Senior ServiceNow Developer & Administrator

ServiceNow Professional with overall 12+ years of experience

PROFESSIONAL SUMMARY

- Highly experienced and competent ServiceNow Developer with around 12+ years of IT experience including 10 years of extensive experience in designing, developing, and implementing complex ServiceNow solutions for various clients. Adept in leading ServiceNow projects, mentoring junior developers, and providing technical guidance. Demonstrated success in delivering quality solutions and modules, and its capabilities.
- Experience working with different modules & applications such as Incident Management, Problem Management, Change Management, ITAM Asset Management, ITBM, Service Catalog, HR Service Delivery, Customer Service Management, CMDB, SACM, Operation Management (ITOM), Enterprise Architecture EA, Scripting, Reports, Integration, Survey, User Administration, Workflows and Knowledge Management.
- Experience working in the Financial Services, Healthcare, and Tech industries, and have a proven track record of delivering successful projects and initiatives.
- Functional knowledge and implementation experience of IT Service Management (ITSM) frameworks and Field Service Management (FSM) demonstrated project management skills and experience working directly with clients.
- Experience in HR Service Delivery (HRSD) including HR agent workspace, employee relations, HR knowledge management, Center of Excellence, visual task boards, service catalogs, case and HR dashboards, SLAs, and reports.
- Experience on end-to-end implementation of ITSM Incident Management, Problem Management, Change Management, Service Catalog, Knowledge Management, ITOM, CMDB, HRSD, Employee Center, CSM, WSD, Service Mappings, Government Risk and Compliance (GRC), BMC Remedy, Virtual Agent VA, ESS portal and Service Portal.
- Extensive experience in designing, developing, customizing & administering ITSM suite of applications. Configuration and customization of Help Desk, Change/Incident/Problem/Asset Management Modules based on user requirements. Functional knowledge and implementation experience in CMDB, SACM, ServiceNow Discovery, MID server architecture, probes, and sensors.
- Integration Analyst responsible for Systems Engineering including designing, developing, testing and implementing specifications from Client. Integrated ServiceNow with third-party applications like Nuvolo, B+S Connects, MECM, Lawson using REST and SOAP web services.
- Experience in integration with Aurora, salesforce, SOM, GRC, SecOps, DevOps, Splunk, LDAP integration with AD Active Directory.
- Experienced in enterprise-wide Strategic Portfolio Management (SPM) initiatives, integrating Application Portfolio Management (APM), Project Portfolio Management (PPM), and Demand Management to align IT with business strategy.
- Excellent knowledge of HTML, CSS, JavaScript, DOM, JavaScript/UI libraries and their use in implementing AJAX solutions debugging and troubleshooting the existing codes. Knowledge in object-oriented analysis design, flow designer and application development.
- Experience in developing AJAX interfaces with libraries and frameworks AngularJS, React JS, jQuery. Extensive experience in Web Applications testing developed in .NET and JAVA.

Muhammad Shahzad

Page 2 • Professional Experience (Cont.)

- Experience in implementing Enterprise Applications, scoped applications with each phase of Software Development Life Cycle (SDLC) including Requirements gathering, Analysis, Design, Reviews, Coding, Unit, and Integration Testing. Experience in agile and waterfall methodology.
- Supported the IT team responsible for the implementation and administration of the ServiceNow implementation, including managing system configurations, gathered and documented user and process requirements, developed workflow customizations.
- Experience in writing/editing web content, technical and user documentation, business process analysis, process flowcharting and documentation.
- Experience in migrating configuration between various environments into ServiceNow instances using import sets.
- Experience in Automated Testing using UFT, BMC Remedy, Test Complete, Selenium and ReadyAPI.

