### About Me

Experienced Agile Coach, Scrum Master, Product owner, SME, and Organization Change Manager passionate about driving successful adoption of agile transformations in Kanban, Scrum & Scrumban teams in the business domain. Proven track record of leading transformation initiatives, fostering stakeholder engagement, and ensuring seamless transitions. Skilled in communication, team management, and strategic planning.

### EXECUTIVE SUMMARY

- Supported the design, development, and execution of change communications to leadership, staff, and vendors across a cross-functional organization.
- Acted as the single point of accountability for end-to-end solution delivery by bridging the gap between business requirements, enterprise architecture, long-term technology strategy and solutions and compliance teams to deliver scalable platforms in highly regulated environments
- Delivered user-focused solution enhancements change management processes for smooth deployment and user adoption. Build solutions that improve internal user experiences or client-facing platforms.
- Highly skilled in using agile Efficiency metrics (WIP- work in progress limits to avoid bottlenecks, defect resolution time, technical debt regarding fixing issues vs. new development, resource utilization capacity, sprint completion rate of stories), Business Impact (CSAT, ROI, Time to market, feature adoption rate), Speed delivery performance Metrics (velocity, throughput, lead vs. cycle time, Sprint Predictability per sprint, and Quality metrics (code coverage by automation, defect density rate, escaped defects, % of successful deployment)
- Contributed to cloud migration and modernization initiatives, aligning existing solutions with cloud-native architectures and DevOps practices
- Managed solution governance processes, including architecture reviews, risk assessments, and change approvals to meet enterprise-level compliance and audit standards.
- Scaled and maintained a mindset of collaboration, transparency, and adaptability within the various Scrum & Kanban clinical trials, research & development, marketing, data-analytics, database management, audit, risk management, governance teams to comply with internal policies and external regulatory requirements (CFR, CMS, FDA, FCC, ICT, FDCA, FTCA, FDIC, CGMP, SEC, FTC, Gramm-Leach-Bliley Act (GLBA), Investment Company Act of 1940, FFIEC, NIST, etc.)
- Managed JIRA user access levels of configuration, project setup and portfolios, workflow management based on project needs, system updates, maintenance work, project boards, customized team boards, generated reports on flow of user story or use case hierarchy including relationship status between various Epics to Epic and status of progress on Stories and implementation stages. Trained users on Jira query etc., educated on best practices for utilizing the platform
- Delivered successful outcomes in all agile roles Agile Team- Scrum Master, Agile Coach, Release Train Engineer, and Product Owner, Developer and Quality Analyst.
- Productive, efficient, engaging, and accomplished transformation professional with proficiency in leading agile transformations to foster organizational agility using various agile frameworks, including Kanban, SAFe, Scrum, Scrumban, Scrum@Scale, DevSecOps, Lean and DevOps
- Highly skilled in using agile metrics/ analytical tools such as burndown chart/velocity estimate, Jira, Confluence, CFD, Control chart, and Sprint reports to provide transparency and strategy to improve
- Delivered better business outcomes by developing a change management framework to drive greater organizational efficiency and expedited decision-making across all layers of the organization.
- Developed strong relationships with key senior clients and external stakeholders.
- Handled teams in the technology operations platform with stakeholders and teams collaboration, intake documentation, and handoffs

- Designed “readiness programs and measurement rubrics to determine when to transition individuals and groups to the next stage of their transformation journey.
- Experience in applications development utilizing SDLC- Software Development Life Cycle & technologies by working in the capacity of a Sr. Business Analyst, Quality Analyst/ Tester, and Developer leveraging a degree in software engineering & networking
- Extensive information technology software delivery experience working with clients across several domains- Pharmaceuticals, Finance/ Banking, Trading & Investment, Telecom, Internet and Digital Media
- Experience in CI/CD, DevOps, SaaS, Applications development, web designing, API, payment gateways, Android, iPhone, Roku, google mobile, marketing and digital platforms and QA Testing( manual & automated, regression, smoke, usability, integration, UI, UX testing), etc. testing, Team charter/program charter/epic, User stories, portfolio management, team agreement, Definition of Done (DOD), Definition of Ready (DOR), acceptance criteria, WIP limit (work in progress), SLA, SL Expectations, Statement of work/workflow, etc., ATDD/BDD/TDD
- Maintained Continuous Improvement/ governance/ compliance, structuring, monitoring, and reporting by leveraging delivery framework

