Summary

Power BI Certified professional with over 16 years of experience in Business Intelligence, Data Analytics, Data Warehousing, and Data Visualization. Proven expertise in delivering end-to-end data solutions using tools such as Power BI, Cognos, OBIEE, Crystal Reports, SSRS and Microsoft Azure. Created calculated measures and columns in DAX to support variance analysis, time-series comparisons, and ratio-based KPIs. Collaborated with cross-functional teams to embed Power BI dashboards into applications and portals, enhancing accessibility. Documented data models, report logic, and visualization standards to ensure reusability and consistency across projects. Provided end-user training and created user guides for self-service BI adoption within business teams. Skilled in ETL processes, business requirements gathering, and performance optimization. Extensive industry experience in the Healthcare and Retail sectors, with a strong track record of driving data-driven decision-making.

Core Competencies

Business Intelligence & Reporting

Extensive experience in developing interactive dashboards, datasets, and reports using Power BI, Tableau, and MicroStrategy. Expert in DAX, M-language, and Power Query with strong knowledge of RLS/OLS security implementations.

Data Warehousing & ETL

Strong background in Star and Snowflake schema design, OLTP/OLAP modeling, and data transformation using SQL, Python, and Databricks DBFS. Skilled in handling complex ETL processes, data cleansing, and optimizing query performance.

Cloud & Azure Environment

Hands-on experience with Azure SQL Database, Blob Storage, and integration with Power BI for real-time reporting solutions. Familiar with REST/SOAP APIs and managing data pipelines in Azure.

Healthcare & Compliance

Domain expertise in Medicare, Medicaid, Insurance, and Life Sciences, including Membership, Billing, Claims Processing, and regulatory compliance with HIPAA and SOX.

Development Methodologies

Adept in Agile, Scrum, and Waterfall methodologies. Experience working with JIRA, ServiceNow, SharePoint, TFS, RALLY, and collaboration tools like Box and Confluence.

Technical Tools & Languages

Proficient in SQL, Python, CSS, PowerShell, MS Excel, MS Access, MS Project, Primavera, and Visio. Familiar with MongoDB, Unix/AIX/Windows environments.

Documentation & Business Analysis

Proven ability to gather and document business requirements (BRD, SRS, FSD, RTM). Strong experience in creating workflows, user stories, and process maps using Visio. Led sessions with business and IT stakeholders to define functional/non-functional requirements.

Education

- **Master of Science (Chemical Engineering):** Texas A&M University, 2006
- **Bachelor of Technology (Chemical Technology):** Nagpur University, 2003

Honors & Awards

- **Customer Support Award:** DirecTV | April 2014

Technical Skills

- **BI & Data Analytics:** Power BI (Desktop & Service), Azure Synapse Analytics, IBM Cognos (11/10/8.4/8.3), ReportNet (Query Studio, Report Studio, Framework Manager), Business Objects, Crystal Reports, Informatica 9, Alteryx
- **Databases & Cloud:** Oracle (11g/10g/9i), SQL Server (2016/2005), Snowflake, Teradata, DB2, MS Access | Microsoft Azure, AWS
- **Development & IT Infrastructure:** Python, SQL, C, HTML | IIS (10/4.0/3.0), Apache, IBM HTTPS, Sun One 5.2
- **Productivity Tools:** Advanced Excel (PivotTables, VLOOKUP), PowerPoint, Word, Visio
- **Operating Systems:** Windows, Linux, Unix, AIX

Professional Experience

Blue Cross Blue Shield (Kansas City), Sr. Power BI Developer (Memphis – Remote)

July 2022 – Present

In my role as **Senior Power BI Developer** at **Blue Cross Blue Shield (Kansas City)**, I provide comprehensive BI support for this leading health insurer serving 115+ million members nationwide. Working remotely, I specialize in Power BI report troubleshooting, performance enhancements, and security implementation while managing the complete dashboard lifecycle. My work includes maintaining documentation standards and providing technical support to ensure accurate, timely data delivery across the organization's independent BCBSA companies.

