

## SUMMARY

Accomplished leader with comprehensive experience in Technical Project Manager, Agile Transformation, Software Engineering, Quality Assurance, Dev Ops, Architecture, and Product/Program Manager. Well-versed in Scaled Agile, Transformation and Release Management as well as business principles and processes. A perceptive, innovative individual with a keen sense of the importance of teamwork to produce results by instilling commitment, trust, fairness, and loyalty.

## EXPERIENCE

- Project Manager/Scrum Master
- Agile Coach
- Staff Development
- Release Manager/RTE
- Program Management
- Budget Planning
- Q A Manger
- 3<sup>rd</sup> Party Vendor Management
- Security Management

## Personal Traits

- Problem Solver
- Complete, Reflect, Improve
- Integrity
- Envision Big Picture
- High Energy/Dynamic
- Compassion
- Dedication
- Team Growth
- Accountability

## TECHNICAL EXPERIENCE

- **Platforms:** .Net, SaaS, C++, C#, VB, Ruby Rails, Java, Angular, Sprint, HTML, CSS | Azure, AWS, Private Cloud, SAS, PAS, Service Now, Salesforce, SAP, Oracle ERP Cloud | Oracle, SQL Server, ETL, Data Lake, Data Ware House, Data Reservoir | App Dynamics, Service Now, Web Trends, Version One, Team Sites, Jira, Confluence, Sharepoint, Remedy ITSM, TFS, VSTS, | QTP, Functional Test, Test Complete, Test Complete Mobile, Cucumber, Selenium, Ruby, SOAP UI, Power Shell, Rest Assured, Postman | Load Runner, Performance Center, Soasta, Visual Studio|
- **SDLC:** SAFe: RTE, SAFe Scrum Master, SAFe Practitioner, LeSS |Kanban, SDLC, Scrum Master, | Ceremonies: Scrum of Scrum, Demo, Retrospective, PO Sync, Sprint Planning, PI Planning | Project Plan, Jira Roadmaps, Roadmunk, Epic, Stories, Risk analysis, Budget, Requirements, Project Status Report, Removing Blockers, Schedule, Work Flows, Issue Log, Critical Path, Execution, Release| Communication, Excellent interpersonal skills, Bridge between Tech and SR Management/Business

- **QA Architect:** Designed QA Process, Requirements Tracking, Defect Tracking, Test Case Management, Metrics, Best Practices, | TFS, VSTS, JIRA, Star Team, ALM Quality Center, QA Test, Version One, Team Site
- **Performance Architect:** Established Enterprise Performance Center of Excellence |Load Runner, Performance Center, Visual Studio, JLoad, Soasta| Server-side monitoring: App Dynamics, Splunk, Perfmon| Automated Log collection, parsing, analysis |Predictive Analysis and Capacity Planning| Monitoring, Tuning and Predicting Infrastructure Metrics| Collecting, Analyzing Performance Metrics | Bottleneck detection and tuning: Memory, CPU, Network
- **Automation Architect:** Established Enterprise Automation Center of Excellence |QTP, Functional Test, Test Complete, Test Complete Mobile, Selenium, Cucumber, Ruby, SOAP, Power Shell, Perl, Python, Gherkin| BDD | Developed Hybrid Framework | TDD| Integrated Automation into the Build and Deployment and Performance functions| Complex, Repetitive, Error Prone |Continuous, Regression, Integration | Mobile Platforms –Android, IOS
- **Analyst:** Owning the requirements, managing business cases, analysis, and reporting on enterprise system: strong requirements organization and tracking, linking requirements to deliverables, communicating impediments, milestones, burndown, reporting | scrum, epics, story planning and grooming

## PROFESSIONAL EXPERIENCE

**Bixal**, Fairfax VA (Oct 22 – March 24) – Health and Human Services Contract

### RTE

Coach/Trained 12+ Teams consisting of 140+ team members in SAFe responsible for: Medicare, Medicaid and Chips Data and Analytics. Established the ART spanning multiple federal contracts. Planned and executed 6 virtual PI Planning events, managing transparency, fostering communication, mapping dependencies, and managing and mitigating risk. Implemented roadmap in utilizing Roadmunk, Lead the effort to migrate all teams to Jira/Confluence.

