Santa Clara, CA | 📞 +1 (408) 800-3734 | ✉️ message.rsharma@gmail.com | linkedin.com/in/rsharma-profile

Product Management Leader in SaaS Platforms, AI-assisted Experiences and Developer Tools - with 17+ years in Tech.

Proven track record delivering scalable, cloud-native platforms, that enhance user experience, improve productivity and drive measurable business outcomes. Experienced in Platform Strategy, Self-Serve Experiences, AI-powered Workflows and Enterprise DevOps. Trusted cross-functional partner to Engineering, UX, and Business teams across Fortune 500 environments.

Customer Empathy • Data Driven Product Strategy • Developer Platforms • AI-powered Experiences • Agility & DevOps

RELEVANT EXPERIENCE

Stealth Startup (WatchAI) | Product Manager (MVP Exploration @ Gap Year)

2024 -

Present (Paused)

- Bootstrapped an **MVP** Prototype effort for a passion-driven Platform for Watch Lovers & Collectors - incl. Community, Editorial Content, Watch Reviews, Marketplace and AI-powered Discovery (brand / model history, pricing, recommendations by taste etc.)
- Conducted **Market Research** and **Initial User Interviews**, towards **Hypothesis Validation**, partnering with a small pilot team.
- **Paused** the venture due to co-founder bandwidth constraints (exit); decided to refocus full-time on exploring PM opportunities.

JPMorganChase & Co. | Senior Technical Product Manager | Internal Platforms & Developer Experience

2023 - 2024

- **Product Management** within JPMC Developer Platforms, to streamline experiences and accelerate Productivity for **~50,000 Developers**, with a focus on improving Onboarding, Software Lifecycle, Cycle Time, Product Quality & Engagement / Satisfaction
- Led E2E delivery of **Internal Developer Portal's (IDP)** AI enabled Search (LLM + RAG + Vector DB based), bringing together the Search, Conversations, In-Context Help & Support use-cases, with a goal to eliminate Information Discovery Productivity loss
- Evangelized DevPlat vision, by running Developer CAB (DevCAB) sessions. Utilized DevCABs & Feedback Loops (like Interviews, Tickets, In-Product Feedback, Success Metrics and Engagement / Satisfaction Scores), to analyze the Voice of Customer (VoC)
- Partnered on defining an inventory for Developer User Journeys and derive Strategy / Priorities (utilizing JTBD), to understand the SDLC workflows and strategize a roadmap for JPMC Developer Portal & Tools (SCM, Code Commit to Deploy and LiveOps)
- Drove alignment across Leadership, Cross-Functional Teams, Partners and other Stakeholders - to identify Business Objectives, evangelize Strategy, Roadmap and Priorities, while maintaining adaptability to pivot quickly, while driving value for users / Devs

- Mentored Product Owner(s), together defining personas, journeys, EPICs & Backlog Maturity / Priorities with our Engg Partners
- Partnered with DevSecOps to optimize developer workflows across Onboarding, Code-to-Deploy, and Ops.
- **Transitioned Out** as role relocated to Columbus, Ohio (could not move to Ohio, due to personal constraints)

Impact:

- Designed and launched a 0-to-1 Unified & Conversational Search Experience powered by LLM + RAG Infrastructure, improving information discovery time by ~12%, Search Relevancy by 22% all Developers across JPMC (in Beta) and overall DevSat by 15%
- Improved Customer Feedback / Discovery time by ~10%, by establishing regular VoC rhythms via a DevCAB, for the Org

Partners:

- User Research, UX Design, Data Sciences & Platforms, Engineering, Program Management, Application Security (AppSec), Legal, Risk & Compliance, Architecture, Operations & Support, Dev Community (~50K), Executive Team, Other Lines of Business etc.

Tools & Technologies:

- JIRA, JIRA Align, Adobe Analytics, Optimal Workshop, Figma, Lucid, Confluence, Miro, Postman, Swagger, Microsoft 365, Zoom, GitHub, BitBucket, Backstage.io, CoPilot, Jenkins, ArgoCD, AWS (OpenSearch, Mistral LLM via Bedrock) etc.

Workday Inc. (1.5 Years) | Senior Technical Product Manager | Infra Optimization & Efficiency Platforms

2021 - 2022

- **Product Management** within WDAY Cloud Platforms, driving Forecasting & Licensing Cost Platforms, utilizing ML (and Constraint based Math Modeling) for B2B Operators / Developers and Technical Sales - delivered as CLI, APIs and Dashboards
- Facilitated PM transition, guiding the group (and early career PMs) on best practices like Personas, User Journeys, Requirements Elicitation (EPICs & Stories), Metrics (vs OKRs, KPIs), Prioritization Frameworks (RICE / ICE, Capacity based Planning etc.)
- Drove Strategy, Roadmap(s), Design and partner with Engineering (on execution) for the Operator Platforms for WDAY Admins
- Delivered EPICs, Stories and supported overall INVEST based Backlog Maturity needs for Engineering & Program Partners
- Work with N cross-functional (XFN) and Global Teams to move the needle forward and drive stakeholder alignment
- **Transitioned Out** to opportunities aligning with professional fulfillment (after exploring internally)

