

# Rodney Thompson

Frontend/UI/UX Developer

[rodneythompson81@yahoo.com](mailto:rodneythompson81@yahoo.com) • (817)899-3477  
[LinkedIn](#) • Fort Worth, TX

Forward focused and versatile Senior Frontend Developer with extensive experience in developing engaging user interfaces, delivering innovative solutions, and leading high-performing teams to success. Skilled in optimizing cloud infrastructures to drive efficiency. Track record of delivering projects ahead of schedule and contributed to significant cost savings through innovative feature implementations. Exceptional expertise in various programming languages, frameworks, and technologies. Strong understanding of software architecture and system integration. Committed to driving technical excellence and achieving business objectives through cutting-edge software solutions.

## Technical Proficiencies

|                                          |                                                                                                                                                                                                                                                         |
|------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Programming Languages:                   | JavaScript (17 years), HTML (17years), CSS/SCSS(17 years), NodeJs (10 years), Java (10 years), PHP (10 years), Scala, C#(5 years), C++ (2years), SQL, Golang(3 years), Typescript (10 years), python (2 years)                                          |
| Web Technologies, Libraries, Frameworks: | Angular 2-18 (12 years), .NET(5 years), Reactjs (7 years), Vuejs 2-3 (6 years), Springboot (4 years), JQuery, NPM, Linux, Apache, WebSphere Liberty, redux/NGRX (10 years), Webpack (10 years), ExpressJS/w node (5 years), React Native (2 years), D3j |
| Cloud Development:                       | IBM K8, Google Cloud, AWS, Azure, Pega Systems (BMS) Certified System Architect, Docker, Kubernetes, ArgoCD, Helm, Terraform, Linux (5 years), Lambda                                                                                                   |
| Database Management:                     | MySQL, MongoDB, DB2, Postgres                                                                                                                                                                                                                           |

| Content Management Systems/UX Design:    | Adobe Experience Manager, Strapi, Drupal, Wordpress, figma, Photoshop, invision                                                                                                                                                                         |

# Career Experience

American Airlines, Fort Worth, TX

Jul 2019 — Current

## Senior Software Development Engineer

Oversee development of enterprise-level employee travel (booking and ticketing) applications employing Java (Spring/Maven), NodeJs, Angular+, React and Vue.js, Cloud Development streamlining processes and enhancing user experience.

### Highlights

Created Pilot recruiting app using reactjs/NextJs and Nodejs/express (APIs). Hibernate Framework (database connection, manipulation), JPA and testing suite such as junit. Used Selenium engine to develop end to end testing as well as Jasmine to develop frontend unit testing.

Supervise team of four developers as UI Lead for American Airlines Employee Booking Admin App, ensuring projects exceed expectations in speed and accuracy.

- Migrated applications to cloud environments, utilizing tools including NodeJS, Docker, Kubernetes, Helm, and ArgoCD for orchestration on IBM Cloud. This includes creating all docker containers, Created and configure endpoints using Kubernetes (Node Ports/Load Balancers) for DEV/TEST/STAGE environments
  - Develop authentication services using OAuth with a combination of Spring Cloud Gateway and serverless computing with AWS (SaaS) Lambda, EC2 and Route 53. Used tools such as Splunk and DynoTrace to monitor network data (cloud and on prem)
  - Design and implement continuous integration and delivery pipelines for both on-premises (Jenkins) and cloud solutions (Git Actions), contributing to DevOps practices.
  - Achieved \$3M+ in annual savings by orchestrating development of the NRTA app, delivering all releases ahead of schedule
  - Saved American Airlines \$2M within three months by implementing a critical feature in the employee travel app.
  - Authored bash shell scripts to streamline deployment procedures, improving operational efficiency.
  - Applied advanced knowledge of web technologies spanning 17 years to write secure, efficient code adhering to industry best practices.
-

---

Intellicentrics, Flower Mound, TX

Apr 2018 – Jul 2019

UI/UX Senior Developer

Directed UI/UX development for multiple products, ensuring seamless user experience and aesthetic design across platforms. Specialized as the lead Angular and React.js developer, providing expert consultation and guidance for all product development stages. Led mobile application development using React Native consistently delivering functional and user-friendly interfaces. Engineered robust microservices using Python, AWS Lambda, and EC2 services contributing to a scalable and efficient backend architecture. Orchestrated the creation and maintenance of the main API, employing PHP and Ruby to ensure seamless data integration and communication. Develop full scale e-commerce app using Angular and NodeJs with expressJs and mongoDB.

- Served as the primary resource for UX development, utilizing CSS, SASS, and various libraries to enhance application visuals and usability.
- Streamlined development for multiple applications, successfully meeting all release deadlines and enhancing user engagement.

Successfully developed and deployed Scheduling application for physicians using goLang and react.