Responsibilities:

Business Analysis & Requirements

- Gathered user requirements through stakeholder meetings and JAD sessions
- Defined business rules to align reporting with legacy systems
- Created business/process flow charts and database diagrams
- Conducted UAT testing and prepared test plans with business teams

Power BI Development

- Designed and developed interactive Power BI dashboards and reports to deliver actionable insights and enhance decision-making across business functions.
- Designed 20+ interactive dashboards from SQL Server/Snowflake data sources
- Applied data modeling techniques to build robust semantic models, ensuring optimized performance and accurate reporting.
- Developed dashboards (KPIs, cash flow, forecasting) for executive decision-making
- Implemented DAX calculations, M-code transformations, and Power Query data cleansing
- Utilized Power Query in Power BI to Pivot and Un-pivot the data model for data cleansing and data massaging.
- Optimized reports using Performance Analyzer (30% faster load times)
- Embedded reports in SharePoint and configured Power BI service subscriptions
- Integrated data from Oracle databases and other enterprise systems into Power BI, enabling unified reporting from multiple sources.
- Created notifications and alerts, subscriptions to reports in the Power BI service.
- Integrated graph databases (Neo4j) with Power BI via APIs/ETL, transforming complex relationship data into interactive dashboards for network analysis, recommendations, and fraud detection.
- Partnered with business stakeholders to gather requirements, translate them into reporting specifications, and deliver tailored dashboards.
- Managed Crystal Reports and Business Objects reports (WEBI) with the enhancements and scheduling

- Skilled in Azure OpenAI & Copilot for Power BI, leveraging AI to automate DAX measure generation, accelerate dashboard design, and derive intelligent insights for enhanced decision-making.
- Skilled in Microsoft Fabric and OneLake, leveraging the unified SaaS platform to centralize data, streamline analytics, and enable seamless Power BI integration.

Data Engineering & Optimization

- Connected to multiple sources (Databricks, Data Lakes, Snowflake)
- Worked on Web Applications in Azure and Azure functions to pull data from API to blob Storage and SQL.
- Tuned SQL queries via SQL Profiler and DBA collaboration (indexing/partitioning)
- Scheduled data refreshes and automated workflows using Alteryx
- Developed and automated Alteryx workflows, optimizing data processes, and managed their scheduling and execution in Alteryx Gallery for efficient data analysis.
- Troubleshoot refresh failures and SSL issues (Microsoft support collaboration)
- Skilled in Python integration within Power BI, leveraging scripts for advanced data transformations, predictive analytics, and custom visualizations.

Security & Governance

- Implemented row-level security (RLS) and role-based access controls
- Managed Premium Workspace permissions for 100+ users
- Maintained documentation standards and conducted knowledge transfer
- Experienced in **Git integration** for Power BI projects, enabling version control, collaborative development, to streamline report deployment and maintain data governance.

Agile & Leadership

- Participated in daily Scrum meetings for requirement enhancements
- Mentored junior developers on Power BI best practices
- Led solution design reviews with cross-functional teams

Technical Environment: Proficient in Power BI, Power Apps, Power Automate, and Power Builder for business intelligence and automation solutions. Experienced with cloud platforms including Azure, Data Lakes, and Databricks, along with database technologies such as SQL Server, Oracle, DB2, graph databases (Neo4j) and Snowflake. Moderate in data visualization using Tableau 11x, Crystal Reports, and Business Objects, and ETL processes with Alteryx. Additional expertise includes Python scripting and project management tools like ServiceNow and JIRA.

Nike, Sr. Power BI Developer (Memphis – Remote)

Mar 2020 – May 2022

As a **Senior BI Consultant** for the world's leading athletic footwear and apparel company (headquartered near **Beaverton**, OR with major distribution operations in **Memphis**), I supported enterprise business intelligence initiatives for this Fortune 500 sportswear manufacturer. My responsibilities encompassed designing data solutions to optimize global supply chain analytics, developing performance dashboards for executive decision-making, and implementing BI tools to enhance retail operations across Nike's worldwide distribution network.

Responsibilities:

Business Analysis & Requirements

- Collaborated with business analysts in an Agile environment to gather requirements and translate them into technical documents
- Designed and developed Power BI reports and dashboards from Oracle, SQL Server, and Snowflake

Power BI Development & Optimization

- Created interactive dashboards using diverse visualizations (Decomposition Trees, Maps, Slicers, Clustered/Stacked Charts, Scatter Plots, KPIs)
- Developed enterprise-grade Power BI reports and dashboards with interactive visualizations tailored to executive and operational business needs.
- Optimized report performance using DAX Studio, Performance Analyzer, and query tuning (reduced load times by 30%)

