Professional Experience

- ❖ Over 13+ years of extensive experience as a ServiceNow Developer, Architect, and Consultant across enterprise-scale implementations and platform governance.
- ❖ Deep expertise across all core ServiceNow modules including ITSM, ITOM, ITBM/SPM, HRSD, SecOps, GRC, and CMDB.
- ❖ Designed and implemented robust CMDB architectures with support for multi-cloud discovery (AWS, Azure, GCP), leading to 98%+ CI accuracy.
- ❖ Advanced knowledge of ITSM suite—Incident, Problem, Change, Request, Knowledge, and SLA management with full lifecycle automation.
- ❖ Proven success in building and managing Scoped Applications for domain-specific requirements, including multi-tenant and regulated environments.
- ❖ Strong background in ServiceNow Discovery and Service Mapping, deploying 100+ MID Servers and 18k+ assets globally.
- ❖ Led multiple implementations of Event Management, integrating tools like Splunk, SolarWinds, AppDynamics, and AWS CloudWatch.
- ❖ Architected HR Service Delivery (HRSD) including Lifecycle Events, Employee Center, Case Management, and Document Templates.
- ❖ Built and deployed full GRC suites—Risk, Policy & Compliance, and Audit Management—mapped to frameworks like NIST, ISO, SOX.
- ❖ Designed and customized scalable solutions across ITSM, ITOM, and GRC modules using Flow Designer, IntegrationHub, and advanced scripting techniques to streamline enterprise-wide service operations.
- ❖ Built and maintained complex CMDB structures and Discovery configurations, ensuring real-time visibility and integrity of configuration items integrated with multiple asset sources and monitoring tools.
- ❖ Developed interactive Service Portals and dynamic catalog items, enhancing user engagement and accelerating service request fulfillment while aligning with branding and UI/UX best practices.
- ❖ Engineered automation workflows using IntegrationHub Spokes, Orchestration, and Scheduled Jobs to eliminate manual processes and enhance operational agility across business units.
- ❖ Implemented secure and seamless API integrations with platforms like Salesforce, Azure DevOps, SAP, Workday, and Microsoft Teams via REST and SOAP protocols, using MID Server for on-prem connectivity.
- ❖ Configured and enforced policy-driven controls in GRC and IRM applications to monitor compliance, manage risks, and support audit readiness in regulated enterprise environments.
- ❖ Enhanced Event Management by creating precise event rules and alert correlation logic, reducing noise and driving actionable incidents in AIOps-integrated platforms.

- ❖ Created reusable Script Includes, Business Rules, and Client Scripts for consistent behavior across ServiceNow applications, ensuring high performance and reduced technical debt.
- ❖ Integrated asset discovery systems and software compliance tools with HAM and SAM modules to automate license tracking, procurement workflows, and inventory validation.
- ❖ Applied Agile and DevOps methodologies using Git, GitLab, and ServiceNow Source Control for iterative development, versioning, and deployment of scoped applications and global updates.
- ❖ Enabled secure access management and authentication protocols using SSO, LDAP, SAML, and multi-factor configurations, aligning with enterprise identity governance policies.
- ❖ Leveraged Performance Analytics and custom dashboards to deliver executive-level reporting on service health, SLA adherence, and operational KPIs.
- ❖ Supported Automated Test Framework (ATF) scripting and reusable test components for continuous testing and upgrade assurance across multiple ServiceNow environments.
- ❖ Developed and maintained custom applications in App Engine Studio to fulfill unique operational needs not covered by out-of-box modules.
- ❖ Conducted root cause analysis and resolution planning for critical incidents, aligning Problem Management with knowledge articles and preventive controls.
- ❖ Facilitated cross-functional collaboration between IT, security, HR, and business teams to ensure ServiceNow platform alignment with strategic organizational goals.
- ❖ Designed real-time Performance Analytics dashboards for leadership, combining KPIs from ITSM, GRC, and HRSD modules.
- ❖ Extensive experience with Virtual Agent, using NLU integration via Dialogflow CX to deliver automated user support.
- ❖ Delivered enterprise-grade App Engine Studio solutions including reusable UIs, guided flows, and contextual record producers.
- ❖ Expert in building IntegrationHub Flows, leveraging Spokes and Custom Actions to integrate with third-party platforms.
- ❖ Integrated ServiceNow with enterprise systems including LDAP, Active Directory, Workday, SuccessFactors, Coupa, Salesforce, and SAP.
- ❖ Proficient in Flow Designer, Workflow Editor, and Orchestration for process automation and cross-platform task execution.
- ❖ Developed custom REST/SOAP APIs, scripted APIs, and Inbound/Outbound Integrations using MID Servers and external endpoints.
- ❖ Strong scripting capabilities using GlideRecord, GlideAjax, GlideForm, GlideSystem, Script Includes, and UI Scripts.
- ❖ Hands-on with CI/CD pipelines using GitHub, GitLab, Jenkins, and Azure DevOps for agile-driven release management.
- ❖ Extensive use of Automated Test Framework (ATF) to maintain test coverage and ensure regression-free upgrades.

