SUMMARY

Inventive front end developer (and aspiring full stack developer) with a passion for accessibility, automation, and discovering how and why things work. Fascinated by writing Bash/Node/Python scripts to automate tasks from development environment setups to web scrapers. Recently developed an interest in working with Raspberry Pis after setting up a Pi-hole on my home network, and is currently building an information board app in React, which is available on GitHub.

EXPERIENCE

Questar Assessments, Inc.

Front End Developer

Apple Valley, MN

SEP 2016 – AUG 2020

- Developed new and improved existing product features for Questar's Test Delivery System and the Item Rendering Engine in Polymer.js
- Implemented accessibility features and worked directly with The Paciello Group to better understand accessibility best practices
- Subject matter expert for a number of features, such as application-wide CSS theming, accessibility, and various tool interactions

SuperValu (contract)

Front End Developer

Eden Prairie, MN

JUNE 2016 - AUG 2016

- Worked on SuperValu customer-facing Web sites, such as cub.com, and save-a-lot.com
- Worked in a Java environment, utilizing Adobe Experience Manager 6.x (AEM), HTML, CSS, JavaScript, and Git

LifeTouch (contract)

Front End Developer

Eden Prairie, MN

FEB 2016 - JUNE 2016

- Developed the UI of Lifetouch's MyLifetouch product offering, along with its MyFamily Rewards program
- Worked in a Grails environment, utilizing AngularJS 1.5, Bootstrap, Ramda, and SVN
