

Michael Olaniran

+1-707-652-8423 | olanirandimeji94@gmail.com | Texas, USA

PROFILE

- Dynamic and results-driven Azure DevOps Engineer/ Azure Cloud Engineer with over 12 years of experience across healthcare, energy, retail, banking, consulting, and education sectors. Expertise in architecting and engineering scalable CI/CD frameworks, automating cloud-based solutions and migrating on-premises resources to Azure. Skilled in leveraging Infrastructure as Code (IaC) tools, scripting, FinOps and DevSecOps practices to ensure efficiency and security. Proficient in Azure, Azure DevOps, Terraform, ARM, PowerShell, and Bash, with a proven record of optimizing operations and reducing costs
- **Certifications:**

Microsoft Certified: Azure AI Engineer Associate (AI-102)

(<https://learn.microsoft.com/api/credentials/share/en-us/MichaelOlaniran-4140/5F5C2279A9196B76?sharingId=F711474FF026B3AC>)

Microsoft Certified: Azure DevOps Engineer Expert (Az-400)

(https://www.youracclaim.com/badges/b6d26415-b013-46d0-a673-d5d84047cfa0/public_url)

Microsoft Certified: Microsoft Azure Security Technologies (Az-500)

(<https://www.credly.com/badges/dba76785-ecde-4d13-9d88-d2bc9b64b0a3>)

Microsoft Certified: Azure Solutions Architect Expert

(https://www.youracclaim.com/badges/ed2fa237-eea1-47ab-b584-b9eb2174851c/public_url)

Microsoft Azure Architect Technologies (AZ-303)

(https://www.youracclaim.com/badges/4eefe28f-9e60-4d58-bf45-cb6cc0f8c53b/public_url)

Microsoft Azure Architect Design (AZ-301)

(https://www.youracclaim.com/badges/421bdf0-8b64-4d70-bd2b-b90db89f6dda/public_url)

Microsoft Certified: Azure Administrator Associate (AZ-103)

(https://www.youracclaim.com/badges/8cdb2ff8-a62b-447f-8e9b-2c298e37d1ca/public_url)

Technical Skills:

- DevOps architecture, Serverless computing, Microsoft Azure microservices,
- Containerization and orchestration using Docker, Kubernetes and Azure Kubernetes Service
- Continuous Integration with Azure DevOps service and Jenkins
- Azure CLI, MLOps, Azure Databricks, MongoDB, CosmosDB, Azure ML, Azure functions, Microsoft Azure PowerShell, Azure Cli, Azure AD, Azure AD App registration, Rbac, Azure firewall, Azure security and ARM template
- PowerAutomate, PowerApps
- Airflow, Streamlit
- Azure Security center, Azure Sentinel
- Management of lifecycle of applications on Kubernetes cluster using Helm
- Agile, Scrum, Basic and CMMI processes
- Unit testing, system testing, load testing and volume testing
- Code analysis and technical debt analysis using SonarQube

- **Automation and Management of lifecycle of, Android, Windows with Visual Studio App Center**
- **Github, Terraform, Gitaction CICD**
- **Scanning open-source dependencies using BlackDuck and WhiteSource Bolt**
- **Implementation of Application Security tools e.g Veracode through Azure DevOps**
- **Knowledge of PaaS, IaaS, SaaS, Infrastructure as Code (IaC) in Azure**

WORK EXPERIENCE

Nestle

June 2023 – Jan 2025

Senior DevOps Engineer

- Hands-on experience in scripting languages like PowerShell as well as IaC tools such as Terraform and ARM templates
- Consolidation and decommission of Azure subscriptions and Management group
- Transfer of Azure VM SKUs across Citrix, AKS and Databricks workloads
- Disabled Azure Cloud shell and onboarded the use of Azure CLI at an enterprise level
- Analyzed the pros and cons of migration compute workloads from Intel based architecture to AMD based architecture taking performance, cost and carbon footprint into consideration
- Designed and built Proof of Concepts in Azure.
- Utilized PowerAutomate, and Azure logic apps to automate creation of P1 incidents in ServiceNow
- In-depth understanding of Data Warehousing and Data management concepts and experience with cloud based Serverless, storage and developer tools technologies.
- Extensively supported Azure IaaS, PaaS & SaaS at an enterprise scale
- Responsible for provisioning of Azure services – Worked closely with a team of architects, engineers, and developers to create functional design specifications.

