

PROFESSIONAL SUMMARY

I have worked in a variety of organizations at different levels supporting Development, & DevOps Initiatives. With my Scaled Agile certified skills, I bring valuable process-oriented view point, Agile related industry best practices, and a lot of passion for continuous improvement.

With my Scaled Agile certified skills, as RTE as well as POPM, I offer unique combination of skills needed for successful delivery. I have verifiable delivery success with one of the leading fortune 500 clients, where I completed waterfall to Agile migration of IT teams to efficient Agile Releases Trains.

PROFESSIONAL CERTIFICATIONS

- Scaled Agile Certified SAgFe® 5 Release Train Engineer (RTE)
- Scaled Agile Certified SAgFe® 4.6 Product Owner/Product Manager (POPM).
- Automation Anywhere University Certified Essentials RPA Professional
- Automation Anywhere Certified Advanced RPA Professional (V11.0)

CURRENT WORK EXPERIENCE

DevOps Consultant / SAgFe Certified Release Train Engineer

Bank of America

– Addison, TX

Jul 2019 -

Present

Responsibilities:

- Implemented the **continuous integration, continuous deployment (CI/CD)** and **test-driven development (TDD)** methodologies while onboarding various different categories of applications and solutions.
- Have exposure to **transitioning waterfall teams to an Agile team** as a process engineer.
- Providing guidance to the various internal teams to **adopt lean agile mindsets** and help them transitioning to agile solution delivery practices.
- **Horizon (CI/CD) Adoption** - Provide guidance for development teams to complete the onboarding or adoption of Horizon target-state CI/CD tools and technologies. This work is ongoing and follows the plan established during the DevOps intake process, with consulting provided by one or two dedicated DevOps engineers focused on the needs of the development team.
- **Pre-Release Support** - Assist development teams with creation and completion of Nexus and CRQ records, including coordinating the interactions and approvals needed to get changes deployed. This work

is task-oriented. assigned to various members of the DevOps team, initiated by phone call or email, and managed through Jira tickets.

- **Emrironment/Infrastructure Support** - Assist development teams with handling new environment requests, changes, and other support issues. The DevOps team will primarily act as facilitator for contacting the necessary teams and staff for each issue but will also provide some level of technical and configuration support for pre-production environments (LLE).
- **Manual DevOps Build/Deploy Support** - When Horizon adoption is not possible or just not completed yet. some DevOps functions may be shifted from the development team to the LSS DevOps team. This work is handled case-by-case. with the DevOps team providing support for manual or partially automated (non-Horizon) builds and/or deployments.
- **Leadership:** Represented LSS-DevOps during business and technical meetings. Lead the team for successful MSP release and integrated release for collateral strategy.
- **Build/Deploy/Release tools:** In the capacity of an extended **ETASC/SDM** team, on boarded APP DEV teams to DevOps and **Mulesoft Deployments:** using Vanguard on PROD as well as all LLE environments, also updated domain & cert updates and provided ongoing build/deploy/release support for those applications, Interface tools with source code repositories such as Git, BitBucket, TFS and SVN.
- **Ticketing tools/process:** Help teams with the onboarding process that encompasses use of ticketing tools like NEXUS, JIRA, PPRT and ARM etc.
- **Compliance:** Comply and uphold Bank of America processes around management of enterprise and third-party code (Enterprise Maven repository).

Agile Team and Delivery Skills:

- Facilitated effective collaboration among Agile team members and supported team resolve problems.
- Have worked with diverse teams with Excellent communication, influencing and facilitation skills and also escalated risks and issues during team disagreements.
- Have High level of credibility with executives and business partners and demonstrated ability to influence, negotiate, and drive to results.
- Able to work independently with limited supervision and Acted as SPOC for all things around the project.
- Planned and Managed, work, timelines with clear and crisp communicated project status with relevant stakeholders.
- Builds positive relationships with stakeholders at the same time held all accountable for their roles and responsibilities.
- Uses the right set of questions to uncover the root cause and impact analysis of business challenges, identify risks & opportunities, and make suggestions & recommendations.
- Actively contributed in documentation of tools and process in team wiki highlighting strategy, business goals/objectives and plans with status to milestones, plan and strategy.

- Self-motivated with organizational skills and managed multiple priorities without affecting quality or timelines.
