## SUMMARY

---

Dynamic Full Stack .NET Developer with over 5 years of experience crafting innovative web applications. Proficient in .NET frameworks, including .NET Core, C#, ASP.NET, ADO.NET, HTML, CSS, JavaScript, React, Blazor, and AngularJS/Angular. Skilled in SQL Server for robust database design and management. Adept at integrating cloud services like Azure and AWS for enhanced scalability and security. Proven ability to deliver high-quality projects on time and within budget. Experienced in utilizing Azure DevOps for CI/CD pipelines, project management, and collaboration. Proficient in GIT and TFS for version control and code collaboration. Strong problem-solving skills, excellent communication, and collaborative teamwork. Dedicated to continuous learning and staying updated on industry trends.

## EXPERIENCE

---

### *American Institute of Research, **Applications Developer***

*Mar 2024 - Present*

- Develop and manage applications such as iTravel, Seated Massage, and DataGovernance. C# .NET was the main language used to develop and maintain these apps.
- Developed apps using Blazor framework with Radzen UI elements.
- Expert in T-SQL; utilized for business logic and database management.
- Engage with clients to figure out features, tasks, and future applications.
- Utilized version control systems such as Git for code collaboration and management, ensuring code quality and traceability.

### *Paccar, **Full Stack Developer***

*Jul 2023 - Dec 2023*

Coordinate with cross-functional teams to identify process gaps and develop solutions, resulting in steady application development.

Developed web applications using MVC, Web Forms, and Entity Framework. Expert in C#, T-SQL; utilized for business logic and database management.

Implemented front-end functionalities using HTML, JavaScript, CSS, Bootstrap within Angular framework.

Maintained high standards of code quality and documentation.

Worked collaboratively in a team-oriented environment, contributing at various stages of the software development life cycle, from design and development to testing and deployment.

Delivered high-quality, maintainable, and well-documented code, adhering to organizational standards and best practices.

Utilized version control systems such as Git for code collaboration and management, ensuring code quality and traceability.

Implemented automated unit tests using NUnit, Moq or MSTest, resulting in improved code quality and faster development cycles.

### *AssetMark, **.Net Developer***

*Oct 2021 - Jul 2023*

Developed financial applications in C#, Typescript.

Designed and implemented database schemas using SQL Server, optimizing queries for efficiency and performance.

Implemented automated unit tests using NUnit, Moq or MSTest, resulting in improved code quality and faster development cycles.

Implemented seamless integration of Angular/React with .NET backend services, ensuring efficient data exchange and a cohesive user experience.

Worked collaboratively in a team-oriented environment, contributed at various stages of the software development life cycle, from design and development to tests and deployments.

Engaged in client requirement gathering, code reviews, and performance optimization.

Coordinated all aspects of the software development lifecycle, including building, testing, and maintaining C# code and performing comprehensive quality assurance testing.

Utilized version control systems such as Git for code collaboration and management, ensuring code quality and traceability.

*Scrap Dragon Software, **Software engineer***

*Feb 2021 - Oct 2021*

Wrote and enhanced recycling applications using C#, WPF, MVVM, GraphQL.

Collaborated closely with clients to develop solutions that effectively met their needs.

Designed interfaces with WPF, XAML/Xamarin; managed version control with Azure DevOps, Git. Conducted code reviews, wrote unit tests, and maintained legacy frameworks.

Optimized application performance through caching strategies, asynchronous processing, and load balancing techniques, resulting in reduced latency and improved scalability.

Developed and implemented efficient software solutions for a diverse range of clients, working closely with cross-functional teams to ensure seamless integration and optimum performance.

Implemented automated unit tests using NUnit, Moq or MSTest, resulting in improved code quality and faster development cycles.

*Young Consulting, **Full Stack Developer***

*May 2019 - Feb 2021*

Developed and maintained stop-loss insurance applications using C#, MVC, Web forms, JavaScript, HTML, CSS.

Designed and implemented database schemas using SQL Server, optimizing queries for efficiency and performance.

Contributed to Agile/SCRUM teams, managed projects in Azure DevOps.

Conducted code reviews, wrote unit tests, and maintained legacy frameworks.

Executed performance tuning and profiling using tools like Visual Studio Profiler, identifying and addressing bottlenecks to ensure optimal application performance under heavy loads.

Implemented RESTful APIs to facilitate communication between front-end and back-end systems, adhering to REST architectural principles.

Integrated third-party APIs and services, such as payment gateways, to extend application functionality and streamline workflows.

*Piedmont Solutions, **Software Engineer***

*Feb 2017 - May 2019*

Developed and upgraded web services, websites using C#, JavaScript, jQuery, HTML, XML, Bootstrap.

Utilized .NET Web API to build RESTful services that seamlessly communicate with Angular/React front-end applications, enabling real-time data updates and synchronization.

Designed and implemented database schemas using SQL Server, optimizing queries for efficiency and performance.

Participated in Agile processes, code reviews, and performance optimizations.

Conducted code reviews, optimized code performance, and implemented best practices.

Actively contributed to the research and development of new technologies and frameworks, staying up-to-date with industry trends and implementing best practices to enhance product functionality and performance.

Troubleshooted and resolved complex technical issues, ensuring minimal impact on application functionality and user experience.

## **EDUCATION**

---

*Kennesaw State University*

**Computer Game Design and Development** • Aug 2014 - Dec 2018

## SKILLS

---

Full Stack Development • Proficient C# • Expert Web Frameworks • Object-Oriented Programming (OOP) • Expert Version Control and Agile Methodology • Proficient Continuous Integration/Continuous Deployment • Proficient Communication and Teamwork • Proficient Advanced Database Management • Proficient Microservices Architecture • Proficient Cross-platform Development