TECHNICAL SKILLS

- **ServiceNow Platform and Administration** - Tokyo, San Diego, Rome, Quebec, Paris, Orlando, New York, Madrid, London, Kingston, Jakarta, Istanbul, Helsinki, Geneva, Fuji, Eureka, Dublin, Calgary, Berlin
- **ITSM** (Incident, Problem, Change, Request, SACM, CMDB)
- **ITAM** (Asset Management, Procurement, Contract Management, SAM Pro, HAM Pro)
- **HRSD** (Employee Service Center, Onboarding, Performance Management)
- **ITBM** (SPM, PPM, APM, Demand Management)
- **ITOM** (Discovery, Event Management, Service Mapping)
- **Portal Development** (Service Portal, CSM)
- **Scripting** (JavaScript, Jelly Script, HTML, Ajax, Groovy, XML)
- **Integration** (REST, SOAP, MID Server, Jira)
- **Tools** - ITIL ITSM, ServiceNow, JavaScript, HTML, CSS, jQuery, MECM, Nuvolo, B+S Connects, Angular JS
- **Programming Languages** - C, C++, Java, J2EE, SQL, PL/SQL, COBOL
- **Software Methodologies** - SDLC, Waterfall, Agile, XP, SLO, Scrum
- **Databases** - Oracle 10g, MySQL, SQL, DB2
- **Platform** - Windows, Linux

CERTIFICATIONS

- ITIL V3 Certified
- ITIL V4 Certified
- CIS -Discovery
- CIS -ITSM
- CIS-HRSD
- ServiceNow CSA (Certified System Administrator)
- ServiceNow CAD (Certified Application Developer)

CLEARANCES

- Clearance - Public Trust

EDUCATION

- B.S Computer Science, Daytona State College (2006)

PROFESSIONAL EXPERIENCE

Muhammad Shahzad

Page 2 • Professional Experience (Cont.)

FIDELITY INVESTMENTS - BOSTON, MASSACHUSETTS

Senior ServiceNow Lead Developer / Administrator

FEB

2019 - Present

- Providing subject matter expertise, acting as a technical product advocate, designing, developing and implement ITIL processes, ITSM, ITAM, SACM, Knowledge, Demand and Release Management modules within ServiceNow platform.
- Designed HAM solutions leveraging ServiceNow's Mobile App for on-the-go asset updates, streamlining data accuracy and field operations.
- Integrated Service Mapping with Change Management, ensuring risk-aware IT changes and proactive impact assessments.
- Integrated ServiceNow CSM with third-party CRMs (Salesforce, SAP, Microsoft Dynamics) for unified customer data experience in AD Active Directory.
- Integrated SCCM with ServiceNow to enable automated incident creation and asset lifecycle management.
- Integrated SLO with ITSM, ITOM, and CMDB, WSD, creating vendor-to-asset relationships to improve incident resolution, change management, and SLA tracking.
- Developed and deployed Virtual Agent solutions within ServiceNow to automate HR and IT queries, enhancing user self-service experience.
- Conducted requirements gathering workshops with end users to identify HR process pain points, also worked on BMC Remedy automation opportunities, and service level agreement.
- Integrated ITAM with procurement systems to synchronize asset acquisition and reduce manual data entry errors.
- Implemented ServiceNow GRC modules (Policy and Compliance, Risk Management, Audit) and SACM to streamline governance and risk assessment.
- Configured SecOps workflows, integrating tools like Splunk and Qualys to enhance automated threat detection, incident prioritization, and remediation capabilities.
- Designed and implemented scalable cloud architectures in AWS, Azure, and GCP, leveraging IaC tools like Terraform and ARM templates.
- Performed Employee Portal customization and development, including widget modification and UI policy scripting to align with organizational branding and UX needs.
- Designed and implemented scoped applications, Single Sign-On (SSO) solutions using SAML 2.0 for seamless user authentication across multiple web applications.
- Configured ITOM Event Management to reduce noise from alerts, using correlation rules to prioritize critical events and streamline incident resolution.
- Integrated SOM with CRM, LDAP and ERP systems to streamline order processing and ensure accurate billing.
- Integrated IDR platforms with security tools like SIEMs and vulnerability scanners to provide centralized visibility and actionability.
- Proficient in implementing and maintaining Software Asset Management (SAM) and Hardware Asset Management (HAM) processes to ensure compliance, optimize costs, and reduce risks.
- Designed and developed HRSD Service Catalogs, Request Forms, and Knowledge Management articles to enhance HR process efficiency and user experience.
- Integrated CSM modules with CRM systems to provide a unified view of customer interactions, improving personalized support.
- Integrated SPM with Agile and DevOps methodologies, utilizing Value Stream Management (VSM) and Lean Portfolio Governance to enhance visibility into project prioritization and execution.
- Managed end-to-end CI/CD pipelines in Azure DevOps, automating build, test, and deployment processes for multi-environment applications.

Muhammad Shahzad

Page 2 • Professional Experience (Cont.)