- ❖ Strong grip on platform upgrades, with pre-upgrade impact analysis, conflict resolution, and safe deployment strategies.
- ❖ Delivered role-based RBAC, Scoped ACLs, and Domain Separation for multi-organization and federal-grade compliance.
- ❖ Hands-on knowledge of CSDM (Common Service Data Model) and its alignment with CMDB, Service Portfolio, and APM.
- ❖ Designed and maintained Update Sets, System Properties, and Access Controls for configuration lifecycle management.
- ❖ Supported end-to-end HR and IT onboarding workflows, including auto-provisioning, asset assignment, and documentation handling.
- ❖ Built custom Service Catalog items with dynamic scripting, condition-based access, multi-level approvals, and fulfillment workflows.
- ❖ Experienced in agile delivery, sprint planning, backlog grooming, and working in cross-functional teams using Agile 2.0 and Scrum.
- ❖ Created knowledge articles, developer playbooks, platform standards, and best practices adopted enterprise-wide.
- ❖ Skilled in instance management—cloning, patching, sub-prod refreshes, data preservation, and user role audit logging.
- ❖ Solid understanding of security, encryption contexts, OAuth2.0, SAML, and federated identity integrations.
- ❖ Passionate about platform innovation and automation—consistently delivering scalable, modular, and reusable ServiceNow solutions.

TECHNICAL SKILLS:

Tools: ServiceNow Studio, Flow Designer, IntegrationHub, ATF (Automated Test Framework), Performance Analytics, App Engine Studio, Script Debugger, MID Server, Service Portal, Virtual Agent, ServiceNow CLI

Cloud: ServiceNow Cloud, AWS, Azure

Scripting Languages: JavaScript, GlideScript, Jelly, HTML, CSS, JSON, REST, SOAP, UI Policies, UI Scripts, Business Rules

Languages: JavaScript, GlideScript, AngularJS, HTML5, CSS3

Databases: ServiceNow CMDB, MS SQL Server, Oracle

Operating Systems: Windows, Linux, UNIX

Methodologies: Agile, Scrum, ITIL, SDLC, DevOps, SAFe, Waterfall

Modules: ITSM, ITOM, ITAM, HRSD, CSM, FSM, SecOps, GRC, IRM, Discovery, CMDB, APM, SAM, HAM, Service Catalog, Flow Designer, Custom Applications

Integrations: LDAP, SSO/SAML, REST API, SOAP API, Microsoft Teams, Jira, Azure DevOps, Salesforce, Workday, SAP, Slack, Okta

Version Control: GitHub, GitLab, Bitbucket, ServiceNow Source Control

Automation: Orchestration, RPA Integration, IntegrationHub Spokes, Scheduled Jobs, Event Management

PROFESSIONAL EXPERIENCE

Lead ServiceNow developer

UnitedHealth Group| Minnesota, USA, Remote

April 2022- Current

Achievements:

- ❖ Customized and configured ServiceNow ITOM and ITSM modules to align with enterprise healthcare operations, ensuring seamless management of incident, change, and problem lifecycle workflows.
- ❖ Developed event rules and alert management workflows to integrate and correlate monitoring tools such as SolarWinds and Splunk, resulting in more accurate incident creation.
- ❖ Built robust CMDB models and service mapping configurations to provide real-time dependency mapping between applications, servers, and network components across medical departments.
- ❖ Created automation workflows using Flow Designer and Orchestration to minimize repetitive tasks related to ticket handling and device management.
- ❖ Integrated asset discovery tools with HAM Pro to support proactive hardware management, lifecycle automation, and compliance tracking.
- ❖ Configured Discovery probes and patterns to locate unmanaged devices and synchronize data to CMDB with minimal manual reconciliation.
- ❖ Enhanced data consistency across CMDB by implementing identification and reconciliation rules aligned with the CSDM framework.
- ❖ Designed UI actions, business rules, and client scripts to support dynamic behavior and interactivity in complex record forms.
- ❖ Established API-based integration with external systems for lab results, EHR synchronization, and medical inventory systems.
- ❖ Built custom dashboards in Performance Analytics to track SLA adherence, mean time to resolution, and service availability metrics.
- ❖ Configured secure authentication protocols using SSO, Azure AD, and Okta to maintain access control and HIPAA compliance.
- ❖ Deployed Virtual Agent with NLU-powered conversation flows to assist staff with ticket creation, knowledge lookup, and equipment status.
- ❖ Collaborated with application teams to support service onboarding and created catalog items with approval routing and conditional logic.
- ❖ Defined custom lifecycle events to support IT onboarding/offboarding aligned with HR requests and user provisioning tasks.
- ❖ Documented deployment plans, system design, and enhancement requests for knowledge continuity and audit traceability.
- ❖ Participated in agile ceremonies including sprint demos, retrospectives, and backlog refinement to ensure continuous platform improvement.