Impact:

- Reduced user-flow execution times by ~15% for Ops & Dev Customers, by delivering improved integration via APIs (vs Scripts)
- Enabled ~\$50K savings (per Qtr.) for DC Operations, by improving Forecasting & Optimization Platform Model accuracy and moving to API / Dashboard based Data Growth Monitoring (and Licensing) management

Partners:

- Engineering, Program Management, ML Research, Architecture, UX Design, Leadership, Sales, Operations & Customer Support, B2B SaaS Customer Admin Operators, Business Planning, Other Business Units and N-XFN teams

Tools & Technologies:

- JIRA, JIRA Align, Confluence, Miro, Trello, Slack, Microsoft 365, Zoom, AWS, Private Cloud, Swagger, Postman, ARIMA Model etc.

PayPal Inc. (5.5 Years) | Senior Technical Product Manager | Developer Platforms & Infrastructure

2016 - 2021

- **Product Management** leadership within PYPL Developer Platforms, to streamline Software Lifecycle (SDLC and Dev + Ops) experiences for **~5000 Developers** across PayPal, Venmo, Braintree and Xoom etc.
- Drove end-to-end Strategy, Roadmap, Backlog Definition and Delivery for Developer Platforms, Tools & Portal, with a goal to improve Onboarding, Velocity, Cycle Time, Defect Escape Rate, Productivity, Engagement Scores, CSAT and Operational Costs
- Led delivery of **CI/CD process** for Code Assessment Scans (via CLI, APIs, Jenkins, Listeners, GitHub Actions) supporting 4500+ Applications. Defined **SCM branching standards** and **automated quality gates** to improve release reliability
- Analyzed Feedback Loops (Surveys, Support Tickets, 1:1s, Community Sessions, Leadership Reviews etc.) and Metrics (like Adoption, Churn, Engagement Scores etc.), to assess Voice of Customer (VoC) and inform DevPlat Product Strategy & Priorities
- With Cross-Functional Partners Facilitated **DevCAB**, **TechExpo** and **ProdCast** events, for evangelizing Roadmaps, Product Releases, Audit / Compliance Needs and Product Demos for all pillars that touch a Developer's Journey Platforms e.g.: DevOps & SDLC Tools, AppSec, Core Data Platform, SRE, Accessibility, Localization & Globalization, InnerSource etc.
- Developed relationships with leadership (C, V & D Level), Engineering, Program, Compliance, AppSec and almost all cross-functional (XFN) teams to - evangelize our Vision, build alignment, identify opportunities, set direction / priorities & drive change
- Delivered EPICs, Stories and supported INVEST based Backlog Maturity / Prioritization in partnership with Engg, PMs & Program

Developer Platforms & Portal Initiatives (0-to-1):

- **Code Scanning as a Service** - Abstraction-based Code Assessment Platform for Containerized (Docker based) Quality, Security & Compliance scans, available via CLI, CI Pipeline Integrations, APIs, Dashboards and Listeners
- **Feature Readiness Platform** - A checklist providing Engineers early signals on overall Build Hygiene before Push-to-Prod
- **Service Ownership Platform** - GitHub attribution-based Service Ownership, enabling teams to find Code Owners quickly
- **Systems Quality Dashboards** - Application Quality, Security & Compliance Dashboards for Developers & Leaders
- **Software Artifact Metadata Repository (SAMR)** - Data Platform with Information about all aspects of Code Repositories
- **SCM Standardization & Deployment Compliance:**
 - **GitHub Release Org (GRO) model**, for 1:1 Live Service to Code Repo mapping
 - **3-2-1 Branching model**, for Builds from GRO Repo Stable Branches & Enabling Automation best-practices

- **Block-Push model**, for promoting Peer-Review Enforcements (especially) on Stable Branches
- **Code Traceability** (Change Ticket - Git Commits - JIRA Features)

Impact:

- Improved Developer Satisfaction by ~21%, through improved Developer Onboarding processes, richer documentation, Software Lifecycle simplification via abstractions and increased Developer Infrastructure stability
- Improved Company-Wide Code Velocity & Quality KRs by ~13% YoY (across 2 years), by delivering “Code Scanning as a Service” Platforms, consumed by Devs via CLI, APIs, CI Pipeline Integrations, for ~4500 apps (Java, Node, Go, Scala, C++ etc.)
- Improved Service Ownership accuracy by ~95%, by delivering an Ownership Platform with GitHub Collaborator(s) attributions
- Enabled ~\$2.3M in prevention of revenue loss (measured via TPV, over 3 years), by delivering the Feature Readiness Platform

Partners:

- Engineering, PMO, Data Sciences & Platforms, Technical Writing, UX Design, AppSec, SRE, Risk & Compliance, Internal Audit, Operations, Dev Community (~5K), Senior Leadership Team (SLT), Learning Management, all Business Units and other XFN Teams

Tools & Technologies:

- Rally, JIRA, JIRA Align, Confluence, Qualtrics, Tableau, PowerBI, Slack, M365, Miro, Docker, Kubernetes, Jenkins, Gradle, Maven, GitHub, GCP, JFrog, BigQuery, MySQL, GitOps, Continuous Integration & Delivery (CI/CD or CICD) Transformations etc.

