QUALIFICATIONS PROFILE

Experienced software testing professional with 6+ years in ecommerce, healthcare, logistics. Proficient in Java, JavaScript, Selenium WebDriver, Postman, SQL, and test automation frameworks. Skilled in manual and automated testing for web-based applications. Strong background in Agile methodology, test planning, UAT support, and CI/CD pipeline integration.

TECHNICAL ACUMEN

Selenium WebDriver, TestNG, Cucumber, Maven, Jenkins, Docker, Jira, SQL, Git/GitHub, Postman, Cucumber Studio, Mocha, SOAPUI, AWS (basic), HTML/XML

RELEVANT EXPERIENCE

Allied Benefit System, Remote – QA Automation Engineer

Aug 2024 – Present

- Leading UI and API test automation initiatives for internal insurance applications.
- Designed hybrid test automation framework using Selenium WebDriver and TestNG.
- Implemented automated regression suites and participated in planning CI/CD integration.
- Developed test cases from business requirements and conducted both manual and automated testing.
- Executed Postman collections and validated API responses and error handling.
- Validated database entries with SQL queries across Oracle and Postgres environments.
- Participated in Agile ceremonies and contributed to test plans, estimations, and UAT cycles.
- Provided detailed defect reports using Jira and collaborated with cross-functional teams to drive resolution.

Squadlocker Inc, RI – QA Analyst and Automation Engineer

Sep 2022 – Dec 2023

- Designed and executed test cases for functional, cross-browser, and regression testing.
- Developed and maintained 90% of regression test suite and End-to-End test automation

using Selenium WebDriver.

- Conducted manual exploratory testing for new features and bug fixes.
- Performed performance testing using JMeter under QA lead's guidance.
- Executed API tests in Postman and validated data consistency.
- Used SQL queries for backend data validation.
- Executed Netsuite integration tests and supported UAT.
- Created test cases in Cucumber Studio and tracked defects using Jira.
- Participated in Agile sprints and collaborated with developers and business analysts.
- Integrated automated tests into Git/GitHub-based CI/CD pipeline.

Adventist Healthcare, MD – Test Automation Engineer

Feb 2021 – Aug 2022

- Created and executed manual and automated test cases for healthcare web applications.
- Automated regression test cases using Selenium, TestNG, and Maven.
- Followed Agile SCRUM methodology and attended daily standups and sprint planning.
- Used Jenkins for nightly builds and Git for version control.
- Performed API testing using Postman and backend validation with SQL.
- Verified front-end to back-end data flow and supported production data validation.
- Documented and tracked defects using Jira and participated in UAT cycles.
- Provided test metrics and contributed to release readiness reviews.

MW Logistics, TX – QA Engineer

May 2019 – Jan 2021

- Collaborated with cross-functional teams to analyze and test logistics workflows.
- Designed and executed manual and automated test cases for web-based applications.
- Created reusable automation scripts using Selenium WebDriver and TestNG.
- Used SQL and JDBC to validate backend data from Oracle databases.
- Performed integration, regression, and exploratory testing in Agile environment.
- Managed test code with Git and used Maven for reporting and build execution.