- Utilized Flow Designer triggers to automate SLA notifications, escalations, and task assignments, enhancing operational efficiency.
- Connected SLO with ERP and procurement platforms (SAP Ariba, Oracle, Coupa) via REST APIs, Lawson, OAuth 2.0, and IntegrationHub, enabling automated purchase order synchronization.
- Skilled in integrating ServiceNow HRSD module with third-party HR systems such as SAP SuccessFactors, Workday, and Oracle HCM Cloud.
- Implemented AI-driven predictive analytics for asset lifecycle ITAM forecasting, leveraging Performance Analytics, Cost Transparency, LDAP and Risk Assessment models to optimize procurement strategies.
- Architected and implemented ServiceNow ITSM & CSM modules with Domain Separation, ensuring data isolation and compliance with security standards.
- Responsible for ensuring that Knowledge Articles are maintained, stable, and available to all clients without interruption during their working hours during the process of upgrades.
- Created customized reports and dashboards in SAM PRO and HAM PRO to provide insights into asset usage, cost trends, and potential savings opportunities.
- Configured and optimized Case Management workflows (CSM), including assignment rules, SLA definitions, and escalation policies to improve response and resolution times.
- Integrated GRC with external audit and regulatory tools (e.g., SOX, GDPR, NIST, ISO 27001) for automated evidence collection.
- Built and deployed custom probes and sensors in ITOM Discovery to meet unique infrastructure needs and expand coverage beyond out-of-the-box functionality.
- Built custom API integrations to connect ServiceNow with third-party platforms, including Nuovo, Lawson, ERP, CRM, B+S Connects, SACM and HR systems, for seamless data exchange.
- Implemented tailored Employee Center/Portal views with scoped widgets and dynamic filters based on user roles and locations.
- Built custom ITAM dashboards to monitor asset utilization and cost allocation, improving financial accountability.
- Worked closely with IT teams to integrate SAM and HAM tools with other enterprise systems, enhancing cross-functional data flow and improving overall asset management efficiency.
- Implemented automated file-based integrations (SFTP, FTPS) for batch processing of transactional data between ServiceNow and third-party tools.
- Implemented Discovery from scratch, by installing MID Servers on remote desktops.
- Developed scalable ITSM and CSM scoped applications, configuring Incident, Problem, Change, and Case Management, WSD to streamline customer and IT support operations.
- Designed and developed scripts for any customization required. Supporting PowerShell scripting in workflows.
- Develop and customize ServiceNow workflows, business rules, and client-side scripts using JavaScript, Glide APIs, MECM and other scripting languages supported by the platform.
- Configured and customized catalog design using dynamic form rules, UI policies, and automation to enhance user experience and fulfillment efficiency.
- Configured and managed ITOM MID Servers for secure discovery and integration across distributed network environments.
- Configured Virtual Agent Designer with custom topics and integrated it with backend workflows for seamless case creation and resolution.
- Configure and automate ServiceNow data imports and exports using scripting and integration tools, such as ServiceNow Import Sets.
- Automated FSM processes using Flow Designer, improving task efficiency and reducing manual efforts.
- Integrated Employee Center with third-party systems (e.g., Workday, Azure, AD Active Directory) via REST APIs for real-time data synchronization and SSO authentication.
- Implemented AIOps solutions to enable intelligent event correlation and predictive analytics for proactive incident management.

Muhammad Shahzad

Page 2 • Professional Experience (Cont.)

- Designed an end-to-end ITAM scoped applications, integrating Hardware Asset Management (HAM) and Software Asset Management (SAM) with CMDB, and Procurement for full lifecycle visibility.
- Created a unified portal for HRSD, providing employees with a single place to access HR services, submit requests, and find self-help resources.
- Provided end-to-end troubleshooting for CSM-related issues, including case routing failures, SLA misconfigurations, and customer portal UI enhancements.
- Integrated ServiceNow SLO with SAP Ariba and Oracle Procurement via REST APIs.
- Deep experience working with team-managed projects in JIRA, helping teams configure agile workflows like Scrum and Kanban to match their needs.
- Developed custom flow actions in Flow Designer, Employee Center/Portal to enable integration with third-party tools such as BigPanda, SolarWinds, and Microsoft Teams.
- Enable the efficient Discovery of SSH and SNMP devices and WMI devices running on multiple Windows domains, using multiple MID Servers.
- Utilized UI Builder and App Engine Studio to design and publish reusable components across portals, ensuring consistency and performance.
- Developed SecOps dashboards and reports, enhancing visibility into cybersecurity incidents and compliance gaps.
- Configured JDBC/ODBC connections to facilitate real-time data retrieval and updates between ServiceNow and external databases.
- Developed advanced client scripting (JavaScript, GlideAjax, GlideRecord) to enhance Service Portal functionality and interactive user experiences.
- Integrated ServiceNow CSM with third-party CRM, ITSM, and ERP systems, leveraging REST/SOAP APIs, Lawson, OAuth 2.0, and IntegrationHub spokes.
- Implemented CSM Configurable Workflows using Flow Designer to automate case routing, approvals, and escalations