## PROFESSIONAL EXPERIENCE

### Currently pursuing education sabbatical (Cyber Security)

Randstad USA – (Dec 2023 – June 2024) || **MFS Massachusetts Financial Services - Scrum Master/ Coach**

- ✓ Baselined Kanban & scrumban teams and mid-level executives on agile ways of working aligned to agile practices as per Kanban Maturity Model for Kanban teams, and biweekly Sprint cycles for the Scrum teams focused on collaboration across multiple teams for seamless delivery, reduction of technical debt on my daily observation of my squads
- ✓ Supported Agile Transformation Office in analysis of the current state of the Trading and Investments business units/ team and recommended changes for improvements to get better outcomes
- ✓ Designed and customized JIRA workflows for different project types, user access, update and reporting on Jira Tool
- ✓ Ensured that development & deployment complied with internal policies and external regulatory requirements such as Securities and Exchange Commission (SEC), Investment Company Act of 1940 etc.
- ✓ Mitigated risks by utilizing Scrum of Scrums meetings to Work with legal and compliance teams to preemptively identify and address potential regulatory issues with quarterly & biweekly releases.
- ✓ Implemented a systematic change across Kanban and scrumban teams enhancing organization's resilience and stability. Identified and presented a detailed transparency into the current maturity level, Kanban teams' existing operational capabilities, prioritized areas for improvement, guided & executed appropriate Kanban & Scrum practices to evolve sustainably across different delivery teams.
- ✓ Assisted portfolio and program managers in creating product roadmap and helped PO at the team level in understanding the team-level Objectives and Key Results (OKRs) aligned to the portfolio roadmap and value streams
- ✓ Lead agile ceremonies such as daily scrum, effort estimation, retrospectives, and spring planning and review with close guidance provided to the Product owners and Teams
- ✓ Lead workshop for Agile Training 101
- ✓ Assisting peer scrum masters and agile coaches in building agile maturity assessment training materials and promoting and incorporating agile framework across the organization
- ✓ Facilitated scrum and Kanban ceremonies and meetings for 3 teams
- ✓ Coached PO in prioritizing product backlog and keeping backlog ready with a minimum of two future sprints worth of work
- ✓ Provided well-paced guidance & support based on the observation of the squad's behavior in the Continuous Improvement phase with recommendations and action required to change and grow as agile teams
- ✓ Provided training to the new and existing agile teams on agile manifestos, principles, sprint ceremonies, Kanban workflow, product owner responsibilities, and story writing

### Citizens Bank (November 2021 – June 2023) - Enterprise Agile Coach (Vice President)

- ✓ Drove improvements in agile maturity and delivery metrics across multiple business units in partnership with 20 Senior Executive Leaders within the Consumer and Commercial banking units and the technology service domain
- ✓ Ensured that development & deployment complied with internal policies and external regulatory requirements such as Securities and Exchange Commission (SEC), Gramm-Leach-Bliley Act (GLBA), Bank Secrecy Act (BSA), Federal Financial Institutions Examination Council (FFIEC), NIST, Payment Card Industry Data Security Standards (PCI-DSS) etc.
- ✓ Mitigated risks by utilizing Scrum of Scrums meetings to Work with legal and compliance teams to preemptively identify and address potential regulatory issues with quarterly & biweekly releases.
- ✓ Lead a team of Senior Scrum Masters of Kanban & Scrumban teams in realizing improved business outcomes utilizing an agile-based operating model
- ✓ Mentored and trained 30+ Product Owners and Scrum Masters
- ✓ Assisted the Business Transformation Office Design Team in creating, presenting and finalizing the modified operating model agile framework aligned to speed delivery of the Bank's Objectives and Key Results (OKRs)
- ✓ Lead an agile delivery team in mobilizing agile operating model improvements across 21 business units
- ✓ Co-ordinated with the high-level and mid-level leadership based on the new agile operating model in the design, implementation, and stabilization phases
- ✓ Executed agile coaching plans in partnership with clients that resulted in a 30% increase in planned product releases in six months
- ✓ Lead multiple workshops on agile values, story writing, story sizing, using Jira tools, sprint planning, and review sessions, product owners & scrum master roles and responsibilities that helped in team growth, sustainable releases, better escalation management, and conflict resolutions
- ✓ Coached mid-level Executives in developing quarterly business plans using quantitative and qualitative delivery and agility metrics
- Delivered positive outcomes during Escalation management and Conflict Resolution
- ✓ Lead an agile delivery team in mobilizing agile operating model improvements across 21 business units
- ✓ Assisted higher leadership in budgeting based on remodeling of the various business units
- ✓ Co-ordinated with the high-level and mid-level leadership based on the new agile operating model in the design, implementation, and stabilization phases
- ✓ Improved the risk audit scores across all the business units I coached based on coordinated coaching actions in conjunction with the risk and strategy leadership
- ✓ Facilitated Meta scrum (Scrum of Scrums) meetings by active engagement of higher leadership team to bridge the communication gap between development and Senior leadership teams
- ✓ Coordinated enterprise big room planning events across inter-dependent Omni channel business units
- ✓ Coached & assisted Scrum masters and Product owners as observed during various scrum ceremonies & backlog refinement sessions that resulted in better story writing with Definition of Ready and Done for the feature in-build with priorities based on quarterly release roadmap
- ✓ Provided well-paced guidance & support based on the observation of the squad's behavior in the Continuous Improvement phase with recommendations and action required to change and grow as agile teams

