EXPERIENCE

Release Train Engineer | Agile Coach

Charles Schwab

2022 - Present Global Headquarters, Westlake, TX

Release Train Engineer for four global platform services within the "Digital Utilities Technologies" backoffice- 1. Smart Processing Orchestrator 2. Digital Messaging 3. Document Ingestion Utilities 4. Digital Trading Services. I'm responsible for the integration of TD Ameritrade platforms into Schwab cloud and architecture as well as facilitating gaps between customer requirements and platform capabilities. I work closely with Enterprise PMO, Program Managers, Architects, Tech Leads, Product Owners, Scrum Masters and corporate senior leadership teams (SLT) to accelerate product feature roadmaps. Responsible for the End-End Delivery of product on-time and on-budget.

As an Agile Coach, I train and mentor teams in their agile transformation at Schwab while working with multiple levels of leadership in establishing agile best practices, iterative planning, coaching of Scrum Masters and Product owners, and creating dashboards to show the progress being made.

Responsibilities:

- Develop executive level presentations & metrics briefed up to Schwab CIO
- Partner with Enterprise PMO & product groups to meet delivery dates and communicate bi-weekly roadmap updates
- Globally manage and communicate project dependencies and impact with engineering stakeholders and SLT business
- Develop/track OKRs, KPIs, & SLAs for program success and governance
- Create and accelerate adoption with SAFe playbooks, user story creation, pi planning maturity, retrospectives and backlog grooming activities
- Drive operational processes & tooling for capturing, prioritizing, and removing product adoption blockers
- Analyze feedback trends to identify systemic issues for platform improvement opportunities
- Motivate teams to transition to SAFe agile methodologies; building on small changes to generate essential improves

Release Train Engineer | Agile Coach

GameStop

2018 - 2022 Global Headquarters, Grapevine, TX

Release Train Engineer for two customer success groups - Global Retail Data Delivery/Analytics and E-commerce Product, Platform and UX organization where I enabled the Enterprise Data Warehouse, DBA, Analytics and Application Teams to deliver their products and services to GameStop clients using Scaled Agile Framework (SAFe).

I was responsible for facilitating System Demos, organizing and running PI Planning Events (physical and virtual), facilitating Scrum of Scrums, ART Sync, Inspect and Adapt, Program Triad, and Community of Practice (CoP) meetings, and resolving impediments or managing and escalating impediments for quick resolution.

Responsibilities:

- Led cross domain digital transformation & IT modernization engagements such as the migration of applications (including Teradata) into Google Cloud Platform (GCP)
- Maintained project documentation in Jira/Confluence, including weekly progress reports in Tableau, technical specifications in Microsoft Azure DevOps, and change orders in Coupa
- Led E-commerce onshore/offshore teams through Design, Requirements and Execution of Salesforce Marketing Cloud - B2C Marketing Automation, Inbound, Outbound marketing, acquisition and retention
- Facilitated daily stand-up meetings and release planning at the program and team level to make sure all the assign tasks have been completed, technical resources available or resolving any impediments
- Mentored Enterprise PMO how to maximize ROI and meet objectives through Agile development
- Developed dashboards, KPIs and SLAs and presented directly to CIO on a bi-weekly basis

Senior IT Consultant

Saxony Partners

2015 - 2018 Galleria, Dallas, TX

Responsible for managing complex projects and driving key business and technology aligned deliverables, including business requirements, technical and user interface designs, testing, and overall planning. Worked closely with product management, technology, client service, operations, and business partners.

Clients: AmerisourceBergen (ABSG), First Guaranty Bank Corporation, Pereview (SaaS), PIMCO. Roles: Program Manager, Project Manager, Agile Coach, Scrum Master, Business Analyst, QA

Responsibilities:

- Oversaw a \$3million pipeline portfolio for AmerisourceBergen that was organically grown by leading the client through an Agile Transformation
- Managed all phases of program and project execution and lifecycle
- Led fundamental changes in business process from waterfall to "SAFe" agile principles across one of ABSG; achieving visibility into timing, production and promotion of new products in pioneering markets
- Simultaneously led two BI projects (30 team members & \$2.5 million budget) pioneering uncharted movements on reporting oncology data through Qlikview, SSRS and proprietor .NET applications while building an Enterprise Data Warehouse from inception
- Facilitated release plans, road maps and go-to market while leading engineering team of 15; delivering an enterprise- scale, Azure cloud platform that enabled 4 REIT clients to manage over \$50 billion in assets
- Worked with the engineering team, in particular the Solution Architect, to define and validate the technical approach, strategy and deliverables for several projects

EXPERIENCE

IT Consultant

Slalom Consulting

2012 - 2015 Addison, TX

Led all phases of diverse technology projects while providing leadership and directing development teams in the delivery of high-quality services in a fast-paced agile environment. As a Consultant, I leveraged ITIL, ITSM, Agile, Lean, SDLC, SAFe, DevOps, Scrum, Azure CRM, Office 365, Azure DevOps, JIRA, Confluence, and complementary processes/technologies to help modernize and transform organizations.

Clients: Alliance Data, SignifyHealth, CBRE, MoneyGram. Roles: Project Manager, Business Analyst, QA Lead, Scrum Master

Responsibilities:

- Scheduled and facilitated daily stand-up, sprint planning, sprint retrospectives and technical delivery meetings with co-located and remote team members for Digital Customer Experience channel at MoneyGram
- Led delivery of business requirements and business process design to development team/product owner for the redesign of MoneyGram's mobile application; enabling customers to send money to roughly 200 countries
- Transformed a chaotic healthcare mobile platform post-production and led the user experience redesign by driving business objectives and timeliness of bug fixes and production pushes; increasing user adoption by 65% within the first 3 months
- Prepared and delivered client presentations and provided project status reporting to executive leadership to validate project results
- Managed dependencies from cross-functional teams and external vendors to ensure deadlines were on-schedule

Senior Associate

Deloitte

2010 - 2012 Arts District, Dallas, TX

Served as a program lead within the "Financial Advisory Services" group that collaborated on creating solutions that help sustain value in mergers and acquisitions of failed banks purchased by other financial institutions. Clients: FDIC Roles: Strategy Consultant, Business Analyst, Project Manager

Responsibilities:

- Controlled project efforts in defining scope, planning, executing and reporting to stakeholders on strategic initiatives related to all facets of the failed bank operation
- Identified and reported on gaps between client requirements and project delivery for each "Purchase & Assumption" agreement made between the FDIC and the failed banking institution
- Awarded Deloitte's "Exemplary Performance Award" for delivery of high-quality services within a committed time-frame

ACHIEVEMENTS

Transition to Scaled Agile Framework

Implemented SAFE Agile Practices and Values across 16 cross-functional teams within the Global Information and App Dev organization of the world's largest gaming retail

Launched Interactive Analytics Platform

Led portfolio of architectural design and development teams through the creation of an interactive analytics platform reporting oncology drug market for the industry leader in global pharmaceutical sourcing and distribution services

Innovation & Digital Transformation

Merged business and Technology strategy to design customer experience for a native mobile application from the outside in, for the second largest provider of money transfers in the world

Adoption of Google Cloud Platform

Yielded cost savings of 1.5 million for a retail industry leader, by leading several off-shore teams in moving enterprise data warehouses to the cloud