- RTE leading virtual and on-site PI planning, SoS, PO Sync and all releases
- Coaching teams to align with Agile or Kanban
- Coaching teams with little or no agile experience, setting expectations with leadership
- Working with Program Managers to establish a prioritized backlog
- Optimized Storage and Compute needs in AWS
- Managed schedule for ETL jobs

- Working with Development Lead to adhere to development best practices
- Managed and Mitigating Risk by creating risk management board
- Removing implements before teams encountering by utilizing dependency mapping
- Hosting brown bag lunch and learns focused on future needs of the team
- Utilized PI Retros to improve PI Planning, helping align teams rapidly needs with the customer's vision
- Improved ART execution via ART Retro and data driven, transparent KPIs
- Provided contract level inputs to Monthly report

**22<sup>nd</sup> Century**, Baton Rouge (Nov 20 – Sept 22) – Louisiana Department of Education

**Engagement Director/Accountable for Budget/Staffing/Delivery**

Leading contract with 42 staff members, responsible for budget, recruitment and staffing, product design, execution, and delivery using SAFe. Redesigned Louisiana's Department of Education software platform, coordinating multiple in-house applications and data stores.

- Contributor to Architect and DBA Architect to ensure the design was compliant
- Hands-on with Scrum Masters, in SAFe environment
- RTE leading virtual and on-site PI planning, SoS, PO Sync and all releases
- Working with Development Lead to adhere to development best practices
- Implemented Jira Roadmap
- Hands-on with QA ensuring functional and performance testing using Automation
- Hands-on Dev Ops working with a single System Engineer to build and support CICD pipeline and release on demand
- Oversaw recruitment and staffing efforts
- Implemented Change Management process
- Planned and executed Disaster Recovery test
- Triageed Service Now support tickets
- Managed support ticket triage
- Ensured adherence to development best practices with Development Lead
- Planned, Scheduled, and Communicated all releases
- Created and maintained compliance with Quarterly Contract Task Orders
- Drafted and presented weekly and monthly reports

**JP Morgan Chase**, Plano TX (2018 – Oct 20)

## **VP of Software Delivery: Agile Coach/Scrum Master/ Release Manager**

### **Accountable for the Delivery and Support of Asset Management Enterprise Data Solution**

Leading scaled agile practices as Coach/RTE for 6 teams. Responsible for implementing road map, development, delivery, and Incident Management support of JPMC's Asset Management Enterprise Data Solution. Sr member of Agile Transformation Group responsible for Agile Best Practices and coaching guidelines. Improvements to the SDLC to include: KPI's, dashboards for reporting, improved CICD including orchestration and Unit Testing and Implemented Performance Testing.

- Coached a mix of Kanban and Agile Teams (LeSS and SAFe) to deliver business-critical data warehousing solution
- Lead Agile ceremonies: Scrum of Scrum, Demo, Sprint Planning, Retrospectives, PI Planning
- Implemented Kanban for Retrospectives
- Facilitated Customer Feed Back Loops
- Worked with Product Management to define and implement Road Map
- Managed all higher-level releases, including Change Control, Validation, Deployment, Notification, Incident Support
- Managed all aspects of CICD Pipeline
- Coordinated schedule of ETL Jobs
- Planned, Scheduled, and Communicated all releases

**Trintech**, Addison TX (2016 to 2018) – Financial Close Management, Transaction Matching, Reporting and Analytics and Automated Reconciliations

### **Dev Manager, RTE & SM, Leading Dev OPs**

Designed QA process, recruited and staffed QA team from ground up. Leading team of 9 developers responsible for an enterprise-level application: Angular, Java and SQL. Building the Dev Ops Practice integrating ServiceNow. Migrating to Azure DeveOps reducing outages.

- Defining Build Definitions in VSTS, streamlining the build process, increasing build success, improving TDD coverage and reducing time to deploy
- Implemented Dev Ops Best Practices: Proactive monitoring, Continuous Integration, TDD, Improved communication and collaboration
- Reduced unplanned outages by 37% Q1 2018, 42% Q2 2018 vs same Q2017
- Responsible for Change Management
- Implemented SAFe, including training for SAFe for Teams, Scrum Masters
- RTE for 3 value streams for 3 PI's