#### **Depository Trust & Clearing Corporation (March 2019 – November 2021) - Enterprise Agile Coach**

[American post-trade financial services company providing clearing and settlement services to the financial markets]

- ✓ Lead Scrum Master for implementing enterprise agile transformation in multiple teams comprising 16 globally distributed Development team members using Scrum or Kanban based on deliverables
- ✓ Developed Continuous Improvement coaching plan for scrum teams with recommendations on maintaining the agile mindset and monitoring growth with Squad & Tribe level metrics using JIRA
- ✓ Ensured that development & deployment complied with internal policies and external regulatory requirements such as Securities and Exchange Commission (SEC), Dodd-Frank Act Commodity Futures Trading Commission (CFTC), Anti-Money Laundering (AML), KYC etc.
- ✓ Managed JIRA to set up new projects, best practices, trained upon different level of access to

Local new users and power users, implement new workflows, schemes, added plugin as required

- ✓ Optimized and delivered Tribe/Squad level scrum master Foundational Agile training and product owner training across the business unit that resulted in a regular cadence of agile ceremonies, bi-weekly sprint demos, retrospectives, and continuous improvement action plan execution
- ✓ Provided visibility into all levels of work to promoting transparency and an understanding of the entire workflow, incorporating maturity model practices in better risk assessment, management, and mitigation
- ✓ Contributed to cloud migration and modernization initiatives, aligning existing solutions with cloud-native architectures and DevOps practices.
- ✓ Coached and enhanced team's capabilities using rubrics and quarterly agile maturity survey to measure agility for Squads, retrospect for improvement & growth in agile ways of working
- ✓ Facilitates discussion, decision-making, and conflict resolution
- ✓ Assisted development of agile metrics and dashboards for on-demand project tracking and health
- ✓ Created & Co-facilitated multiple global Quarterly planning sessions for quarterly roadmap, including setting up agendas and final readouts from Chapter Leads & Product owners
- ✓ Mitigated risks by utilizing Scrum of Scrums meetings to Work with legal and compliance teams to preemptively identify and address potential regulatory issues with quarterly & biweekly releases.
- ✓ Developed Tribe-Level Dashboard & Jira Advanced Roadmap for data transparency, metrics analysis, and reporting for the Senior Executives

Project 1 (Oct 2018 - Dec 2018) || [NBC - Agile Consultant \(Scrum Master& BA\)](#)