Environment: ServiceNow ITOM, ITSM, Discovery, Service Mapping, CMDB, HAM Pro, CSDM, Flow Designer, IntegrationHub, Virtual Agent, MID Server, REST APIs, Azure AD, Okta, SolarWinds, Splunk, Agile

Senior ServiceNow Consultant / Technical Lead

Target Corporation| Minneapolis, Minnesota, USA, Remote

Feb

2021 - Mar 2022

Achievements:

- ❖ Integrated ServiceNow with PeopleSoft HR system to automate position management, onboarding steps, and termination triggers for in-store and regional staff.
- ❖ Enhanced HR Case Management lifecycle by building custom HR services, lifecycle events, and dynamic templates integrated with knowledge base articles.
- ❖ Designed mobile-responsive service portal themes using Service Portal Designer to offer intuitive, multilingual employee experiences across corporate and warehouse networks.
- ❖ Built asynchronous email-based approval flows and notifications for HR onboarding, leave approvals, and store assignment requests using notification templates.
- ❖ Developed a role-sensitive dashboard for field managers with widgets reflecting case distribution, pending reviews, aging tasks, and employee self-service metrics.
- ❖ Implemented Virtual Agent chatbot to automate FAQ handling for time-off policies, benefit enrollment, and employee system access queries.
- ❖ Configured condition-based access control on HR tables and catalog items to enforce separation of duties and PII protection in compliance with internal audit.
- ❖ Supported integration with Workday and SAP payroll systems using IntegrationHub spokes and scripted REST APIs for job data synchronization.
- ❖ Built custom reports and PA scorecards for HR leadership to monitor workforce KPIs, onboarding SLA breaches, and satisfaction scores.
- ❖ Created lifecycle dashboards for retail onboarding tasks across IT, HR, security, and store operations teams ensuring visibility and accountability.
- ❖ Maintained sandbox and sub-prod environments, ensuring code promotion through ATF and coordinated testing cycles.
- ❖ Supported UAT planning, knowledge transfer sessions, and job aid creation to drive ServiceNow adoption across business units.

Environment: ServiceNow HRSD, ITSM, App Engine Studio, Service Portal, IntegrationHub, REST APIs, Virtual Agent, Performance Analytics, Workday, SAP, PeopleSoft, Agile, ATF

ServiceNow Senior Consultant / Platform Lead

Wells Fargo | San Francisco, California, USA, Hybrid

Mar 2018 – Sep 2020

Achievements:

- ❖ Enhanced banking infrastructure support through tailored implementations of ServiceNow Incident, Change, and Problem Management with strict audit controls.
- ❖ Customized CAB workflow and implemented risk scoring logic to prioritize financial change requests using custom logic and decision tables.
- ❖ Configured secure Access Control Rules (ACLs) and script includes for confidential records and system tables based on RBAC principles.
- ❖ Integrated CyberArk and internal IAM systems to control privilege access provisioning and revocation from within ServiceNow.
- ❖ Engineered a multi-tier approval system with SLA-based timers for technology upgrade requests, role modifications, and firewall rule changes.
- ❖ Developed GRC policies and exception workflows to track compliance requirements across finance, risk, and operations teams.
- ❖ Deployed ServiceNow Discovery with patterns to map critical infrastructure components and their dependency to financial applications.
- ❖ Built custom dashboards using Performance Analytics for CIO-level visibility into incident backlog, risk posture, and change calendar.
- ❖ Enabled secure integrations between ServiceNow and internal CMDB tools with API authentication and encrypted data exchanges.
- ❖ Automated configuration audits and periodic access review reports using Scheduled Jobs and Report Designer.
- ❖ Designed review workflows for vendor risk assessment using custom tables and business rules tied to procurement modules.
- ❖ Developed integrations with Splunk and QRadar to auto-create security incidents based on predefined log triggers.
- ❖ Documented data flows and mapped audit trail for SOX and internal compliance monitoring using out-of-box GRC module enhancements.
- ❖ Coordinated with offshore development teams for story grooming, sprint execution, and release deployment.
- ❖ Supported major platform upgrades and patch management cycles including plugin testing, rollback planning, and hotfix application.

