Professional Summary

- Having 8+ Years of QA experience in Manual/Automation testing of Web Apps and clients, QA Automation Engineer proficient in testing on Client/Server and Web based Applications using Selenium Web Driver IO, Java Script and BDD Cucumber.
- Experience in all phases of the Software Testing Life Cycle (STLC), Software Development Life Cycle (SDLC), Bug life Cycle, and Methods like Waterfall and Agile.
- Extended experience in systems testing, integration testing, UAT testing, positive and negative, functionality testing, and regression testing.
- Expertise in Manual Testing Automation Testing and Service Oriented Architecture.
- Experience with SOA, Web Services, SOAP, Soap UI, RESTFUL, and WSDL technologies.
- Experience in developing end to end automation using Selenium WebDriver/IDE, Cucumber, TestNG, Maven, Jenkins, Web Services testing (POSTMAN, SOAPUI, REST ASSURED).
- Tested and Automated API's/Restful Services developed IBM Mule soft using Java and Rest Assured java libraries.
- Having experience in Perfecto Mobile Automation scripts for parallel and sequence execution on multiple devices and different OS (Android and iOS).
- Experience with automation testing tools: Postman API, Selenium Web driver, QTP.
- Knowledge in Web Service testing by using SoapUI, Postman, Rest Assured.
- Designing and implementing for fully automated server build management, monitoring and deployment by Using DevOps Technologies like Puppet, Chef, Jenkins.
- Expertise on Testing REST API using Robot Framework and SOAP U.
- Exhaustive Experience in Designing & implementing Automation Frameworks including TDD, BDD, data-driven, keyword-driven, and hybrid using Selenium Web Driver, JavaScript.
- Experience in SQA (Software Quality Assurance) including Manual and Automated testing with tools such as Selenium RC/Web Driver/IDE/Grid, HP Quick Test Professional and Junit/Testing, and Load Runner.
- Expert in developing Java Selenium Web Driver/RC/IDE/GRID test scripts using Java,

JavaScript, Test Framework, ANT/MAVEN build tools.

- Experience in load and performance testing tool JMeter.
- Experience in Automation testing using Selenium and HP Quality Center.
- Extensive experience on Developing Automation Scripts and Integration with CI/CD pipeline using various tools as Team City, Azure DevOps Pipelines.
- Developed Azure API Management (APIM) Publisher portal and Developer portal for hosting APIs.
- Experience on DevOps operations process like continuous integration, building pipeline, Jenkins, unit test automation, Build/Release Management, Software Configuration Management, Environment, Service, Incident and Change Management.
- Created Azure Powershell script for APIM backup and restore operations.
- Experience in various application lifecycle management tool like ALM/QC, Jira, Azure DevOps.
- Designed and implemented end-to-end test automation frameworks using Cypress for web applications, ensuring high coverage of UI test scenarios.
- Experience in using HP Interactive automated testing tools like Quick Test Pro and Quality Center.
- Proficient in using Quality Center, Rally, JIRA, Clear Quest, and Bugzilla. Experience in working with open-source tools Selenium (Selenium IDE, Selenium RC, Selenium Web Driver), Eclipse, and preparation of automation test framework.

Software Skills:

Automation Tools	Selenium Web Driver, Selenium RC, Selenium IDE Selenium GRID, UFT, SOAP UI, JIRA, Protractor, JMeter, Manual Testing, Spec flow Perfecto, Cucumber, Jaws, Appium, See Test, Jasmine, Karma, POSTMAN API Wireshark, Charles
Languages	C, Java, Python and Mainframes, SAP
Testing Methodologies	Agile, Scrum, waterfall Model.
Defect Tracking tool	Jira, Bugzilla, IBM rational
Web Technologies	Web Technologies: HTML, HTML5 and XML
Protocols	TCP/IP Protocol suite (HTTP, FTP, SMTP, UDP, DHCP, SSL, DNS)

Continuous Integration Tools	Jenkins, Hudson, Cruise Control
Packages	MS-Office Suite (Word, Excel, Access), MS-Project and MS-Visual Studio
Operating Systems	Windows variants, UNIX, Linux, iOS

Academic Profile

- Master's in Master of Computer Applications from Symbiosis University, Pune, India 2006-2009.
- Bachelor's in science from Sri Krishna Devaraya University, Anantapur, India 2003-2006.

Projects Profile

Client: AT&T

Nov 2022 – Till Date

Role: Sr. QA Automation Consultant

Roles and Responsibilities:

- Experienced QA engineer with a history of success in automating testing and improving efficiency
- Strong background in collaborating with developers, mentoring peers, and collaborating with offshore teams
- Involved in regression testing using QTP tool prior converting QTP scripts to Selenium web-driver. Implemented and worked on Acceptance Test Driven Development (ATDD) agile methodologies completing releases ahead of schedule.
- Performed defect reporting and bug tracking using JIRA and also followed up with development team to verify bug fixes, and update bug status.
- Reviewed database test cases according to assigned Requirements to validate reports by retrieving data with complex SQL queries from SQL Server.
- Implemented automated testing using Selenium and JUnit, resulting in a 29% reduction in testing time.

