
MICHEAL SEGUN

Mansfield, TX 76063 ♦ 2143177929 ♦ adufemi14@gmail.com

PROFESSIONAL SUMMARY

Highly experienced and results-oriented **Azure DevOps Engineer** with over 10 years of cumulative IT experience, specializing in the design, development, and maintenance of robust Azure cloud platforms. Proven expertise in **managing Azure VMs, storage, networking, Azure AD (Entra ID), Azure Backup, and ensuring patching compliance**. Adept at implementing comprehensive **CI/CD automation (Jenkins Core, Azure CLI, ARM templates)**, proactive monitoring, and **cost optimization solutions** for diverse applications including Java, Python, .Net, and Node.js. Strong background in **Windows-related cloud experience**, including setting up and deploying to Windows servers, coupled with hands-on experience in **API and UI Design & Development and Microservices Architecture**. Certified in Azure, Kubernetes, and Terraform, committed to enhancing operational efficiency, ensuring security best practices, and fostering collaborative environments.

SKILLS

- **Cloud Platforms:** Azure (Azure DevOps, Azure Containers, Azure Data Factory, Azure Databricks, Azure Communication Services, AKS, PaaS, Azure Git, CosmosDB, SQL), AWS (EC2, S3, Lambda, CloudFormation, ECS, EKS, VPC, ELB, Route53, RDS, IAM), GCP, VMware
- **Infrastructure-as-Code (IaC):** Terraform, AWS CloudFormation, Ansible, Puppet, Chef, CDK, HashiCorp Vault, HCP Vault
- **Containerization & Orchestration:** Docker, Kubernetes (AKS, EKS), Docker Swarm, Helm Charts
- **Programming & Scripting:** Python (Code Development, Execution & Support, AWS SDKs), PowerShell, Bash Scripting (Ksh), Groovy, Ruby, YAML, JSON, Shell Scripting, Program Logic Design/Testing

- **CI/CD & DevOps Tools:** Jenkins, GitHub Actions, Azure DevOps, GitLab CI/CD, Bitbucket, Git, GitHub, Jira, SonarQube, JaCoCo, Junit, Nexus, Artifactory, Slack, Maven, Ant, MS Build, Veracode, TFS Release Management
- **Monitoring & Observability:** Prometheus, Grafana, Splunk, CloudWatch, Datadog, Log Aggregation, System Instrumentation, Performance Analysis (Server Stress, Resource Usage)
- **Application/Web Servers:** Tomcat, WebLogic (9.x/10.x/12c), Apache (2.x/1.3.x), JBoss
- **Databases:** Oracle, SQL Server, MySQL, PostgreSQL
- **Soft Skills:** Excellent Programming & Problem-Solving, Strong Data Analysis, Advanced Verbal & Written Communication, Effective Team-level Communication, Thought Leadership, Interpersonal Skills, Team Player (Independent & Collaborative), Highly Motivated, Detail-Oriented, Time Management, Multi-tasking, Flexibility (Flexible Hours for Support), Adaptability, Aptitude to Learn & Apply New Technologies, Meet Tight Deadlines
- **Data Engineering & Databases:** Azure Data Factory, Azure Databricks, Parquet File Creation & Management, SQL Server (Database Management, Tables, Views, Stored Procedures), MySQL, Oracle, PostgreSQL, Azure CosmosDB, Azure SQL, Snowflake (Administration, Warehouse Management, Query Optimization), Relational Databases, SQL, JDBC, Entity Framework, Data Analysis
- **System Administration:** Linux (Ubuntu, Red Hat, Windows, UNIX, Solaris), On-Premises Application Management, Highly Clustered Environments, E-Commerce Software (Linux, J2EE/PHP)
- **Compliance & Security:** PCI-DSS, Audit & Compliance Requirements, Access Controls, Zero Trust Architecture, Change Management, Audit Logging, SOC 2 readiness
- **Methodologies:** Agile (TDD, SCRUM, KANBAN), DevOps Strategy, Continuous Improvement, Blue-Green, Rolling Deploys, Canary Deploys, Incident Management, Post-Release Reviews, Repeatable Processes, Workflow Analysis