- Scrum Master for the Architect team providing Trintech's strategic platform solutions across software, Security, DBA functions and Environments. Supporting private/public cloud, Angular, Java, C#, client-server applications, web, API/services and data tiers
- Leading several enterprise projects: Data Governance, Dev Ops, QA COE, Micro-Services
- Adapted industry best-practices such as SAFe, TDD, Xunit, Junit, resulting in more accurate estimates and more reliable releases
- Established the QA COE: implemented ATDD with Cucumber utilizing Gherkin, Rest Assured, Rest Share, MTM in VSTS, and Risk Based Testing
- Reduced reported defects by 57%
- Reduced regressions by 78%
- Reduced QA Schedule by over 20%
- Reduced the number of failed deployments from 58% to 11%
- Streamlined the release process resulting in 25% reduction in release schedule and SOC 2
- The above helped drive customer satisfaction, resulting in faster adoption rate by clients
- Implemented QA COE using Kanban, empowering QA teams to achieve a high level of performance

**MERCER, Houston, TX (2005 – 2015) – Health and Benefits**

#### **Performance and Automation Lead and Scrum Master**

Performance and Automation Architect, responsible for strategic planning, project management, budget, framework design, development, and implementation for all performance and automation in the Americas.

- Scrum Master and Performance Architect for all Infrastructure projects: Managed the backlog, working with Data Center Ops, Middleware, App Teams, and Managing the Global performance team.
- Expanded QA Automation and Performance strategy and frameworks to Mercer Global utilizing Load Runner, Performance Center, QTP, Functional Test, Test Complete and Quality Center, and Selenium, increasing test coverage while reducing timelines. Implemented ALM connected to both Performance Center and Quality Center to provide test plans, coverage and better track test execution. Proto-typed framework in Cucumber, using Ruby and Python.
- Migrated Performance and Automation process to Agile, utilizing Version One, updating existing process into agile mindset and utilizing ALM, with focus on Performance, Automation, QA Test Management, and Deployment
- Provided Cloud environment proof of concept to SR Management: AWS and Azure.

- Enterprise Dev Ops Scrum Master: All Enterprise level updates: OS, DB, .net, Enterprise Framework, Security
- PM for infrastructure upgrades: OS upgrades and consolidation, Oracle Upgrades, DMZ implementation, Firewall implementation and mitigation, SQL Server Upgrades, Disaster Recovery, DC fail over, Server migration to VM

**QA Manager/ Software Engineering** (2000– 2005) formerly **SYNHRGY**– acquired by Mercer

Designed and implemented software engineering processes in the Health and Benefits, Pension and Absences Management space for a Startup Company that became 33rd fastest growing company in US. Designed QA, Automation, Performance, and Configuration Management process. Co-designed Data Center infrastructure, meeting client SLA's for uptime while achieving P&L goals.

- Integrated deployment process with QA process resulting in a highly efficient QA organization
- Implemented requirements traceability tracking requirements from design, development, deployment, QA to production, yielding highly re-useable code and test cases.
- Early adopter of Mercury: Load Runner, QTP and QC: Debugging with Architect, DBA, Lead Dev and Network. Severed as the Admin for LR, QTP and QC. Adapted QA procedures to leverage QC, requirements, defects, test coverage, and reporting.
- Adapted the build process to leverage automated builds and automated testing

**COMPAQ**, Houston, TX ((1996–2000)

**OS Engineering Team Lead**

Technical lead for the integration of Microsoft Windows, Intel CPU/Chipsets and pre-production Compaq system boards chartered with root cause analysis and resolution of issues with Microsoft, Intel, and other key vendors.

- Implemented Companywide Microsoft Logo Process, resulting in \$12 million saving
- Helped drive the industry in the migration from early CPUs to multi-core CPUs
- Core Team Member for enterprise-level software upgrades, improving time to market.

**UNISYS DEFENSE SYSTEMS**, Houston, TX

**1990-1996**

**On Board Systems Team Lead**

Responsible for code that simulated shuttle telemetry, satellite uplink/downlink, shuttle instruments, and real-time memory management.

**EDUCATION**

**Bachelor of Science:** Computer Science

Louisiana State University – Baton Rouge, LA

Associates: Business Administration  
Louisiana State University – Alexandria, LA

### **PROFESSIONAL DEVELOPMENT**

HIPAA Certified, SAFe Scrum Master Certified, MOD: Training Johnson Space Center,  
MSF: Microsoft Solution Framework  
Agile Scrum Master, SEI Training and workshops, DoD : Clearance - inactive