CVS Health

May 2022– June 2023

Senior Azure Cloud Engineer

- Automated the provisioning and deployment of Azure IaaS, PaaS & SaaS enterprise-level cloud infrastructures
- Led a team of Azure DevOps engineers that were responsible for the support of Azure DevOps operations at an Enterprise scale
- Designed and engineered the usage of pipeline as a code and Azure DevOps best practices across entire Software Development lifecycle
- Utilized PowerApp to automate the assignment of new team members of Enterprise analytics AD groups
- Spearheaded the adoption and implementation of Azure DevOps culture and best practices across entire organization
- Subject matter expert of the organization in DevOps, Azure DevOps, Infrastructure as a code (IaC) and Pipeline as a code
- Identity management with Azure AD
- Integrated Application Security Testing Tools such as Veracode in Azure DevOps projects.
- Automated the containerization of applications through Azure DevOps CICD pipelines
- Responsible for migration of workloads to the Azure cloud platform
- Scripting Azure policies using Terraform
- Set up Azure Machine Learning workspaces using Azure ARM templates

- Assignment of built-in and custom Azure Policies using Terraform
- Automation of deployment of Azure Data Factory to lower and upper environments using Azure DevOps Git mode
- Deployment and Provisioning of Azure SQL DB through IaC (Infrastructure as Code)
- Deployment and Provisioning of Azure Databricks ,CosmoDB , Mongo DB through IaC (Infrastructure as Code)
- Deployment and Provisioning of Azure Storage through IaC
- Automation of Logging, Monitoring and Alert generation through Azure Monitor, Alert rules and Log Analytics workspace
- CICD deployment through Azure DevOps, Gitlab and Github

Wellstar Health System

May 2021 – May 2022

Principal Azure DevOps Engineer / Azure DevOps Architect

- Automated the provisioning and deployment of Azure IaaS, PaaS & SaaS enterprise-level cloud infrastructures
- Led a team of Azure DevOps engineers that were responsible for the support of Azure DevOps operations at an Enterprise scale
- Designed and engineered the usage of pipeline as a code and Azure DevOps best practices across entire Software Development lifecycle
- Spearheaded the adoption and implementation of Azure DevOps culture and best practices across entire organization
- Subject matter expert of the organization in DevOps, Azure DevOps, Infrastructure as a code (IaC) and Pipeline as a code
- Automated the daily update of PowerBI dashboard with PowerApp and PowerAutomate
- Integrated Application Security Testing Tools such as Veracode in Azure DevOps projects.
- Automated the containerization of applications through Azure DevOps CICD pipelines
- Responsible for migration of workloads to the Azure cloud platform
- Scripting Azure policies using Terraform
- Utilized
- Assignment of built-in and custom Azure Policies using Terraform
- Automation of deployment of Azure Data Factory to lower and upper environments using Azure DevOps Git mode
- Deployment and Provisioning of Azure SQL DB through IaC (Infrastructure as Code)
- Deployment and Provisioning of Azure Storage through IaC
- Automation of Logging, Monitoring and Alert generation through Azure Monitor, Alert rules and Log Analytics workspace
- CICD deployment through Azure DevOps, Gitlab and Github
- Hands-on experience in scripting languages like Powershell as well as configuration management tools such as Terraform, Ansible and ARM templates
- Designed disaster recovery strategies, Backup, and retention architectures in Azure.
- Automation of critical IT infrastructures using Azure DevOps, PowerShell scripts and ARM template