- Design, execute, and analyze performance tests to assess the scalability, reliability, and responsiveness of the SAP ERP system under various workloads.
- Simulate real-world usage scenarios by applying different levels of user load to identify bottlenecks, system limits, and areas requiring optimization.
- Document and report performance-related defects or anomalies in the system, collaborating with development teams to ensure timely resolution.
- Implemented simulator for Mobile App Testing in Android Platform and iOS Platform using Appium and See Test.
- Designed and implemented end-to-end test automation frameworks using Cypress for web applications, ensuring high coverage of UI test scenarios.
- Implemented Page Object Model Pattern (POM) based Keyword Driven automation testing framework utilizing Java, Test-NG and Selenium Web-Driver.
- Used ANT and Maven for building the WebDriver project. Integrated with Continuous Integration tools Jenkins for running tests automatically.
- Implemented automation framework in Selenium WebDriver using Behavior-Driven (BDD) approach in Cucumber framework with Gherkin.
- Key role in the acceptance of standardized software testing methods, tools, procedures, and controls for contact center solutions such as IVR, telephony, and reporting
- Expertise in the Salesforce ecosystem, including UI, web services, and APIs
- Designed and executed robust test automation and regression testing strategies
- Proficient in a range of tools and technologies, including IntelliJ IDEA, Cucumber BDD, Gherkin Script, Java Script, Appium, Python, JUnit, Sauce Lab, Java and Selenium WebDriver
- Well-versed in Atlassian products such as Jira, Confluence, Bamboo, and Bitbucket
- Skilled in using Visual Studio Code for metadata analysis
- Confident in ability to make a positive impact in any organization as a QA engineer
- Excited to explore opportunities to join a new team and drive continuous improvement in the delivery of high-quality software.
- Proficient in Tosca automation, including service templates, blueprints, and orchestrators
- Experience with cloud deployment and infrastructure automation, including AWS and Azure.

Environment: IntelliJ IDEA (Automation), Maven build, Cucumber BDD, SAP, Gherkin Script, Java Script for step definitions, Atlassian products (Jira, Confluence, Bamboo, Bitbucket for version control), Office 365, WebEx & Teams for collaboration and agile ceremonies' code for Metadata Analysis

Client: Aditya Birla group

Apr 2016 – May 2018

Location: Hyderabad, India

Role: QA Automation Engineer

Roles and Responsibilities:

- Expert in developing Java Selenium Web Driver/RC/IDE/GRID test scripts using Java, JavaScript and Test Frameworks using Maven builds, and ANT/MAVEN build tools.
- Worked as a senior QA Analyst who is responsible for developing and executing comprehensive suites of automation test plans and test cases. (IDE: Eclipse)
- Involved in various meetings like Project planning, Scrum calls, weekly refinement, sprint retrospective, Defect Status and QA workshops.
- Involved in gathering Non-Functional Requirements and put them in a Performance Test Plan and Workflow document.
- Performed Gap Analysis to check the compatibility of the existing system infrastructure with the new business requirements.
- Coordinated (with business users, database administrator, mainframe team and testing team) in the mirror to production testing.
- Conducted GAP analysis to analyze the variance between the system capabilities and business requirements.
- Extensively used Protractor locators like (model, css Containing Text, button Text, options, binding) to interact easily with Angular Application.
- Designed and developed REST API test automation using confidential karate framework.
- Interacted with teams in AFS, ACBS and Info Lease to extract the information for the reports.
- Automated regression test suite using Cypress that reduced the UAT cycle time by 50%
- Gathered requirements and created Use Cases, Use Case Diagrams, and Activity Diagrams using MS Visio.
- Conducted User Acceptance Testing (UAT) and collaborated with users and vendors who build the system.
- Used python to extract raw data and transformed it into a visually presentable format using power BI.
- Upgraded the present application by adding new functionalities and adding new reports.
- Extensively used SQL for accessing and manipulating database systems.
- Contributed to developing selenium/BDD framework for angular four web application.

- Wrote regression test cases and did smoke testing with users.
- Participated in Regular Sync-up calls and meetings with client and Onsite coordinator.

Environment: Eclipse, Junit, TestNG, Jira, Confluence, GitHub, Jenkins, Core Java, Selenium, Cucumber, Jmeter, TestNG and Windows.

Client: Aegon Life Insurance

Aug 2011 – Mar 2016

Location: Bengaluru, India

Role: Quality Analyst

Roles and Responsibilities:

- Experience with automated testing tools such as Selenium and Cucumber.
- Understanding Requirement Specifications and Design Documents.
- Good experience in Preparing Test Cases and Execution.
- Automated test scripts for Sanity test.
- Regression testing using Selenium automation tool.
- Conducted Smoke Testing, Functionality testing and Regression testing.
- Working in an agile environment and delivery the User Story in a very short span of time.
- Record and track issues logged into the defect-tracking system using Bugzilla.
- Developed and Executed Test Cases using WebDriver with TestNG
- Involved in preparing bug status report and Preparing test status report.
- Perform regression testing after bug fixation and modification.
- Participated in Regular Sync-up calls and meetings with client and Onsite coordinator.

Environment: Manual Testing, JIRA and Windows.