- ✓ Guided Media Broadcast Project executives in standardizing agile guidelines, metrics governance, creating team assessments for all teams
- ✓ Facilitated Iteration Review, Planning, Demo, and backlog refinement ceremonies for all teams
- ✓ Encouraged & guided self-organization, held training 7 workshops on story pointing, agile
- ✓ Coached scrum product owners, program managers, and development team in creating team & Project Charters, working agreements, & customizing Scrum& Kanban framework based on the individual squad deliverables
- ✓ Mitigated risks by complying with the governance standards such as FCC compliances & regulations
- ✓ Administered JiRa usage, user access, added projects, new work flow
- ✓ Helped in Agile adaptation by supporting and guiding 6+ global team members and provided support with continuous coaching and 1:1 mentoring & guiding sessions for fostering an agile mindset
- ✓ Held team-level training workshops on refining & prioritizing the Product Backlog with the Product Owner (PO) & Dev Tech team on Sprint Backlog, User stories, Epic, and US sizing
- ✓ Collaborated with leadership in PI planning, creating portfolio management, program management & product road map,
- ✓ Coached & mentored teams on different maturity models & framework, led the Scrum/Iteration team to achieve higher levels of maturity in execution, Safe ceremonies
- ✓ Acted as a liaison between the business units, technology, and support teams.
- ✓ Assisted in periodic synchronization meetings, such as sync at the Program/Portfolio Level, PO sync, solution management PI Planning, System Demos, Scrum of Scrums (SoS), RTE follow-ups, Solution Demos, managing stakeholder communications, and helping to implement an effective system of project governance
- ✓ Identified training needs to increase teams' competencies & optimized growth using the Jira tool for metrics
- ✓ Partnered with Product owner in identifying scope, decomposing initiatives, and defining strategies to minimize and prevent impediments in all iterations to ensure consistent velocity, predictability, and workflow.
- ✓ Built and maintained relationships with multiple squad(s), agile Release Train Engineers, portfolio/product owners, and other supporting teams in delivering business value.

S3 (Oct 2017- July 2018) || [ESI Express Scripts Inc. Pharmaceuticals - Sr. Scrum Coach/ Scrum Manager](#)

- ✓ Supported multiple Pharmaceutical industry global scrum & Kanban teams in learning and adapting an agile mindset to bring transparency, collaboration, and higher efficiency in their effort toward day-to-day project work to increase productivity by following an iterative approach

- ✓ Lead scrum meetings to ensure the team stays aligned on priorities, progress, and any obstacles. Facilitated team sessions reflect on past sprints and identify areas for continuous improvement
- ✓ Monitored key performance indicators to assess team productivity and the effectiveness of agile practices by implementing a continuous feedback loop to refine processes and drive iterative improvements.
- ✓ Trained multiple squads on Incremental development & releases, preparation of Vision and Backlog , efficiency, quality , delivery, and business impact metrics
- ✓ Assisted into cloud migration and modernization initiatives, aligning existing solutions with cloud-native architectures and DevOps practices.
- ✓ Identified blockers that could impede the team's progress and ensured coordination & collaboration to deliver a resolution without breaking the momentum of productivity & velocity.
- ✓ Scaled collaboration, transparency, and adaptability within the various Scrum & Kanban clinical trials, research & development, marketing, data-analytics, database management, audit, risk management, governance teams to comply with internal policies and external regulatory requirements (CFR, FDA, GMP, DSCSA, EMA, CMS etc.)
- ✓ Collaborated with leadership and product owners in Tribe planning, creating portfolio management, program management & product road map, created scrum team/product charter, DOD (Definition of Done) / DOR (Definition of Ready)
- ✓ Handled release manager & project manager work for multiple Cloud teams
- ✓ Co-ordinated with multiple teams (onsite/offsite/ Offshore) in the process of dependency management, removing impediments, creating a risk mitigation plan with the Product Owner to prioritize the backlog, increasing productivity by following an iterative approach
- ✓ Handled JiRa to support various project management, help scrum teams plan, track, and manage software development projects, track bugs, raise bugs tickets, vendor management.
- ✓ Successfully trained multiple scrum teams comprising developers, testers, product owners, and Business Analysts in the Jira tool & Agile framework and scrum ceremonies
- ✓ Initiated & Co-conducted various on-site comprehensive Lunch & Learn and Lean-Coffee sessions that motivated even non-agile teams to adopt an agile framework
- ✓ Acted as a change agent in driving the adoption and enforcement of Agile principles and manifestos, removing impediments, establishing cross-functional teams, utilizing the Jira Tool
- ✓ Fostered Self-Management/Organization across multiple global project teams to build and sustain high-performance teams.
- ✓ Supported understanding of delivery effectiveness concepts such as frameworks & concepts (ex: agile, scrum, Kanban), organizing, planning, coaching, servant leading, facilitating, estimating, negotiating, problem-solving, risk mitigation, conflict resolution, and effective communicating