Senior Azure DevOps Engineer / Azure DevOps Architect

- Automated the containerization of applications through Azure DevOps CICD pipelines
- Developed appropriate DevOps channels throughout the organization.
- Implemented and streamlined DevOps practices across the organization
- Established a continuous build environment to accelerate software deployment and development processes.
- Possess excellent automation skills and the ability to drive initiatives to automate processes.
- Built strong cross-functional leadership skills and worked together with the operations and engineering teams to make sure that systems were scalable and secure.
- Automated the flagging of Azure resources provisioned without tags using PowerApps and PowerAutomate
- Excellent knowledge of software development and software testing methodologies along with configuration management practices in Unix and Linux-based environment.
- Possess sound knowledge of cloud-based environments, Azure in particular
- Experience in handling automated deployment CI/CD tools.
- Configured Azure ML clusters using terraform
- Deployed ML models to Azure ML workspaces using Azure DevOps pipeline
- Possess excellent knowledge of infrastructure automation tools (Ansible, Chef, Puppet).
- Hand on experience in working with Azure
- Must have strong expertise in operating Linux/Unix environments and scripting languages like Python, Perl, and Shell.
- Reviewed deployment and delivery pipelines i.e., implemented initiatives to minimize chances of failure, identified bottlenecks and troubleshoot issues.
- Supervised, examined and handled technical DevOps Process and operations.

University of Missouri,**August 2018 – May 2020*****Azure Cloud Engineer***

- Performed unit testing, system testing, volume testing, as well as load and penetration testing of designed applications
- Reported on Cycle time and lead time of assigned work item and sprints
- Built Pipeline for on Azure ML Ops
- Trained citizen Data Scientists in using the automated Env
- Worked with AI & ML engineers to onboard new models
- Maintained and kept the MLOps pipeline operational
- Worked with enterprise leadership in building a standard
- Measured technical debt as well as code analysis using SonarQube
- Tracked work items on Kanban board
- Carried out continuous integration and continuous delivery using Jenkins and Azure DevOps service
- Granted permissions for Azure repositories at both repository level and branch level
- Installed and managed lifecycle of applications on Kubernetes cluster
- Created both Private and Public distribution groups to control access to release
- Automated and managed lifecycle of iOS, Android, Windows and macOS with Visual Studio App Center
- Responsible for the creation of Agents and agent pools to run tasks in Azure DevOps pipeline
- Provisioning of Azure Kubernetes Cluster as well as Azure Container registry
- Created Azure container registry using CLI command

- Performed testing with Azure DevOps using test case, test plans, and test suites
- Performed load test to gauge how well applications developed by developers behaved under certain types of load or stress
- Created URL load tests
- Imported test from tools such as Fiddler, Visual Studio and Apache JMeter
- Placed Pre-deployment and post-deployment approvals in Azure release pipelines
- Places Gates in Azure release pipelines to collect information from external services before triggering running of stages in pipeline
- Deployed applications to multiple destination servers and VMs using deployment groups
- Performed deployments using the Blue-Green pattern as well as the Canary deployment pattern
- Organized and controlled access to packages using Azure Artifacts
- Used BlackDuck and WhiteSource Bolt to scan open-source dependencies for vulnerabilities and licensing