VANGUARD- PENNSYLVANIA (REMOTE)

Jun 2018 - Feb 2019

Service Now Developer & Integration Lead

- Developed and maintained an integration strategy for ServiceNow to connect with external systems and applications, ensuring that data is transmitted securely and efficiently.
- Architected intuitive and user-centric HRSD solutions, enhancing the employee journey across hiring, onboarding, and internal mobility processes.
- Introduced advanced error handling mechanisms in Flow Designer workflows to improve fault tolerance and ensure reliable task execution.
- Developed and managed a roadmap for integrating ServiceNow with third-party systems, such as CRMs, ERPs, and ITSM tools.
- Implemented end-to-end Supplier Lifecycle Operations (SLO) in ServiceNow, optimizing vendor onboarding and contract management.
- Improved ITAM data hygiene through automated asset reconciliation processes, reducing inconsistencies in the CMDB.
- Automated CSM contract management processes to track and maintain SLAs, ensuring compliance with service agreements.
- Engineered robust Service Portal solutions by developing widgets, leveraging AngularJS, and implementing role-based access controls.
- Used ITOM Certificate Management to automate SSL/TLS certificate renewals and avoid downtime caused by expired certificates.

Muhammad Shahzad

Page 2 • Professional Experience (Cont.)

- Provided ongoing support and optimization for AIOps platforms, ensuring continuous improvements in anomaly detection and root cause analysis.
- Designed and implemented the HRSD Center of Excellence (COE), tailoring HR categories like benefits, payroll, and employee relations to fit organizational needs.
- Implemented SecOps Vulnerability Response processes to manage and resolve vulnerabilities effectively, aligning with enterprise security policies.
- Monitored integration performance, and proactively identify and address any bottlenecks or areas for improvement.
- Stayed up to date with emerging trends and technologies in the integration space and evaluate their potential impact on ServiceNow.
- Integrated on-prem ServiceNow with secure enterprise systems, ensuring seamless communication using protocols like REST, SOAP, and JDBC.
- Integration with ITSM tools such as JIRA, Zendesk, or BMC Remedy to streamline the incident management process and automate ticket routing.
- Conducted regular audits to ensure SAM and HAM data accuracy, helping to reduce the likelihood of compliance issues and unnecessary software or hardware renewals.
- Integration with HR tools such as Workday or Oracle HCM Cloud to manage employee data and automate HR processes.
- Integration with cloud platforms such as AWS, Azure, or Google Cloud to manage cloud infrastructure and automate deployment processes.
- Deployed ITOM Cloud Management to monitor, manage, and optimize resource usage across multi-cloud environments like AWS, Azure, and Google Cloud.
- Integration with collaboration tools such as Microsoft Teams or Slack to enhance communication and collaboration within teams.
- Automated asset discovery ITAM, contract management, and compliance tracking, leveraging ServiceNow SAM Pro, SaaS License Management, and True-up reporting to optimize software spending.
- Used Flow Designer's scripting and logic tools to enhance workflows with conditional branching and reusable sub-flows, supporting scalability.
- Set up tailored JIRA dashboards and reports to provide teams and stakeholders with clear insights into project status, team performance, and key metrics.
- Expanded the use of the HRSD unified portal beyond HR, integrating it with IT and facilities teams to create a shared service experience.
- Implemented ServiceNow Discovery to automate infrastructure discovery and CI population in CMDB, improving data accuracy and visibility.
- Configured proactive CSM notifications to keep customers updated on case statuses and service disruptions.
- Configured MID Server deployments for secure data collection, integration, and orchestration between ServiceNow and enterprise IT systems.
- Integration with security tools such as Splunk or Qualys to manage security incidents and vulnerabilities.
- Collaborated with teams to design and execute ITOM Roadmaps, aligning ITOM strategies with organizational IT and business objectives.
- Integration with monitoring tools such as Nagios or SolarWinds to monitor the health and performance of IT systems.
- Integration with data analytics tools such as Tableau or Power BI to gain insights into IT operations and performance.
- Integration with the existing LDAP and Single Sign-On (SSO) solution.
- Experience with ServiceNow platform architecture and design, including knowledge of key components such as the application server, database, web server, and integration components.
- Expertise in ServiceNow upgrade processes, including the ability to plan, execute, and troubleshoot upgrades from one version to another.