- Built optimized data models leveraging star schema, snowflake schema, and best practices to improve performance and scalability.
- Transformed and modeled data using Power Query (M), DAX, and SQL optimizations
- Implemented advanced DAX functions to support trend analysis, forecasting, and dynamic time intelligence reporting.
- Enhanced Power BI reports with interactive storytelling features like bookmarks, drill-through filters, and selection panes to improve user engagement.
- Worked closely with data architects and DBAs to fine-tune queries and ensure efficient integration between Oracle and Power BI datasets.
- Implemented Role-Based Security (RLS) for secure data access

Data Integration & Management

- Scheduled and managed data refreshes via on-premises gateways
- Worked with DBAs to optimize SQL queries and database performance
- Utilized SOAP requests for API-based data retrieval
- Extracted and transformed data from diverse sources (SQL Server, Azure SQL, Salesforce, etc.) to support reporting and analytics, ensuring seamless data integration.
- Developed complex SQL queries, stored procedures, and CTEs to extract and transform data from data warehouses, enabling efficient report generation and analytics.

Testing & Documentation

- Conducted unit testing in Dev and supported UAT/Production deployments
- Maintained comprehensive documentation in Confluence

Technical Environment: Proficient in Power BI and Cognos 10.x/11.x for advanced data visualization and business intelligence solutions, with scripting capabilities in JavaScript. Experienced in working with diverse database systems including Teradata, SQL Server, Oracle, DB2, and Snowflake for robust data management and analytics. Skilled in Linux environments and utilizing ServiceNow and JIRA for project management and workflow automation.

Kirkland's, Sr. Power BI Developer (Brentwood, TN)

Sep 2019 – Jan 2020

Kirkland's, Inc. is a leading U.S. specialty retailer offering home décor, furniture, textiles, and gifts through 434 stores across 37 states and a robust e-commerce platform. The company provides stylish, affordable home furnishings to enhance living spaces via both physical and digital shopping experiences.

Responsibilities:

- Performed dashboard performance tuning by optimizing measures, relationships, and visual rendering times.
- Delivered KPI tracking solutions for business-critical areas such as finance, sales, and operations, using calculated measures and drill-down reports.
- Designed, developed, and deployed business-critical dashboards in Power BI to deliver real-time insights and executive summaries across departments.
- Designed and optimized DAX formulas for advanced Power BI calculations
- Enhanced dashboard functionality and managed automated refresh schedules
- Conducted data quality checks on Oracle-to-Power BI pipelines to identify anomalies, duplicates, and missing values.
- Improved database performance by creating targeted indexes to resolve full table scans
- Prioritized and tracked tasks using JIRA, including incident creation and updates
- Developed comprehensive analysis documentation in Confluence for team-wide accessibility

Technical Environment: Proficient in developing Power BI solutions with Oracle 11.2.0 database integration on Windows platforms. Experienced in project management using JIRA and documentation via Confluence, with additional expertise in IIS web server administration and database development tools including DBeaver and Oracle SQL Developer.

VITAS Healthcare, the nation's leading hospice provider, delivers compassionate end-of-life care across the U.S. As a consultant through **Symbiotic Consulting Group LLC**, I supported their mission by developing data analytics solutions to optimize patient care workflows and implementing systems to improve operational efficiency

Responsibilities:**Business Analysis & Requirements**

- Collaborated with business analysts to gather requirements and translate them into technical specifications
- Documented deployment processes to ensure SOX compliance via ServiceNow requests

Power BI Development & Optimization

- Designed and developed interactive Power BI reports/dashboards with advanced visualizations
- Performed data modeling, transformations, and created calculated measures using DAX
- Created semantic models and relationships in Power BI using normalized and denormalized Oracle tables for faster query execution.
- Optimized Power BI data models by implementing DAX functions to enhance calculations, metrics, and visualizations for improved reporting efficiency.
- Published and scheduled datasets/reports in Power BI Service for cloud consumption
- Collaborated with data engineering teams to design optimized Oracle queries that reduced report refresh times and improved scalability.
- Implemented row-level security (RLS) and managed roles for data access control
- Designed and deployed Power BI reports by publishing to workspaces and apps, while automating data refreshes to ensure real-time, up-to-date insights.

Reporting & Data Solutions

- Developed SSRS reports (drill-through, cross-tab, charts) for auditing and runtime metrics
- Optimized SQL queries using SQL Profiler and collaborated with DBAs on performance tuning
- Built data modules to support dashboards and ensure uniform dataset consumption
- Skilled in data analysis, database querying, and leveraging SQL tools to extract, analyze, and interpret data for actionable insights.
- Experienced in leveraging Azure Data Factory (ADF) with Power BI to automate data pipelines, transform datasets, and ensure seamless data integration for dynamic reporting.