PRICEWATERHOUSECOOPERS

September 2017 – July 2018

Senior Azure Cloud Engineer

- Defined roadmap for CI/CD
- Architected, designed, built, integrated, improved and managed CI/CD tools and pipelines
- Responsible for the set-up, maintenance and ongoing development of continuous build/ integration infrastructure and actively troubleshoot any issues in CI/CD pipelines to make delivery process faster.
- Kept up to date on modern technologies and trends and advocated for their inclusion within DevOps deliverables when it was possible
- Supported source code repositories, and break/fix maintenance tasks for build/CI and deployment systems.
- Worked closely with multiple product teams and assisted in making the DevOps infrastructure more scalable and improved performance.
- Presented and communicated the architecture internally and externally
- Created and managed Virtual Machines in Windows Azure and setting up communication with the help of Endpoints and VM. Possesses strong ability to fully design, configure, and troubleshoot multi-layer networks in various environments.
- Designed and developed robust backend solutions that was used by the development teams.
- Designed, deployed and managed microservices created by the development teams, using Docker and Kubernetes.
- Designed and built backend integrations using various integration tools, including .Net and Azure DevOps.
- Monitored and debugged Azure resources for multiple multitenant applications.
- Collaborated with multiple Scrum teams, Product Owners, Scrum Masters, System Architects, QA Engineers, DevOps Engineers and Users.
- Leveraged cloud platform products and services to build, deploy, and manage cloud infrastructure components through IaaS/PaaS
- Responsible for application integration, event driven architecture and integrating multiple microservices

PRICEWATERHOUSECOOPERS

February 2015 – July 2017

Azure DevOps Engineer:

- Worked on DevOps /Agile operations process of Code review, unit test automation, Build & Release automation Environment, Incident and Change management.

- Created and maintained Infrastructure for Applications in Azure using Terraform. Building & Automating CICD pipelines for different applications.
- Built engineering and release management process, building and deploying applications by adopting DevOps practices such as Continuous development, Continuous Integration (CI) and Continuous Deployment (CD) in runtime with various tools like Git, Maven, VSTS, Jenkins, Ansible, Chef, Docker, Kubernetes and managing cloud services
- Administered and monitored activities for SVN, GIT, TFS, Perforce, UCM Clear case and CVS.
- Worked on deployment automation of all the micro services to pull image from the private Docker registry and deploy to Docker swarm cluster using Ansible.
- Helped in Pre-server migration, migration and post-migration activities from on-premise to Azure
- Utilized the Azure CLI to create resources that range from VMs, Connection string, EventGrid subscription, and Event Grid Topic
- Responsible for configuring Azure boards
- Automated PowerBi dashboard refresh using PowerApps
- Defined features and Epics in Azure DevOps
- Created build environment for software developers
- Managed codes in Azure DevOps repo
- Built and deployed code with Azure pipelines
- Created Azure Deployment Pipelines from an IDE such as Visual Studio code
- Released Pipeline with a YAML File
- Created a Manual Test Plan
- Ran a URL Load Test
- Parameterized CICD deployments using variables and variable groups
- Assisted in Azure cloud automation projects
- Assisted in projects involving Continuous integration and Continuous Delivery (CI/CD)
- Responsible for Container Orchestration
- Kubernetes Architecture
- Created of pods using YAML file
- Designed replication controllers and replica set
- Planned, Configured and managed Azure backups

EXXONMOBIL

Azure Cloud Engineer

June 2014 - January 2015

- Communicated and implemented established physical, data and computer security policies and procedures
- Assisted in the establishment and documentation of new security policies and practices
- Configured Vnets and subnets as per the project requirement. Configure Azure blob storage and Azure file servers. Configured private and public facing Azure load balancers etc.
- Design and Implement Database Schema import data and build stored procedures on SQL Azure.
- Extensive experience implementing software throughout the SDLC process, deep hands-on experience of networking, migration and implementation in AZURE. Configuring windows firewall for databases engine access, network administration load balancing, IDS/IPS, IPSEC and VPN.
- Worked on Microsoft Hyper-V environment
- Implemented data ingestion with Azure Data Lake and Data Factory
- Support various hybrid cloud projects including Microsoft System Center Virtual Machine Manager
- Provided primarily remote (some onsite) support services to existing accounts by analyzing work orders; investigating complaint service tickets; conducting tests; resolving problems.