PayPal Inc. (Contract, 18-Months via GSSR Inc.) | Technical Program Manager | Engineering Productivity
2016 - 2017

Responsibilities:

- Own Backlog, Prioritization, Scrums and Overall Execution for multiple API first Systems Dashboards, visualizing Quality, Security, Performance, Internationalization, Globalization, Localization, Accessibility etc. for ~4000 (Web and Native - iOS, Android) apps
- Setup and manage the PayPal Quality Champions Network (across 8 Business Units), to evangelize Developer Productivity Initiatives, Roadmaps and regularly capture Voice of Customer (VoC) / Feedback
- Helped partner teams evangelize - AppSec (OSS, Static, Dynamic), Accessibility & Perf Scans and InnerSource, Audit initiatives
- Setup and drive the Mobile SDLC Committee with members from all PayPal Business Units & their Sub-Brands
- Support PayPal Sandbox Integration delivery needs for Checkout Flows with B2B Customers & their Developers

Impact:

- Successfully delivered on multiple SLDC Audit Initiatives, by driving multiple GitHub SCM Standards and ~100% adoption on all
- Improved Horizontal ePMO Productivity by ~14%, by promoting a lightweight KanBan process for managing ~30+ Program tracks

Partners:

- Engineering, Agile Transformation Team, AppSec, SRE, Internal Audit, Accessibility, Globalization Operations, Customer Support, Senior Leadership Team (SLT), Other Business Units and N-XFN teams

Tools & Technologies:

- Rally, JIRA, JIRA Align, Confluence, Qualtrics, Tableau, PowerBI, Slack, M365, Miro, Docker, Kubernetes, Jenkins, Gradle, Maven, GitHub, GCP, JFrog, BigQuery, MySQL, GitOps, Continuous Integration & Delivery (CI/CD or CICD) Transformations etc.

Cisco Systems Inc. (Contract, 18-Months via GSSR Inc.) | Program Manager & Scrum Master | B2B Cloud PaaS
2014 - 2015

Responsibilities:

- Led **7 Scrum teams**, driving end-to-end delivery of **UI & APIs for an OpenStack-based Cloud PaaS** for B2B (Beta) Customers.
- **Improved Delivery Predictability by 21%**, by coaching teams on Capacity-Driven Planning and 3-Buckets Estimation techniques.
- **Transitioned Out** due to Service Break requirements.

Tools & Technologies:

- Rally, Confluence, WebEx, Qualtrics, GitHub, OpenStack, Box, Slack, Figma

OTHER EXPERIENCE

- **Apple Inc.** (Contract, Fixed-Term via Yoh Inc.) | EPM - Developer Platforms | **2022 - 2023**
- **Qualcomm Inc.** (3 Years) | Lead QE & Scrum Master - Software & Infrastructure Apps | **2011 - 2014**
- **Tata Consultancy Services Ltd.** (2.5 Years) | Clients: CVS Inc., Qualcomm Inc. | Senior QE | **2007 - 2010**
- **Quark Software Inc.** (2.5 Years) | Associate QE & Product Support - B2C & B2B Products | **2005 - 2007**

CERTIFICATIONS

- **AI for Product Management** (Pendo.io)
- **Introduction to GitHub Copilot** (Microsoft Learning)
- **Certified Scrum Product Owner** (CSPO)
- **Certified Scrum Master** (CSM)
- **ITIL v3 Foundation** (EXIN)

PRODUCT & TECHNICAL SKILLS

- **Product Management & Strategy:** Roadmaps, Competitive Analysis (KANO), PRDs, User Stories, Backlog Management, OKRs / KPIs, Agile Methodologies (Scrum, Kanban, ScrumBan, XP)
- **User Research & Analytics:** User Interviews & Surveys (VoC), Persona Development, Journey Mapping (JTBD), Usability Testing, Tableau, PowerBI, Adobe Analytics
- **XFN Partnerships:** Engineering, UX (and User Research), Data Science, Technical Sales, Developer Community, PMO, Operations, Tech Writers, Leadership (SLT)
- **Platforms & SaaS:** Developer Platforms, SDLC DevOps, B2B Platforms, Gen AI (powered) - Search, Chat / Conversations, Support

- **Collaboration Tools:** JIRA, JIRA Align, Rally, Confluence, Microsoft 365, Box, Slack, Miro, Figma, Trello, Aha, Optimal Workshop
- **Technical Exposure:** AWS, GCP, OpenStack, Docker, JFrog, GitHub, BitBucket, Gradle, Maven, Jenkins, TeamCity, GitOps, ArgoCD, Ansible, GitLab, Swagger, Postman, Kafka, Mesos, Kubernetes, Backstage.io, Test Automation, AWS Bedrock (Amazon OpenSearch, AI Agents, Mistral 7B Large Language Model / LLM, RAG & Embeddings), Langchain

EDUCATION

- **Carnegie Mellon University**, Master, Information Systems Management
- **University of Mumbai**, BEng, Computer Engineering