Performance & Testing

- Fine-tuned report performance through parameter optimization and indexing
- Conducted unit/performance testing in Dev/UAT environments and created test cases
- Tracked bugs and work items using Team Foundation Server (TFS) for version control

Deployment & Support

- Managed ServiceNow requests to troubleshoot user issues and resolve defects
- Maintained documentation (lineage, training materials, test cases) for knowledge sharing

Technical Environment: Proficient in end-to-end BI solutions using Power BI, SSIS, SSRS, and SSAS with SQL Server 2014/2016 databases. Experienced in TM1 10.x for enterprise planning, utilizing D-Beaver and SSMS for database management, and deploying solutions on Windows servers with IIS. Managed workflows and incident tracking through ServiceNow.

As a Lead Cognos Developer at Nike, the global leader in athletic footwear and apparel headquarters near Beaverton, Oregon, I supported the company's data-driven decision-making by designing and optimizing enterprise BI solutions using Cognos to enhance supply chain analytics and retail performance reporting. My work contributed to Nike's operational excellence in inventory management and global sales tracking.

Responsibilities:

Team Leadership & Collaboration

- Managed and mentored onshore/offshore teams to deliver high-impact BI solutions
- Partnered with business analysts to translate requirements into technical specifications

Cognos Report Development

- Designed and developed 50+ complex reports (cross-tab, drill-through, master-detail, burst) with multi-query prompts
- Built interactive **Active Reports** using RAVE visualizations for iPad deployment
- Optimized report performance by 40% through parameter tuning and SQL enhancements

Data Modeling & Security

- Designed and tuned **Framework Manager models** for optimal query execution
- Implemented **row-level security**, macros, and session parameters for data governance
- Managed folder/user-based security and report scheduling

Testing & Optimization

- Conducted unit testing and supported UAT/production deployments
- Collaborated with DBAs to optimize tables/queries, reducing runtimes by 30%

Technical Environment: Extensive experience with IBM Cognos Analytics 11.0.6/10.2 suite including Framework Manager (data modeling), Report Studio (enterprise reporting), Query Studio (ad-hoc queries), Analysis Studio (OLAP analysis), Workspace Advanced (dashboarding), and Active Reports (interactive mobile reports). Developed solutions leveraging Teradata for large-scale data warehousing in Linux environments.

Department of Information Systems, State of Arkansas, Little Rock, AR
Sr. Cognos Developer/Administrator

Oct 2015 – Nov 2017

The Department of Human Services (DHS) is Arkansas's largest state agency, with over 7,500 employees dedicated to improving citizens' health, safety, and quality of life. Key programs include **ARKids First** (children's health insurance), **SNAP** (nutrition assistance), **TEA** (employment support), and **Medicaid**, ensuring comprehensive care for vulnerable populations across the state.

Responsibilities:

Full Project Lifecycle Ownership

- Led end-to-end BI processes: analysis, design, development, testing, implementation, and production support
- Migrated 50+ reports/packages from Cognos 10 to Cognos 11 with zero downtime
- Upgraded web servers from Apache to IBM HTTP and implemented SSL certificates

Cognos Development & Optimization

- Designed 30+ complex reports (drill-through, unions, MDX-based dimensional reports) using Report Studio
- Built Framework Manager models with multi-source data (DMR/relational) and tuned SQL for 40% faster performance
- Created Tableau dashboards for POC and integrated with Cognos analytics

System Administration

- Configured multi-node Cognos 11 installation with load balancing for high availability
- Managed security (row/object-level permissions), scheduling, and report distribution
- Monitored servers, scheduled jobs, and resolved 95% of incidents within SLA

Testing & Documentation

- Conducted unit/UAT testing and trained 20+ users on new reporting tools
- Centralized report formatting using layout components for brand consistency

Technical Environment: Proficient in IBM Cognos Analytics (11.0.5.2, 10.2.1) including Framework Manager, Report Studio, and Active Reports, with DB2 Server 10.5 on AIX 7.1. Skilled in LDAP/AD integration, IBM HTTP/Apache web servers, OpenSSL, and Tableau 10.x for complementary analytics.

Cetera Financials, Sr. Cognos Consultant/Analyst (El Segundo, CA)

Feb 2015 - Aug 2015

Cetera Financial Group, one of the nation's largest networks of independent wealth management firms, supports over **9,500 financial professionals** and **600+ institutions** with award-winning advisory platforms and broker-dealer services. For this HR-focused initiative, I collaborated with stakeholders to **gather requirements, design data models, and develop complex reports** using agile methodologies—enhancing workforce analytics and strategic decision-making across the organization.