Environment: ServiceNow ITSM, GRC, Discovery, Performance Analytics, CMDB, Change Management, CyberArk, Splunk, QRadar, REST/SOAP, ATF, RBAC, Agile

ServiceNow Developer – ITOM & CMDB Specialist

Tech Mahindra| Pune, Maharashtra, India - Onsite

2015 – Feb 2018

Jul

Achievements:

- ❖ Designed Incident, Request, and Problem workflows tailored to a telecom client's service operations using out-of-box templates and business rules.
- ❖ Created catalog item bundles with parent-child dependencies to automate mobile service provisioning and hardware requests.
- ❖ Implemented SLA definitions and escalation policies aligned with telecom SLAs and customer experience targets.
- ❖ Configured user roles, groups, and data segmentation models for distributed network operations teams.
- ❖ Developed transformation maps and import sets to load data from legacy systems into the CMDB, ensuring minimal data duplication.
- ❖ Integrated SMS gateway using REST APIs to enable proactive notification for outage alerts and ticket updates.
- ❖ Automated onboarding and access provisioning with HR requests integrated via email parser and scheduled jobs.
- ❖ Customized list layouts, form views, and workspace views for helpdesk analysts and network field teams.
- ❖ Configured Visual Task Boards for NOC teams to prioritize incoming alerts and assign technicians across shifts.
- ❖ Supported domain separation setup for multiple telecom clients hosted in a single ServiceNow instance.
- ❖ Conducted training sessions for Tier-1 support on catalog usage, ticket handling, and escalation procedures.
- ❖ Developed client scripts and GlideAjax calls for dynamic UI behavior within major telecom support modules.
- ❖ Built custom reporting dashboards and scheduled reports for SLA trends, ticket volume by region, and service impact.
- ❖ Managed update sets and deployment packages for dev, test, and production environments with rollback planning.
- ❖ Supported platform patching cycles, plugin installations, and MID server upgrades.
- ❖ Facilitated retrospective reviews, technical documentation updates, and sprint burn-down tracking.

Environment: ServiceNow ITSM, CMDB, Catalog, SLA, SMS Integration, REST API, Visual Task Boards, MID Server, Domain Separation, GlideAjax, Agile

ServiceNow Developer / ITSM Consultant

KPIT Technologies | Pune, Maharashtra, India - Onsite

Feb

2012 – Jun 2015

Achievements:

- ❖ As a ServiceNow Analyst at Microsoft, played a pivotal role in the implementation and optimization of ServiceNow platforms, responsible for analyzing and refining backend workflows to enhance the service catalog, ensuring smooth technical operations and an improved end-to-end customer experience.
- ❖ Supported end-to-end ServiceNow ITSM configuration for automotive clients focusing on change management, release planning, and deployment coordination.
- ❖ Customized Service Catalog for IT asset requests and software installation approvals using variable sets and reference qualifiers.

- ❖ Built approval workflows with email notifications and escalation logic to support regional IT teams.
- ❖ Integrated with external procurement tools using SOAP messages for PO generation and hardware dispatch.
- ❖ Configured CI relationships and asset lifecycles within CMDB for manufacturing line equipment and R&D lab systems.
- ❖ Implemented SLAs, OLAs, and Underpinning Contracts for inter-team coordination within the shared service center.
- ❖ Developed custom dashboards and trend reports for helpdesk operations and service performance review.
- ❖ Automated onboarding request flow via Excel import scripts and email parsing rules.
- ❖ Conducted code reviews and collaborated with QA teams for ATF scripting and UAT feedback handling.
- ❖ Created end-user training guides and wiki documentation for self-service portals.
- ❖ Supported Knowledge Base structure for global automotive teams including article workflows and feedback loops.
- ❖ Deployed MID Server for secured data collection and script deployment in production subnet.
- ❖ Participated in requirement workshops, solution demo sessions, and knowledge transfer post go-live.
- ❖ Managed quarterly upgrades, plugin testing, and rollback plans to maintain platform compatibility.
- ❖ Enabled multi-language support for end-user portals used across India, Germany, and Japan.
- ❖ Aligned incident response matrix with ITIL standards and ensured ISO-compliant record handling.

Environment: ServiceNow ITSM, CMDB, Service Catalog, SOAP Integration, Knowledge Management, ATF, MID Server, SLA/OLA, Agile, ISO/ITIL Standards

EDUCATION:

- ❖ Computer Science Engineering, NED University of Engineering and Technology 2011.

Certifications:

- ❖ Certified Implementation Specialist – CSM, ServiceNow | Issued: 2022
- ❖ Certified Implementation Specialist – HRSD, ServiceNow | Issued: 2020
- ❖ Certified Implementation Specialist – ITSM, ServiceNow | Issued: 2018
- ❖ Certified Application Developer (CAD) ServiceNow | Issued: 2016
- ❖ Certified System Administrator (CSA) ServiceNow | Issued: 2014
