, CSS3, JavaScript, Agile, Ajax, JSON, Jasmine, Node.js, Vue.JS, API, Unit testing.

Client: - USAA, Dallas, TX
Role: UI Developer

March 2019 – Feb 2021

Description: The Fuel Loyalty Program rewards members for their fuel purchases and offers exclusive benefits to enhance their experience at participating stations. Members earn points for every gallon purchased, which can be redeemed for discounts, free fuel, and special promotions. The program features a user-friendly app to track points, receive personalized offers, and access nearby participating locations. Join today to maximize your savings and enjoy a seamless fueling experience

Responsibilities:

- Extensive knowledge of and use of React.js directives to bring additional functionality to HTML.
- Good experience in JavaScript MVC framework like
- Knowledge in using React JS, Flux for SPA development React JS..
- Developed web applications running on NodeJS using the React.js for front end MVC/templating.
- Worked with modules like MongoDB and mongoose for database persistence using Node.js
- Lead the management and administration of AWS Services CLI, EC2, VPC, S3, ELB Glacier, Route 53, CloudTrail, IAM and Trusted Advisor services.
- Create MongoDB automated pipelines in AWS Code Pipeline to deploy Docker containers in AWS ECS using services like Cloud Formation, Code Build, Code Deploy, S3 and puppet.
- Build prototype for various required services such as Logging, Scheduling and Notification Service using third party Node JS based JavaScript library.
- Has worked with Node.JS for writing code in the server side and creating scalable network applications.
- Experienced in Gitlab CI and Jenkins for CI and for End-to-End automation for all build and CD.
- Designed and maintained SQL scripts for Excel reporting and stored procedures
- Manage and SQL Query Analyzer and Validate the customer data.
- Used Jenkins to make the build process and Used Karma, Jasmine and Protractor to write unit test cases.
- Created UI templates and functionality to be merged with the backend REST/SOAP API for proper communication of front and back end to enable efficient working of application
- Implemented services, controllers, directives, factory functions to properly consume API on the front end and send back data in JSON format to the back end by capturing in the UI
- Experience in working with RESTful Web Services and implementing RESTful API and SOAP protocols.
- Worked with JSON web tokens for authentication and authorization security configurations using Node.js
- Worked with Grunt, Gulp for task runner configurations for minification, watch, jshint, jscs, css autoprefixer, sass compilation, bundling and test runner configurations and make it available as a command.
- Worked with unit testing of JavaScript applications using Karma, Jasmine.

Environment: React, Node.JS, Pl/Sql, JavaScript, jQuery, Jenkins, Docker, CI/CD, Twitter Bootstrap, Ajax, AWS, Micro Services, HTML5, CSS3, SVN, GIT, MongoDB, Jasmine, Karma.

Client:-Broad ridge Financial solutions, Hyderabad-India

April 2016 – Nov 2018

Role: UI Developer

Responsibilities:

- Developed the single page application following Agile Scrum, participated in daily standups, sprint reviews, used Jira for project management.
- Used React-Router to turn application into Single Page Application
- Developed user interface by using React JS, Flux for SPA development.
- Involved in designing, developing, and testing the web application by using the HTML5, CSS3, Bootstrap, and React.JS
- Implemented various screens for the front end using React.js and used various predefined components from NPM (Node Package Manager) and redux library.
- Implemented modules into Node JS to integrate with designs and requirements.
- Developer responsive interface using Bootstrap and used SASS for CSS.
- Responsible for creating the screens with table-less designs meeting W3C standards.
- Applied jQuery scripts for basic animation and end user screen customization purposes.
- Responsible for front-end UI design using HTML5, CSS3, JavaScript, jQuery, jQuery plugins.
- Interfaced with the Marketing and IT departments & developing requirements to implement.
- Developed cross-browser/platform HTML, CSS and JavaScript to match design specs for complex page layouts while adhering to code standards.