Responsibilities:

Project Leadership & Delivery

- Led end-to-end BI projects (analysis → support) for HR analytics, meeting 100% of Agile milestones
- Translated complex business requirements into technical specs through cross-functional collaboration

Cognos Development & Modeling

- Designed 30+ Framework Manager packages using best practices (cardinality, determinants, security)
- Built relational/dimensional models with embedded filters, MDX functions, and complex calculations
- Developed interactive reports (drill-through, unions, conditional formatting) in Report Studio

User Enablement & Testing

- Trained 50+ users on Workspace Advanced for self-service analytics
- Conducted UAT with test cases validating reports against legacy systems (100% accuracy)

Administration & Deployment

- Managed migrations, scheduling, and security (role/group provisioning)
- Documented systems end-to-end (design specs, deployment guides, user manuals)
- Resolved high-priority tickets via JIRA/ServiceNow (95% SLA compliance)

Technical Environment: Expertise in IBM Cognos 10.2 including Framework Manager (data modeling), Report Studio (enterprise reporting), Query Studio (ad-hoc analysis), and Active Reports (interactive outputs). Developed solutions on SQL Server databases and integrated with UltiPro for HR analytics.

DirecTV, Sr. Cognos Developer/Architect (El Segundo, CA)

April 2013-Dec 2014

As a BI Consultant for DirecTV, the leading U.S. satellite television provider serving millions of subscribers across North and Latin America, I supported enterprise reporting initiatives by assessing project feasibility, gathering reporting requirements, and developing optimized Cognos solutions. My work included performance tuning, system monitoring, and providing production support for critical business intelligence infrastructure that informed strategic decisions across the organization.

Responsibilities:

Project Leadership & Coordination

- Led cross-functional collaboration between internal/external teams for Cognos project allocation and service requests
- Developed high-level design documents for PMO to align \$2M+ BI initiatives with business goals
- Maintained 100% on-time delivery for all project milestones

Cube Development & Optimization

- Migrated 50+ reports from Cognos 8 to 10, improving performance by 35%
- Designed and optimized multidimensional cubes in Cognos Transformer 10.x using 5+ data sources
- Implemented advanced techniques (relative time categories, custom calculations) for OLAP reporting

Report Development & Performance

- Built 20+ complex reports with joins, unions, and conditional formatting in Report Studio
- Tuned SQL queries and FM models, reducing report runtimes by 40%
- Developed standardized global templates adopted across 10+ business segments

Security & Administration

- Implemented granular security (package/object/data-level) for 500+ users
- Automated scheduling and triggers for enterprise report distribution

Testing & Documentation

- Conducted UAT with 100% validation against legacy systems
- Created comprehensive technical documentation (design specs, user guides)

Production Support

- Resolved 95% of high-priority tickets within 4-hour SLA

- Provided Tier 3 support for mission-critical reports

Technical Environment: Expertise in **IBM Cognos 10/8.3**, including **Framework Manager** (data modeling), **Report Studio** (enterprise reporting), **Transformer** (OLAP cubes), and **Active Reports** (interactive outputs). Integrated with **Teradata** via **Informatica 9** ETL pipelines and **BSP Meta Manager** for metadata governance.

Cognizant (BI Architect/Sr. Consultant)

Feb 2011 – Feb 2013

Clients: **Abbott Laboratories, Abbott Vascular**

Technical Environment: Proficient in IBM Cognos 10/8.4 (Framework Manager, Report Studio, Query Studio) for enterprise BI solutions, with Oracle 11g and Informatica 9 for ETL/data integration. Skilled in Linux/Windows 2005 environments, using SQL Developer, WinSCP, and PuTTY for administration, with LDAP for authentication.

Softpath Systems (Sr. Cognos Developer/Administrator)

Apr 2007- Feb 2011

Clients: **Medimmune, McKesson Corporation (Relay Health), Hewlett Packard - Blue Cross Blue Shield**

Technical Environment: Expertise in IBM Cognos 8.x suite including Framework Manager (data modeling), Report Studio (enterprise reporting), Transformer (OLAP cubes), and Analysis Studio (multidimensional analysis). Developed solutions on DB2 databases across Windows 2003 and AIX 3.0 platforms, with Tivoli LDAP authentication. Integrated with ESRI for geospatial analytics and deployed on WebSphere application servers.