Muhammad Shahzad

Page 2 • Professional Experience (Cont.)

- Developed custom dashboards in Performance Analytics for ITOM, providing actionable insights into system health and operational performance.
- Implemented tailored integrations via Flow Designer's custom actions, connecting ServiceNow to enterprise platforms like Workday, Azure DevOps, and Salesforce.
- Reviewed Skipped records to ensure the impact of customization on OOTB Objects.
- Worked with business stakeholders to understand their requirements for portal functionality and design and create user-friendly and intuitive portal experiences.
- Developed and customize portal widgets using HTML, CSS, and JavaScript, and integrate these widgets into the portal layout.
- Managed the full lifecycle of software (SAM) and hardware (HAM) assets, ensuring efficient tracking, compliance, and cost optimization from procurement to retirement.
- Developed custom dashboards and reports using the Performance Analytics module and using this data to identify areas for improvement and drive organizational decision-making.
- Robust experience on scripting, both server and client-side scripting. Develop and customize ServiceNow workflows, business rules, and client-side scripts using JavaScript, Glide APIs, and other scripting languages.
- Enhanced testing efficiency by integrating ATF with external reporting tools, providing detailed insights into test execution and results.
- Used Client scripts, Business Rules, UI Actions, UI Policies, Script Includes and Transform Maps.
- Created Knowledge Articles to provide end users with a robust HTML experience.
- Involved in using the Access Control List (ACL) to restrict and give section access to the users.
- Experience in using the Application Programming Interface (API) that provides the classes and methods which were used in scripts to define functionality.
- Launched a branded HRSD unified portal, making it visually appealing and easy to navigate for employees seeking HR support.
- Enhanced asset lifecycle visibility by utilizing HAM in conjunction with ServiceNow's CMDB to track dependencies and optimize resource planning.
- Deployed ITAM workflows to streamline asset lifecycle management, from procurement to decommissioning.
- Implemented CMDB Bi-directional Web Services integration. It involves consuming Restful web services, publishing SOAP web services API's, using Business Rules, Script Includes, UI Actions and other ServiceNow scripting modules to support data synchronization and business logic.

SANFORD HEALTH - SIOUX FALLS, SOUTH DAKOTA (REMOTE)

Aug 2016 - Jun 2018

Service Now Portal Developer & Admin

- Worked on portal development that included writing down angular JS widgets more on the client side, server side so making sure these widgets work both on desktop and as well as mobile level.
- Worked on Service Portal using out of the box widgets and customizing widgets according to the needs of the client.
- Configured CSM self-service portals to empower customers with tools for case tracking, service requests, and accessing knowledge bases.
- Automated routine IT operations tasks using ITOM Orchestration, improving operational efficiency and reducing manual workloads.
- Designed and developed custom portals in ServiceNow, leveraging the ServiceNow Content Management System (CMS) and other portal development tools. Worked on Unified portal to give end user experience of both ITSM and HR functionalities.
- Integrated chat-based Virtual Agent solutions with HRSD to provide 24/7 employee support, resolving common queries without human intervention.
- Created customized and User-Friendly widgets so users can access specific platform features using Service Portal.

Muhammad Shahzad

Page 2 • Professional Experience (Cont.)