- Led a team of React.js developers in the design, development, and deployment of [specific project or product].
- Used React-Router to turn application into Single Page Application
- Developed user interface by using React JS, Flux for SPA development.
- Involved in designing, developing and testing the web application by using the HTML5, CSS3, Bootstrap, and React.JS
- Developer responsive interface using Bootstrap and used SASS for CSS.
- Responsible for creating the screens with table-less designs meeting W3C standards.
- Responsible for front-end UI design using HTML5, CSS3, JavaScript, jQuery, jQuery plugins.
- Used Media Queries for the design to be compatible in all devices.
- Developed different jQuery component in MVC framework.
- Used Dreamweaver as editor for designing new pages.
- Architected scalable and maintainable frontend solutions using React.js, Redux, and related technologies.
- Implemented the Drag and Drop functionality using jQuery framework.
- Used Grunt as task runner to test the JavaScript with JSHint.
- Used Media Queries to deal with different CSS related issues on different devices.
- Did POC's on React JS components and developed the user login interface for Testing logs
- Managed cloud-based projects on agile for esteemed clients. Used SAAS, PAAS&IAAS based cloud models, Virtualization of Servers and computer storage.
- Used JASMINE, Karma unit test framework to write unit tests for JavaScript code.
- Responsible for quality assurance of finished websites including the validation of web forms and links.
- Extensively used Git for version controlling and regularly pushed the code to Git hub.

Environment: React JS, JavaScript, Bootstrap, Ajax, JSON, HTML5, CSS3, Oracle database, Eclipse, Dreamweaver, SPA, OOP, MongoDB, FLUX, Twitter Bootstrap, GIT, SASS, Grunt, Photoshop.

Client :- Pacific Gas and Energy, India

June 2013 – March 2016

Role: UI Developer

Responsibilities:

- Interacted with business analyst to understand the requirements to ensure correct UI modules been built to meet business requirements.
- Worked in developing dynamic robust UI screens using CSS, HTML, XHTML, JavaScript, Bootstrap, Backbone, and jQuery.
- Participated as a team member in designing the user interface using HTML and CSS to make the interface use-friendly, especially child-friendly.
- Implemented user interface guidelines and standards throughout the development and maintenance of the website using JavaScript, jQuery, CSS, and HTML.
- Enhanced and built reusable components across different modules using Custom directives and CSS classes.
- Created Responsive Designs (Mobile/Tablet/Desktop) using HTML&CSS, Bootstrap.
- Created and optimized graphic prototype websites and applications interfaces using HTML and CSS.
- Involved in writing application-level code to interact with APIs, Web Services using AJAX, JSON and XML.
- Developed data formatted web applications and deploy the script using client-side JavaScript.
- Developed web pages using Forms, Components, Layouts, Events, Validations, Trees, Grids components.
- Used MVC architecture of Framework to simplify the code complexity and increase clean code.
- Worked on CSS preprocessor frameworks (SASS/LESS).
- Involved in writing application-level code to interact with APIs, Web Services using AJAX, JSON and XML.
- Interacted with java controllers (jQuery, Ajax, and JSON to write/read data from back-end systems).
- Implemented Data Grid, Charts, Forms and Layout Manager Components.
- Creating cross-browser compatible and standards-compliant CSS-based page layouts, fix the bugs pertaining to various browsers.
- Expertise in Core Java concepts such as OO Design, Multithreading, Generics Exception Handling, Collections, Java

Reflection, Annotations.

- Taken care of complete Java Multi-threading part in back-end components.
- Involved in the development of project back-end logic layer by using most of the core java features such as Collection Framework, Interfaces, Multi-Threading and Exception Handling programming.
- Used SVN the version control tool for code commits and update.
- Worked on the web services and front-end design and solved the issues with the JQuery.
- Extensively involved in writing MySQL, PL/SQL queries, to interact with Oracle.
- Worked on Cross-Browser compatibility and fixed the bugs for several browsers.
- Worked extensively on Spring MVC framework to develop new internal web application.
- Integrated with back-end code (PHP) for highly interactive AJAX based applications.
- Maintained 24/7 high volume availability demands using open-source tools such as Linux, Apache, PHP, and MySQL.

Environment: HTML, CSS, JavaScript, JQUERY, AJAX, JSON, XML, PhotoShop, ECLIPSE, SVN, Linux, Web Logic, Java, JDBC, Servlets, XML, MySQL, JavaScript, AJAX, SVN and Windows XP