- Help create and deploy application to AWS cloud. Created and Configured Load Balancers using AWS EC2

---

Elevate Credit, Addison

Jun 2016 – Apr 2018

UI/UX Senior Application Developer

Developed and enhanced user interfaces for RISE and Elastic products at Elevate Credit, utilizing advanced technologies including Angular, Redux, .NET with C#, Typescript, Node.js, and Google Cloud to improve customer experience. Engineered robust Front End Unit Tests with Karma and Jasmine, ensuring high-quality, bug-free user interactions. Created Application to monetization credit companies with Elevate application, using Angular 14 Frontend and Golang backend and Golang mysql database

- Enhanced customer engagement and satisfaction through cutting-edge UI/UX solutions.
- Developed and refactored enterprise-level API Restful applications using C# and .NET Core, improving system efficiency by 25%.

---

Securus, Addison

Mar 2014 – Jun 2016

UI/UX Senior Developer

Led UI/UX development for high-profile applications. Engineered robust unit and end-to-end testing frameworks using Karma, Mocha, Chai, Selenium, and Protractor to ensure application reliability and performance. Developed mobile applications with Ionic Framework and applied Agile Scrum methodologies.

---

- Developed and standardized UI components for the Securus Online Site, improving user experience and interface consistency.
- Develop video phone app for enhanced prison communication experience using D3js and javascript
- Spearheaded UI development for ConnectUs app, NextGen App, Pattern Library, and Securus Online across multiple platforms and technologies, including PLAY, Java, Vagrant, and Node.js with ExpressJs.

McAfee, Plano, TX

Jul 2013 – Mar 2014

Web developer | Video integration/ UX/UI)

Designed and developed team site on Windows Server, streamlining project workflows for technical designers to upload videos and other training materials. Edited and formatted educational videos for web integration, ensuring compatibility across various platforms with Brightcove API, Flash, and HTML5. Created and maintained applications on SharePoint Server.

- Enabled efficient training processes and knowledge sharing across the organization by designing a comprehensive ramping site to support company-wide training, incorporating both front-end and back-end elements, utilizing a
- diverse technology stack including PHP5, JavaScript, jQuery, SharePoint API, Windows Server 2003, Linux, Knockout.js, HTML5, CSS3, AJAX, Responsive Design, MySQL, and Adobe Creative Suite 6.

FedEx Services, Irving, TX

Jan 2013 – Jul 2013

Software Application Developer OOP

Developed user interfaces for FedEx Lite Shipping application, ensuring seamless integration with backend databases. Employed Java, JAXB, and JavaScript MVC frameworks including CanJS, along with RESTful services using Jersey and Jackson, to build robust software solutions. Maintained and enhanced content management systems, particularly focusing on Drupal for front-end consistency and usability. Crafted comprehensive software designs to meet specified requirements, utilizing Java, JavaScript, HTML, CSS3, AJAX, and jQuery.

- Streamlined data transfer processes by hand coding methods in Java, enhancing system communication and performance.
- Ensured software quality by creating and implementing rigorous test cases, significantly reducing bugs and user-reported issues.

Art Institutes

Jun 2012 - Aug 2012

UX/UI Instructor

Taught classes in Web design and development ( Javascript, CSS, HTML, PHP).

Taught classes in interactive media (Flash, actionscript, jquery..)

Taught classes in basic server side development.

Taught classes in audio production and post video production.

Front End Developer(contract)  
Verizon Digital Media Services

Jun 2012 - Aug 2012

Collaborated closely with product managers, developers, and other stakeholders to define user needs and translate them into functional designs. Conducted user research, including usability testing, surveys, and user interviews, to gather insights and iterate on design concepts. Developed wireframes, prototypes, and user flows using tools such as Adobe Frameworks and photoshop. Develop UI based on mock-ups using Javascript, CSS, HTML

Media Specialist(contract)  
NJ & Associates

Aug 2011 - Dec 2011

Develop training material using Adobe CS5, video, audio, HTML, JavaScript, CSS, animation and graphics.  
Develop various platforms using Java and Python

iChooseFit  
Developer

Jan 2009 - Aug 2011

Created and maintained iChoosefit's website. Developed advance ecommerce application. Created and maintained a social network site from scratch using PHP and MySQL .  
Created and currently maintaining iChoosefit's website. Developed an advanced ecommerce application.  
Created and maintained a social network site from scratch using PHP and MySQL .

## Education

Master of Fine Arts in Web Design and New Media  
Academy of Art University, San Francisco, CA

Master of Science in Information Technology  
Capella University, Minneapolis, MN

Bachelor of Science in Music Education  
Alabama A&M University, Normal, AL

## Additional Experience

IT Instructor (adjunct) Front End Development/New Media Creation, Art Institute of Fort Worth, Fort Worth, TX

Computer Applications Instructor (adjunct), Tarrant County College, Fort Worth, TX