SoftCorp International Corp. (Oct 2014 – Dec 2015) || **CNBC - Team Product owner/Scrum Master & coach**

- ✓ Scrum Master and guide for multiple Telecom & Internet provider scrum teams comprising 30+ members on creating Definition of Done(DoD), Definition of Ready(DoR), Team working agreements, charters, and assist leadership in building cross-functional teams
- ✓ Trained & coached 3 Agile Leadership Workshop for the enterprise
- ✓ Managed/visualize and manage upstream/downstream dependencies risk mitigations by complying with the governance standards such as FCC, FTC, CFR related to ISPs compliances & regulations
- ✓ Facilitated Kanban & scrum team's refinement of features to be considered in the next Program Increment (PI) planning cycle to meet the Feature (DoR) Definition of Ready.
- ✓ Facilitated coordinated preparation and execution of release planning for the team with prioritized features to be included in the Quarterly planning cycle.
- ✓ Provided support to the agile Kanban team with adapting to changing client priorities and responding to ad hoc requests.
- ✓ Supported Rally and Jira Tool administration to create, edit, and/or delete project roles, defect tracking, logging a defect ticket, updating status in JiRa for agile teams
- ✓ Guided & assisted PO in breaking down features into manageable Epics, user stories, and tasks, backlog refinement/grooming understanding DoD( Definition of Done), user story estimation methods, and work prioritization

- ✓ Coached teams to analyze delivery and agile performance metrics to improve delivery performance and team health
- ✓ Created bi-weekly iteration report, facilitated iteration planning sessions based on Definition of Ready (DoR) for Epics and stories to bring to the backlog

### EDUCATION & CERTIFICATION

- Bachelors in Commerce -Graduate Major in Financial Accounting & Business Administration
- Advanced Diploma in Software and Network Engineering (NIIT, GPA 3)
- Post-graduation in HR, Business Management & Communication (Welingkar Institute of Management, GPA 3.3)
- Diploma in Web designing (Boston Computing Institute & Technologies)
- Certified Agile Coach (ICP-ACC)
- Certified Lean Portfolio Management (ICP-LPM)
- Certified Business Agility Foundation (ICP-BAF)
- Certified Leading SAFe 4.5 & SAFe 5 Agilist (Scaled Agile)
- Certified Scrum Master ( Scrum Alliance)
- Certified Cyber Security Technician (CST)
- Certified OKR Professional (Objectives and Key Results (Certiprof)

### TECHNICAL SKILLS

Agile skillset: Behavioral competencies, Coach, Facilitator, Mentor, Teacher, Trainer, Scrum Master

Documentation: MS Office Suite (Visio, PP, etc.), Confluence, Miro, BOX, SharePoint, MS Team

Other Tools: Power BI, Jira Align, Tableau, iRise, BPMN, Camtasia, Monosnap, Balsamiq Mockups, Slack, Jabber, Azure PM & Bug Tracking Tools: **JIRA**, RALLY, Bugzilla, QC & HP ALM, Team Track, Microsoft Teams, & etc.

SD Methodologies: Agile, ADKAR, Scrum, Scrum at Scale, Kanban, SaFe, Lean, Hybrid, Scrum-Ban RUP, Waterfall

### EXPOSED TO ENVIRONMENT/ TECHNOLOGIES

DB/ platforms: My SQL, Oracle, Big data- Teradata/Hadoop, Cloud, RDBMS, Android, iOS, Roku, Fortify, Teamcity, Splunk, Charles River Drive, TSI ( trading tools)

Other tools: GitHub, Mural, Trello Miro, Azure project boards, Team Foundation Version Control (TFVC), Microsoft Virtual Board, MS Teams, Jenkins, GitLab HP QC, HP- ALM, Selenium, Kafka, Attunity, Spark, Charles log, Load Runner, Spirent, Apache, Tomcat, FTP, Toad, SOP standard operating procedures), UI, ComScore, Conviva & etc.

Languages: Java, PHP, XML, Ruby, Gherkin, Python, SQL

*My past Experience was as a consultant in the IT department. Across varied domains in Australia & India from (2003-2013) “*
