PROFESSIONAL SUMMARY

QA Automation Engineer with **6+ years** of experience in manual and automated testing across web, mobile, and backend applications. Expert in functional, integration, regression, and performance testing with strong skills in test automation frameworks using **Java, Selenium, TestNG, and Cucumber (BDD)**. Hands-on experience in **API testing** (Postman, Rest Assured, SoapUI), backend validation (SQL), and performance testing (JMeter). Experienced in working in **Agile/Scrum** environments with strong collaboration skills. Passionate about delivering high-quality software solutions by maintaining detailed test documentation, building scalable test frameworks, and ensuring robust test coverage through **CI/CD integration** and team collaboration.

TECHNICAL SKILLS

- **Languages:** Java, SQL
- **Automation Tools:** Selenium WebDriver, Appium, Cypress, Playwright (learning)
- **API Testing:** Postman, Rest Assured, SoapUI, ReadyAPI
- **Frameworks:** Hybrid Frameworks (Data-Driven, Keyword-Driven), BDD with Cucumber, TestNG, JUnit
- **CI/CD & DevOps:** Jenkins, GitHub Actions, Bitbucket, Docker (basic)
- **Databases:** Oracle, MySQL, PostgreSQL, MS SQL
- **Performance Testing:** JMeter, Gatling, K6 (learning)
- **Test Management:** JIRA, Zephyr
- **Logging & Monitoring:** AWS CloudWatch, CloudTrail, Splunk (basic)
- **Cloud & Platforms:** AWS (basic), Kafka (basic)
- **Version Control:** Git, GitHub, GitLab
- **Others:** Eclipse, VS Code, Maven, Agile/Scrum, SDLC/STLC

PROFESSIONAL EXPERIENCE

Signet Jewelers – Dallas, TX

QA Automation Engineer • Aug 2022 – Present

- Created, maintained, and executed **automated and manual test cases** for UI and API applications.
- Built and enhanced hybrid automation frameworks using **Selenium, TestNG, and Cucumber**.
- Performed **API testing** with Postman and RestAssured; validated RESTful services and JSON responses.
- Conducted **backend testing** using SQL queries to validate database transactions and stored procedures.

- Participated in performance testing using **JMeter**, simulating user load on critical endpoints.
- Collaborated with developers to triage and resolve defects; provided test data and edge case scenarios.
- Integrated automated tests into **CI/CD pipelines** using Jenkins and GitHub Actions.
- Authored test plans, traceability matrices, and detailed test reports for stakeholders.
- Contributed to **BDD scenarios** using Gherkin syntax for behavior-driven development.
- Used **AWS CloudWatch** and **CloudTrail** for basic log verification.

Tools Used: Java, Selenium, TestNG, Maven, Jenkins, GitHub, Postman, Rest Assured, AWS, SQL, Cucumber, JIRA

Shiftwave Technologies – India

QA Engineer • Jun 2019 – Jun 2022

- Developed manual and automated test scripts for API and UI testing using Selenium and Cypress.
- Created and maintained reusable test automation scripts for functional, regression, and end-to-end scenarios.
- Participated in Agile ceremonies and collaborated with cross-functional teams.
- Designed and executed test cases using black box, white box, and grey box testing techniques.
- Used **JIRA**, **Zephyr**, and **Bugzilla** for test management and defect tracking.
- Conducted API testing using SoapUI and Postman, validating responses, headers, and status codes.
- Wrote complex **SQL queries** for data validation and backend testing.
- Mentored junior testers on framework usage, test strategies, and best practices.

Tools Used: Selenium, TestNG, Cypress, Postman, SoapUI, SQL, JIRA, Zephyr, Git, Jenkins, Maven, Agile, Cucumber

EDUCATION

Bachelor of Food Science and Technology

Acharya N.G. Ranga Agricultural University, Guntur • 2019