- Work with developers on applications design and integration with Azure cloud
- Troubleshoot and resolve all on-premise and Azure active directory synchronization issues (Azure AD Connect) Azure active directory B2C, B2B
- Azure active directory audits monitoring and logging
- Deployed Azure Infrastructure as a Code (IaC) using ARM template, PowerShell and Terraform
- Configured Azure load balancer (Internal and External) and Azure Traffic Manager
- Experience with Docker to containerize applications and common orchestration platforms
- Configured virtual machine networking in Azure
- Scaled Azure Virtual Machines, High availability and Resiliency
- Designed and Implemented Azure VM Storage as well as NOsql, Cosmo DB
- Configured monitoring for Azure virtual machines using Azure monitor, Log Analytics and App insights
- Configured and managed Azure Content Delivery Network (CDN)

JASMIC TECHNOLOGIES

April 2013 -June 2014

Azure Cloud Administrator,

- Integrating Azure AD with Existing On-Premise Directories
- Installing windows roles, features and deploying applications using Power Shell scripting.
- Configured Access and Federation
- Experience administering and configuring Linux-based systems, including shell scripting
- Managed and supported Identity and Access Management on Azure Platform
- Integrated Third-party App with Azure Active Directory and configuring Single Sign-On (SSO)
- Managed, maintained and provided access and permissions to users, applications and other network resources in the Azure environment
- Managed and maintained the Microsoft Multi-Factor authentication (MFA) server.
- Troubleshoot and resolve all issues related to user' mobile device MFA and VPN access for users working remotely.
- Implemented data ingestion with Azure Data Lake and Data Factory
- Supported Microsoft Office 365 and Azure environment
- Supported Microsoft MDM solution – Intune Created standard Azure Cloud SOPs
- Working experience in setting up cluster environment for load balancing and high availability of Windows servers.
- Created recommendations on how to duplicate a subset of on premise machines to the Azure Infrastructure as a Service (IAAS) offering which will be used for disaster recovery. This analysis included the specifics to synchronize on premise data with SQL Server and SharePoint instances hosted in VMs.
- Performed client acceptance and prototyping using Azure Compute and SQL Azure instances.
- Configured SQL Server 2016 and 2012R2 on to Azure VMs
- Knowledge on Replicate VMware VMs to Azure with Site Recovery.
- Worked with team for Migrating virtual environments VMware to Azure Cloud Scripting and automation to move workloads and improve operations and support.
- Installed and configured IIS web server on Microsoft Windows 2012/2012R2 /2016 server accordingly.
- Perform hands-on activities involved in creating cloud infrastructure components.
- Performed design, deployment, configuration, and maintenance of scalable Cloud infrastructure; with an intense focus on Quality and Security.
- Implemented data ingestion with Azure Data Lake and Data Factory
- Configured VMs availability sets using Azure portal to provide resiliency for IaaS based solution and scale sets using Azure Resource Manager to manage network traffic

- Worked extensively on configuring, installing and migrating VM Servers between different clusters.
- Worked on Cloud Administration tasks such as creating Affinity Group, Storage Accounts, Cloud Services, VPN, DNS server and VPN connectivity.
- Extensive knowledge of cloud networking topologies and diagnostics
- Experience with load balancing, high availability, disaster recovery, and storage architectures
- Extended working knowledge in cloud service, IaaS, worker role, queue, and azureblob and table storages, Cosmo DB, Azure SQL DB, SQL DB
- Configured NSGs for two-tier and three-tier applications. Experience in integrating on premises servers to Azure.

EDUCATION

- **MSc. Geophysics, University of Missouri, Columbia, MO, USA** GPA 3.84/4.0 (Top 1%,) **2018-2020**
- **Udemy 2019**
Python for Data Science and Machine Learning Bootcamp, Complete Python Bootcamp: Go from zero to hero in python 3, Machine Learning A-Z™: Hands-On Python & R in Data Science, Apache Spark 2 with Scala – Hands On With Big Data, The Ultimate Hands-On Hadoop-Tame your Big Data, Azure DevOps Fundamentals for Beginners, Docker for Absolute Beginners -Hands on DevOps, Ansible for the Absolute Beginner - Hands-On - DevOps
- **B.Sc. Geoscience (Geology & Geophysics), 3.9, Top 1%, University of Lagos, Nigeria** **2010 – 2015**