Dell Technologies

- **Led the management of Azure VMs, storage, networking, Azure AD (Entra ID), and Azure Backup**, ensuring robust infrastructure and **patching compliance** across critical environments.
- **Maintained and troubleshooted Azure-hosted Windows servers**, managing Active Directory, resolving server issues, performing upgrades and patch management, and ensuring security software was up to date.
- **Built and optimized CI/CD automation for Azure Windows VM deployment and rehydration**, significantly streamlining infrastructure provisioning and reducing manual effort.
- **Automated operations using Jenkins Core, Azure CLI, and ARM templates**, implementing proactive monitoring and optimizing application performance and scaling resources in Azure.
- Designed, developed, and maintained comprehensive and scalable **DevOps automation practices for Java, Python, .Net, and Node.js applications on Azure cloud platforms**.
- Designed and developed automation for a wide range of Azure services, including **Windows VM, AKS, Database, Service Bus, Function App, Logic App, VMSS, App Gateway, VM, Storage, and Key Vault solutions**.
- Created and implemented advanced **cloud observability solutions**, including dashboards and alerts, for various Azure services, enabling proactive issue resolution.
- Established system-level performance alerts and automated elasticity based on specified requirements, optimizing resource utilization and cost.
- Designed and developed **cost optimization solutions for Azure infrastructure**, implementing strategies that resulted in significant savings.
- Responded to alerts and performance issues using **Azure monitoring tools** (e.g., Azure Monitor, Application Insights) and implemented security best practices to enhance system resilience.
- Developed and maintained highly scalable Azure-based data ingestion, storage, and distribution platforms, ensuring efficient data workflows and compliance.
- Provided comprehensive execution and support for Python code development, including designing, programming, testing, and documenting program logic, significantly easing manual burdens for developers.
- Implemented and managed Parquet file creation and management processes for optimized data storage and access, **improving query performance by 90%**.
- Participated in and oversaw code reviews for infrastructure, automation scripts, and application logic, ensuring high code quality and adherence to best practices.
- Analyzed problem areas in existing systems and workflow documents, designing and implementing system improvements that **enhanced operational efficiency by 20%**.
- Maintained applications and **accelerated CI/CD pipelines** using Jenkins, GitHub Actions, Azure DevOps, Maven, Bitbucket, SonarQube, Nexus, Docker, and Slack, **significantly reducing manual tasks and deployment overhead**.

- Automated infrastructure provisioning on AWS and Azure using Terraform and Ansible, **reducing manual setup time by 30%** and improving configuration consistency.
- Set up and managed **Kubernetes clusters (Azure AKS)** and Azure Containers, ensuring robust orchestration for distributed applications.
- Leveraged **Azure Data Factory** and **Azure Databricks** for data pipeline orchestration and big data processing, optimizing data flow and analysis.
- Provided 24/7 on-call support on a rotating basis for urgent analytic needs, application launches, and production outages, demonstrating direct and responsive support and minimizing downtime.
- Collaborated with software application developers and engineers to configure and troubleshoot application servers and implement robust SQL Server and MySQL database back-ends, including management of tables, views, and stored procedures.
- Documented all operational processes and procedures, establishing repeatable processes to optimize support and management of deployed systems.
- Designed and developed an **infrastructure cost dashboard** to monitor and optimize expenses.

AWS DevOps Engineer, 08/2019 - 04/2022

Epsilon

- Managed and automated infrastructure deployment on **AWS** using **Terraform** and **AWS CloudFormation**, implementing Infrastructure as Code best practices across **multiple enterprise projects**.
- Built and maintained highly available **CI/CD pipelines** using **Jenkins** and **GitHub CI/CD** in a highly elastic, cloud-native environment, supporting continuous integration and delivery for enterprise-scale software products.
- Applied **Docker for containerization** and **Kubernetes** for orchestrating deployment, scaling, and management of Docker Containers on **AWS ECS and EC2 instances**, optimizing resource utilization.
- Actively contributed to **Microservices deployments on AWS ECS and EC2 instances**, implementing docker-maven-plugin in pom.xml to build Docker images from Java JAR files.
- Gained expertise in a wide range of **AWS services** including EC2, VPC, Route53, ELB, S3, EMR, Redshift, and supporting networking and management/monitoring services.
- Ensured application, server, and network security, applying strong analytical and troubleshooting skills to resolve complex issues.
- Developed automation for AWS S3 and EC2.

Unix System Administrator, 08/2012 - 07/2019

Spherion

- Troubleshoot and identified all faulty hardware & software issues on customer IN/VAS Linux server platforms, planning and executing hardware replacements, **reducing system downtime by 10%**.

- Worked with **HashiCorp Vault** and installed new software patches on Linux servers, monitoring to ensure stability after all software installations.
- Wrote **Cron-scripts** to automate scheduled activities like database backups and purging of log files, **improving system maintenance efficiency by 15%.**

Unix System Administrator, 03/2011 - 07/2012

Agile Sentinel

- Ensured **24/7 uptime** on clients' Server Platforms, performing hardware and software installation and upgrades on various servers and storage.
- Performed fault troubleshooting of server hardware and software, and conducted monthly health checks and scheduled preventive maintenance.

EDUCATION

Bachelor of Science: Computer Science & Industrial Mathematics,
Ambrose Alli University - Edo State,Nigeria

CERTIFICATIONS

- Professional Scrum Master (PSMI) - Scrum.org Certified SAFe
- Scrum Master (SSM 4.6) - Scaled Agile Framework
- HashiCorp Certified Terraform Associate
- Microsoft Certified: Azure Administrator Associate
- Certified Kubernetes Administrator (CKA)
- Azure DevOps Engineer Expert
- AWS Certified DevOps Engineer – Professional