- Streamlined license management in SAM PRO by automating software installations, upgrades, and audits, ensuring compliance without manual tracking.
- Worked on Portal Development from scratch. Involved In requirement gathering with Client.
- Performed mapping using ServiceNow Service Watch.
- Integration with ADDM (Discovery Tool) into CMDB via CMDB Sync.
- Responsible for creating various workflows for Incident Management, Change Management, Service Requests and SLA's.
- Experience in working with Scripted Web services, Script Includes, JavaScript and Jelly Scripting.
- Worked on Service Portal to build widgets.
- Enhanced data quality by applying CMDB-like governance to HRSD records, improving case resolution accuracy and reporting insights.
- Involved in creation of business rules, client scripts, UI policies, UI Actions as per the requirements.
- Created XML Schema, XML template and used XML SAX/DOM API to parse them.
- Worked with engineers and application developers' groups to implement solutions for the company's LDAP services.
- Developed the Catalog client scripts and UI policies to make client-side changes.
- Integrated ITSM modules with DevOps tools to enable seamless issue tracking and resolution, bridging operational and development teams.
- Implemented end-to-end Service Catalog, Incident Management, Configuration & Asset Management, Operation Management (ITOM), Change Management and Release Management with extensive knowledge on Content Management System.
- Participated in validating Form and Table level using UI Policies in ServiceNow.

CHASE BANK - NEW YORK, NY (REMOTE)

Apr 2013 - Aug 2016

Service Now Developer & Administrator

- Created Business Rules, Client Scripts associated Script Includes.
- Designed Workflows, along with standard Workflow templates which can be reused.
- Configured Data sources and transform maps for CMDB.
- Built Citrix integration to load virtual and desktop groups into CMDB tables
- Orchestrated the efforts of vendors, and internal divisions/departments to internalize new IT Asset Management processes
- Worked on LDAP integration with ServiceNow for obtaining users and groups.
- Created Breakdowns, Scorecards, Dashboards and Widgets for Performance analytics process.
- Defined and configured DISCOVERY schedules to set up mid servers and check for the connectivity.
- Imported Configuration Items (CI) from third party applications using import set tables.
- Performed migration between various ServiceNow instances using Update Sets.
- Customizing the forms for the Incident, Change and Problem Management ITIL processes.
- Reconciliation of complicated workflows to simpler form.
- Created database views to pull reports on variables which are being used by catalog items.
- Wrote Catalog client scripts and UI policies to make client-side changes.
- Created the UI pages to use them in catalog items using the UI Scripts.
- Created Knowledge articles to document the steps in creating the catalog items.
- Worked on different kinds of variables and variable sets.
- Worked on order guides, to arrange them in sequential order to make the user comfortable while raising a request.
- Responsible for the acceptance, identification, storage and withdrawal of all supported CIs.
- Responsible for ensuring that all the CIs are registered, and these records are correct and up to date.
- Worked in creating various Custom Applications, Modules, Tables and Table extensions as per the requirements.

Muhammad Shahzad

Page 2 • Professional Experience (Cont.)

- Resolved typical Users access and roles issues by checking active directory and users' table.

DIGITAL MANAGEMENT LLC - BETHESDA, MARYLAND

Jun 2012 - Apr 2013

Service Now Developer & Administrator

- Implementation, Customization and Maintenance of ITIL modules such as Incident, Change, Problem, Knowledge, Service Catalog, CMDB in ServiceNow.
- Worked on various modules of ServiceNow like Incident management, Change management and Problem management, Event Management, Service Catalog, User Administration, Reporting and Discovery.
- Designed Workflows, along with standard Workflow templates which can be reused.
- Created database views to pull reports on variables which are being used by catalog items.
- Configured multiple forms for Asset module using Configuration Management Database.
- Performed day to day administration of the ServiceNow tool by maintaining business services and configuration item relationships in ServiceNow tool.
- Responsible for analysis of problems and providing resolutions or fixes for production issues related to ServiceNow platform within Service Level Agreement SLA.
- Developed various applications and modules in Incident, Problem and Change management using ServiceNow tool.
- Worked on Update Sets to create, modify and deploy them into different instances.
- Imported data from spreadsheets using Import Sets and Transform Maps.
- Provide production support for Incident, Problem, Change, Service Catalog, Release, Deployment, Task, Knowledge management modules in Service Now platform.
- Created new Users, assigned them to Groups based on their Roles.
- Responsible for analyzing, designing and developing business applications which involved customization, workflow administration, data imports, custom scripting using JavaScript.
- Supported Business Departments by coordinating moves, additions and changes in IT Services and facilities.
- Coordinated ServiceNow environment/form back-end customizations. Notified clients and updated documentation.
- Responsible for closing the Open Incidents, Problems and Enhancement requests and communicating with customers about the status of the request to ascertain a timely customer gratifying result.
